WHERE POLES ARE PROPER.—Philadelphia, N. Y., April 21.—The fishing has appeared and a few messes of bullheads and suckers are reported. Pickerel refuse to take anything but live bait during the spring. A few pickerel have been caught in the river. Yesterday I saw a black bass jump for a fly that was skimming over the water. No one uses the artificial fly here. A light fly-rod "wouldn't hold a minner," the fishermen here say; and the angler's outfit consists of a 12ft. cane "pole," a chalk line, and a trolling spoon 3in. long. Four-pound pickerel are sometimes thrown over the fisherman's head with this outfit.—RAY SPEARS.

SWAN BASS, according to Commissioner H. C. Ford, is a local name at Lake Erie for the calico bass or strawberry bass. Specimens were sent to Luzerne county, Penna., under the first name last spring. Over a thousand were brought from Lake Erie and deposited in Eastern rivers and lakes.

THE MOON-EYE.

CHICAGO, April 9.—*Editor Forest and Stream:* Will you please describe a fish that is caught in Winnebago Lake, Wis., and only caught for about ten days in each year, generally in June, while the sand flies are around. It is a fish that greatly resembles the shad, has the large scales, red tint around the eye and would easily pass for a shad; it is known there by the name of moon-eye. It takes the fly freely and will often take a small minnow. If you can place this fish from this above description would be pleased to hear from you through the columns of your paper. C. S. BURTON.

[The moon-eye, or gold-eye, of Lake Winnebago is referred to in FOREST AND STREAM of Nov. 14, 1889; an illustration of the fish forms plate 219 of Sec. I., "Fishery Industries, U. S." Other names of this game fish are toothed herring, moon-eye shad, fresh-water shad, silver bass and *Naccaysh.* The moon-eye bites eagerly at the artificial fly or worm and is considered one of the smartest of the fishes and most difficult to hook.]

THE MOON-EYE.

CHICAGO AND THE WEST.

[*From a Staff Correspondent.*]

CHICAGO, April 30.—A large hiatus in the season; cold, wet, wind, desolation, so that a shooter or fisher is in luck to be alive and free from pneumonia when the balmy month of May starts in. A few trout have been caught, and a few bass, and a few plover have been shot, but all the sport has been alike uncertain and unpleasant. This spring is backward to the point of prudery.

The jacksnipe have become discouraged and have gone to the unknown regions. Mr. P. F. Stone has killed a great many about Wheaton. Some bags of 20 and 30 have been made about Momence, where there is very good snipe ground near by. There is little doubt that the last flight of snipe is now up, but the birds are scattered and wild.

The golden plover flight is also now in this latitude. Mr. W. G. Payson and his friend bagged 92 last Monday near Joliet. The market shooters are shipping heavily. At Gilman the flight yesterday was very heavy. Mr. F. C. Donald and Mr. R. B. Organ went down last night, and should have had fine shooting. Weather permitting the plover will now linger on these uplands of northern Illinois and feed till near the close of May.

On Wendesday the wind changed to the south, and though it blew a gale the weather became milder. On Thursday, April 28, the first of the run of small-mouth black bass in the Kankakee appeared at Momence, a run of small rock bass, yearlings, also appeared. The fishing should improve there now, and be good for two weeks. The first buds are now appearing on the trees, and the first bass come along with the first leaves.

From the trout country the returns are similar. The fish are very dull and not rising much. Mr. J. L. Wilcox has sent down some good trout from the Kinnikinnick, including one rainbow taken by himself, 24in. long, weight 4lb. 5oz. dressed. He says, however, that the fishing has been very poor. It will pay to wait a couple of weeks on trout. The annual Fred Taylor party, numbering fourteen men this year, will swoop down on the Little Oconto about the last week in May. They will kill 3,000 trout.

Warden Buck's week at Aroma, on the Kankakee, discovered no nets, though possibly some had been in use. Set-lines by the hundred, however, were all through that part of the river. Catfish were being taken on these by the wagonload. Two men, Germans, on the Iroquois River, were found with gill nets, but promised never to use them again.

The fishway at Aroma has never been completed, as promised by Mr. H. Beardsley, the dam owner there. This gentleman's promise to Mr. Cole was very explicit, and the low water gave him a very good opportunity to complete the work on the inefficient way then serving by excuse. The treatment extended Mr. Beardsley was courteous and considerate. It seems that does not serve. We may suppose a formal notice would serve better.

I see in the papers the following item: "The greatest fishway in the world is in the course of construction on the Potomac at the Great Falls. When it is completed it will carry fish over a vertical fall of seventy-two feet." This is perhaps a better fishway than Mr Beardsley's at Aroma. I am of the opinion that Mr. Beardsley's Aroma fishway is an aromatic fraud, of which 72ft. would be needless.

A black bass which is a civil engineer can get through the fishway at Kankakee town.

A dogfish weighing 14lbs. was caught by A. H. Harryman at Momence this week, after a hard fight, on light tackle. The proper embellishment of this story, however, belongs rightly to the kennel department, and it is respectfully submitted.

The spring season of the trap-shooting tournament circuit is now at hand. Kansas City shoot will call out a few of our shooters, who will wander far, far away, and who will be gray-headed before they get back, if they try to cover the whole circuit these days. There are fixtures all the way west to the coast, and some projecting out over the Pacific ocean. What with the snipe, the fish and the trap, life begins to appear more worth living to the average sportsman of this unkindly clime.

E. HOUGH.

A PALE BROOK TROUT was described by Mr. Charles W. Parkin, of Pottsville, Pa., in a recent letter to Mr. H. C. Ford, president of the Pennsylvania Fish Commission. The specimen was 6¾in. long, 1¼in. deep, and unusually light in color. Above the middle line of the body were seven rather large red spots; below the line were eight spots of golden yellow. The pectorals and ventrals were golden yellow, the latter with a black edge. The anal fin as in the common brook trout. The fish was a female with very small eggs, and unusually heavy for its size. It was caught in Tumbling Run Stream. The tail, as the result of an accident, had only the external lobes remaining, the middle rays had been entirely lost. The pale color and the thickness and weight of this trout at once attracted attention. Evidently this must have been what is known to a few fishculturists as the pale variety of *fontinalis*—a race superior in size, rapidity of growth and fertility to the common brook trout. The U. S. Fish Commission has now a number of fine breeders of this race at its Northville station, and all who have seen them admire their beautiful form and color. We have seen this race also from several other localities.

PIKE COUNTY TROUT.—Dingman's Ferry, Pa., April 26.—An article has appeared in the Philadelphia *Inquirer* of the 21st, saying that trout fishing in Pike county streams this spring is very poor and there appears to be no trout in the streams and advises people not to go to Pike county for trout fishing. The person who wrote that article misrepresents either wilfully or ignorantly. He certainly has not been in Pike county fishing this spring, for if so he would have been arrested. By special act of our Legislature the trouting season does not open until May 1. We are a law-abiding and law-observing people, and we believe the law has been strictly observed by our people. If the party who wrote that article has been fishing in Pike county this spring he has done it sneakingly and thievishly. Our trouting opens on May 1 and we anticipate a splendid season. It has been a most favorable winter. All reports say that a great many trout are seen in the streams.—P. F. FULMER.

ADIRONDACK PRESERVES.—Weston, Dean & Aldrich have leased to Warren Humes all of the forest lands owned by them in Lewis, Herkimer and the southeast corner of St. Lawrence counties, embracing about 3,000 acres, which the latter will reserve for the use of his guests at Forest Home on the Middle Branch. About 10,000 acres of land, including Otter Lake, in Oneida county; Brewer Lake, Grannis Pond and Bear Creek Mill Pond, in Herkimer county, have been leased by Dr. R. H. Ash and J. H. Wilcox, of Port Leyden, and they have posted it according to law to use it as a private park for the purpose of propagating and protecting fish, birds and game. It is a very desirable preserve, the Adirondack and St. Lawrence Railroad passing near it.—*Boonville Herald, April 28.*

THE TARPON RECORD at Fort Myers, for week ending April 25, was as follows for fish caught with rod and reel:

April 21, J. P. M. VanCortlandt	6ft. 10in.,	102lbs.
April 21, A. M. McGregor	6ft.,	109lbs.
April 21, A. M. McGregor	4ft. 11in.,	59lbs.
April 23, James L. Breeze	5ft. 5in.,	91lbs.
April 22, B. B. McGregor	6ft. 6in.,	140lbs.
April 22, E. C. Sherman	5ft. 2in.,	72lbs.
April 24, B. B. McGregor	6ft. 4in.,	141lbs.
April 24, B. B. McGregor	6ft. 3in.,	139lbs.
April 24, E. C. Sherman	6ft. 1in.,	120lbs.
April 25, E. C. Sherman	6ft. 3in.,	130lbs.

Previously reported 133; this week 10; total 143.

SHARK AND SHEEP.—The New York *Sun* reports that "A man-eating shark, 18½ft. long, with a head as big as a barrel, came ashore on the beach at Trescott, Me., recently. Its stomach contained a sheep and several dogfish." We have become a trifle callous to the shark's pastime of shearing lambs, but when it comes to taking in an old, woolly sheep and with it a pack of dogfish, presumably to keep the sheep from straying into forbidden pastures, we think old carcharodon is going a step too far, and we advise him to go back to menhaden and sea lettuce.

GAME PROTECTOR HAWN.—Syracuse, N. Y., April 27.—Game Protector Hawn during the last week has taken seven trap-nets and one seine, and made four arrests.—H. L.

TROUT IN LUZERNE COUNTY, PA.—Wilkesbarre, April 30.—The weather has been extremely cold and backward and very dry, there having been no rain of any consequence since the snow left. Of course there has been a great deal of fishing, and a few good catches were made, but, as a rule, a small catch with the ejaculation of "too cold" or "water too low," or both. I was out this week and did fairly well, considering that the mercury was at 26° in the morning, with ice on the bushes hanging in the water. I caught one 12in. California mountain trout, this being the first and the only one I have taken of that species. I was surprised to find it in the midst of its spawning season. I don't know whether this is the regular season or not.—M. [In the McCloud River, Cal., from whence the original stock of rainbow trout was brought to the East, the spawning season sometimes lasts through April, but in Eastern waters, as a rule, the spawning closes before the end of March.]

ADIRONDACK TROUTING.—The trouting season in the forest preserve opened May 1 under auspices unfavorable to the angler. The cold April weather, the lingering snow and the freshets in the streams have combined to make the fisherman's lot an uncertain and unhappy one. The growing practice of establishing private preserves cuts off the general public more and more inexorably from the desirable trout waters. Some owners, however, grant permits to hunt and fish to law-abiding sportsmen. Among these Dr. Webb is cited as a notable example. Warren Humes has leased twelve miles of the Middle Branch of the famous Oswegatchie and will preserve it for his friends. There will be a nice question of law in the near future as to what constitutes navigable water in the State of New York and the decision may benefit anglers by opening up to them the Fulton Chain of Lakes, as well as many other Adirondack waters, which are now closed to the public.

THE VERMONT TROUT LAW.—Rutland, Vt., April 29.—The impression having gone abroad that the action of the Legislature of 1890 virtually repealed the six-inch trout law (1888, No. 123, Sec. 2) I have obtained the opinions of a number of the ablest lawyers in the State, including Hon. James Barrett, ex-Judge of the Supreme Court, ex-Gov. W. P. Dillingham, H. A. Huse, G. W. Wing, T. W. Moloney and Edward W. Bisbee, and all the opinions thus obtained agree that the aforesaid law is still in force. The State League and Fish Commission will act together in their desire to see this law enforced. You are requested to use your influence to correct the wrong impression that has gone abroad and to encourage a popular sentiment toward the protection of the small trout.—JOHN W. TITCOMB, Sec'y.

SMALL-MOUTHED, RED-EYED, GRAY BASS.—Little Rock, Ark.,—I notice the article in last week's issue regarding the small-mouth, red-eyed, gray bass of Minnesota. I have taken many of these same bass at Battle Lake, Minn., and they are certainly as near "nitro glycerine" as any fish I ever hooked. We have many of the very game fish in the mountain streams of Arkansas. Their shape and markings are the same. Mr. Mershon could get a supply of them at Battle Lake any time from July 1 to Sept. 15.—ARKANSAS.

THE FISHING BOAT contrived by Secretary S. E. Worrell of the Deep Lake Fish and Game Club, of Hannibal, Mo., has evidently been evolved from the brain of a man who likes to fish in ease and solid comfort. The convenience and utility of the novel craft are so manifest that one wonders how he has got along all these years with the common fishing boats. We do not wonder that, as Mr. Worrell writes us, his advertisement in FOREST AND STREAM has attracted wide notice.

CONNECTICUT TROUT.—Preston, April 25.—The veteran angler, C. W. Barnes, is high hook thus far here. He and Henry Jencks took, yesterday, thirty-two fine trout, three of which tipped the scale at 7¼lbs. They were beauties. The others were of good fair size. This is quite an improvement on all previous records. We are also having good sport with the spirited perch under Greenville dam, hundreds being caught daily.—E. M. B.

SMALL-MOUTHED, RED-EYED, GRAY BASS, will soon become known to anglers, thanks to the courtesy of Mr. W. B. Mershon, who has the promise of Mr. Charles Cristadore to send a specimen to FOREST AND STREAM. Mr. Cristadore has sent to Lake Ida for an example which will be duly forwarded. He has seen the fish on no other lakes than those at Alexandria, Minn. The bass is said to resemble a cross between the small-mouth black bass and the rock bass.

QUEBEC TROUT, PICKEREL, DORÉ, BASS, MASKINONGE.—An order issued by Acting Deputy Minister of Fisheries S. P. Bauset, April 12, prescribes close seasons as follows for Province of Quebec: Speckled trout, Oct. 30-April 30. Pickerel (doré), April 15-May 15. Bass and maskinonge, May 25-July 1.

VERMONT BASS.—We have received from H. L. Samson, of the Lake View House, St. Albans, Vt., a photograph of three small-mouth black bass, weighing respectively 5¾, 4¾, and 3¾lbs., taken there in the Great Back Bay of Lake Champlain.

Opening of the Trout Season in Pike County, Pa.

THE Pike county trout season opened last Monday. From all reports it is probable that the fishing in that well-known locality will be unusually good this year. The total catch last season was not up to the average of previous years, as the streams throughout the greater part of the summer were unusually low, and the trout too well fed to furnish the fishermen good sport. Owing to this circumstance, however, a larger number of trout than usual were left for seed, and last year's misfortune promises to react to the craft's advantage this. The Erie Railroad is the great thoroughfare to this region. The principal stopping points for fishermen are Milford, Shehola, Dingman's Ferry, Lackawaxen, Hawley, etc.—*Adv.*

MR. THOMAS J. CONROY, the well known dealer in fishing tackle and camping outfits, has removed from 65 Fulton street, and is now located at 310 Broadway. This old and reliable firm was established in 1830 by John Conroy, and for sixty-two years has had the Fulton street address connected with its name. The new location is most desirable, and is in the center of the sporting goods district of New York city.—*Adv.*

Fisheulture.

THE OHIO REPORT.

THE report of Dr. Henshall, president of the Ohio Fish and Game Commission, says the Newark, O., *Advocate*, is attracting more attention and receiving more commendation than any previous report since the Commission was first organized. Dr. Henshall is one of the most thorough scientists in his specialties in the country, and his services have been very valuable as the head of the Commission during the past year. For the first time in the history of the Commission there is a balance in the State Treasury belonging to the funds appropriated for its expenditures. The financial statement in the report shows that there is $1,612.32 remaining of the $2,024.87 general appropriation. This is due to the rigid economy that has been the uniform policy of the present Commission. When the present Board of Commissioners went into office they found a large deficit of the funds. Besides this, the State was involved in numerous expensive lawsuits in all the counties bordering on Lake Erie. Suits had been brought against the State for damages, which grew out of the contentions between the former Board and the lake fishermen. In many of these suits judgments had been rendered against the State. All these, together with costs and attorneys' fees, had to be settled and paid, which took a large portion of the funds appropriated for the first year of the present board. Now a balance not only stands to the credit of the State Fish and Game fund, but the present Commissioners have largely increased the propagation of fish for the lake waters as well as increased the facilities for propagating and distributing fish for the inland waters of the State. A scientist like Dr. Henshall at the head of the present Board has been of great advantage in the matter of fish propagation and distribution. It has been the policy of the present Board to waste none of the State's money in experiments, and in this policy it has been greatly aided by Dr. Henshall's scientific knowledge and experience.

In the matter of fish distribution and planting in the inland waters of the State, the present board was only able to acquire facilities for it and fairly commence the work late last September.

The following synopsis of Dr. Henshall's report has been made by the Columbus press correspondents:

In the winter of 1890-91, says the president, the hatchery at Sandusky was run to its full capacity, and notwithstanding the open winter and remarkable changeableness of the temperature of the water during that time, there were hatched in March, 1891, 39,000,000 whitefish, which were planted about the Bass Islands and in Sandusky Bay. After the hatching of the whitefish 15,000,000 pike-perch eggs were obtained, nearly all of which were successfully hatched and planted as follows: Muskingum River, 5,000,000; Cottage Grove Lake, Summit County, 5,000,000; Sandusky Bay, 4,000,000.

He suggests that the hatchery should be enlarged and attributes the extraordinary large run of whitefish last spring to artificial propagation. The Commission was successful in hatching 5,000,000 young sturgeon from 6,000,000 eggs, surpassing all other efforts in that direction. The president also refers to the completion of the fish car with the special appropriation of $3,500, and since it was put into service last September 200,000 adult fish have been planted in various Ohio streams. All the railroads of Ohio, with two or three exceptions, have hauled the car without charge, thus reducing the expense of planting the fish to a very low estimate. The financial statement in the report shows that there is $1,612.32 remaining of the $2,024.87 general appropriation.

The State hatchery at Sandusky, in consequence of its superior management, the past year hatched and planted a larger amount of fish than any other State or United States hatchery in the entire country. The object of the State in propagating and planting fish in Lake Erie is to cheapen the supply of food fish for the people, and if the good work of the Sandusky hatchery is carried on to the same extent and with equal results of that of the last year, great benefits to the people in the way of an abundant and cheap supply of food fish are inevitable.

MESSRS. CORNWALL & SMOCK, the well-known sporting goods dealers, are on deck for the spring trade with a number of specialties in the line of fishing tackle. Their S. B. rods, manufactured especially for them after their own pattern by the Malleson Rod and Reel Co., are confidently recommended to expert fishermen and all who love a good rod as the best that skill and experience can turn out. Messrs. Conwall & Smock also call attention to their lancewood combination bait and fly rod, which cannot only be combined into the two rods as occasion may demand for the different styles of fishing, but also into several weights of each.—*Adv.*

The Kennel.

FIXTURES.

DOG SHOWS.

May 4 to 7.—Annual Dog Show of the California Kennel Club, at San Francisco Cal. Frank J. Silvey, Sec'y.

May 17 to 19.—Androscoggin Kennel Club, at Lewiston Me. T. R. Cartland, Sec'y.

Aug. 31 to Sept. 3.—Second Annual Dog Show of the Blue Grass Kennel Club, at Lexington, Ky. Roger Williams, Sec'y.

Sept. 6 to 9.—Second Annual Dog Show of the Hamilton Kennel Club, at Hamilton, Canada. A. D. Stewart, Sec'y.

Sept. 12 to 16.—Fourth Annual Dog Show of the Toronto Industrial Exhibition Association, at Toronto, Canada. C. A Stone, Sec'y.

TRAINING AT FIELD TRIALS.

Editor Forest and Stream:

Mr. Waters touched the right chord in his recent article on "Training at Field Trials." Training should be the first feature considered by judges; without which a dog is utterly worthless for any purpose.

If a dog is started in a field trial the fact itself is sufficient evidence that an attempt has been made to train him, if a candidate for honors in the Derby, and that he is thoroughly trained if entered in the Age stakes. If an imperfectly trained dog is presented for competition, in either stake, there is only one conclusion to be drawn from an exhibition of his faults, *i. e.*, such dog is untrained and therefore ineligible to field trial honors. The question is settled so far as the duty of judges is concerned. Whether he can or cannot be trained is a matter of no consequence to judges. If opportunities have been afforded to exhibit such qualities as result from training, and he fails to reach a standard or degree of training necessary to prove the existence of such qualities by a competitive test which affords contestants equal chances, it only remains for the judges to presume that the dog cannot be trained owing to the absence of qualities necessary to that end.

Dogs that require several years of training to fit them for work they should perform at the age of maturity, are not calculated for the important station in the canine world that winners commonly occupy.

The excellence of a field dog depends more upon acquired faculties than upon natural instinct; although certain inborn qualities are indispensable when a high order of field excellence is the object sought. The actual expense of producing the essential innate qualities and the time required by nature to perform its functions, are comparatively nothing with the time, expense and skill necessary in rearing, developing and educating the products of nature. As the actual working life of a field dog, under the most favorable conditions, is limited to about seven years, it is highly important that the acquired qualities should be developed and perfected at the earliest possible period in life, in order to derive a benefit from his services commensurate to the expense and time devoted to production. If it requires the first and best half of a dog's life to fit him for usefulness in his old age, there is certainly room for improvement in the qualities upon which depends this state of affairs. The question arises whether sluggish development is caused by the absence of instinct or a deficiency in intellect or reasoning powers. I know that I am treading upon dangerous ground by using the word reason to express a certain faculty possessed by the canine race; nevertheless, my limited knowledge of language presents to my mind no more appropriate word, and I will use it according to my convictions.

Learned authorities have expended much brain force in attempting to disprove the existence of reason in the lower order of the animal creation. As scientific expounders of theory, and concocters of languages, they have proved eminently successful in the opinion of those who pretend to understand enigmas; and, no doubt, have otherwise contributed to every store of knowledge excepting the training and running of dogs at field trials; in which the learned gentlemen seem to have been a little timid—gunshy, perhaps. As Messrs. Darwin, Bain, *et al.*, who have favored us with data concerning brains, reason, etc., have never experienced the chagrin incidental to the transformation of a "high class" field dog into a "stove-up livery hoss." It is painfully evident they "didn't know it was loaded."

I believe that dogs, susceptible of training to an extent necessary in field shooting, possess brains of an order next in rank to those of the human race; that they possess reasoning powers and an intellect capable of receiving and retaining ideas that may be applied at will. I believe also, in fact know (as positively as anything of like nature is known) that, although the dog's intellect lies dormant until opportunities are afforded for its exhibition, it owes its origin to the same source from which is derived the intellect of human beings.

I believe the identical laws established by nature, and which govern the perpetuation and development of the human intellect, are more applicable to bird dogs, their breeding and development, than to any other species of the lower animals, simply from the fact that their usefulness depends almost entirely upon their intelligence and tractability, two prime factors in the human organization.

An ideal field dog possesses many qualities, all of which must be developed and subservient to the will of his master and be employed intuitively according to requirements. He must use reason. He must obey signals, and perform his work as well at a distance as under the immediate control of his master, which would be an impossibility without the possession of intellect and the powers of reason. Associations which ignore "brains" when testing qualities of dogs intended for field shooting, and breeders who are guided by decisions rendered by judges who sacrifice "brains" for qualities of less importance are improving the bird dog in their imagination only.

Authorities have illustrated their profound views relating to the science of breeding, by comparing the horse with the dog. Nothing could be more ridiculous than such a comparison unless a hog was substituted for the horse. Horses are beasts of burden and their work is performed under absolute restraint. They are urged forward by the gad, or fear of it, guided here and there and brought to a standstill by force directly applied. Admitting that in some instances horses have been trained, by considerable tact and labor, to perform a few amusing tricks, it is noticed that the tricks are very simple and are performed under protest; always in an inclosure and under the influence of a tight check rein and a formidable whip. These tricksters, if turned loose as the field dog is, would require a dozen men to catch them; to say nothing of their willingness to perform tricks in a manner to be compared with the work of an ordinary field dog. As horses are not commonly used to locate and point birds, it is silly to suppose they are "in it" with "high class" dogs.

Modern theory of breeding dogs does not appear to harmonize with practical requirements, excepting in isolated cases, when a happy "nick" is the result, which reduces the "great science" below the present stage of modern hog breeding, in which the breeder, with one object in view, is uniformly successful. Breeders of hores, for the track, pursue but one object, in which they have been astonishingly successful.

Hog breeders produce weight and horse breeders are rewarded by increased speed as the direct result of judicious mating. The average dog breeder employs lots of imaginary science in efforts to improve the dog by breeding, but, as results indicate, he is as liable to advance the breed "backward" as forward. He employs the same principles in breeding that have proved successful in improving the physical condition of other animals, but fails to attain corresponding results because the "scales" employed in testing the qualities of the bird dog are fluctuating in effect according to the whims and fancies of those acting as "official weighers."

Speed and weight, of horses and hogs, can be accurately estimated by time and weight indications; therefore breeders of those animals are governed by positive facts, which enable them to form an opinion of their productions without depending upon the erratic fancies, or discretion of any kind, of individuals, as a guide to success.

Unlike breeders of other animals, breeders of the dog, intended for field use, have many qualities to consider which enter into their ideal productions, any one of which, if absent, detracts from the dog's value to a greater or less extent. Admitting that several of the most important qualities sought are wholly dependent upon the intellect, until a system of running and judging dogs is adopted by field trial clubs, that will test acquired qualities, as well as those supposed to be natural, public competitions will be of no practical value as a guide to breeders.

Modern breeding of field dogs, as practiced on scientific principles, consists of the wonderful skill required in breeding one winner to another. The more prominent the winners the more skill required on the breeder's part and the higher the value placed on the products of the union. The value of such products is usually estimated in the prospective, and, however high it may at first be placed, time generally reduces the price to a figure within reach of any one in need of a nucleus for a "high class" dog foundry. We've all got 'em, and if the market is short we will gladly unload for a very small consideration.

This so-called scientific breeding has prevailed to a great extent during the past decade, and, as a rule, the products were afforded every possible advantage in the matter of rearing and training. When time and expense are considered, it is to be regretted that so few instances can be recorded where successful results were obtained. In fact, success has been the exception rather than the rule.

Of course, we have read laudatory reports of wonderfully developed and promising youngsters, and the great things expected of them, as soon as the breath of life is apparent.

At the eye-opening and teeth-cutting periods of puppyhood the press is again deluged with accounts of the wonderful progress of the scions of royalty. With a grand flourish they are sent to the trainer and the world notified; eventually entered in several field trials; finally the gush subsides; the great dogs don't start and their brilliant, though short, public career closes, the public is relieved from anxiety, because it never had any, and the sun continues to rise in the east. How many paralleled cases to the above are fresh in our memory, the result of "modern theory" in breeding?

If field trials were conducted in a uniform manner, with an accepted standard of excellence, comprising all qualities essential in field dogs, to guide judges in the performance of their duty, those engaged in breeding could intelligently select mates for either sex, whose union would result in a vast improvement on the prevailing fad of breeding winners who won because the judges said so.

I believe in field trials as a medium by which the field dog can be improved in breeding and training, if conducted in such a manner that the several qualities necesary in the field dog are tested by competitions conducted under specific rules. But it is questionable whether the field dog can be improved by any test where a premium encourages the breeding of one or two natural qualities to the exclusion of others of vastly more importance. If "heels" are of more consequence than "brains," let it be so understood by breeders who can be governed accordingly.

From an inventory of the work exhibited at field trials the past season, it appears to the casual observer, that the development of "heels" has reached high-water mark; "brains" show some improvement in the abstract and other qualities are represented by proxy, judges rendered decisions according to preference and the reporters rendered decisions (on paper) to the contrary—"the world do move"—the dog advances—Which way? Who can tell? A. J. GLEASON.

ALMA, Kans.

THE BEAGLE STANDARD.

Editor Forest and Stream:

You print in a recent number of FOREST AND STREAM an interesting letter from Mr. F. C. Phoebus advocating the raising of the beagle standard from 15in. to 16in.

Mr. Phoebus's argument, as I remember it, is this: That choice beagle pups, when they come to maturity, sometimes exceed 15in. in height, but rarely if ever go over 16in.

Mr. Phoebus is correct when he says beagles seldom exceed 16in. at the shoulder. But why are they no larger? Merely because they are bred from beagles which conform to the present standard. Let us, however, suppose for a moment that the standard has been raised to 16in., and we have succeeded in breeding some typical beagles which just scrape under the new measure—they are perfect and we decide to match them. Let me ask any breeder if a few of these pups will not be as liable to exceed our new standard as our present beagles are to exceed the existing standard? And then, will not the same argument which is now used apply just as forcibly to a further increase in the limit of size? I believe it will, and once started we shall keep on till, after a time, it will be difficult to distinguish a large beagle from a small foxhound, and there will be no distinct dividing line between the two breeds.

The proper game of the beagle is the hare. Dogs conforming to our present standard run him down and kill him fairly on the ground. A 16in. or 17in. beagle could do no more.

Mr. Phoebus further argues that because the limit of the small class has been increased from 12 to 13in., that of the large should be increased in proportion. I can not agree with him. When the subject of the field trials first came before the National Beagle Club, owners of small dogs asked a class for their favorites. The field trial committee thought it was not fair to run a dog, only a trifle over 12in. in height, against a 15in. dog. The little fellow would have no chance to win, for he could not keep up with his large opponent. After careful consideration it was thought fair to all to make two classes—one for beagles 13in. and under and one for those 15in. and under. This was done to bring dogs which were nearly the same size in the same class. Then, that the bench show classes might correspond with the field trial classes, the change was made on the bench.

I have great regard for the opinion of my friend Mr. Phoebus, but I can see nothing inconsistent in keeping the standard where it is and at the same time giving the small class an additional inch. In making this change, not one beagle has been made eligible to competition which was ineligible before; the smaller dog has merely been taken from the large class, where he could not win, and put in a class where he has a fair chance with those of his own size. We must have an arbitrary limit of height, and in my opinion the framers of the present standard did well to place it where it is. Let us keep it there. Increasing the size of our favorite will not increase his desire or ability to kill his game or make him more typical. Let him remain "the merrie little beagle." BRADLEY.

Editor Forest and Stream:

In regard to a letter from Mr. F. C. Phoebus under date of April 7, to the National Beagle Club, asking them to change the height of beagles from 15 to 16in., I would say from the tone of his letter he desires the change asked for by him to allow some beagles he owns or is interested in, at present over height, to come under the standard. I as a member of the Beagle Club am opposed to any such change in height to accommodate any one owner or class of beagles.

The standard was framed by a gentleman who has had a great deal more experience than ever Mr. Phoebus has, notwithstanding his eighteen years experience. Dr. L. H. Twaddell, a gentleman known to all beagle owners, the chairman of the committee appointed to draft a standard, with his forty years experience, is with the other two members, N. Elmore and the late Gen. Rowett, fully more competent to give us a proper standard and height than an individual. In all due respect to Mr. Phoebus's ideas I am opposed to any change he proposes as to scale of points or height. If we commence to alter the standard there is no telling when or where it will end. As a member of the club and one who is interested in beagles I am against changes to the standard. W. H. ASHBURNER.

YEADON, Delaware County, Pa.

NATIONAL BEAGLE CLUB MEETING.

Editor Forest and Stream:

An executive committee meeting of the National Beagle Club was held at 266 Washington street, Boston, Mass., April 29, 1892, and called to order by the president at 7:45. President Chapman, Vice-President B. S. Turpin, W. S. Clark, O. W. Brooking, W. A. Power and H. V. Jamieson were present.

The committee on constitution, W. A. Power, chairman, read the report, which was accepted. Committee on incorporation, W. A. Power, chairman, made his report, and it was voted that the committee have more time. Report of auditing committee, B. S. Turpin, chairman, was read and accepted.

Communications from members read and filed.

Mr. Wm. Mainard, Westfield, N. Y., was elected to membership. It was then voted that the constitution be adopted by sections.

Also voted that the constitution be set up and that a sufficient number be printed and sent to each member, the same to be returned with vote in favor or against its adoption.

Voted that the secretary be instructed to write a final letter to clubs in question asking for official list of winners of N. B. C. specials, that same may be paid; failing to receive such, he to be instructed to communicate with the A. K. C. for further instructions.

H. V. JAMIESON, Sec. N. B. C.

NOTES AND NOTIONS.

Editor Forest and Stream:

The course of certain critics as to Mr. Lacy, merits emphatic condemnation. The testimony of an unknown, such as "The Onlooker," being of no weight as an opinion, he rests his protest on such facts as will meet with general concurrence. That Mr. Lacy is the best kennel editor in the country will surely be admitted. He has the rarest knack of collecting and presenting news in an interesting form. His honesty every way is unquestioned. It is not denied that he has a good knowlenge of dogs; for my own part, I do not hold him such a born judge of dogs as Mr. Mason, Mr. Davidson or Mr. Fellows, men who seem gifted with an instinct for measuring animal form in any breed, but excepting these three, I do not know of a superior he has. Like any and every man of any mental robustness, he has his own opinions, and I am frank to say that in his expressions as to the breed "The Onlooker" personally devotes himself to, I have sometimes disagreed most diametrically with him, but is he, as editor, to constitute himself a mere mouth-piece for Tom, Dick and Harry? His recent utterance as to greyhounds is a case in point. The writer, knowing rather less than nothing as to the breed, being guided only by impressions, certainly thought Mr. Lacy was wrong in denying the greyhound a deep chest, and had he felt authorized to comment on Mr. Lacy's statement, would have done so in an inquiring tone, most certainly not a derisive one, and would thereby have escaped the snub of having "Stonehenge" thrown in his teeth.

What possible good is accomplished by the nagging, derisive tone adopted by certain critics of Mr. Lacy? With all respect in the world for the accomplished editor of the London *Stock-Keeper*, I would inquire of him whether an inquiry as to the reason for using such a remarkable phrase as "noble" fox-terrier, would not have been in better taste than summary ridicule of it? Finally, would it not be better to save excoriations for some of the many knaves and curs of low degree that infest kennel circles? If critics disagree with his statements, by all means let them express their differences, but may not a friendly, respecting tone be used? THE ONLOOKER.

[As the above is of a personal nature, it may be explained that it has not been seen by Mr. Lacy, and is printed here wholly without his knowledge.]

POINTS AND FLUSHES.

CHICAGO, April 30.—Mr. F. H. Perry, the well known Irish setter breeder of Des Moines, Ia., and owner of Claremont Patsy and other good ones, writes me that a kennel club has been formed at Des Moines and that a show will be held in the second week of January next. Application will soon be made for membership in the A. K. C. Mr. Perry expressed an earnest wish that a bench show circuit, comprising St. Louis, Omaha, Kansas City, St. Paul, Des Moines and St. Joe, could be arranged for next winter. Milwaukee would also make a very desirable and important factor in the arrangement. With the bench show club recently formed in St. Louis, the members of which are disposed to take vigorous action toward holding a successful show, and the Kansas City Kennel Club, which recently held a meeting in Kansas City to discuss the holding of a bench show next fall, a most excellent beginning toward establishing the circuit could be made with very little trouble and effort if the officers of the Des Moines, Kansas City and St. Louis clubs would agree upon dates. The arrangement would be mutually advantageous, since it would add greatly to the success of each individual show. More dogs would be prepared to compete in a whole circuit than would be for a single show, and for the same reason, more dogs would be sent from a long distance. The circuit would have the further advantage of coming at a time of year when no shows were held in other sections, and hence would not conflict with or be injured by competition with other shows. Of course their claims of dates would be subject to the approval of or rearrangement by the A. K. C. when they become members. Such a circuit, if once established, would probably become permanent and would greatly increase the dog interest in the West, which would be a direct benefit to breeders at large.

* * *

Mr. H. S. Bevan, of Lamar, Miss., writes me that he has added to his kennel the English setter dog Whyte B. (Roderigo—Florence Gladstone), and will use him largely as a stud dog. He purchased him from the famous breeder, Mr. P. H. Bryson, Memphis, Tenn. Whyte B. distinguished himself most favorably in the late Southern trials. Mr. Bevan expects most successful results from breeding this dog to his bitches, which are of rare good breeding and superior merit afield, representing several thousand dollars in value. He contemplates running Whyte B. in the field trials this fall and winter. His enterprise and honest efforts deserve success.

* * *

The fox hunters of Chicago appear to be a most unfortunate body of enthusiasts, their fox-hunting aspirations in practice taking the form of much newspaper talk, a vigorous start on horseback, an instant thinning of riders and a pull-up at the first obstruction. Somehow, the sporting schemes of these "sportsmen" take such forms as excite the earnest attention and intervention of the Humane Society, and unlimited newspaper criticism. The last effort, which occurred at Fairland, Douglas county, Ill., on Wednesday, April 27, was replete with the incidents which only these weird riders can bestow. A very good idea of the "fox-hunters'" conception of sport and its practical application can be gathered from the following reprint:

"The 'sportsmen' who went a-hunting tame foxes at Fairland, Ill., had little 'sport' for their money. Mr. Little, one of the officers detailed by the Humane Society to attend the hunt, told the story of the proceedings to an *Evening News* reporter this morning. 'If it had not been so brutal it would have been ridiculous,' he said. 'After trying for a day to find a wild fox, one of the men brought out two tame animals that he had brought up by hand and made pets of. He led them by the collar to the field where the hunt was to commence and let one of them go. At first the animal played about the field, but presently it found a hole in the fence and escaped. When the time allowed under the "rules of the sport" had elapsed the hounds were loosed and dogs and men went over the fence into the next field. There they found the pet fox playing contentedly in the stubble. When he saw the hounds he ran with them at first, but afterward attempted to bite one and was torn to pieces. The second fox fled into a drain pipe and a man who tried to drag him out was bitten in the wrist. That was the only blood shed in the second hunt. Finally a man tied the body of the first fox to his horse's tail and dragged it over the country and the hounds followed until they caught him. When they came back we served our warrants. We can prove without difficulty that the men on whom we served warrants have committed an offense punishable by the law of the State. The society is entitled to a conviction and will prosecute the case as it would any other. If the laughter of the people does not put an end to this imitation of English hunting it must be stamped out by law.'"

Such wanton butchery of a defenseless animal merits the most earnest attention of the Humane Society, and all true sportsmen should wish the society success in prosecuting the violators of sport and humanity. This mockery of the royal sport should be repudiated and condemned by all true sportsmen. Such a public exhibition of brutality, if allowed to pass as sport, would justly bring disgrace on the genuine fox hunters. Gentlemen, well-dressed and mounted, impelled solely by a craving bloodthirstiness, are not sportsmen. The Chicago fox hunter appears to be *sui generis*. Every hunt ends in a novel or brilliant fiasco. The preliminary education of these daring riders usually consists of gentle rides on the boulevards and taking fierce training in the parks over water jumps fully 3ft. wide and hurdles about 2ft. high. With such thorough training and the knowledge of fox hunting which it engenders, it is not wonderful that fame is achieved at one effort by such "sportsmen." In hunting the wild fox his great speed, knowledge, cunning, fertility of resources in baffling and escaping the hounds pitted against the speed, intelligence and knowledge possessed by the hounds afford the element of the sport. The voices of the hounds, dashing riding and an element of danger all contribute to the interest and excitement. The fox has every opportunity to escape and often does so. This is vastly different from taking a tame fox out in a lot and killing him. No one would consider it sport to take a setter among a flock of tame geese and shoot them right and left, yet it would be a similar circumstance. These sportsmen have thoroughly demonstrated that the Humane Society is necessary, and it is to be hoped that the Society will prove that it is eminently useful by convicting the offenders.

* * *

I was much gratified this week to receive a package of photographs, portraying interesting scenes of the recent Southern field trials, several containing excellent portraits of judges, handlers and visitors, from Mr. W. S. Bell, of Pittsburgh, Pa. The portraits do not testify alone to Mr. Bell's skill, which, by the way, is most excellent. The number of photographs taken at field trials, show the general and growing interest in them by the people at large, the constant improvements in photography and the large number of amateurs who practice the art. B. WATERS.

THE INFLUENCE OF A PREVIOUS SIRE.

Editor Forest and Stream:

As many of your readers are aware, much attention has been paid during the last six months to the above subject. The principal consideration in my mind has always been how often does this influence show itself? Many writers in American and English journals have contributed their experience and the result of their observations, and although the results of these have not yet been tabulated, it is quite evident that an overwhelming majority are against the idea of this influence existing except in a very insignificant minority of cases, and it is worth while remarking that very, very few of those who incline to giving weight to this influence as a practical matter, do not bring up that oft-cited case of Lord Morton's mare, the quagga sire, the subsequent black Arabian, etc., etc., *ad nauseum*, indicating that many of them go on superstition.

I have pushed inquiries in every direction attainable, and the result of them has been that I got three cases where progeny plainly showed traces of a preceding sire, against fifty cases of mesalliances that were never followed by any traces of the misfortune in subsequent litters. The reports of observers in England give fully as high a proportion of negatives, if not higher. I have not found one breeder of experience in this country who gives the theory of influence any real weight, two attaching an indefinite, misty importance to it, the majority scouting it as "bloody rot." Some cases of non-influence are very striking; the pointer bitch Fan Fan, dam of many noted winners, having had her first litter to a setter, and the noted bitch Beulah, dam of the renowned Beaufort, having had the litter preceding Beaufort, Bradford, etc., to the Irish setter Berkeley.

The result of these inquiries seems to me to firmly establish that the danger of future ill effects of an accident are about equal to the chance of English setters or pointers being satisfactorily judged at New York show, or as Dr. Perry puts it, to the chance of a monstrosity occurring in the human family. Unquestionably this influence does occur, but for all practical purposes, it does not exist as far as the breeder is concerned. Further, when it does occur, it seems confined to coat and color; conformation and mentality being unaffected; it is shown in but a few of a litter, the others being true to the breeding, and it gradually disappears. So even at its worst it is a trifle after all.

Now I have one earnestly desired object, I want a puppy whose paternity is unquestioned, who shows plain evidences of the influence of a previous sire, such an instance as the one cited by Dr. J. P. Gray of a thoroughbred pointer pup that had the coat and color of the Newfoundland who was the sire of the preceding litter. I want a bitch pup, and when I get it (if I ever do) I will have it trained to the work of its breed and see how it performs; I will breed it straight and see how far the "influence" is transmitted; in a word, I will try to learn something positive.

Will not readers of FOREST AND STREAM help me, and the interests of breeders, along, by bearing this request of mine in mind? W. WADE.

HULTON, Pa., March 30.

FLAPS FROM THE BEAVER'S TAIL.

TORONTO, Can.—Mr. P. J. Keating's, Toronto, black field spaniel Bob (Bob Obo—Nellie), first in puppy class here last fall and which had frequently been placed since, has succumbed to a severe attack of inflammation of the lungs.

The dog show committee of the Industrial Exhibition consists this year of Messrs. C. N. Postlethwait (chairman), John Vaughan, J. F. Kirk, John Massey, C. H. Nelson, J. Henderson, J. Wilson, Capt. Greville Harston, R. Junor, J. S. Mitchener, H. B. Donovan, J. S. Williams and J. Ditworth, with Mr. C. A. Stone as secretary and superintendent.

The only new name on the list is that of Mr. J. S. Williams, the well-known St. Bernard breeder, who takes the place of Mr. W. S. Jackson, who will be unable to give the necessary time and attention to the show this year.

At a meeting of the committee held April 26 in compliance with a request from the National Beagle Club, the class measurements were changed to under 12in. and from 12 to 15in. It formerly read 13in., etc.

Mr. George Bell has bought a fox-terrier pup by Pitcher, recently deceased, which in honor of his sire he has renamed Pitcher II. H. B. DONOVAN.

TRAINING AT FIELD TRIALS.

Editor Forest and Stream:

Now that it is clearly proven by the great preponderance of evidence that there is nothing in common or sympathy between the "high class field trial dog" and the "educated, practical, field dog," it must be acknowledged that there has been much gained by long discussion, for there are thousands that want a dog that can be educated into a practical field dog where there is one that wants a field trial dog and it will save much thought and money. Until this much discussed matter came up I thought if I wanted the best I must breed to, or buy, the get of "Baron von Highclasser," but being a believer in "like begets like" I now see that I must return to my first love and breed to good old "Reliable" for the practical and useful that will stand educating. Long live W. W. Titus; and may his ideas prevail.

NEW HAVEN, Conn. S.

"WOLF COURSING."

Editor Forest and Stream:

I have read with great interest the accounts, as given in your paper, of the match between the deerhounds and Psovois, and the comments on same contained in your issue of April 14. As a breeder of deerhounds for actual work, not for show purposes, and at the same time keeping the breed pure and true, will you allow me to say a few words?

First and foremost, let me put in one word of indignation at the act of Mr. Macdougall (just a little short of murder) in shooting his dog because forsooth he would not tackle an animal for which probably he had never been entered. He was bought on trust, was supposed and guaranteed to be a wolf killer, and if he was not, was it the dog's fault or that of the man who trained him? But to proceed to my own experiences.

In 1883 my ranch in Nevada was so overrun with coyotes that I found it absolutely necessary to do something to get rid of them. I have a horror of putting out poison for anything, knowing the awful agony its use entails. I therefore purchased from Capt. A. J. Hutchinson, then residing near Los Angeles, Cal., two puppies by Hector, bred by Miss De la Poer, out of Gruagach, bred by Cameron, of Locheil. I had great trouble with them at first, and feared they would prove useless; however, with patience and kindness, and above all by educating them with a dog, half mastiff and half greyhound, who would tackle anything, I eventually turned out a couple of animals which proved to be exactly what I desired. The training amounted to little; never allow them to run anything except the game for which you may desire them to be entered; no chasing of jack rabbits especially, and above all no self hunting. If possible let one man and the same always accompany them, and if they are not too badly punished and cut up as puppies I feel confident any deerhound can be taught to attack any animal, but he must be trained for that particular animal. At one time I had fifteen dogs running at once, but this was too many, as it provoked constant fights among themselves, and I have always had better success with three than any other number, and if possible one of these ought to be an old dog.

My dogs have never had an opportunity at a gray wolf, but one of them, single-handed, in one day, killed nine coyotes, or I should say disabled them so that they were powerless, and the same dog killed in fair fight a large mountain lynx. This may prove that the dogs, as a breed, are not deficient in pluck; it is merely a question of early education, and above all patience with what at first may be a timid puppy and afterward turn out a dog that will turn from nothing. HUGH W. VAIL.

LOS ANGELES, Cal.

LOS ANGELES DOG SHOW.

PRIZE LIST—Concluded.

ENGLISH SETTERS.—No challenge entries.—OPEN—*Dogs:* 1st, G. A. Van Berk's Kash; 2d, J. F. Holbrook's Stamboul; 3d, H. M. Tonner's Roy T. Very high com., Godfrey Fritz's Prince Charlie, Wm. Garms's Sport. High com., J. B. Banning's Colonel. *Bitches:* 1st, H. T. Payne's Lilly C.; 2d, Joseph Singer.

IRISH SETTERS.—No challenge entries.—OPEN—*Dogs:* 1st, C. J. Ashborn's Brace. *Bitches:* 1st, J. W. England's Nora Mavourneen; 2d, Mrs. L. L. Campbell's Lady Josie C.

GORDON SETTERS —*Dogs:* 1st, C. H. Brown's Donald. *Bitches:* 1st, John W. Edward's Lady Clara Jane. *Puppies:* Prizes withheld.

IRISH WATER SPANIELS.—Prizes withheld.

SPANIELS.—ALL BREEDS OVER 28LBS.—Prizes withheld. Com., T. B. Glover's Gip. *Bitches:* Prizes withheld. Com., H. Findlay's Betty, G. Hoffman's Reno. *Puppies:* Prizes withheld. Com., H. C. Pott's Bess.

COCKER SPANIELS.—*Dogs:* 1st, withheld; 2d, E. S. Slater's Dan Slater; 3d, Fred S. Cox's Duke. *Bitches:* 1st, Fred S. Cox's Flirt.

RETRIEVERS.—1st, withheld; 2d, Llewellyn Bros.' Nigger; 3d, C. Milligan's Roy.

CHESAPEAKE BAY DOGS.—1st, R. L. McKnight's Laddie.

COLLIES.—*Dogs:* 1st, J. B. Banning's Fordhook Bravo; 2d, C. R. Johnson's Perris; 3d, Mrs. A. B. Anderson's Laddie. Very high com., A. P. Baird's Snep. *Bitches:* No entries. *Puppies:* 1st, C. R. Johnson's Perris.

BULL-TERRIERS.—*Dogs:* Prizes withheld. *Bitches:* 1st, W. H. Collins's Twilight. Com., Will T. Ward's Tip. *Puppies:* 1st, W. H. Collins's Twilight.

FOX-TERRIERS.—CHALLENGE—1st, Sumner's Blemton Volunteer.—OPEN—*Dogs:* 1st, Messrs. Kobicke and Martin's Blemton Reefer; 2d, C. A. Sumner's Blemton Vesuvian; 3d, Warren Campbell's Jack C. Very high com., Fred Smith's Winks. High com., Geo. W. Debenham's Frisco Joker. Com., Geo. W. Ford's Jack F. and Miss Sallie Utley's Bobby Burns. *Bitches:* 1st, John W. Mitchell's Winifreda; 2d, C. A. Sumner's Bonnie Buzz; 3d, J. B. Martin's Golden Clip. Reserve, C. A. Sumner's Bonnie Bess. Very high com., John H. Bullock's Blemton Lillian and Capt. A. B. Anderson's Golden Patch. High com., Dr. W. W. Hitchcock's Fashion. Com., Thos. S. Casey's Frisky Viola, W. B. Morehead's Nettle II., Capt. A. B. Anderson's Flirt and Mrs. A. R. D. Patterson's Vi. *Puppies:* 1st, S. W. Ferguson's Randy; 2d, F. Stokes's Hampden Tip. Reserve, Geo. W. Debenham's Frisco Joker. Very high com., E. Lyndon Bowenig's Glendale Frolic. High com., Capt. A. B. Anderson's Sweep. *Bitches:* 1st, S. W. Ferguson's Roxy; 2d, C. A. Sumner's Bonnie Buzz. Very high com., J. B. Martin's Golden Clip. High com., Geo. W. Ford's Rags.

SKYE TERRIERS.—1st, Jennie and T. H. Helmes's Jerry.

AIREDALE TERRIERS.—1st and 2d, A. W. Sketchley's Red Venus and Badger II.

DACHSHUND.—1st, Henry Pfirrmann's Waldena.

TOY TERRIERS.—1st, J. C. Blackington's Lady.

PUGS.—OPEN—*Dogs:* 1st withheld; 2d, W. E. Christie's Neal. *Bitches:* 1st, S. G. Spiers's Pug; 2d, J. W. P. Dukes's Belle.

POMERANIANS.—1st, Mrs. E. R. Cleveland's Doady.

MISCELLANEOUS.—1st, Gus Reglen's Mustache.

SPECIALS.

Best mastiff, J. Tyler's Draco A. Best St. Bernard, J. B. Martin's Republican. Best deerhound, Mrs. H. W. Vails's Trojan. Best greyhound, S. Tyler's Pronto. Best pointer dog, E. K. Benchley's Kan-Koo. Best bitch and best pointer in show, H. M. Tonner's Amarylis. Best get of Kan-Koo, H. M. Tonner's Ah Sing. Best get of Idstone Bang, J. W. England's Spot. Best English setter (2), H. T. Payne's Lily C. Best Irish setter, J. W. England's Nora Mavourneen. Best Gordon setter, J. W. Edward's Lady Clara Jane. Best cocker spaniel, Fred S. Cox's Flirt. Best retriever, Lewellyn Bros.'s Nigger. Best Chesapeake Bay, R. L. McKnight's Laddie. Best collie, J. B. Banning's Fordbrook Bravo. Best bull-terrier, W. H. Collins's Twilight. Best fox-terrier, Messrs. Kobicke and Martin's Blemton Reefer. Best get of Blemton Vesuvian; F. Stokes's Hampden Tip. Best Skye terrier, J. & T. H. Holmes's Jerry. Best Airedale, A. W. Sketchley's Red Venus. Best pug, S. G. Spiers' Pug. Best Pomeranian, Mrs. E. R. Cleveland's Doady. Best dog entered by a German, Henry Pfirrmann's Dachshund Waldena. Best toy, J. C. Blackinton's Lady. Best dog entered by a lady, Mrs. H. W. Vail's Trojan. Best kennel of fox-terriers, C. A. Summer's. Best sporting dog, H. M. Tonner's Amarylis. Best bitch bred in California, S. W. Ferguson's Roxy. Best brace of greyhounds, Geo. W. Gordon's Leo and Deno. Best brace of pointers, H. M. Tonner's Ah Sing and Amarylis. Exhibitor with the biggest entry, S. Tyler.

These are the awards where there was any competition, the other specials covering about five pages of the catalogue, follow the awards in the regular classes.

BENCHING AT DENVER SHOW.—New York City.—*Editor Forest and Stream:* With reference to your account of the Denver dog show in your issue of April 21, in which you state "the benching was good, the partitions being of wire," will you allow us to inform your readers through your valuable columns that the Continental Kennel Club have obtained the right to use this benching from us by paying us a royalty, they having acknowledged the infringement of our patent.—SPRATTS PATENT (AMERICA) LTD.

DOG CHAT.

THERE have been few dog shows in England lately, in fact, the kennel papers for two or three weeks past have had very few if any reports. This is singular, for Great Britain can generally scare up a dog convention in some corner or other of the domain. The Collie Club show at Agricultural Hall, London, has been occupying the attention of the lovers of the shepherd's helpmate—as he is supposed to be—and exchanges this week tell us that old champion Metchley Wonder is still on deck and well able to increase his long list of honors. *Stock-Keeper* says he looked as well as any dog in the show. He was first in the veteran class and also in the class for winners of six firsts in open or challenge classes under K. C. rules, and followed this up with the special for best of all classes, Stacathro Ralph gaining the reserve. Lady Christopher took the ribbon in the corresponding class for her sex. Mr. Stretch's Ormskirk Ormonde won in rough dogs under two years old and also in the dog puppy class. This dog is very well spoken of, and is according to Mr. Stretch, the best he ever bred. Meersbrook Hero, it is said, will also make his mark. Barwell Pearl was an easy winner in her class. Smooths did not show up so well. Mr. Hurst's Dot and Mac being the winners in the regular class. Mr. Charles's Wellesbourne Christopher, winner of third in the under two years old class, is said to be one of the smallest young dogs at the show and is bred in to Mr. Jarrett's crack Christopher on both sire and dam's side. *Stock-Keeper* says a "prettier collie and one better shown would be hard to find." He is very like Christopher was when he came out, in head, carriage of ears and color. Metchley Wonder made a gallant show for the stud dog prize, having no less than twenty-two in his family. A pleasant feature of the event was an exhibition of paintings and photographs of collies for which prizes were awarded. Dr. McGill judged the collies in the ring and Mr. Murcott their counterfeits on the walls.

Mr. Geo. Raper no sooner landed at Queenstown than he hurried up to Dublin Town, and owing to the absence of two judges, Messrs. Fred Gresham and W. W. Thompson, he was pressed into service and had a hard day's work in the ring. He was given a cordial welcome, and expressed himself as delighted with his visit to "Yankeeland," and, as usual, with an eye to the main chance, he claimed a winning Gordon setter for $50 that is considered a bargain. The show itself was not remarkable for quality, and nothing particularly interesting happened, if we except the mastiff Ilford County Member winning in the open dog class and Duke of Maplecroft, the St. Bernard, doing equally as well in his breed.

Some of our "boys" fancy themselves a good deal over their little maneuvers to elude the grasping baggage master, but they hardly equal the British dogmen, who in going to the Dublin show classed themselves as "cattlemen," and so crossed over the channel at the reduced rate of thirty-six cents a head!

At Kilmarnock show Mr. "Alphabet" Astley found a wire-haired fox-terrier puppy that, though in failing to show itself properly was only placed, will, in proper hands, make a name, for Mr. Astley is said to have refused $100 for his bargain after having given $80 for the dog.

Paris, France, is to have a dog show May 19 to 27, and on the 28th Berlin will afford the good Germans a chance to show their "hunde."

It seems there is a family by the name of McGovern in Ireland which is said to own, have or possess a specific for hydrophobia; and some children having been bitten recently they have been put in charge of the McGovern family and were reported to be progressing favorably. So far so good, but the *Stock-Keeper* disapproves of quackery, and offers to have the specific, whatever it is, scientifically tested and experiments carried on at their own expense. If the McGoverns come to time we can recommend Hartford, Conn., as a capital place, according to Dr. J. Gardiner, to commence operations in, for any town that can boast fifteen cases of undoubted rabies in nine months is just ripe for such a test. While we are on the rabial subject we might as well quote another case from the same journal, which says: "An important experiment has been made by Prof. Murri, of Milan, at the Institution for the cure of hydrophobia. The *Daily News* states that a man who had been bitten by a dog, and had undergone the Pasteur treatment, was nevertheless attacked with hydrophobia. Paralysis had already set in from the waist downwards, and his life was despaired of when Prof. Murri thought of making subcutaneous injections of the virus in its fixed form. Little by little all the serious symptoms disappeared, and the man is now cured. The Milan papers say that if further experiments of the kind, as is probable, give the same result, a real curative, and not merely preventive, treatment of the terrible disease will have been found."

A small boy at Woods Holl, Mass., had for his favorite pet a great Newfoundland dog. Joe had made many attempts to ride his Nero, and the pet was very obliging; but after a few trials Joe gave up the undertaking. On being asked one day why he did not ride Nero, he replied: "No use trying, his skin slips off."

Miss Doggett (to man who has returned her "lost" pet)—"Here is a dollar, my good man. I hope Fido didn't give you much trouble?" Man (with the air of a martyr)—"Thot same he did, mum. Oi had to kape him toied onp in th' cellar, an' sit there an' watch him all day, or he'd 'a' broken loose and run back home."—*Puck.*

Mr. C. Steadman Hanks will soon have a large kennel of Psovois. Some time since we gave the particulars of the coming importation, two of which arrived by the s.s. Indiana from Russia. One has been sent on to Mr. Hanks, the other remains in Mr. Jarett's kennel as it is not in fit condition to travel. This bitch is Kinjat and is noted as the winner of the bronze medal at St. Petersburg, 1891. The rest of the consignment will arrive by the Missouri, May 11. They are all from the kennel of Prince Galitzin, and it will be interesting to compare their type with the others over here.

Mr. W. W. Titus, the well known field trial dog owner, handler and general good fellow, writes us that he is moving the Coal Grove Kennel to Coal Grove, Ohio, from his place at West Point, Miss. Mr. Titus did not take a very active part in the trials last year, but we hope to see him on the warpath again next fall with several Daisy Hopes.

From all accounts it seems that Boston will send up quite a delegation of dogmen and their dogs to the Lewiston show, which takes place May 17, entries for which close to-day. The beagle men especially will turn out strong, and will afford a gathering of the clans to discuss Mr. Phœbus's proposed extension of the standard 15 inches to 16. In this connection we are reminded of the saying, "Give him an inch and he'll take an ell."

Mr. H. Osborn informs us that Col. DeLancey Kane, of New Rochelle, has ordered a lot of young jacks from Kansas to stock a preserve. They will be used for foot-hunting with the beagles. Mr. Osborn also got a lot for N. Q. Pope, of Maine, and A. L. Page, of the Eastern Coursing Club, but these were old ones.

Mr. M. Kronauer, of Rochester, N. Y., has purchased the St. Bernard dog Dud (Hector—Tromba) from Mr. Th. H. Groves, of the same city. Dud was in the money at the last Rochester show.

Will Mr. Tod, who recently imported a couple of collies, kindly call or send his address to this office, as we have a letter for him.

Mr. H. B. Anderson's, of Glenview, N. J., hard luck is still with him, for he has now lost by distemper all of his Nugget puppies, and, strange to say, does not own a dog at present. These pups were ten months old and with them he expected to repeat their dam's achievements. Having no dogs Mr. Anderson is now at liberty to train one or two for the more fortunate owners of "reds," and this is an opportunity that the Irish setter men will not be slow to avail themselves of.

We omitted to state in a recent issue that Mr. C. H. Corbett, of Kingston, Ont., is an honorary member of the Ottawa Bench Show Committee.

ANOTHER IDOL BROKEN.—Even faithful old dog Tray, steadfast, brave and true, is but a myth. Could he be Tray and yet be faithful too?—*Brunonian.*

Mr. E. A. Manice, who has taken the advancement of the dachshund in this country under his especial care, has been making some good purchases in his favorite breed. From Mr. Harry Jones, the noted dachshund breeder in England, he has bought a good dog in Jay, by Jackdaw out of Jealousy. Jay was whelped May 21, 1888, and has won first at Colchester and novice and club sweepstake at the Kennel Club show in 1889. Second Kennel Club show 1890. First and special Coventry and Chelmsford; first Tunbridge Wells and Kennel Club show, and also first Crystal Palace and best in show 1891. These were the only times he was shown. He weighs 22lbs. and is liver colored. Another good one he is importing is Jargonelle, a red bitch and probably the best in England to-day. She is by champion Jackdaw out of Zuliana, by champion Zigzag out of champ Hagar. She has been shown only once, at Maldon, where she won first in open and first novice, and was reserve to Pterodactyl for best in the show, beating Stephanie and Zenica. She will be shown at the Kennel Club show, when she will become Mr. Manice's property and will remain in England to be bred to Pterodactyl. Mr. Manice has also purchased two other red bitches (sisters) by Jingle out of Rene (dam of Jenny Wren, Reena, etc.), whelped July, 1891. These will be bred to champion Jackdaw and Jingle if possible before coming over. Mr. Jones in his letter to Mr Manice says, "I was grieved to see poor Janet beaten at your show, it cannot be right." We have received the dachshund trophy, valued at $250, that Mr. Manice will donate at the next Boston and New York shows, and it is indeed a handsome cup, standing nearly a foot high. A picture of it will appear in our next issue.

Mr. W. C. Reick arrived last Saturday, bronzed with the suns that beat on the sands in the land of the pyramids. After running through the English kennels he saw nothing to take his fancy excepting a six months bitch pup by Marvel out of a half sister to Hepsey, which he purchased and which sailed on the City of New York. This young bitch weighs over 100lbs. already and is quite a good one. Mr. Reick expresses himself as pleased with his visit, but thinks that America is getting along very well in the matter of St. Bernards, Col. Ruppert has not bought anything yet, but the cables are just aching to convey the news that he has decided to buy a crack, news of which we may have before we go to press.

The Toronto dog show has caught on among the dwellers in the Queen City, and entries have come in fast. Valuable specials are being given, and the show promises to be a great success, 150 entries having been received up to last Tuesday.

We suppose we have now heard the last of the Meadowthorpe Farm in a kennel sense, for it has just been sold to Mr. James E. Pepper for $275 an acre, the highest price ever paid for a blue grass farm. It will be remembered that the dogs "Scotch" Bailey made so famous from this farm were sold off last fall.

Entries closed for the San Francisco show last Saturday and we learn that the show has created great excitement among the fancy on the Pacific slope, and the entries are very satisfactory. Mr. Mortimer is having a royal time and will be pretty well on the jump for some weeks yet, as when he gets back he judges at Lewiston, then starts for England to take in the Kennel Club show.

The National Greyhound Club's show is to be held in the Claremont avenue rink, Brooklyn, during Christmas week.

Mr. "Diehard" Naylor has been made a Justice of the Peace. That is fine.

The Occidental Coursing Club had a capital day's sport Sunday, April 24, and many well-known greyhounds, notably Al Farrow and Chicopee Lass, took part in the All-Age Stake. Al Farrow was not himself, having been badly staked during the morning while chasing a cat, and was put out in the first round by T. J. Cronin's Jenny G. Chicopee Lass stood to her work through two rounds, but was downed by the greater speed of her opponent Firenzi in the third round. Her first round was an undecided, but in the next try she ran away in hollow style. Eventually Queen of the Valley and J. Shea's Firenzi divided the stake. Mr. John Grace was the judge and Jim Wren, the well-known slipper, sent the dogs to their work.

A Mr. Smith, an exhibitor of collies in England, has been shown up pretty effectually by the E. K. C. It seems he offered a judge, Mr. Stewart, the judge of collies at Cruft's show, five pounds if his dogs were placed first and second, although, as he stated in his letter to that gentleman, he did not want him "to go against light and knowledge." At Bath this same individual insulted Mr. Krehl, the judge, insinuating favoritism, and in consequence the Kennel Club very justly relegated Mr. Smith to seclusion for life as far as K. C. shows are concerned.

The Chicopee Lass—Pearl of Pekin matter is not ended yet. Although we had our information from four different sources, and presumably authentic, as we printed it recently, it seems that after the committee had decided to award the stake to Mr. Bartels' dog on the "ride over" the affidavits of Mr. Brougher, Dr. Shaw and Mr. Edmunds changed the views of the committee and they referred the matter back to the club, although their intention was to refer it back to Mr. Bartels. It is rather a curious matter and shows a want of firmness somewhere. It has been before the club since last October, and after making the circuit of the American Coursing Club Executive committee, the American Coursing Club, National Club and A. C. C. committee again, it is now back to the A. C. C once more. It certainly should be decided before the next October coursing meeting.

Those who are interested in speeding dogs will have a good chance on May 30 to see the race for the dog running championship of America between Firenzi, owned by Jas. Douglas, of Newark, N. J., and Blair Athol, owned by Thos. Clark, of Yonkers, N. Y., at the Fishkill Athletic Club grounds.

At the Nottingham, England, show, held recently, Messrs. Toon & Symonds's fox-terrier Surefoot won third. Their pointer bitch Ruby VII. has just whelped six pups to Mr. Raper's Naso of Strasburg.

Last Saturday week the Morey Kennels, of Fairfield, Conn., shipped the fox-terrier Blemton Rapture to Mr. J. B. Martin, of San Francisco, Cal. Blemton Brilliant, sold to the same party, will be kept East till after whelping.

The first of the spring field trials in England has just been brought off; they were the Kennel Club trials. We cannot, however, give more than the results this week. In the Puppy Stake, with six pointers and five setters, four of which were Irish, the lovers of the red dog had again cause to feel proud of their favorites, as in the final between the winning pointer, H. Dory's Master of Meirelbeke, and the winning setter, J. K. Milner's Airnie, the first prize fell to the Irish setter, much to the Rev. O'Callaghan's delight, who himself took second in the setter class with Elphin II. In the All-Age Stake, T. Lander's English setter Sweep's Delight won first, the pointer, D. Moriarty's Glenbeigh, that did so well last year, getting second place; Dr. G. A. Wood's Fred third, and F. C. Lowe's Di of Kippen fourth. The trials were held near Ipswich, and the judges were Messrs. Shirley and Doyle.

There are several new advertisements this week. Among them we notice that C. T. Brownell offers three Gordon setter dogs and several puppies; James Tumilty, St Bernards; Fairmead Kennels, Great Danes; the Anglo-American Terrier Kennels a number of well-bred dogs of different breeds, and also a prize-winning Pomeranian; Tonti Kennels, mastiff pups. The New York St. Bernard Kennels also offer a good chance to secure some excellent stock. At stud: Elisha Burr offers the pointers Mainstay and Bounce, and F. H. Perry the Irish setters Claremont Patsy and Pride of Patsy.

Just as we go to press we hear that the judges selected by the Eastern Field Trials Club for the trials in November next are Messrs. H. B. Duryea, R. L. McCook, of New York city, and Col. Arthur Merriman, of Memphis, Tenn.

At the United States field trials Col. Sloo and Mr. P. H. Bryson have already been chosen to judge. Mr. B. Waters was also invited to judge, but declined, for business reasons.

Mr. F. R. Hitchcock has presented Mr. J. O. Donner with his noted English setter Tory Lieutenant, winner of Eastern Field Trials Derby, 1890.

COCKERS AT DENVER.

Editor Forest and Stream:

Kindly allow me to call your attention to your report on the cocker spaniels at Denver show, April 21, in regard to the cocker challenge class. You state that King of Obos was alone in his class, whereas Lady Obo was also entered and if King of Obos had been found, as you state, to be overweight, before he was judged he should have been withdrawn from competition and Lady Obo should have been awarded first prize. I am extremely sorry that there should have been any settlement come to with or without this qualification, for I think Mr. Kellie Cookson ought to have objected or disqualified my four dogs for competing for the kennel prize, but probably he thought there was quite enough confusion in the show in regard to the cockers shown there by me, which we shall hear more about later on. I should be very pleased to have the kennel prizes withdrawn from me and given to the above gentleman if he will kindly accept. Let him state his views through this paper or direct to me. G. BELL.

TORONTO, Canada.

ANOTHER SILLY SLIP.—Hulton, Pa., April 22.—*Editor Forest and Stream:* The English correspondent of a certain Western paper makes a reference to an "answer" to me in the London *Stock-Keeper*. Permit to say that every inference that Mr. Huscroft draws from that "answer" is completely wrong, and that he has again shown that he does not know what he writes about. I should think that the Salisbury incident, the "Merlin" episode and a few other breaks, would have taught him that a line divides what he knows from what he does not know.—W. WADE.

DOG SHOW AT GRAND RAPIDS, MICH.—*Editor Forest and Stream:* The Western Michigan Kennel Club's first annual bench show will be held Sept. 19 to 23, 1892, in connection with the West Michigan Agricultural and Industrial Association Fair at Grand Rapids, Mich. H. Dale Adams, Superintendent, Galesburg, Mich.—C. K. FARMER, Vice-President.

KENNEL NOTES.

Kennel Notes are inserted without charge; and blanks (furnished free) will be sent to any address.

NAMES CLAIMED.

☞ **Prepared Blanks sent free on application.**

David Johnson. By F. L. Cheney, Pittsfield, Mass., for dark red Irish setter dog, whelped April 11, 1892, by Onota Don (champion Chief—Bizreena) out of Daisy (Chief—Leigh Doane).

Henmore Shamrock, Jr. By F. L. Cheney, Pittsfield, Mass., for dark red Irish setter dog, whelped April 11, 1892, by Henmore Shamrock (Muskerry—Avoca) out of Onota Peg (champion Chief—Bizreena).

Bizreena II. By F. L. Cheney, Pittsfield, Mass., for dark red Irish setter bitch, whelped April 22, 1892, by Henmore Shamrock (Muskerry—Avoca) out of Onota Peg (champion Chief—Bizreena).

Dick Hunter. By A. S. Aborn, Wakefield, Mass., for white and tan beagle dog, whelped May 30, 1891, by Calmer II. (Brad's Sport—Belle of A.) out of Music IV. (Brad's Sport—Fanny).

Adele K. K. By G. A. Kenken, New York city, for dark red Irish setter bitch, whelped March 12, 1892, by Mickey Muldoon (champion Tim—Judy Killarney) out of Pearly Echo (champion Echo, Jr.—imported Laura).

Royal Forest. By P. M. Carman, Wrightsville, Pa., for black, white and tan ticked beagle dog, whelped July 9, 1891, by Frank Forest (Riot—Skip) out of Nellie Krueger (Bugler—Queenie).

Trueman. By P. M. Carman, Wrightsville, Pa., for white and tan beagle dog, whelped July 3, 1891, by imported Laick's Rattler (Chancellor—Careless) out of Laick's Music (Dandy—Diana).

Beauty C. By P. M. Carman, Wrightsville, Pa., for black, white and tan beagle bitch, whelped July 6, 1891, by Little Dot (Rally—Cora) out of Cricket (champion Bannerman—Krueger's Pet).

Royal Forest Beagle Kennels. By P. M. Carman, Wrightsville, Pa., for his kennel of beagles.

BRED.

☞ **Prepared Blanks sent free on application.**

Spinaway—Fullerton. Woodhaven Kennels' (Woodhaven, L. I.) greyhound bitch Spinaway (Lord Neversettle—Partera) to Colonel North's Fullerton (Greenstock—Bit o' Fashion), March 28.

Fanny Sheffield—Graphite. Sheffield Kennels' (New York city) pointer bitch Fanny Sheffield to E. R. Bellman's Graphite, April 13.

Signa—Grousedale. Banks & De Russy's (New York city) pointer bitch Signa (Lachimer Boy—Bella) to R. R. Moore's Grousedale, April 16.

Marguerite II.—King of Kent. J. H. Dey's (Red Bank, N. J.) pointer bitch Marguerite II. (Mainspring—Marguerite) to Westminster Kennel Club's King of Kent (Priam—Kent Baby), April 12.

Dora—Henmore Shamrock. Dr. E. P. Kremer's (Lebanon, Pa.)

Irish setter bitch Dora (Chief—Doe) to F. L. Cheney's Henmore Shamrock (Muskerry—Avoca), April 5.

Queen Novice—Dan Gladstone. R. D. Stocking's (Lowell, Mich.) English setter bitch Queen Novice (Count Noble—Dashing Novice) to Blue Ridge Kennels' Dan Gladstone.

Richard's Fanny—Dan Gladstone. R. D. Stocking's (Lowell, Mich.) English setter bitch Richard's Fanny (Richard III.—Royal Flo) to his Dan Gladstone.

Dinah C.—Matane. W. B. Wells's (Chatham, Ont.) English setter bitch Dinah C. to his Matane, February.

Daphne—Cincinnatus. W. B. Wells's (Chatham, Ont.) English setter bitch Daphne to Maumee Kennels' Cincinnatus, February.

Cambriana—Toledo Blade. W. B. Wells's (Chatham, Ont.) English setter bitch Cambriana to Maumee Kennels' Toledo Blade, February.

Bell—Frank Forest, Jr. P. M. Carman's (Wrightsville, Pa.) beagle bitch Bell (Victor—Sylvan) to National Beagle Kennels' Frank Forest, Jr., March 5.

Countess Christine—Roi d'Or. C. J. Gayler's (New York city) English setter bitch Countess Christine to F. R. Hitchcock's Roi d'Or, April 20.

WHELPS.

☞ **Prepared Blanks sent free on application.**

Lady Vixen. F. R. Page's (Orland, Me.) pointer bitch Lady Vixen (imported Bang—Daisy Ranger), April 5, eight (four dogs), by C. B. Faxon's Witheridge Sambo (Devon Sancho—The Village Juno).

Sara Bernhardt. Eberhart Pug Kennels' (Cincinnati, O.) pug bitch Sara Bernhardt (Lord Roseberry—Cora), April 13, four (two dogs), by their Spokane (champion Kash—Lady Thora).

June Rose. Forest Beagle Kennels' (Lynn, Mass.) beagle bitch June Rose, April 12, eight dogs, by Glenmore Kennels' champion Fitz Hugh Lee.

Onota Peg. F. L. Cheney's (Pittsfield, Mass.) Irish setter bitch Onota Peg (Chief—Bizreena), March 11, nine (five dogs), by his Henmore Shamrock (Muskerry—Avoca).

Daisy. F. L. Cheney's (Pittsfield, Mass.) Irish setter bitch Daisy (Chief—Leigh Doane), March 22, seven (three dogs), by his Onota Don (Chief—Bizreena).

Loumont Kit. H. M. Howe's (Somerville, Mass.) bull-terrier bitch Loumont Kit (Gully the Great—Kit), April 30, six (two dogs), by F. W. Moulton's Roscoe (Bendigo—Starlight).

Lillie Lansdown. H. Wilkins's (Leamington, Can.) pointer bitch Lillie Lansdown (Lansdown—Old Nell), April 21, eight (four dogs), by J. R. Daniels's Lord Graphic (champion Graphic—Daphne).

SALES.

☞ **Prepared Blanks sent free on application.**

James G. Blaine. White with orange spot, rough St. Bernard dog, whelped March 27, 1891, by Ben Hur, Sr. out of Silma, by A. Smith, Maud, Pa., to C. T. Ashman, Philadelphia, Pa.

Micky Muldoon—Pearly Echo whelp. Dark red Irish setter bitch, whelped March 12, 1892, by John Hawthorn, Jamestown, N. Y., to G. A. Kenken, New York city.

ANSWERS TO CORRESPONDENTS.

There is no charge for answering questions under this head. All questions relating to ailments of dogs will be answered by Dr. T. G. Sherwood, a member of the Royal College of Veterinary Surgeons. Communications referring to other matters connected with Kennel Management and dogs will receive careful attention.

J. B., West Fitchburg, Mass.—You had better have the dog examined by a competent "vet," possibly a piece of quill has lodged in the throat.

M. K., Rochester, N. Y.—The Hospice Kennels, of Arlington, N. J., have been broken up, but there is a kennel of that name owned at Shelly, Ohio.

E. P., Cortland, N. Y.—Will you give me pedigree of cocker spaniel bitch Trinket (A.K.R. 4214). Ans. Trinket by Kiddlewink (A.K.R. 997) out of Power's Mignon (A.K.R. 1,003).

J. S. S., Natick, Mass.—What will remove the odor of a skunk from my dog. I have tried everything that I can think of without success, and the more I do the worse it is. Ans. Time will prove the only remedy.

W. H. W., Rochester, N. Y.—Do you consider the first litter of pups that a bitch throws makes as intelligent and active dogs as those of the third or fourth litter? Ans. Yes, and some breeders consider them more so.

R. D. S., Lowell, Mich.—Mix one quart of whale oil, ¼lb. of pulverized sulphur and ½oz. oil of tar, rub well into affected parts, then wash off in a few days with warm water and castile soap. Repeat if necessary. Avoid heating foods and allow plenty exercise. Dr. Glover's blood purifier will be found very efficacious as well.

S. E. D., Armstrong, Fla.—Kindly give me some information in regard to what would make good varmint dogs for Florida. What I want is good trailers and good fighters. Would not some of the terriers fill the bill? Have fox-terriers good nose enough to trail wildcat? Ans. 1. Should think Airedale terriers would be the best for all-around work, next Irish terriers, though the latter would hardly be strong enough to tackle wildcats. 2. We do not think so, they are not trailers.

E. A. C., Westchester, N. Y.—Kindly give me the pedigree in your paper of Gus Bondhu two or three generations, also Bo Peep the same, and what prizes they have won if any. Ans. Gus Bondhu, by Dashing Bondhu out of Novel, by Dan out of Nellie. Dashing Bondhu by Dash II. out of Countess Bear. Second N.A. K. C. trials, 1885; third, Philadelphia (spring), 1885; vhc., Boston, 1885; vhc., Boston, 1886; 2d, New York, 1886. Bo Peep, by Gladstone out of Juno, by Leicester out of Dart. Gladstone by Lewellyn's Dan out of Petrel.

B. A. S., North Attleboro, Mass.—At the Centennial exhibition of 1876, held in Philadelphia, there were two Scotch collies, Sport and Home Nelle, both were imported and exhibited by Mr. Wm. Crozier, of Long Island. Can I find in any of the back numbers of the FOREST AND STREAM any account of these dogs of that date? Ans. We can find no mention of these dogs other than that they were first prize winners at the Centennial show, Home Nellie being shown by George Aiken, Chester, Pa., and Sport by W. Crozier, North Point, L. I.

J. J. W., Pittsfield, Mass.—Having come into possession of the setter bitch Bess, formerly owned and registered in the *American Kennel Register* by T. J. Peck, of Pittsfield, Mass., Jan. 29, can I obtain her pedigree of you. Ans. Bess is not registered, but there is an English setter, Bess Bobbet (A.K.R. 6974), registered by Mr. Peck and bred by R. B. Penn, of New Haven, Conn. Sire—Yale Belton, by Belton (Syke's Dash—Daisy) out of Blonde, by Carlowitz out of Magnet. Dam—Lill, by Ranger II. (Ranger—Judy) out of Cora, by France out of Fancy. This is in February issue of *American Kennel Register*, 1889.

A CONSTANT READER, New Orleans, La.—Please advise me whether or not the Boston terrier is a distinct breed, and why so called? Ans. There is a Boston Terrier Club, and the admirers of the dog claim that it is a distinct breed; but as yet it has not been recognized by the American Kennel Club. This terrier was known until recently as the round-headed bull-terrier, and indigenous to Boston and surrounding districts; this was afterward changed to Boston terrier. They are a cross between a bulldog and terrier; they come all sorts, shapes and sizes, and are not by any means of one distinct type. Nevertheless, they are bright, smart companions.

W. L. R., Randolph, N. Y.—I have a bitch that the party I bought her from claimed was sired by a full-blood beagle. He said that he lined her with a genuine Rowett beagle. Can you give me a description of a Rowett beagle? The bitch whelped four pups; one black, white and tan, the other three nearly all black, one of them with tan markings, the other two with white and tan markings. Do they show correct markings for beagles? Ans. The Rowett beagles were a strain derived from General Rowett's importation of Sam, Dolly and Warrior, and noted for their hunting qualities, endurance and general appearance of "pocket" foxhounds. They were, we believe, the type selected by which the present beagle standard was compiled, a copy of which you can procure by writing to Mr. H. V. Jamieson, Melrose, Mass. The markings you mention are all good hound colors.

H. W. R., Clinton, N. H.—1. Give a short description of the Dandie Dinmont terrier, including its weight. 2. What are the principal differences between American and English foxhounds? 3. Suppose a bull-terrier good in other respects but one ear standing up straight, the other laying back or his head. Would not that prevent his winning at a dog show? Ans. 1. The general appearance of a Dandie Dinmont is that of a rough-coated, thick-set dog, very low on the leg, body flexible and long in proportion to height, but broad, deep-chested and compact. Head large, with broad and well-domed skull, covered with light-colored hair softer and more silky in texture than that on the body. Jaws long, strong and slightly tapering to the nose, which must be black. Eyes large and set wide apart and of a dark color. Neck thick and muscular, shoulders low and loin arched, ears pendulous and hanging low. Legs short and very muscular, allowing the chest to come well down between them. Tail carried gaily and well fringed with hair. Expression of great determination, strength and activity. Height, 8 to 10in.; weight, 14 to 22lbs.; about 18lbs is the best. 2. The American foxhounds are built on lighter lines throughout than the English hound, not so well set on their legs and are supposed to have greater speed in hilly or rough country. 3. It would only affect his chances in close competition.

SAGE, Huntington, Ore.—The dog in question is a pointer seven months old, and, although not exactly gun shy, is startled at the report; an unusually timid dog at all times. Would you kindly answer the following questions and make any suggestions you may think of? 1. In what way is a choke collar used in forcing a dog to retrieve? 2. Would you advise this method to be used on a dog as described? 3. At what part of his education would you use same, and at what age would you start him in the field? 4. Would you advise the use of an old dog or train him separately? Ans. 1. Grasp the collar with the right hand close to the dog's neck. In the left hand hold a pad or old glove. The first lessons are directed solely to teaching the dog to open his mouth when ordered to "Fetch." When the order is given, jerk just hard enough to make the dog cry out. When he opens his mouth place the glove in it and cease punishment instantly. If the dog throws the glove out of his mouth, replace it, holding the left hand under his under jaw, raising his nose slightly in the air, thus forcing him to hold it in his mouth. By repetition, he will learn to open his mouth at the order "Fetch," without any punishment. After he is perfect in this, the next stage is to teach him to walk forward a step or two and take the glove out of the hand. This is done by giving the order "Fetch," and jerking the collar with force enough to make him walk forward to the glove and grasp it with his mouth. After he will walk forward and grasp the glove to order without punishment, teach him to take it from the hand when near the floor or ground. This is commonly the most difficult part of the work. Do not depend on force entirely. Induce him to show some playful eagerness by waving the glove in his face and getting him to grasp it without punishment. Pat and praise him every time he does well, do not hurry his training, and by all means do not lose your temper. You might get your dog so he would pick up an object to order in three or four days, but you had better take three or four weeks. Have him thoroughly obedient at home before you ask retrieving afield. 2. Do not attempt to teach retrieving by force till your dog is thoroughly over his timidity, and you had better wait till he is thoroughly field broken before you attempt it. 3. He is old enough to start in training next fall. Retrieving should not be taught to any dog before the second season at the earliest. 4. If he will hunt, train him alone. If he is too timid to hunt alone, an old dog which will hunt without loud orders or punishment would help to give him confidence. You would do well to let him chase rabbits, birds, etc., during the summer, taking him out in the fields and letting him have his own way without any attempts at training afield, although you could give some yard lessons profitably, always avoiding anything which would make the dog afraid.

Canoeing.

WHITECAPS FROM THE "HUB."

PRIOR to the formation of the American Canoe Association in 1880 there were scarcely a dozen canoe clubs or combined boat and canoe clubs in the country. Canoeing has exhibited a steady though not very rapid growth since that year. In looking over the list of clubs in the A. C. A. year-book for 1891 the other day, I find that the formation of canoe clubs has been fairly rapid since 1880. By years it is as follows: 1880, 5; 1881, 0; 1882, 5; 1883, 9; 1884, 6; 1885, 12; 1886 (the banner year), 20; 1887, 9; 1888, 16; 1889, 13; 1890, 18; 1891, 18. From the foregoing it will be seen that since 1888 the growth of the club list has been rapid, and there are to-day upward of 150 clubs either wholly or in part devoted to this pleasant sport. That to the prominence given to canoeing, by the A. C. A., has been largely due this increase is beyond a doubt and, it may be fairly stated, that every right-minded canoeist should consider it his duty to lend his support to an association which has as its principle the advancement of canoeing. One does not gain much by joining the A. C. A. except a certain standing among canoeists, and a year-book, but "in union there is strength," and many benefits may accrue to its members when the A. C. A. has become a large and strong organization. Every man that propels a canoe, either by sail or paddle, to-day, has been benefitted by the A. C. A., hence he should lend his support in order that still greater benefits may be showered upon him. There is a feeling of pride in knowing that you have contributed your mite toward the advancement of your chosen sport.

I have been working in the Eastern Division, A. C. A., on the year-book, and find that there are seven clubs in the division owning war canoes capable of carrying ten men or over. A very healthy growth is noticed in almost all the clubs. Everything points to an early opening of the season around Boston.

The Puritan C. C. has been negotiating for an island in Boston Harbor upon which to build a summer "Lodge." The island is about five miles from the P. P. C. house.

The Massasoit C. C., of So. Boston, have the use of a small island near Downer's Landing, about seven miles from their house, upon which they have a camp in summer season.

Mr. Geo. R. Underwood, of the Puritan C. C., has purchased the Vesper canoe "Elida," formerly owned by Mr. Ralph Brazer, of Lowell. He intends to race her, and will, we hope, give the leaders a push at the meet.

Considerable interest is being manifested in the coming A. C. A. meet, and Boston will be well represented at Willsboro' Point in August.

The "Hubites" will give up the haphazard style of making camp next year and will exhibit a model camp in many respects. One feature will be the totem of the club upon which work will soon commence.

I think a perfectly stunning A. C. A. camp could be arranged by offering a prize for the club presenting the best camp at the meet, which scheme I offer as a suggestion to our worthy executive.

ILEX.

NOTHING short of a resumption of international racing could equal in importance the news just made public of the sale of Gloriana to a racing owner, and of her participation in the coming season's racing in the hands of a skipper who will do full justice to her. Her new owner is Dr. W. Barton Hopkins, of Philadelphia, a member of the leading yacht clubs, whose summer home is at Newport, where the yacht will probably remain. Dr. Hopkins has owned for several years the 53 footer Cinderella, recently sold to Lake Ontario, and last season he started her in a number of races. He has re-engaged Captain John Barr, who sailed Cinderella last year, and who will now have as his most dangerous antagonist his brother, Captain Charles Barr, in the new Herreshoff 46-footer Wasp.

Both of the Barrs are well known here, having come to America in Clara in 1885 and sailed her ever since. Captain John Barr was in Clara for two years, having command of Thistle in 1887 on her visit to America. The next year he commanded the cutter Thora in Scotch waters, but in 1889 and '90 he was again in command of Clara under the ownership of Dr. Barron, while in '91, as stated, he sailed Cinderella. Though considerably younger than his brother, Captain Charles Barr is equally well known here, having sailed Minerva through her two successful seasons, '89 and '90, after sailing her out from Scotland in 1888. In 1891 he was in command of the Burgess 46 footer Oweene, doing very well with her.

With the assurance of Gloriana, Wasp and Harpoon (Beatrix), the latter owned and handled by two of the leading Corinthian sailors, Messrs. Adams, the racing in the 46ft. class is likely to be closer and more interesting than last season. While such other yachts as may wish to start will be welcome, this trio unquestionably represents the chief result of the skill and money which has been so liberally expended in the creation of the new class; and the racing between three yachts picked from a fleet of a dozen, and each in the best racing form, offers sport far and away above the very unsatisfactory contests that marked the class through a great portion of last season. It is reasonably certain that the three will be on an equality in form, handling and construction, and that the racing will be a much more severe test of type and model than that of last year, and consequently of far greater real value.

It will probably be a very long time before the authentic lines of Gloriana are made public, but in the meantime the design which we publish this week and last will give a very close idea of her many novel features. Though based on free-hand sketches and on dimensions which, while approximate, are not exact, the design has been worked out with special care, and offers a far more satisfactory basis for study and comparison than anything yet published or likely to be concerning the yacht.

SIZE VS. LENGTH AND SAIL AREA.

Editor Forest and Stream:

It is evident that while we are getting gradually a "leetle higher apart" we are not quite nigh enough to embark in the same boat.

You could not have selected a better example than the little cutter Nameless of a 25×7x6 boat, and as you have chosen her, I will name Chippewa, for comparison, as a representative light draft.

Chippewa is 24ft. x11ft. x3ft., and carries with ridiculous ease her sail area of 745sq. ft. According to your method of calculation, you would make the last named boat larger than the first because she is able to carry to advantage 145ft. of sail in excess of what is considered correct for the Nameless.

Nameless carries a large amount of lead in her keel, while Chippewa has done some of her best sailing absolutely without any ballast, and with a limited crew.

Now, the point I wish to make is that in cubic contents—*i. e.*, size—Nameless is the larger. She is also longer on the waterline. She carries her limited area of sail by the leverage of the lead in her keel acting upon her greater size, while Chippewa carries her larger sail easily because of her shape. In light winds Chippewa outsails Nameless a trifle, but in a wholesail breeze she beats the latter about 20 minutes in 30 miles. "Cape Cod cats" are nowhere with either of these fast boats.

THOMAS CLAPHAM.

ROSLYN, L. I., April 22, 1892.

[The cubic contents of the two boats are of no possible value as a gauge of their capabilities for speed, but even if they were we are of the opinion that the actual cubic content of Nameless would be less than Chippewa, a fact that can only be determined from the drawings of the two. Without a more intimate acquaintance with the two boats we would not attempt to say whether they should race on even terms or if not, what allowance is due from one to the other, nor are we aware that they have ever sailed together sufficiently to give a satisfactory test of their respective speeds. Chippewa's excess of beam, 70 per cent. greater than Nameless, gives her greater sail carrying power than the former's lead keel, and she is probably taxed fairly for the extra canvas under the rule. It is merely guesswork to argue over two boats so radically different in type without the exact drawings and sail plans and a knowledge of their relative speeds. Our original proposition, which Mr. Clapham has lost sight of entirely, was that in centerboard boats of the same length and same general type, the one with 12ft. of beam and 900ft. of sail was in every way larger than the one of 9ft. beam and 700ft. of sail. This would be true under the cubic contents rule which Mr. Clapham now advocates, and which would be no less distasteful to the owner of a wider boat than the Seawanhaka rule is.]

NEW YORK Y. R. A.

THE first general meeting of the year of the New York Yacht Racing Association was held April 22, at O'Neill's. Delegates from the Brooklyn, Canarsie, Columbia, Harlem, Hudson River, Indian Harbor, Jersey City, Newark, New Jersey, Pavonia, Staten Island Athletic, and Yonkers Corinthian were present. Com. A. J. Prime presided.

The report of the Dinner Committee was read and accepted and the committee discharged with thanks.

The following amendment to Rule I. of the Sailing Rules, relating to classification was adopted by adding after Class G, Class H, all yawl-rigged yachts.

It was also decided to hold the usual annual cruise, and all matter relating to the same including the time and place of rendezvous was left to the president with power. From remarks by the president, the cruise will probably be fixed for the last week in July. The sentiment of the meeting seemed to be that the cruise be out through the Narrows this year instead of on the Sound, as heretofore.

GLORIANA'S RACING FORM.

THE following letter from Vice-Com. Morgan corrects an error which we shared in common with others in regard to Gloriana's preparation for her first races. It appears that but little sailing was done prior to her coming to New York, notwithstanding which she showed up in far better form than is usually found in a new yacht:

Editor Forest and Stream:

Referring to your article on Gloriana in the FOREST AND STREAM of April 28, I wish to say that previous to her first race Gloriana went sailing but five times, inclusive of her trip to New York.

There was no tuning up attempted, as it would have been nearly impossible under the conditions, at one time with a large party of ladies, on another for but a half hour, etc.

I thought you would wish to know this, as all previous reports have been misleading.

E. D. MORGAN.

WHEATLY, Westbury Station, L. I., April 30.

GLORIANA AND THE HERRESHOFFS.

II.

[Concluded from Page 406.]

IN considering Gloriana, we may safely start out with the assumption that she is both faster and better than anything near her size new or old, in the fleet. Not only has the 46ft. class as a whole made a most favorable showing through the season alongside of the 70-footers as well as the 40-footers, to say nothing of older boats like Clara and Cinderella; but within the class Gloriana is undoubtedly the fastest. Another point that may be assumed at the outset is that apart from her actual merits, she is the distinct embodiment of a principle that is likely to play an important part in the designing of the future. At the same time there has been more sheer, rank nonsense written about her than has ever before been showered on a winning yacht. Her speed, her performance in rough water, her peculiar features, have all been exaggerated, with the most absurd theories to account for each, until those who have never seen the boat are in doubt whether to accept the whole story in the face of reason and common sense; or to reject entirely as a Yankee hoax the mythical yarn of a yacht with a nose like a shark, designed by a man who is totally blind, and winning by miles under all conditions from yachts whose high speed is beyond question.

After a careful study of the racing of the 46ft. class last season, the full record of which appeared in the FOREST AND STREAM of Nov. 12-19, the impartial yachtsman will come to the conclusion that while Gloriana is the head of the class, under equal conditions of form and handling she will beat the first half dozen of her competitors by minutes and not by hours or miles. Considering the general excellence of the class and the amount of hard racing, this in itself is a position seldom attained by a successful yacht, the season's honors usually being divided among several; or if going to a single winner, being discounted by the fact that most of her rivals are older and inferior in racing construction.

In the case of Gloriana, her success may be attributed to three important factors, racing form, racing construction, and design, Gloriana was the only one of the class which was ready in time and at the same time was well handled throughout the whole season; those of her rivals which might have been the most dangerous were hampered from first to last by delays and breakdowns which should have been, and in Gloriana's case were avoided by forethought and superior construction. Those boats which were best-sailed were among the most unfortunate in this respect, and of the class, Gloriana was the only one which started every race in really good condition and with a good hand at the stick. As old racing men, the Herreshoffs were fully aware of the great advantage of early and thorough preparation and of regular and skilful handling, and as the result proves, they took no chances, but reduced everything in advance to a mechanical certainty.

In both the planning and execution of her construction, Gloriana was far ahead of her mates; the actual ratio of ballast to displacement was no higher if as high, as in others of the class, but in the first place the weight was carried low, that part of the hull above water with its double skin and thin deck being far lighter than the solid yellow pine planking of Mineola, Sayonara and Alborak, while deadwoods, bulwarks, coamings, etc., were cut down as much as possible in weight. While a part of this gain was offset by the extra superficies of the ends, it is probable that through a good distribution of material the center of gravity of the hull and rig was lower than in any of the others of equal power. Light construction is a great thing in racing, but it must be of the kind that stands, and not the kind which is constantly breaking down. Fortunately for Gloriana, hers was of the former variety; while in the case of most of her rivals there was something amiss in every race; topsides and bottoms leaking, stems pulled apart in the scarfs, channels doubling up, masts over the side, bobstays parting, splices drawing and other diverting incidents that add variety to the chances of yacht racing.

No doubt there may have been defects of construction developed in Gloriana in the course of racing which have not been specially advertised to the public, but no mishap occurred to mar her chances in a single race; the rig gave occular evidence of its excellence in the notably perfect sit of the canvas, and the hull is sound and tight after a season of hard sailing, the yacht having been in use from May to November.

As we stated last week, the lines, and even the exact dimensions of Gloriana, are the secret of her builders, and are not available for publication, but as it would be impossible to describe her, and much less to discuss her peculiar features, with nothing more than a verbal description to enlighten those who have never seen the yacht, the accompanying design has been specially made. While not official, it is based on a close study and observation of her through the season, aided by many sketches and photographs taken both in and out of the water. The dimensions are those commonly assigned to Gloriana, as published last week, the designed waterline being taken at 45ft., the racing measurement, while the sail plan is based on the official figures of baseline, perpendicular and total area. The dimensions and elements of the design are as follows:

DIMENSIONS AND ELEMENTS OF DESIGN.

Length on waterline	45ft.
Forward overhang	12ft. 3in.
After overhang	13ft. 6in.
Length over all, stembead to taffrail	70ft. 9in.
Beam extreme	13ft.
L.W.L	12ft. 5in.
Draft extreme	10ft. 6in.
Freeboard, least	3ft.
Sheer } bow	2ft. 6in.
} stern	1ft.
Rake of sternpost, degrees	30.
Displacement, long tons	34.25
Ballast, lead keel, long tons	21.
Ratio of ballast to displacement	60 per cent.
Area of midship section	49.28sq. ft.
load water plane	404.
lateral plane	319.
rudder	21.
Center of l.w.l. to—	
Midship section	2.50ft.
Center of buoyancy	2.00
Center of lateral resistance	3.22
Center of effort	2.33
Center of effort above l.w.l.	26.40
Center of buoyancy below l.w.l.	2.70
Center of lateral resistance below l.w.l.	4.27

DIMENSIONS OF SAIL PLAN.

Mast from fore end of l.w.l.	14ft.
deck to hounds	41ft.
diameter at deck	11in.
masthead	9ft.
topmast—heel to hounds	37ft. 3in.
Bowsprit—cranse iron to end of l.w.l.	30ft. 6in.
stem	18ft. 6in.
gammon iron	21ft.
Boom	56ft. 6in.
Gaff	37ft.
Spinaker boom	44ft.
Topsail yard	35ft.
club	29ft.
Mainsail	2072sq. ft.
Jib	600sq. ft.
Staysail	440sq. ft.
Working topsail	528sq. ft.
Total	3640sq. ft.
Lower sail	3112sq. ft.
Seawanhaka rule sail area	4137sq. ft.
square root	64.3
Sailing length	54.17
Y. R. A. rule sail area, working topsail	4287sq. ft.
rating	32.1

The lateral plane, identical with Gloriana, shows rather less of the extreme triangular outline than is found in the Burgess, Fife and Watson boats, the forefoot well cut away, but with some depth under the mast, the greatest depth forward of the heel of keel which rounds up slightly, and a sternpost raking about 30 degrees. There is nothing specially striking in the lateral plane or the midship section, but there is a decided departure from the conventional in the length and outline of the two ends; which are carried out to an extent heretofore unknown, while the angle of the stem and the center timber of the stern with the waterline is much more acute than in the average yacht. Superficial and extraneous as these long ends are, they attract the eye at once, and nearly all of the critics and commentators having seen have believed, and have sought no further than these abnormal extremities for the reasons for the superiority of Gloriana over the rest of her class. She has longer ends and sails faster, consequently long overhangs give speed of themselves, and it is only necessary to spin a boat out into an extravagant caricature of a fish or a snake to make a winner of her.

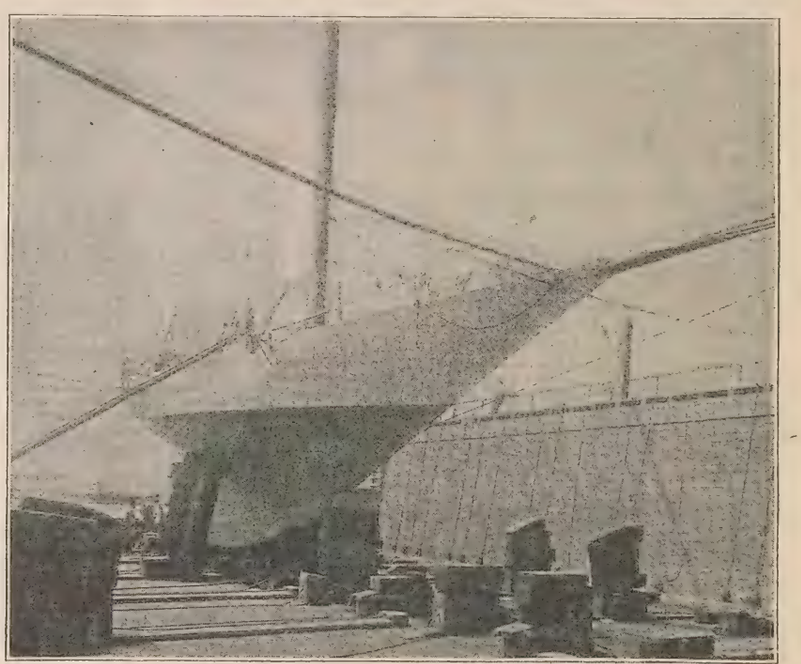
We quote, as a fair sample of the ridiculous nonsense that has been uttered and printed about Gloriana, the following from the *New York Herald* of June, 1891, a story by the way which like all of the *Herald's* yachting news of late years, came from Boston:

"The Gloriana is simply a boat that measures a shade less than forty-six feet on an even keel, but is so shaped as to her overhang fore and aft that for every foot she heels she extends her waterline immensely, and when fairly over, close hauled, she measures about 65ft. on her actual waterline. As she never sails practically on an even keel she is constantly exceeding 46ft. on her actual waterline, and the greater the pressure from the canvas the more her resistance to it increases. The resultant force must be expended in making more arrowy her flight through the water. On an even keel a small craft can carry the canvas of a man-of-war, but, feeling the wind, would turn over. The Gloriana with her 46ft. measured length can carry the sail area of a 65-footer, because she is built to sail on her side.

"Is this to be contemned as a 'smart Yankee trick' to weather the rules? Or is it to be considered as the fair and brilliant solution of the problem? 'How to combine the highest speed and best weatherly qualities in a yacht eligible to the 46ft. class?'

"Possibly such geniuses as Burgess and Fife will, adopting this idea, design boats that will outsail the Gloriana. It is more than probable that they will do so, for the mind that evolves a novel idea of this sort rarely carries it out to its most ultimate possibilities. But in the meantime the Gloriana remains to-day thoroughly proven the fastest and best of her class, and perhaps the practical answer to the main problem of yacht architecture."

* * * * * * * *



"The Gloriana's victories are the talk of the yachting world, and most of those who look into the matter are inclined to agree with the explanation for them offered in the *Herald* a few days ago—that she increases her waterline length very much as she heels over and consequently increases her power to carry sail and her speed.

"Mr. ——, a yachting writer and an amateur designer thoroughly grounded in the theory and not a little in the practice of the art, says the *Herald's* explanation is the correct one, and that it was on the peculiarity of the Gloriana's model, in regard to increasing her waterline length when heeled, that he based a prediction early in the season that she would be among the first four in the class, if not first. He saw the boat on the ways before launching and also the lines on the draughting board. From measurements given him he calculated the waterline when the boat is heeled at an angle of 10 degrees and found it to be about 55ft. Up to that angle of heel, which brings the yacht's rail a little more than half way to the water, the waterline lengthened very rapidly, but after that the increase is very slight. 'She makes this rapid gain forward,' says Mr. ——, 'because her bow is carried out very full beyond the normal waterline, and makes it aft because her quarters are very low. The full bow of a dory would not be a bad illustration of the principle of the Gloriana's bow. The waterline length she gains gives her additional buoyancy and therefore power to carry sail. Most of the naval architects thought the principle was wrong, but Mr. Nat. Herreshoff has proved it to be right.'

The question of a gain in effective length through overhanging ends is one that is frequently discussed by yachtsmen, and which has been elevated to a far higher degree of importance than it really deserves, but it has never been carried to such an absurd extreme as in the present case. The fallacy that a substantial gain in effective length can be effected by means of long counters and clipper stems has long been popular, in spite of the absence of any scientific reasons for it, and of much proof in the other direction afforded by the performance of plumb-stemmed boats with short counters. The familiar Cape Cod catboat is an example of a fast boat with square ends, and the 21½ rater, Glycera, whose lines we published April 21, is but one out of some two-score of successful boats by the same designer which have won from the clipper-stemmed craft. Even the moderate amount of gain which is possible in the case of a craft with long ends compared with one with square ends, is lacking in the case of Gloriana compared with the rest of her class, as all of the others are carried well out over the water, forward and aft, so that whatever gain accrues to Gloriana is shared by them in a great degree.

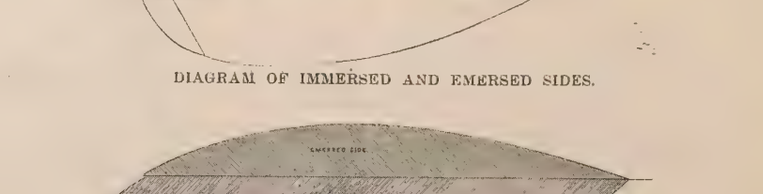
The theory we have quoted, that a yacht may measure but 46ft. when at anchor and yet increase this length by 20 feet as soon as she begins to move, is so absurd that the only wonder is that it has found any adherents, and yet there are not a few yachtsmen content to accept it as the true explanation of Gloriana's superiority.

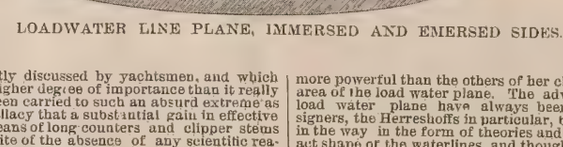
A look at the lines will show that such a yacht as Gloriana will actually shorten her waterline as she heels down on her powerful bilge, and can only increase her length by increasing at the same time her displacement, which we know is theoretically and practically constant, whether she is at anchor or at her highest speed. The increase of the displacement due to the pressure of the wind when under way is not only small in a boat of this size and type, but it is shared in common by all the boats of the class, Gloriana gaining no more in this respect than Mineola, Sayonara or Beatrix. We have shown on the drawing the inclined waterline at 25 degrees, a very considerable angle of heel, and in the accompanying diagram we have shown the true shape of the inclined load water plane, and above it, by the shaded portions, the immersed or leeward and the emersed or weather side of the yacht when heeled to this angle. The greatest length of waterline that can be measured in any direction is not 65 but 48ft. If this line be lengthened by depressing the bow, which by the way Gloriana does not do save in rough water, the stem must rise, thus shortening the after end of the waterline in short the only way in which a material lengthening of the waterline can take place is a great addition to the displacement which shall immerse the boat bodily and permanently.

"GLORIANA" IN DRYDOCK.

If we are not greatly mistaken, one of the leading principles of Gloriana's model is diametrically opposed to this theory of the lengthened waterline; the form which Mr. Herreshoff has evolved is one directly calculated to minimize the inevitable shifting of the centers which takes place, especially in disturbed waters; so far from seeking a change of length as the propelling force increases, the object seems to be to keep the immersed body as nearly as possible the same as each part is in turn supported by the wave. As the bow is immersed in a sea, the section at the fore end of the waterline, No. 0, is nearly of the same form as the next section abaft it, while this section in turn assumes the same shape and area as the next section abaft it. The midship section shifts forward to No. 6 or No. 5, without any radical change of form and area, while the sections taken out aft vary in the same manner. Not only Gloriana, but all the later boats show this same peculiarity, a form which may be depressed by bow or stern and yet retains nearly the same length of waterline and form and area of the immersed sections, and consequently of the whole under-water body. With such a form as this, the disturbing influences of a long, hollow bow dropping into a sea, or of a full heavy quarter immersed for a moment and then lifted out are avoided, with a great gain in easy motion, in speed and in steering.

No doubt a part of Gloriana's merit lies in this direction, but beyond this, she is unquestionably a very large and powerful boat for her class. This superiority does not lie in the direction of any fantastic expansion of the waterline, varying from time to time, but it is constant at all times, the yacht as she lies at anchor is larger and more powerful than the others of her class, by virtue of the extended area of the load water plane. The advantages of a large area of load water plane have always been realized by successful designers, the Herreshoffs in particular, but there has been an obstacle in the way in the form of theories and dogmas in regard to the exact shape of the waterlines, and though these theories have changed from time to time, they still exist, and have exercised a far too great influence with many designers.





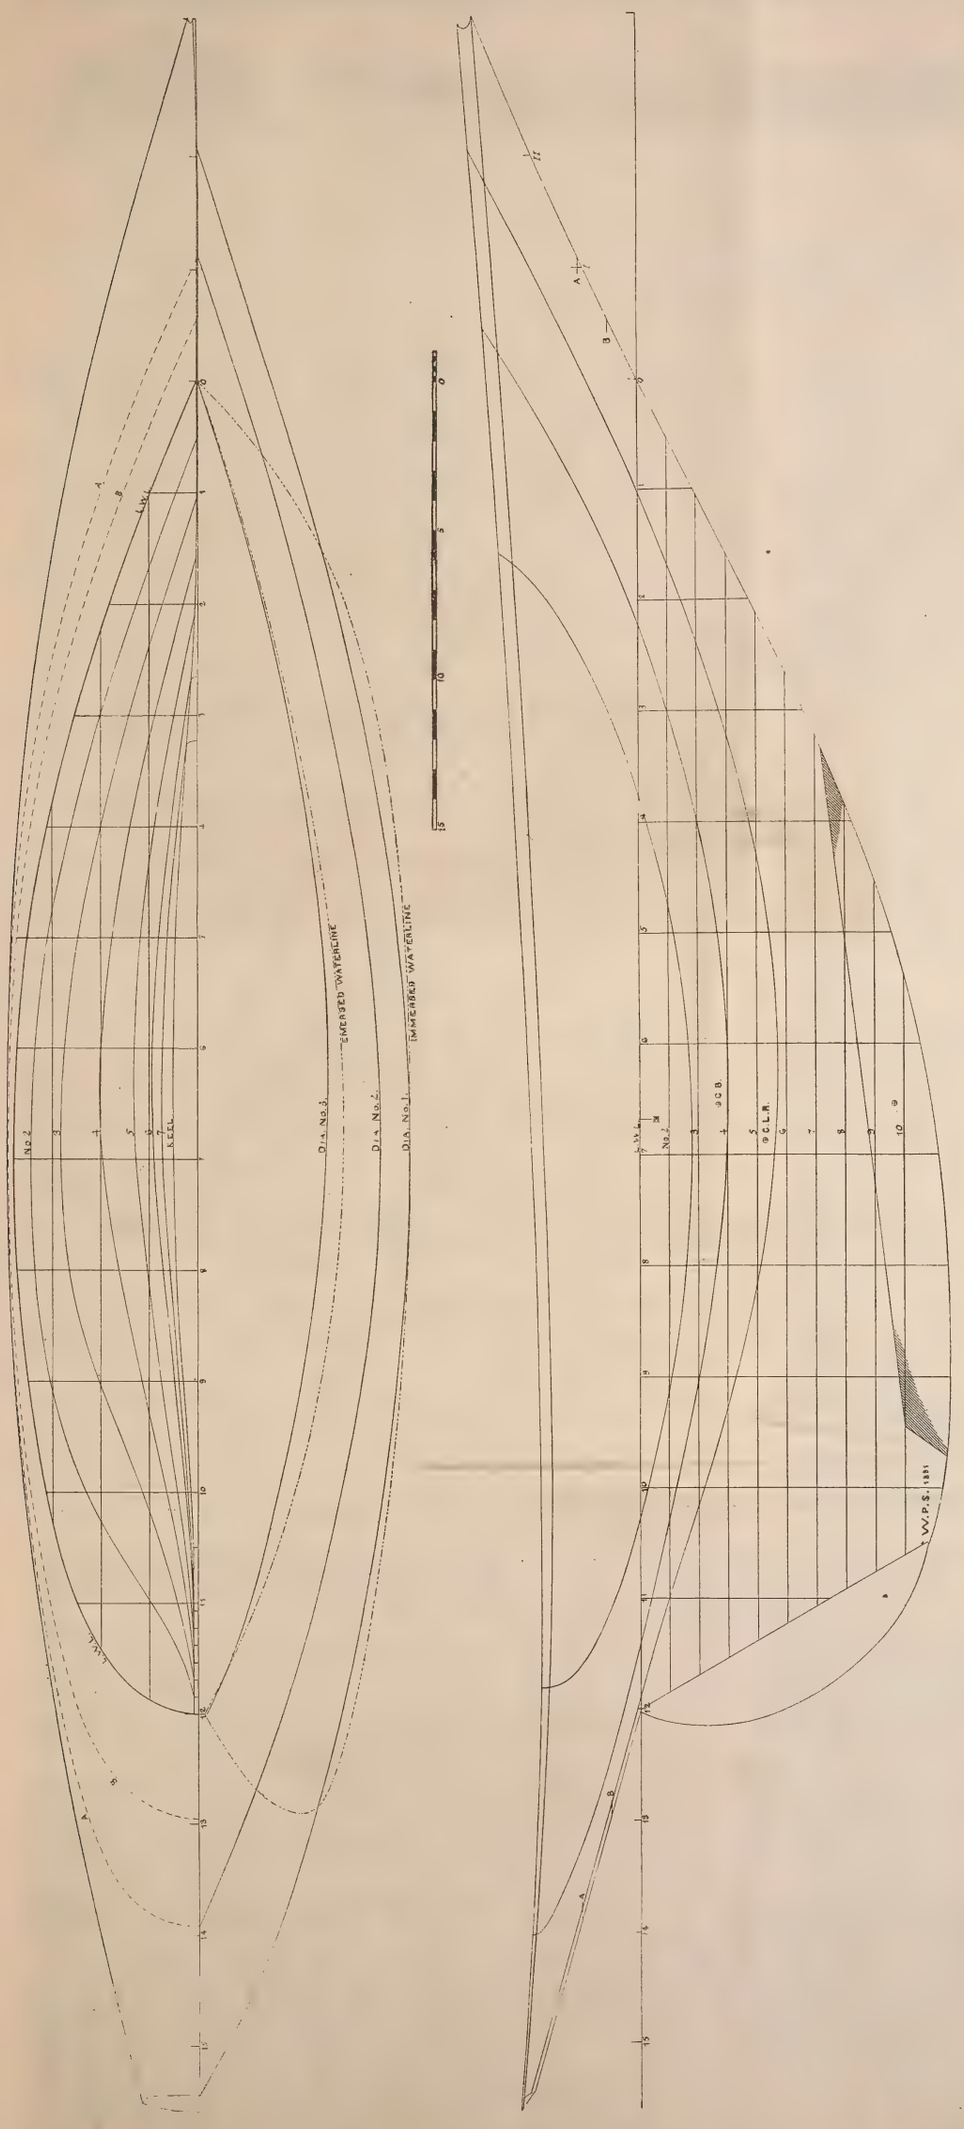


DIAGRAM OF IMMERSED AND EMERSED SIDES.

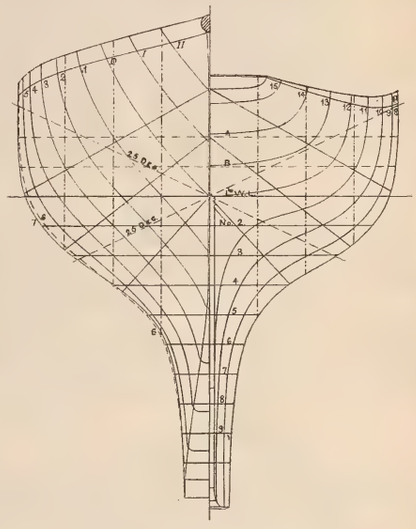
LOADWATER LINE PLANE, IMMERSED AND EMERSED SIDES.

Considering the ease with which the horizontal waterlines are obtained from a wooden model or laid down in a design, it is not surprising that in the course of years they should have been exalted to a position of importance out of all proportion to their merits, and should have taken precedence over all the other lines of a yacht. The young yachtsman from the first sees the waterlines prominently outlined on every model, he is treated to lengthy dissertation on the merits of a little hollow there and just so much fullness here, and if he takes up designing or turns to the books for information the waterlines confront him everywhere. The subordinate theories as to the exact shape of the waterlines may change from time to time, but the main theory, that the essential feature of a design is the form of the waterlines, has existed for many years. At one time the fad of



DESIGN OF 46-FT. YACHT SIMILAR TO "GLORIANA."

the day was for the "cod's head and mackerel's tail" form of waterline, following which, about the time of the America, came a complete revolution, by which the full bows and fine runs were reversed, the new theory being carried to its extreme in the wave line form of Mr. J. Scott Russell. While never returning to the old idea of the cod's head, the fashion in waterlines has changed greatly from time to time, until in the work of Fife, Watson and others a positively convex waterline is found.

For some years past the influence of the waterlines with the designers has grown less and less, the wave form theory has done much to destroy it, and Sir Robert Montague's investigations of the diagonal lines long since demonstrated their great value, but at the same time nearly every designer has become wedded to a certain form of waterline which recurs in all of his boats. Indispensable as they are to the draftsman and designer, forming a foundation on which a design may be readily constructed, the horizontal waterlines really form no essential feature of a design, and are of little importance compared with the diagonals and section lines

From the comments on Gloriana's form and on Mr. Herreshoff's remarks concerning her lines, it appears that there are still some to whom the diagonals are a complete novelty, and who assume that the boat is always upright, and that the water runs around it in horizontal layers corresponding to the waterlines marked by the light and dark lifts in a model; but the value of the diagonal lines has long been appreciated by the "rule o' thumb" men, as well as by the designers. The America is a conspicuous instance, George Steers depending for his shape in her as in all his yachts and pilot boats mainly on the diagonals as laid down on the mould loft floor, and on the same lines as shown by the ribbands when the yacht was in frame. The whole character of the model is shown better by the diagonals and section lines than by any others, a fact that was emphasized some 20 years ago by Mr. J. W. Griffiths, in his treatise on ship building, but which, up to the present time, has not been as generally understood as it should be. As Mr. Griffiths points out, the waterlines are valuable from their convenience, but they are important not from their own shape, but from the resulting shape of the diagonals and section lines. If it were not for the mechanical difficulties of the drafting, designers would be only too ready to abandon the horizontal waterlines entirely, and to start the design with the yacht not in a vertical but in an inclined position, at the average sailing angle, the section lines and diagonals alone being shown.

In designing Gloriana Mr. Herreshoff has apparently considered her from this point of view alone, he has boldly turned his back on

BODY PLAN.

the waterlines, striving merely to secure as large an area as possible for purposes of stability, and his attention has been directed almost entirely to the diagonals. These are long, clean and easy, the main diagonal, cutting the flat part of the floor, offering an unobstructed passage to the water, and being especially clean aft. Blunt and round as the immersed waterline appears to be, an easy passage for the water is provided underneath, rather than around, by the diagonals and buttock lines.

In all this there is no new principle, no great discovery, no marvelous invention, as some would have us believe, but there is a bold stroke of genius in the way in which Gloriana's designer has thrown aside all the conventional theories concerning the waterline, and broken a new path in which others are hastening to follow him. The value of the diagonals was established a generation ago, the desirability of a large area of loadwater plane has been realized by designers for years, the practicability of the convex waterline in certain types has long since been demonstrated by Watson and Fife, but at the same time designers have followed the conventional path, hampered by usage and tradition in regard to the particular form of waterline which they were at liberty to use in a wide boat, and it has remained for Mr. Herreshoff to remove the barrier to a field which promises to be productive of the best results in the future. In our opinion Gloriana would have been none the less valuable as a teacher had she been no better than third or fourth in the fleet; even in that case she would have served to disprove the old fallacies as to the importance of a special form of waterline, and to have started designers in the new direction. As a teacher she stands beside America and Mosquito; they served to disprove certain accepted theories which were directly in the way of progress, and she has done the same; having done this, the question of how many mugs she has won or may win becomes of little importance.

Looking at the actual value of the long ends, apart from the peculiar form of the boat proper, the first point noticeable is that while they result naturally from the carrying out the long fore and aft curves to their legitimate endings, a large part of each end might be cut off without loss of power, in fact, so far as speed in smooth water is concerned, and apart from all question of appearance, the two ends might be cut off plumb with the waterline, as in the scows to which Gloriana had so often been compared. Even with such a shortening as this she would possess the same load water plane and the same powerful and easy bottom, and her performance in smooth water would suffer but little. Forward the loss would be nothing, there would be the same entrance, the same lines below water, even when heeled. Aft there would be some loss, though by no means proportionate to the extreme length of the counter.

The value of after overhang was never better understood than by the builders of the type of sloop once in common use about New York under the mean length rule, the tax on overhang induced the designers and builders to take no more than the last inch that was absolutely helpful to the boat, and how much this was we know from Grayling, Fanita, Mischief and the rest of the old stub-tails. The counter was carried out, the center timber as low as in modern boats, but as soon as this timber was well clear of the water under all ordinary condition of heeling and immersion, it was chopped off abruptly. Those who have observed the modern boats traveling at a high speed have doubtless noticed that the quarter wave runs sometimes the entire length of the counter, but it must not be supposed that there is either stability or effective length for this distance; quite a considerable part of this water is probably carried along by the boat, with even a positive retarding influence, and the valuable portion of the entire after overhang is certainly not greater than a third of the average length.

Under a rule taxing overhang we would see Gloriana's ends cut off in proportion to the extent of the tax; taking the boat as she is, it would be possible to reduce both ends materially without harm to her sailing qualities, a matter of 4ft. off the stem and of 5ft. from the stern would, as will be seen from the design, make no important difference in the lines save a turning in short about the deck. Something of this kind is apparent in the new Wasp and the fin-keels, the bows of Wasp are even fuller than Gloriana about the waterline, but the lines are turned in quicker about the stemhead.

While we have for many years combatted the stupid and illogical rule which makes compulsory the building of none but square-ended yachts, with what success is shown by the almost general abandonment of the mean-length rules, and while we believe in the utility of both the clipper stem and long counter, as well as the right of a designer to put them on any boat; at the same time we are far from sharing the popular idea that such ends are in every way an unmixed

APPROXIMATE SAIL PLAN OF "GLORIANA."

advantage. Like all other features, they have certain good and certain bad points, the general tendency of owners and designers being to follow the fashion to its latest extreme, regardless of all underlying principles, as well as of the result on the yacht.

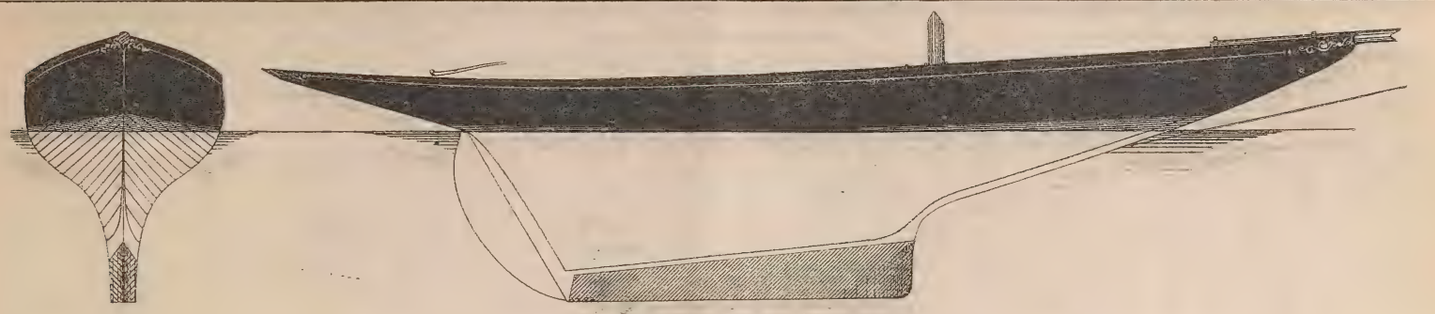
For rough water the value of a certain amount of overhang, especially forward, may be conceded at once; it is true that the trials made in late years between plumb-stemmed and clipper-stemmed craft, as Titania and Katrina, Grayling and Sea Fox, Clara and Cinderella, Pappoose and Baboon, Mayflower and Sachem, have not resulted in final and conclusive proof of the superiority of the clipper stem in a seaway; but it must be remembered that in all of these cases the clipper stems, so-called, were combined with the same form of waterline as in the corresponding plumb-stemmed craft, and in reality were little more than carved wood and gold leaf so far as any material filling out of the lines of the bow were concerned. In contrast with the old plumb stem they looked to the eye extremely long, but beside such a bow as Gloriana's they are seen in their true shape; but little more than the carved hackmatack knee bolted to the straight stempiece of some of the old sloops to make a clipper stem. In the sheer plan they show up boldly enough, but the true test is in the sections of the body plan, and such a comparison, for instance between Mayflower and Sachem or Volunteer, will show that the bows of the latter two are practically no fuller than those of the former.

The proper way to determine the value of the forward overhang is by comparing the bow in our design, especially as shown in the body plan, with any of the old plumb-stemmed designs, or even with the modern clipper stems. Such a comparison will show the radical difference between even the latest form of clipper stem and the peculiar bow devised by Mr. Herreshoff; and a trial of the two yachts in actual practice would, we feel confident, demonstrate fully the superiority of the Gloriana bow in really rough water. Gloriana has already shown that with her long bow, in conjunction with the very peculiar fore-body of which it is the result, a yacht can go dryer and easier than with any of the older forms of bow; and there is hardly ground for a further discussion on this point.

Sea-going qualities, however, count for little in most modern craft, comparisons of designs are naturally made from the standpoint of speed, above all else; and mere dryness and ease in a seaway are not enough in the absence of other qualities. The advantages of the long ends in point of speed are three, deck room, support to the spars, and beauty. The first is of no small importance, as with the exaggerated sail plans now in general use a large area of deck room is needed to work the ship, and the actual gain in square feet of deck is not only of value at all times, but especially so in racing with a large crew. At the same time the extension of the backbone of the ship well fore and aft beyond the ends of the waterline affords a support that is absolutely necessary for the main sheet and bowsprit, such a support as is had in square-sterned yachts by a trussed outrigger of wood and iron.

As regards appearance, something which few yachtsmen are willing to sacrifice if they can avoid it, opinion is almost exclusively on the side of the overhanging ends, the short stub stern being clumsy and inartistic to a marked degree, while even the pilot boat stem, shipshape and symmetrical as it is, lacks the graceful finish of a well-modeled overhang. If our view of Gloriana is correct, and the true merits of the design lie in the character of the waterlines and diagonals rather than in the mere overhang, the effect of a tax on overhang would be to produce a most awkward craft. The present form of the hull proper would be abruptly chopped off just beyond the waterline, leaving much the same form in the water when heeled, but with the grace and beauty of a wood scow. One chief function of the overhang on each end is to end gracefully and harmoniously the full lines of the hull proper.

The question of construction is closely connected with that of the support of the spars, previously mentioned, but in anything larger than an open sailboat the strongest as well as the simplest construction is that in which the fore and aft members, such as the keel, plank sheer, clamps, shelves and bilge-clamps are carried out to a common vertex at each end, where they all unite in forming a strong support for the gammon iron at the stem or the traveler at the stern. Incidentally, too, there is no small advantage, with modern sail plans in the carrying out of the forestay considerably further than in a plumb-stemed craft, thus allowing of such a foresail as is now considered essential.



The advantages of the long ends may be then summed up as follows: dryness and ease in rough water, larger working platform, lengthened support for bowsprit and main sheet, stronger construction, better form of foresail, improved appearance, and facility for the natural ending of all fore and aft lines. So far as any increased power, or of effective length of waterline, we have shown that the overhang has but a slight effect, which may be as marked in a yacht of the old sloop type as in Gloriana. In the plain rectangular scow there may be an appreciable gain of effective length through heeling, and it may be possible so to design a vessel of abnormal form as to gain materially in the altered position due to the wind pressure; but our remarks apply to all normal types of yacht, from Gloriana down to Gracie, Fanny and their fellows.

Looking now at the other side, two serious disadvantages are at once apparent, weight and windage. Not only is the added weight of the overhangs a disadvantage in racing, but it is carried in the worst possible position, high up and at the extreme ends of the vessel, lessening her stability and aggravating her vertical movement. At the same time a very considerable area of useless surface is exposed to the wind at the worst possible angle, the weather side of bow and stern being nearly vertical, driving the vessel bodily to leeward and at the same time knocking her head off. The total result of these two drawbacks is by no means beneath consideration, and they offset a great deal of the advantage gained in other respects; but with a very large sail plan the designer can still afford this loss for the sake of a gain in other directions.

Although the ordinary clipper stem has always been common among American yachts, the plumb-stemmed yachts of Ellsworth and a few others being the exception to general practice, the question of plumb vs. clipper stems may be said to date from the advent of the 10-tonner Buttercup in 1880, the first British cutter with other than a plumb stem. After following the discussion carefully since this time, we have reached the conclusion that a moderate length of overhang at each end is desirable on all yachts and essential in those carrying large sail plans, while on the latter only is an extreme length possible. As regards the peculiar forms of fore and after overhang recently introduced by Mr. Herreshoff, they can be used to advantage in almost all yachts.

Much has been said during the past year about the great gain on the part of the newer yachts in this respect, and the necessity of a rule restricting overhangs, and some have even gone so far as to suggest a definite tax, as in the old mean-length rules. That a yacht of last year with her long ends has a decided advantage over one five or ten years old may be very possible, but even if true, this amounts to nothing. There is, save in a few of the smaller classes, no disposition on the part of the old yacht to enter against the new, and even if there were, the disparity in construction, in canvassing and in points of design, would offer a far greater obstacle than the mere inequality in over-all length. So far as the new fleet is concerned, any advantage enjoyed by one is so equally shared by all the others that no legislation is necessary to secure the same fair chances for all.

The only grounds on which a tax on overhang could be based are that the boat with overhang is in some way inferior and less desirable than the best boat with square ends that can be built to the same class limit; and thus far no evidence has been adduced to support this. On any given waterline length, the yacht with overhanging ends has greater deck room, greater internal accommodation, is easier, dryer and handsomer and can carry her spars better and more safely than the yacht with little or no overhang; and until some substantial reasons are advanced for the latter or against the former, there can be no excuse for any legislation which will make our yachts similar in sheer plan to those built in America between 1880 and 1885. If at any time it should be considered advisable to place a tax on the overhang, it can be done far more satisfactorily than by the clumsy expedients once in vogue, of including a half or a third of the overhang in the measurement of the length, or of measuring at some distance above the true line of flotation. A heavier tax on sail will at once cut off all extremes of overhang,

"WASP," 46-FOOTER, 1892.

leaving the designer free to to do it in an artistic and graceful manner; with a heavier limit on the driving power, yachtsmen will very soon learn that they are paying too high a price for the weight and windage of excessively long ends.

There is one most interesting point about Gloriana which her designer alone can clear up, and on which thus far he has been silent. In studying the history of the America, the inquiring yachtsman will find that up to about 1845, or some five years prior to her construction, the work of George Steers was much like that of his contemporaries, the same bluff bows and fine runs; while in the America, as all know, the reverse is the case, she being a striking departure from the prevailing ideas. In tracing backward the Steers boats from the America to the earlier ones, many links are missing, the famous pilot boat, Mary Taylor, forms an important connection between the America and her predecessors, showing some marked steps of the great change, but the other steps, and the exact order of other models is well nigh lost; and it is not known to-day what suggested to Mr. Steers the first idea of the great departure which led Mr. Herreshoff to make in Gloriana a most radical departure from his previous practice are still unknown. The Herreshoff yachts, as a rule, were noted for plumb stems and short counters, many being built under a mean-length rule; but even in the cruising craft with which he has amused himself in experimenting for some ten years, the same characteristics are visible.

The well-known cat-yawl Consuelo, designed and built by him in 1883, is a good example, a large powerful model, with more than the average area of load water plane, but with a plumb stem and a very blunt counter, the total overhang being about 3ft. on 24ft. lwl. His second cat-yawl, Clara, built some four years later, is similar in model, though with 3ft. more length over all. The first evidences of a material change of model were in the two cat-yawls, Gawnet and Penguin, built late in 1890 for Vice.-Com. Morgan and his brother in-law, Mr. Moran. Both of these had bows similar to that afterward seen in Gloriana, but less extreme; at the same time showing a radical departure from earlier Herreshoff boats. They were tested thoroughly in the rough waters of Narragansett Bay and late in the season, their performance being so encouraging that the design for a 46-footer was finally made in which their characteristics were worked out more elaborately and to a greater extreme.

It has been said that the idea of Gloriana is derived from the common Barnegat sneakbox, but in spite of a general resemblance of the bows to the sneakbox and Norwegian pram, the differences are almost as marked as the points of resemblance. The sharp V sections of Gloriana's fore body and overhang have little in common with the semi-ovals of the sneakbox which makes her so much like a teaspoon. A much more plausible theory of the course of evolution by which Gloriana was produced was broached to us some time since by an observant yachtsman, who pointed out how the long forward overhang was directly obtained from the old form of boxy, but additions, but by starting at the stemhead and cutting away not only the forefoot but several feet of the waterline, giving to the new stem about the rake shown in our design. Such a cutting away in in any old yacht would remove a large piece of deadwood and the very fine end, with but small decrease of displacement, and by fairing the lines in to the new stem, the waterlines and sections would assume the general form of the Gloriana model. The reduction of forefoot has been general among designers for about eight years, being particularly noticeable in Thistle and all later yachts; until the lateral plane has assumed the form of a triangle. Other designers have stopped as soon as the waterline was reached, but Mr. Herreshoff has made a far bolder step, and with full appreciation of the price to be paid under any rule for each inch of waterline, and of the small value of length in the shape of merely a thin deadwood, he has cut away at both ends until the true body of the boat is reached.

To him is due the credit for the first perception of the gain to be made in this direction, for the courage to attempt the experiment in the face of these established theories as to the form of the waterlines which declared it impracticable, and for the skill which has made such a triumph in the first experiment. He has achieved the end sought by most designers, whether in open catboats, narrow cutters or the modern wide cutter, of combining the greatest amount of power with a form that is easy to drive and easy on her helm; whether this is the highest development of the problem of yacht designing, or whether a rule will in time be devised which will make it desirable to take less than the maximum amount of power, remains to be seen. While there are features in Gloriana's design which will be advantageous in any type of yacht, regardless of rules, the greatest advantages of her peculiar form are realized under those rules in which length of waterline is an important factor.

The merits of Gloriana have found a speedy recognition among designers in the immediate adoption of her forebody, which is likely to become too common to attract attention. The later work of Mr. Herreshoff has been fully described in the FOREST AND STREAM during the winter, all of the yachts, fin-keels, catboats and the new cutter showing the leading characteristics of Gloriana, though in some cases the actual length of overhang is noticeably short. In the new Wasp, whose approximate outline is shown in the cut, the forebody is still fuller than in Gloriana, so that the merits and limits of the new departure are likely to be definitely settled before the close of the season of 1892.

Massachusetts Rifle Association.

BOSTON, April 30.—The members and friends of the Massachusetts Rifle Association gathered at its range to-day in large numbers, to take part in the prize and practice matches, and the militia was also well represented. The shooting conditions were very unfavorable. Messrs. Paine, Foote and Harris won pistol medals, and Messrs. Avay and Francis shot a pistol match of 50 shots each, Francis winning. Below are the scores of the day, distance 200yds., standard American target, all being re-entry matches:

Silver Pistol Medal.

Won on 10 scores, 86 or better, by S. Paine 87 88 87 89 88 92 93 94 91 90

Bronze and Silver Pistol Medal.

Won on 10 scores, 81 or better, by E. Foote 84 84 80 88 82 82 82 82 85 82

Bronze Pistol Medal.

Won on 10 scores, 75 or better, by H. Harris 91 91 92 91 89 85 88 84 82 86

50-Shot Pistol Match, 50yds.

Greenville Scores.

JERSEY CITY, N. J., April 22.—The following scores were shot by members of the Greenville Rifle Club on Friday, 22d inst. at their range, 604 Ocean avenue:

*Capt Ropidoux	237	*W C Collins	227	†Geo Purkess	235
C Boag	234	C Plaisted	240	Jas Dodds	227
*Jos Kaiser	239	*J Boag	217	*J Hill	229

* Medal winners in respective classes. A source of considerable fun and sport is induced by the rivaly existing between two of its most enthusiastic members, Jas. Dodds and Uge Phierson. Both are earnest shooters, true sports and game losers, but Uge being the better shot outpoints Jem every time. However, as sure as the night of the weekly shoot comes around so sure is Jem's challenge on hand, and just as sure Jem gets beaten.—W. C. COLLINS, Sec'y.

Lischke Scores.

JERSEY CITY, April 29.—The A. Lischke Rifle Club held their weekly contest Friday, April 22, headquarters 17 Milton avenue, 110ft. range, 25-ring target. The scores of some members are as follows:

Capt A Lischke	25 24 24 24 24 23 23 23 23 23—236
Reicherz	25 25 25 24 24 23 23 21 20 20—230
Scharly	25 25 24 24 24 22 22 21 21 20—226
Strater	25 24 23 23 22 22 22 22 20 19 19—219
Schulie	25 25 24 24 23 22 20 16 15 11—205
Steidel	24 23 23 21 21 21 20 20 18 14—205

OTTO SCHULTE, Shooting Master.

New Jersey Rifle Shooting.

[Specially Reported for Forest and Stream.]

EXCELSIOR RIFLE CLUB, Jersey City, Tuesday, April 26. The regular weekly competitions for the several class medals closed to-night. Those who will retain the medals, having won them the most times in their respective classes, are: William Weber, first class; C. Bauchle, second class; Colin Boag, third class. Three medals were offered, one in each class, for the men making the best averages. The winners were: Ward J. Channing, William H. Robidoux and Colin Boag, in their respective classes. The total points made by the Excelsior men and the averages are:

	Total Points.	Scores.	Average.
First Class.			
Ward J Channing	6113	26	235
L P Hansen	6084	26	234
Wm Weber	6069	26	233
W J Hennessy	5575	24	232
Second Class.			
Wm H Robidoux	6008	26	231
C L Pinney	5962	26	229
C Bauchle	5937	26	228
T Hughes	5767	23	225
J Hughes	5829	26	225
Third Class.			
C Boag	6019	26	231
Geo C Varick	2496	11	227

The scores made to-night are appended below. The conditions were 10 shots, off-hand, 25-ring target, possible 250:

L P Hansen	25 25 25 25 24 24 24 23 23 23—241
Wm Weber	25 25 25 24 24 24 24 24 23 22—240
W J Channing	25 25 25 25 24 24 24 23 23 22—240
Wm H Robidoux	25 24 25 24 24 24 23 23 23 22—238
J Hughes	25 25 25 24 24 24 23 23 22 21—236
C Boag	25 25 25 24 24 23 23 22 22 21—234
C Bauchle	25 25 25 24 24 24 23 20 19 18—227
C L Pinney	25 25 24 24 24 23 23 22 19 18—227

The medal winners were: First class, L. P. Hansen 241; second, Wm. Robidoux 231; third, Colin Boag 231. The indoor season having closed, the members will now devote themselves to out-door shooting. A regular series of shoots with the Newark Schuetzen Corps has been commenced. The distance they will shoot is 200yds. The first match took place in Newark last Thursday. The organizations will meet semi-monthly, and therefore shoot once in Newark and Jersey City monthly.

Miller Rifle Club, Hoboken, Captain Richard W. Dewey, Wednesday, April 27.—The following scores were made to-night in the regular weekly shoot in the several classes. The conditions were 10 shots off-hand, 25-ring target, possible 250:

Invitations and cards bearing the list of prises to be distributed among the marksmen attending the shoot of the club at the Union Hill Schuetzen Park on May 30 (Decoration Day), have been sent to every rifle club, shooting society and schuetzen corps in this and New Jersey State. Over fifty clubs received them. All details, both great and small, have been attended to, and all that is hoped for is a nice clear day. The race for the two handsome medals donated by the club to the two men selling the most tickets for the festival has brought out many competitors, but the winners will probably be, first medal, H. Fred Meyer; second, Capt. Richard W. Dewey. The former is only a new acquisition to the club, but his hustling in the ticket-selling line has given him quite a local reputation. Hitherto Captain Dewey has had a monopoly on the first medal, but if he wins it this year he will have to sell four or five hundred to win. As yet Captain Dewey has not started in, but he will make the fur fly from now on. The Millers have not as yet changed their headquarters, notwithstanding the modest (?) request of the proprietor for an increase of eight dollars per month in the rent. But the club will "get up and get" inside of a week.

The Friday Night Rifle Club, with headquarters at 210 Washington street, Hoboken, meet regularly every Friday evening for practice. Their aim is to make their club a social one, they not particularly keeping down to shooting alone. In President August Grueber they have a hustler who is always on the lookout for articles which can be used for the advancement of the club's interests.

Freischutz Company, No. 53, Germania Schuetzen Bund, Captain Joseph Schauer, Sr., practice once every two weeks on the 100ft. range, which is situate at headquarters, Wisch's Hall, Third and Adams street, Hoboken. Though only possessing sixteen members, they have quite a number of expert handlers of the rifle, foremost among whom are Joseph Schauer, Jr., and Lambert Schmidt.

Company A Victorious.

THE shoot for the Colonel E. A. Stevens trophy, at the armory, Hoboken, open only to companies of the Second Regiment, N. G. N. J., ended last Thursday evening, and when the smoke of the battle cleared away it was found that Company A, Captain Sagendorf, had won the handsome prize, beating the team of Company D, who were expected to win it, by 11 points. Five teams of 10 men each were entered, three shooting on the first night, Tuesday, April 26, and two shooting on Thursday, April 28. The gun detachment also shot, using pistol, for a handsome prize. The scores made Tuesday are below. The conditions were 5 shots off-hand, 5-ring target, possible 25 per man, 6lb. trigger pull:

Co. A, Capt. Sagendorf.		Co. E, Capt. Jackson.	
First Sergt Allison	5454—20	Sergt Fox	5400 3— 7
Pvt Bruhn	2544—19	Corp Streter	4033 5—15
Pvt Givernaud	5444 3—20	Corp Fox	0002 2— 4
Pvt Pingeon	4433 3—18	Pvt Hilder	2020 0— 4
Pvt Walters	5545 3—22	Pvt Douze	2300 3— 8
Sergt Belanger	4543 3—19	Pvt Kretzner	2233 3—13
Pvt Selig	4443 2—17	Pvt Koopmann	3545 3—20

Pvt Birck	4444 4—20	Pvt Schenkenberg	2045 0—11
Pvt Demarest	4544 2—19—195	Pvt Von Cleft	2402 4—12—113
Average	19½	Average	11 2/10

Co. C, Capt. Rabodd.	
Corp Horneker	0223 3—10
Pvt Steil	4450 3—15
Pvt Soltenstahl	3424 2—15
Sergt Miller	5445 3—21
Pvt Corwin	4534 5—21
Average	15⅗

Co. E, Capt. Jackson.	
Sergt Fox	0400 3— 7
Corp Streter	4033 5—15
Corp Fox	0002 2— 4
Pvt Hilder	2020 0— 4
Pvt Douze	2300 3— 8
Pvt Kretzner	2233 3—13
Pvt Koopmann	3545 3—20
Pvt Schumaker	3444 4—19
Pvt Schenkenberg	2045 0—11
Pvt Von Cleft	2402 4—12—113
Average	11 2/10

Co. C, Capt. Rabodd.	
Sergt Sohl	2022 3— 8
Corp Augus	0004 0— 4
Corp Harroun	5445 4—22
Pvt Votteller	3335 4—17
Sergt Glaser	5444 4—21—154
Average	15⅗

The companies who finished up the shoot on Thursday, April 28, with the scores made by them are appended below:

Co. D, Capt. Lohman.		Co. B, Capt. Buttenbaum.	
Sergt Gunkel	4454—21	Pvt Buttenbaum	2404 2—12
Corp Weaver	4444—20	Pvt Berenbrock	0443 4—15
Pvt Weimer	4233 3—15	Sergt Wolf	2354 4—15
Sergt Holm	3352 5—18	Pvt Kirschgessen	4223 3—12
Pvt Heuberg	2445 4—19	Pvt L Ber	4334 3—17
Corp Eggers	2523 3—15	Sergt Sheehan	0452 4—14
Pvt Coulihan	4444 3—19	Pvt Bosse	3042 5—14
Pvt Roland	4354 4—20	Pvt Smith	3534 4—19
Pvt Walters	4334 2—16	Pvt Frosia	4464 4—21
Pvt Spahn	3445 5—21—184	Pvt Sturn	4344 4—19—159
Average	18⅘	Average	15⅗

So it will be seen the teams finished thusly: First, Co. A, 195 points; second, Co. D, 184 points; third, Co. B, 159 points; fourth, Co. C, 154, and fifth, Co. E, 113. A handsome special medal was also offered to the shooter making the highest score during the shoot. Pvt. Walters, of Co. A, and Corp. Harroun, of Co. C, tied with totals of 22. Each man on the winning team will be presented with a medal.

The scores made by the gun detachment are appended below:

Corp Still	4343—14	Pvt Schwarz	0000— 0
Pvt Sachs	4040 2— 6	Pvt Ording	0020— 2
Pvt Thiess	4020 3—11		

The members of Co. A are jubilant over the result. They attribute their winning the trophy to the indefatigable efforts of the officers to bring the men together. A match has been arranged between Co. A and D for a $25 trophy. The latter will have to hustle to win the match from the regiment crack company. The latter are getting in several more good shots, thereby strengthening. J. H. Kruse has been proposed as a member. The presentation of the prizes will take place in a few weeks' time.

The Zettlers.

NEW YORK, April 26.—The Zettler Rifle Club concluded its indoor season with the last of twenty-five shoots at their headquarters, 219 Bowery, on Tuesday evening. Fifteen men faced the target, and some fine scores were made. Mr. Dorrler succeeded in equaling Dr. J. Boyken's fine record of 249 out of the possible 250, the two scores being on the top rung in this year's match. The other scores, strings of ten shots, off-hand, 2in. bullseye, 25-ring target, were as follows: J. A. Boyken 248, B. Walther 248, H. Holges 245, M. B Engel 245, G. Nowak 243, C. G. Zettler 243, L. Flach 242, F. Ross 242, B. Zettler 242, F. Schmidt 242, M. Tropp 238, F. Lindklositer 236, F. Hecking 230, F. Fabarius 230.—GUS. NOWAK, Secy.

Americans at Bisley.

FOR the encouragement of long range rifle shooting at the coming Bisley meeting of the English National Rifle Association, a silver cup of the value of $250 has been donated by Mr. Wm. L. Winans, of Baltimore, for competition at 1,000yds.

71st Regiment Matches.

THE success of the 7th Regiment members in carrying on a series of winter matches in the armory has determined one inspector of rifle practice to do something of the same sort. This is Capt. Edwin Gould, of the 71st Regiment, and he has really accomplished a great deal under very untoward circumstances. Just now the command is camping around, as it were, in this and that hall, hoping and waiting for the completion of the new armory. But there were the men, the trophy and the will, and it did not take the energetic young captain long to find a place for his men to show their skill. A request for the privilege of using the 7th Regiment shooting tunnels promptly met with an affirmative response, and on April 25, 27 and 28 the various company teams of the 71st Regiment occupied their fellow guardsmen's quarters. The trophy shot for was the Zabriskie trophy, a fine work presented about a year ago by Capt. Andrew C. Zabriskie and receiving its initial competition. Every company in the regiment had its team of 10 men and each man fired 5 shots offhand at the 200 and 5 shots prone at the 500yds. target. A team of each company shot on each evening, and the aggregate of the three grand totals fixed the first winners as Capt. Smith's men of Co. B, with a total of 1,052.

The scores were as follows:

Co. B.	1st night.	2d night.	3d night.	
Capt C H Smith	40	35	43	
Lieut T W Timpson	29	30	38	
First Sergt F D L Walker	42	37	41

	1st contest.	**2d contest.**	**3d contest.**	
Co A	312	333	373—968	
Co D	286	280	265—831	
Co F	257	282	301—840	
Co K	298	295	328—921	

During the contests full strings at bullseyes of 500yd. target were made by Lieut. Col. Dennison and Capt. Goss, Co. K.

Co. H was a vigorous second, but had a measure of revenge by distancing Co. B by just one point in the Homer trophy match, fired by teams of five men at the 200 and 500yds. targets. The scoring in this match ran:

Co. H.	200	500	T'l
First Lieut Fisher	19	13	32
Second Lieut Ross	21	22	43
First Sergt Roberts	15	14	29

The Seventy-first Regiment has adopted an armory button similar to that of the Seventh Regiment, and every evening, except Saturdays, for two weeks, beginning April 11, different companies have tried to qualify their men. During that time each company has had two chances to qualify its men, and the interest taken by the men has been very great, with the result of 260 qualifications; very satisfactory, indeed, considering the absence of previous practice.

South St. Louis Sharpshooters.

ST. LOUIS, Mo., April 18.—The South St. Louis Sharpshooters will give a tourney May 8, at their range across the Mississippi River in Illinois. Broadway cable cars to Anna street. Then take Anna street ferry.

There will be four tournaments given by our club at the Creve Cœur Lake grounds this year—one in April, one in May, one in August and one in September. These will be each a two days' shoot. The South St. Louis Club will probably give the same number.

The Millwaukee Sharpshooters have notified us that they hold a tournament May 13, 14, 15. I think some of the St. Louis boys will take it in. SAM G. DORMAN.

The 9:30 train of the Missouri Pacific Railroad, which pulled out of the Union Depot April 24 for Creve Cœur Lake, carried a jolly crowd to the rifle tournament given by the St. Louis German Sharpshooters. At the close of the shoot, and after a short address by our genial president, Dom. Delabar, prizes were awarded according to the following scores:

German Ring Target.

L Schwinghoefer	69	S G Dorman	67
F Lendi	67	C K Dunkerley	64
P Schook	67	G W Alexander	63
V Rapp, Jr.	67	D Wiget	60
H Vogel	59		
C Mueller	59		
R Bethmann	58		
Wm Baaer	58		

Point Target.

NAMROD.

Garden City Rifle Team.

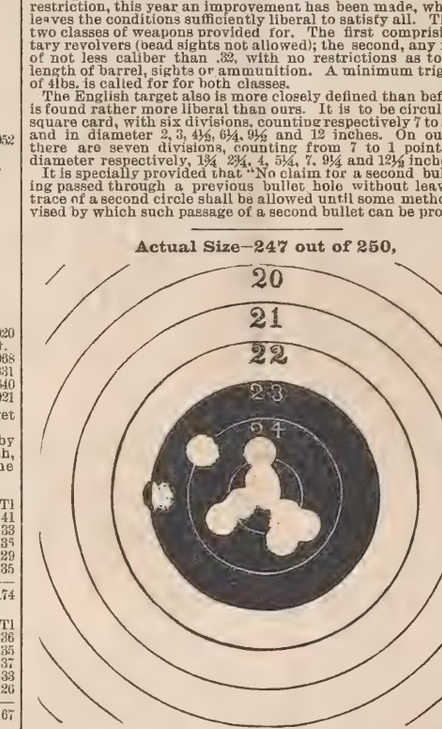
THE Garden City Rifle Team met for their weekly contest Tuesday evening, April 26, at Geo. McCune's shooting gallery, Chicago, Ill.; 25yds., 25 shots, open sights, free off-hand position, Massachusetts paper target, possible 300:

H S Burley	272	A McBean	265
W J Gibbs	271	R Taylor	260
C A Hankle	269	W J Myers	260
Geo McCune	269	Thos Ford	259
M Tatro	252		
R McBean	251		
W Frisbie	250		

In sweepstake shot after regular club shoot Hankle won by a score of 110 out of a possible 120 points.

The Revolver in Canada.

THE *Canadian Militia Gazette* rightly takes the rifle associations of the Dominion somewhat to task for the fashion in which revolver competitions have been treated in the making up of meeting programmes. It says:



Strictly speaking it may be no part of the business of a "rifle" association to concern itself about revolver practice. But as the rifle meetings everywhere are attended so largely by officers and others whose weapon is the revolver rather than the rifle, the associations have acted the useful part of auxiliaries for encouraging the attainment of proficiency with the former also. True, the work has been done about in a very half-hearted manner, and the revolver competitions at our central meetings have been very tame indeed—the least interesting of all being that at the D. R. A. meeting last year, when only about ten or twelve competed. The reason for this complete lack of interest was the adoption of the rule calling for nothing less than the immense calibre of .44, and a 7½ inch barrel. This announced attempt to popularize the use of a "strictly military" weapon having so signally failed, it behooves the executive of the D. R. A. either to declare that the revolver match serves no useful purpose and will not have a place in the programme, or else to take steps to popularize it.

The National Rifle Association of Great Britain is naturally and properly followed by ours in nearly every respect concerning the firing conditions, and if no exceptions were made of the revolver competition we believe there would be very general satisfaction. In England hitherto the fault has been rather a lack of definite restriction, this year an improvement has been made, which still leaves the conditions sufficiently liberal to satisfy all. There are two classes of weapons provided for. The first comprising military revolvers (bead sights not allowed); the second, any revolver of not less caliber than .32, with no restrictions as to weight, length of barrel, sights or ammunition. A minimum trigger pull of 4lbs. is called for for both classes.

The English target also is more closely defined than before, and is found rather more liberal than ours. It is to be circular, on a square card, with six divisions, counting respectively 7 to 2 marks, and in diameter 2, 3, 4½, 6¼, 9½ and 12 inches. On our target there are seven divisions, counting from 7 to 1 point, and in diameter respectively, 1¾ 2¾, 4, 5¼, 7, 9¼ and 12½ inches.

It is specially provided that "No claim for a second bullet having passed through a previous bullet hole without leaving any trace of a second circle shall be allowed until some method is devised by which such passage of a second bullet can be proved.

Actual Size—247 out of 250.

Made by E. J. Travis, March 17, on ranges of Wurfflein Rifle and Pistol Club, Philadelphia, Pa.

Rifle vs. Revolver.

TORONTO, April 23.—A match of a rather novel and interesting nature was fired this afternoon between a team of six members of the Q. O. R. of Canada Revolver Association and the same number of the Toronto club of the Dominion Off-Hand Rifle Association. Conditions, seven rounds, Q. O. R. C. R. Association target; ranges, the revolver team at 25yds., the rifle team at 75yds. Team aggregates, Q. O. R. C. R. A., 147 points; Dom. Off-Hand, 166 points, being 19 points in favor of rifles.

Trap Shooting.

All ties divided unless otherwise reported.

FIXTURES.

If you want your shoot to be announced here send in notice like the following:

May 5.—New York County Gun Club monthly shoot, at Dexter Park, Long Island.
May 6.—Crescent Gun Club, Dexter Park, Long Island.
May 6.—Union Gun Club, fifth monthly prize shoot and open tournament at Springfield, N. J.
May 7.—South Side Gun Club, Newark, N. J.
May 7.—Sewaren Land and Water Club, at Sewaren, N. J.
May 7.—Sweepstake shooting at Watson's Park, Burnside, Ill.
May 7.—New Jersey Shooting Club, Claremont, N. J.
May 7.—Dexter Park Shooting Association, at Dexter Park.
May 7.—Verona Rod and Gun Club, Pittsburgh, Pa.
May 9-12.—Texas State Sportsmen's Association tournament at Dallas, Texas.
May 10-12.—The Ohio trap-shooters' annual tournament, Columbus, O.
May 10-12—Mankato Gun Club tournament, at Mankato, Minn.
May 10-12.—Geneseo Gun Club tournament, at Geneseo, Ill.
May 10-12.—Williamsport Rifle and Gun Club, fourth annual tournament, at Williamsport, Pa.
May 10-13.—Nebraska State Sportsmen's tournament, Grand Island, Neb.
May 11-12.—Cortland County Gun Club, kingbird tournament, Cortland, N. Y.
May 12.—Unknown Gun Club, at Dexter Park, Long Island.
May 12.—Newark Gun Club, Bloomfield ave., Newark, N. J.
May 14.—New Jersey State Trap Shooter's League, at Rutherford, N. J.
May 16.—Paterson Rod and Gun Club, regular shoot, at Paterson, N. J.
May 16-19.—Capital Gun Club annual tournament, at Washington, D. C. Arthur S. Mattingly, Sec'y.
May 17-18.—Oregon State Sportsmen's Association tournament, Salem, Ore.
May 17-19.—Grand tournament at Indianapolis. For programme, etc., adress Chas. Polster, 149 Indiana avenue, Indianapolis.
May 17-20.—Annual tournament of Kansas City State Sportsmen's Association, at Council Grove. G. W. Cleck, Sec'y.
May 19.—Essex Gun Club, Marion, N. J.
May 19.—Falcon Gun Club monthly shoot, at Dexter Park.
May 19-20.—Big Four tournament, Burlington, Iowa.
May 20.—Marion, N. J., 50 live birds, $50 entry. Name of shooter, with $10, to be sent to C. H. Townsend, 318 Broadway, New York.
May 20.—Jeanette Gun Club, at Dexter Park.
May 20.—Parkway Gun Club, Dexter Park, Long Island.
May 20.—Atlantic Rod & Gun Club, at West End, Coney Island.
May 23-25.—Altoona, Pa., first annual tournament, at Wapsonocok Shooting Park. For programme address W. G. Clark.
May 24-26.—Iowa State Association tournament, at Des Moines, Iowa.
May 24-26.—Knoxville Gun Club, annual tournament, at Knoxville, Tenn.
May 24-27.—Windsor Keystone Gun Club tournament, at Windsor, Ontario, Canada.
May 25.—Glenmore Rod and Gun Club, Dexter Park, L. I.
May 26.—Emerald Gun Club, at Dexter Park.
May 26-27.—Harrisburg Shooting Association, third annual spring tournament, at Harrisburg, Pa.
May 26-27.—Carmen Gun Club tournament, Carmen, Ill.
May 27.—Linden Grove Gun Club monthly shoot, at Dexter Park, Long Island.
May 30.—Canajoharie Gun Club, king bird tournament, at Canajoharie, N. Y.
May 30.—White Plains Gun Club tournament, White Plains, N.Y.
May 30.—Op-n shoot and team match for Connecticut Keystone Trophy, under the auspices of the Bridgeport Gun Club, at Bridgeport, Conn.
June 1-3.—Minneapolis Gun Club tournament, Minneapolis.
June 6-11.—Eighteenth annual tournament of Illinois State Sportsmen's Association, at Chicago. W. L Shepherd, Sec'y.

July —.—Interstate Manufacturers' and Dealers' Association tournament, at Watertown, N. Y.
July 21-22.—Independent Gun Club tournament, Plainfield, N. J.
Aug. 9-12.—Pennsylvania State Sportsmen's Association's annual tournament, Reading, Pa. Walter D. Eller, Sec'y.
Aug. 10-12.—Missouri State Amateur Association tournament, at Lexington, Mo. Added purses. Address G. A. Sturges, Sec'y.

DRIVERS AND TWISTERS.

THE great attractions the coming week for trap shooters are the tournaments of the Williamsport (Pa.) Rifle and Gun Club; Texas State Sportsmen's Association, at Dallas; Ohio State Association, at Columbus; Mankato (Minn.) Gun Club; Geneseo (Ill.) Gun Club; Nebraska State Association, at Grand Island; Cortland County (N. Y.) Gun Club, and New Jersey State Trap Shooters' League. This gives a variety of places that will suit shooters from all over the country and give them all a chance to try their skill and nerve in fast company.

* * *

When the writer arranged the conditions for the fifty-bird match that took place at John Erb's grounds in Newark on April 27, it was considered more of an experiment than anything else, and friends assured him in strict confidence that he would be "unable to get more than three entries." The results proved conclusively that the "friends" were wrong, as seven men took part in the shoot. This was perfectly satisfactory to the projector. At the request of a number of shooters, among whom may be mentioned Al Rust and John Rothaker, of Philadelphia; M. H. Fox, of Trenton; Allen Willey, of Hartford; M. F. Lindsley and E. Collins, of Hoboken, and H. E. Smith, of Newark, another big shoot has been arranged, the conditions to be as follows: Fifty live birds per man, $50 entry, 28 and 30yds. rise, modified Hurlingham rules to govern, shoot to take place at Al Heritage's grounds, Marion, N. J., on Friday, May 20, at 10:30 A. M. If there are seven to eleven entries there will be three moneys; twelve to fifteen entries, four moneys; sixteen to nineteen entries, five moneys; twenty or more entries, six moneys. Those shooters who desire to enter are requested to send their entry along with $10 forfeit money to C. H. Townsend, trap editor FOREST AND STREAM, 318 Broadway, New York city.

* * *

The majority of the New York and New Jersey shooters who are at Pittsburgh this week will go directly from that city to Williamsport, Pa., to attend the three-days' shoot of the Williamsport Rifle and Gun Club. This organization offers a splendid programme and is certain to draw big lists of entries. The awards of average moneys to the highest aggregates in the 60, 70, 80 and 90 per cent. classes will give a winning chance to everybody. The regular purses will be divided as usual into 30, 25, 20, 15 and 10 per cent. Targets at 3 cents each will be deducted from all purses. The big event of the second day will be a contest for teams of two men each, 15 singles per man, $3 entry per team. Shoot No. 9 on the same day will be at 25 singles, as will be Event No. 4 on the third day. The grounds of this club are splendidly located in the most picturesque part of Lycoming county and affords some unsurpassed scenery. The members of the club are determined to give everybody a good time during their three-days' stay.

* * *

At Marion on Saturday Al Rust, the well known Pennsylvania expert, broke 23 out of 25 bluerocks under expert rules. This is a good score under any conditions, but is a remarkably fine one under these conditions. He used a 12-gauge Parker gun and American wood powder.

* * *

The Auburn Gun Club is anxious to know when the Interstate Association will announce positive dates for the tournament to be held at Auburn in August. The dates will possibly be the 9th, 10th and 11th.

* * *

Harry Whitney, the old-time "boy wonder," of Phelps, N. Y., whom the writer has had the pleasure of meeting at various shoots in New York State, is one of the most modest youngsters in the business, although away beyond the boyhood stage. He shoots about as stiff a gait as ever and generally manages to be in the vicinity of the cashier's box about the time the winners are called for. When Harry started in on his shooting career—at Syracuse in 1882—he was a shaver of thirteen summers and the same number of winters, and was called "built in a heap," being about as broad as he was long. At Syracuse he astonished the talent by his work at glass balls. During the three days he made the highest average, had the highest number of straight scores and also scored the longest string of consecutive breaks. At the State shoot at Buffalo he won the R. V. Pierce diamond badge, in a contest at 15 live birds, 21yds. rise, one barrel, gun below the elbow until bird was on the wing. Whitney and two others tied on 15 kills each and shot off at 5 birds, 26yds. rise. Here Whitney and Luther tied again on 5 kills each, the other man being shot out. On the final shoot-off at 5 birds, 31yds. rise, Whitney won, making 5 kills to Luther's 4.

* * *

The Boiling Springs Fish and Gun Club, of Rutherford, N. J., are always endeavoring to stimulate the shooting interest of their members, and are about to inaugurate a new series of contests. On the second Wednesday of each month hereafter the members will take part in a series of live bird contests for prizes valued at $50, and on the first Saturday of each month they will shoot at bluerock targets for a whole stack of cash and merchandise prizes. The grounds are being put in first class condition, and will be in apple-pie order on May 14, when the club will engineer the fourth monthly contest of the New Jersey Trap Shooters' League, in conjunction with which they will run an all day tournament.

* * *

In connection with the arrangement of the above tournament I wish to congratulate the Boiling Springs people upon their foresight in using two sets of five traps instead of the old style of one set of five. When the New Jersey League first started the writer advised the use of two sets of traps, claiming that at least 3,000 more targets could be thrown than by the use of the 10-trap system. In shooting the 10-trap system ten men are obliged to wait for one man to shoot, while by shooting from two sets of five traps each, two men are blazing away all the time. Another drawback of using the 10-trap system at these shoots is that sweepstake shooting has to stop entirely while the team contest is going on. At Rutherford one set of traps will be used for sweeps while the other is being used by the teams.

* * *

The fifth monthly prize shoot and open to all Keystone tournament of the Union Gun Club will take place at Springfield, N. J., to-morrow. In the club contest each member will shoot at 25 singles, from unknown angles.

* * *

The White Plains (N. Y.) Gun Club informs us that a clay-pigeon tournament, open to all, will be held on their grounds on Decoration Day, beginning at 10 A. M. These grounds are well equipped for trap events, and the members will assure a pleasant welcome and lots of sport to all who visit them.

* * *

The dates for the kingbird target tournament of the Cortland

County Gun Club at Cortland, N. Y., have been changed from May 11 and 12 to May 10 and 11 in order that the affair might not conflict with other shoots.

* * *

Everybody in the shooting fraternity knows rosy-cheeked Will K. Park, who is doing such good work with the guns manufactured by the Wilkes-Barre Gun Company, and will be pleased to know that they will meet him "around the circuit." He is now in charge of the office affairs of the company, but expects to go on the road at an early date. He is now organizing a gun club in Wilkes-Barre, Pa., and is confident of bringing it to the front rank.

* * *

The third annual tournament of the Kansas State Sportsmen's Association, to be held at Council Grove, on May 17 to 20, inclusive, promises to be a big affair. The programme is a mixed one at both live birds and bluerock targets, and special events are arranged for those who are not eligible to shoot in the State events. In open event No. 2 on the third day the conditions are ten live birds, $12 entry, with $32.50 added to the purse by the Council Grove Gun Club.

* * *

Mahlon Fox is not satisfied with the result of his recent match with M. H. Ruppell and offers to shoot the latter another match at 50 birds for from $100 to $200 a side, 28 or 30yds. rise, 21yds. boundary.

* * *

Billy Wagner wants us to tell the shooters that they may be assured of a "red hot time" at Washington May 16 to 19, inclusive. He says the members of the Capitol City Gun Club intend to exert themselves to make everybody feel at home. If they are all as jolly as Billy the visitors need have no fear of being dull.

* * *

Knoxville, Tenn., will be the Mecca for trap shooters on May 24, 25 and 26, the week following the Washington shoot, and a number will go directly from the latter place. On each of the three days there will be ten regular programme events at 15, 15, 15, 20, 15, 25, 15, 20, 15 and 15 single bluerock targets respectively. The entry for the 15-bird events will be $2; for the 20-bird events and for the 25-bird events $3. The club will add to purses $155 on the first day, $150 on the second day, and $190 on the third day. Event No. 4 each day, at 20 singles, will be for eight merchandise prizes, in addition to the entry fees and $20 added money, the entry being $3. There are also five merchandise prizes for the best averages each day. Event No. 6 each day is at 25 singles, $3 entry, with $35 added on each the first and second days and $30 on the third day. As special inducements ten prizes, the first an L. C. Smith hammerless gun, will be presented to those making the best averages in all three of the No. 4 events, and four prizes will be awarded for best averages to those shooting in all three of No. 6 events. The first of these prizes is a hammerless gun, presented by the American Arms Company. One year's subscription to FOREST AND STREAM will be presented to the shooter winning first place in No. 4 event on the second day. Arrangements have been made by which the round trip from New York, including sleeping berth each way, will cost only $38.14. Shooters may leave New York on the Shenandoah Valley Express (Pennsylvania Depot) at 5 P. M. on Sunday, May 22, and reach Knoxville at 6 P. M. on Monday. The route leads through Shenandoah Junction, Luray Grottoes, Basic, Buena Vista, Natural Bridge and Roanoke.

C. H. TOWNSEND.

The Tomato Can Shooting Club.

SEVEN STAR TAVERN, Pa., Dec. 25.—Dr. Tooley says that you want reports of all kinds of shooting, and that I should write out what our boys have been doing. That he would send the report to you. Dr. Tooley takes your paper. He told us about the shooting of Mr. Brewer and Mr. Fulford, and the great amount of fun so many clubs have shooting at artificial targets, which sail off just like birds. None of us boys ever shot at anything flying or running except rabbits. Game has gotten very scarce here, only squirrels, pheasants, rabbits and turkeys to hunt, and not many of them. The husking and apple-butter boiling have gone out of fashion, so about all the fun we boys have left is pitching horseshoes, going to meetings and seeing the girls home and staying with them nearly to morning.

Seven Star Tavern is about seven miles away from any town. Always gets a license, so most of the men from a good ways round gather there at times, pitch horseshoes for fun and drinks, tell stories and talk about all sorts of things. Dr. Tooley is often there. He is a great politician. We all like him. He generally manages to get to Seven Stars if he has anybody sick in the neighborhood, and it seems he nearly always has somebody to attend to on Saturdays and rainy days. He beats everybody telling stories and saying funny things to make the boys laugh. Mr. Fox, the tavern keeper, says it's because the doctor is an Irishman. He plays a good many tricks on the boys, but nobody gets mad at him. He always treats when he does something real funny.

One day the Doctor told us that we ought to make a gun club and learn to shoot pigeons flying, as there were plenty of them at all the barns that we could buy for ten cents, and catch a good many at night for nothing. The Doctor said we ought to have a trap to throw them up, but that we could shoot at them if one fellow stood off a piece and chuck them by hand. So we got a lot of pigeons, and one Saturday we tried shooting pigeons flying. Jake Wurst agreed to throw them. Dave Loudenslager was the first one to try. Dr. Tooley had told us to stand fifteen steps away from thrower. The pigeon went up straight, then right over Dave and he didn't shoot at all. Joe Lauver came next, the pigeon flew all sorts of ways going up, up, nearly out of sight, and Joe was just watching it like all the rest of us. Then Bill Auker had a turn. He said, be durned if he wouldn't shoot if he did miss, that he wasn't going to climb all over barns in the dark to catch pigeons just to see them fly away without shooting. Wurst chucked out a pigeon for Bill, which scooped down a little to right of thrower, and sure enough Bill's gun went off. Bill said he wasn't ready. The thrower was mad, said that he wasn't going to throw pigeons for no such durned fools and take more chances of getting shot than the pigeons had. Nobody would throw, so we quit. The crowd was pretty big, and they laughed and teased awfully. Just then Dr. Tooley drove up. We told him that nobody could hit pigeons flying. The Doctor said that he would try. So he took Bill Auber's gun, which was a long gun. It was marked "Manton, Maker." Doctor said he guessed it was made in Germany. He loaded both barrels, and picked out a big blue rooster pigeon which he said could fly, he thought, as no one would throw for him. So he took it in his right hand and threw it. The pigeon went up and down, right and left, and off like a bullet. Everybody was hollering "Shoot!" and laughing and watching the pigeon get away. Bang! went the gun, and blame me if that pigeon, more than forty yards away, didn't go tumbling head over heels toward the ground. Bang! went the other barrel, and it seemed as if all the feathers left on the pigeon after the first shot flew off at the second shot. Then the crowd yelled. I never heard such shouting at a bush meeting. Then the Doctor treated. The boys think that the Doctor has a deal with Mr. Fox, and don't pay full price; but we don't care as long as we are in. After old Mike Brubaker had his drink—he is always bragging and grumbling—he said the Doctor's hitting that pigeon was just accidental. Nobody could hit that very often, and it was all nonsense wasting powder and shot.

In the good old days when he was young, folks only shot at squirrels, turkeys, deer and bear, and wanted to be mighty sure of killing. Then Peter Oberwolster told him to shut up, for he knew the Doctor could hit flying, for one day he had come across the Doctor hunting. The doctor had a kind of long-haired dog with spots black all over him and the rest was white. The dog just went around with head away up, and did not seem to be smelling for anything. After a while the dog got behind a pine thicket, and when the Doctor and me found him he was standing still as a sitting rabbit, with head up and one foot. Doctor said he was pinting. "Pinting what?" says I. Then the Doctor walked right past that dog and chased up a pheasant that went like lightning into the pines. The Doctor shot and the pheasant was aflopping on the ground. I just know that the Doctor couldn't have seen that pheasant for ten feet before it was out of sight. The Doctor said "fetch!" and that dog been standing there dumb as any fool, jumped into the thicket and brought out the pheasant in his mouth and pushed it up to the Doctor's hand. Yes sirree, the Doctor can just shoot flying, I guess he's a witch. That's all at present.

YONEY WINKLEBLEICH.

Excelsior Gun Club.

MONTHLY shoot at Pearl River, N. Y.:

J J Blauvelt	1011010111111101101111111—20
R McMillen	1111111111010010011111100—18
C Peterson	1111111111010010111011011—20
J H Blauvelt Jr.	1111111110101100111111101—20

The small attendance was due to a match shot at Closter on May 4, between the Excelsior and Closter teams.

A Syracuse Man's Record.

THE picture shown in connection with this article is an excellent likeness of George C. Luther, of Syracuse, N. Y. Mr. Luther was born in that city in 1855, and began his shooting career in 1879, when at the State shoot in Rochester he won the R. V. Pierce diamond badge, defeating all the best-known experts in the State. This was at live birds. Since that time he has probably won more money and merchandise prizes than any shooter in New York State.

In 1880 he received the entrance fees ($550) in the Pierce medal contest. This year he was also a member of the team that won the Dean Richmond cup; won first prize at the State shoot at Coney Island in 1881. In a sweepstake shoot, open to the world, at 25 live birds, 31yds. rise, one barrel only allowed, he made a clean score, shooting out Brewer and several other experts, winning a Scott gun valued at $150. In 1887 he was a member of the winning team in the Dean Richmond cup contest at Auburn; also a member of the team that won the State championship, his score being 20 straight. At Albany in 1888 he was again a member of the winning team in the State championship shoot.

During the palmy days of the glass ball, now relegated to oblivion, he defeated Wm. Miller in two matches at 100 each, shot for $100 a side, one match at Syracuse and one at Newark. He next shot a match against Henry Gale at Syracuse, 200 glass balls each for $200 a side, breaking 157 to Gale's 151. Broke 94 to Frank Elliott's 85 at Utica for $100 a side; broke 91 to Mr. McGregor's 84 at Syracuse for $100 a side, balls thrown from Bogardus traps. He next defeated Eddie Mann by 48 to 44 at 50 balls each for $50 a side. At Rochester he shot at 100 clay pigeons against H. H. Pleischer, breaking 79 to Pleischer's 78. At Erie, Pa., he defeated J. E. Graham in a match at 100 clays for $100 a side, breaking 95 to Graham's 84. R. E. Sheldon, of Cleveland, was his next oppo-

GEORGE C. LUTHER.

nent, each shot at 100 glass balls, Luther breaking 96 to Sheldon's 79. At Lyons, N. Y., in July, 1884, Luther broke 124 out of 125 glass balls and at Syracuse the same year he made a run of 135 straight at composition balls.

About this time he challenged Carver, Bogardus or any other man to a match at 100 glass balls thrown from a rotary trap for $1 000 a side, and had no takers. He also offered to wager $100 to $500 that he could go out every day in the week and break 95 or more out of 100 glass balls each day. He won the first medal ever offered by the Onondaga County Sportsmen's Club. In 1888 he broke 100 bluerocks straight, and won the Atlantic Ammunition Co.'s New York State trophy. At Auburn, in May, 1891, he broke 114 out of 115 kingbirds. He won the Onondaga Club medal five consecutive times, breaking 116 out of 125 bluerocks, thrown from five traps, unknown angles. At the World's Shooting Carnival, held in Boston, in June, 1887, he made the highest average, defeating such noted cracks as McMurchy, Budd, Tiepel, Eager, Wagner and others, and winning a $150 grade Pieper hammerless gun.

Mr. Luther is an active member of the Onondaga County Sportsmen's Club, and never loses an opportunity to indulge in his favorite pastime of shooting. Of a quiet, retiring disposition he has hosts of friends all over the country, and is always accorded a hearty welcome.

Philadelphia and Jersey City Divide First.

SWEEPSTAKES at from three to ten live birds per man are daily occurrences in all parts of the country; occasionally one is arranged with fifteen to twenty birds; rarely is there a twenty-five-bird sweep, while those in which the contestants try their nerve and skill at fifty birds each are comparatively an unknown quantity. And yet in the long run the larger events, those running from twenty to fifty birds, with entries ranging from $15 to $50, are by far the cheapest for even the averaged-paced shooter. In shooting small events, say three to five birds, a man may in a half day's shooting, kill all or nearly all his birds, and be considerably out of pocket. A few weeks ago at an afternoon's shoot, the events being at five birds each, $3 entry, a well-known expert killed 43 out of 44 birds and lost something over $14. This was caused by losing one bird just when several pots had been bunched. A little later another shooter, a prominent gun salesman who holds forth in a Southern territory, paid about $17 for killing 42 out of 44 birds in a series of "Jersey" sweeps. Ties are too frequent in these affairs to give a man any chance of coming out even, much less ahead. In the larger shoots, while the entries are larger, so are the pots, and less frequent are the ties.

A few weeks ago, during a twenty-bird sweep at John Erb's "Old Stone House" grounds in Newark, N. J., a number of shooters, prominent among them being some Philadelphia experts, expressed a wish for a good big sweepstake in which the contestants would have some chance of winning a pot that would bring them out even. Inquiry revealed the fact that the majority were in favor of a sweep of fifty live birds, $50 entry, birds included, with a division of the purse on the basis of one money to every four entries.

At the request of the shooters the writer undertook to engineer such an affair, and after a consultation with Mr. Erb, Wednesday, April 27, was decided upon as the date. Positive guarantees to enter were given by at least a dozen men, and when the time for the shoot arrived just four of the dozen materialized. Three others, men who had made no previous promise, also appeared on the scene and took a hand in the sport. The day was a beautiful one, the sun shining warm and clear; the air having a spring-like feeling and the wind, from the right, being just strong enough to make the birds feel lively, without being strong enough to chill the shooters and spectators. A good party was present as onlookers, among whom were noticed William Taylor, the old-time bird shot and boniface, of Sufferns, N. Y.; Robert Kierstead, chief engineer of the Newark Fire Department; Milton F. Lindsley, of Hoboken; Dr. J. P. Knowlton, of the Emerald Gun Club; and A. O. Hunt, of New York.

It was 1:30 P. M. when the big sweep, the first of the kind ever shot in the vicinity, was started, the participants being Captain Tom Jones, of Jersey City, the genial trap shooting sea captain who has made a fine record for himself in both live-bird and target events; A. "James," who hails from Philadelphia and holds the title of champion of Pennsylvania, won with his favorite Parker 12-bore; Eddy Collins, the sandy-complected and gray-haired "boy," from West Hoboken, who looks after the destinies of Fred Quimby's ammunition department and incidently breaks targets and kills live birds; Wm. S. Canon, Newark's well-known insurance expert and America's one-armed champion; John Sergeant Dustin, who sports "Harrisburg Shooting Association" on the front of his silk Jersey and who has recently been shooting a stiff gait; Harry E. Smith ("you can hear me as soon as I come in sight"), one of Newark's rising manufacturers and an already risen shot, who has worried some of the experts within a year; and last, but by no means least, Hartford's leading journalist and one of the Wooden Nutmeg State's most expert live-bird and target shots, Allen Willey, he who in his sanctum wields such a facile pen when occupying the silken editorial chair of the Hartford *Globe*, and who in the public field makes friends wherever he goes by his easy bearing and never-failing good nature.

The race was an intensely interesting one from start to finish, and the birds, although a mixed lot, ran as good as the average lot of match birds. There were some, of course, that could be classed as "duffers," while others were of the style that no living man had any right to reach with the average load. Taken as a whole they may safely be termed a "good" lot. The exceptionally good birds, so far as noted, were as follows:

Collins—4th, 23d (tost), 32d, 42d, 44th, 45th.

Smith—3d, 15th (a beautiful long second), 25th, 35th, 37th.

Willey—3d, 6th, 7th, 19th (an elegant first), 23d (fine second), 24th.

Jones—3d (very fine second), 11th, 19th (long and good second), 32d.

Dustin—7th (fine long second), 16th, 22d, 42d, 49th, 50th (splendid second).

James—4th, 6th (fine first), 16th (elegant second), 27th (ditto), 35th, 48th.

Canon—11th, 12th, 21st (beautiful second), 23d, 26th, 45th.

Willey's thirteenth bird was hard hit with both barrels but managed to get as far as the fence, upon which it attempted to alight. Before it could gain a footing some outsider fired a shot which landed the bird inside the boundary. The referee correctly gave the shooter another bird. Jones's 19th bird was a twisting driver which fell, apparently dead, near the fence. When the dog reached the bird it made a dying effort and reached the top rail of the fence. Here it remained for an instant when it made one more supreme attempt to get away and managed to get its claws on top of the fence, but before it could draw its wings together it fell inside and was scored.

Below will be found the full score of the match, the use of our copyright trap score type enabling us to show the direction of flight of every bird. The figure over the sign shows the trap from which the bird was sprung.

James	5	10	15	20	24	29	33	37	42	47
Canon	4	8	12	16	21	26	29	33	38	42

During the day the following sweepstakes were shot, the first three preceding and the last one following the big sweep. The conditions in each were 5 birds, $5 entry, with three moneys in the last and two moneys in each of the other events. In No. 1 first money was divided; Dustin drew his prorata of second and Collins won the balance by beating Jones on a shoot-off in No. 2. Both moneys from No. 2 were carried over to No. 3, the curious feature being that those who tied for first in No. 2 were second in No. 3, and those who tied for second in No. 2 were first in No. 3. First money in No. 4 was decided by a miss and out, the last two rounds being shot at 32yds. rise. On the fifth round the birds were all shot and the six "stayers" divided. The scores:

	No. 1.	No. 2.	No. 3.	No. 4.	Ties.
Collins	11220—4	11121—5	20112—4	12212—5	11211

Lindsley				21222—5	11112
Hedden				11210—4	

C. H. T.

Live Birds at Doylestown.

DOYLESTOWN, Pa., April 28.—The following scores were made in a series of live-bird sweeps shot here to-day:

	No. 1.	No. 2.	No. 3.	No. 4.	No. 5.	Ties
Herst	0	1222	0201—2	0012—2	0122—3	11
Rupell	101	1210	1021—3	2101—3	1110—3	10
Apgar	201	1110	1210—3	2101—3	1101—3	20
Warford	0	20	1121—4	1121—4	1211—4	
Kelly	10	1110	1110—3	0010—1	1201—3	10
Jones	0	0	2000—1	....	....	
Garner	....	....	....	....	2201—3	11

Nos. 1 and 2 were $2 miss-and-out's; the others were at 4 birds each, $3 entry, two moneys; second money from No. 3 was carried over to No. 4, and won by Apgar and Ruppell.

Ruppell Outshoots Fox.

APPENDED is the score of an interesting match shot at Milford, N. J., on April 27 between Mahlon H. Ruppell, of that place, and Mahlon Fox, "the shooting blacksmith" of Trenton, N. J. The original agreement called for 50 live birds per man, 30yds. rise, 21yds. boundary, stake $50 a side, but as birds were scarce the race ended on the forty-fifth round. W. C. Apgar, the well known boniface of Frenchtown, N. J., was referee and scorer. The birds were a splendid lot of flyers, and were helped along by a strong wind. Score:

Ruppell	2111111130lo'o11111c0012—19 20122201o11oo10:0211	—13—32
Fox	2223012222x2211220o0x2222—20 201c1200120100200110	—10—30

On the last day of the Heritage tournament Mr. Heritage offered a prize of $5 to be awarded to the shooter making the best appearance at the score. This was awarded to Mrs. M. F. Lindsley ("Wanda"). The award met with general approval.

The Tournament at Marion.

THE famous old trap grounds of the Jersey City Heights Gun Club, at Marion, N. J., were crowded by an enthusiastic crowd of shooters on April 28, the opening day of Al Heritage's annual live bird and bluerock tournament. This was the first big affair held on these grounds since 1889, when the New Jersey State Sportsmen's Association held a series of contests running through three days. The weather on the opening day was delightfully like spring and there was no wind to worry the shooters. Among the shooters who were on hand were Geo. O. Mosher, of the Hunter Arms Company, Fulton, N. Y.; A. C. Mead, of the Knoxville (Penn.) Gun Club; E. F. Cox, who hails from South Norwalk in the Wooden Nutmeg State; Enoch Miller, of Springfield, N. J.; Wm. R. Hobart, C. M. Bedden and Asa White, of the South Side Gun Club, Newark, N. J.; Neaf Apgar, of Plainfield, N. J.; Milton F. Lindsley, of Hoboken, N. J.; Eddy Collins, of West Hoboken, N. J.; Captain Wm. Jones, of Jersey City, N. J.; Frank Class, of Pine Brook, N. J.; Major R. Heber Breintnall, of Newark, N. J.; "Uncle Billy" Sigler, of Montclair, N. J.; Thomas Brantingham, of Plainfield, N. J.; J. J. Blauvelt, Sr. and Jr., of Cherry Hill, N. J.; R. Drake, A. Parry, J. Warren Smith and Jackson Smith, of Maplewood, N. J.; James L. Smith, of Hackettstown, N. J.; Harry Thurman, of Germantown, Pa.; S. J. Lyon, of the North Side Gun Club, Maspeth, L. I.; Al Soper, of Plainfield, N. J.; John Riggott, of Rockaway, N. J.; Chas. W. Tuttle, of the Auburn (N. Y.) Gun Club; and R. J. Davis, of the Freehold (N. J.) Gun Club.

The shooting was at bluerock targets, thrown from bluerock traps, under the five-trap, rapid firing system. Al Heritage and W. Fred Quimby had the direct management of the shoot. Mr. Heritage introduced a novel feature of free advertising for the various sporting papers and a number of firms and individuals, putting "puffs" for them on the face of the trap screens in full view of the shooters.

On the opening day two special prizes of $5 each were offered, one for the heaviest and one for the lightest shooter. The heavyweight prize was awarded to John Riggott, of Rockaway, while the lightweight prize went to J. J. Blauvelt, Jr., of Cherry Hill, the fifteen-year-old lad who has been making such a fine record at various Jersey shoots.

The fun started at 9 A. M. and it was not until after 6 P. M. that the enthusiasts could be prevailed upon to stop. During the day about 6 000 targets were thrown, the conditions of the regular events being of follows:

No. 1, 10 bluerocks, $1; No. 2, 15 bluerocks, $1.50; No. 3, 10 bluerocks, $1; No. 4, 20 bluerocks, $2; No. 5, 15 bluerocks, $1 50; No. 6, 10 bluerocks, $1; No. 7, 15 bluerocks, $1.50; No. 8, 10 bluerocks, $1; No. 9, 15 singles, $1.50; No. 10, 10 singles, $1.

The scores follow in detail:

The Second Day.

Opened with a drizzling rain which continued nearly all day and made everybody feel uncomfortable. In spite of this drawback the events filled well and the shooters remained until six o'clock. Among the new comers were F. G. Moore of the New Jersey Shooting Club; Ferd. Van Dyke of Newark; "Tee Kay" Keller of Plainfield; Frank Post of Park Ridge; Paul Jeaneret of the Boiling Springs Fish and Gun Club of Rutherford and J. R. Peck of the same club.

A feature of the day was the match for teams of two men each, fifteen targets per man, $4 entry. There were three moneys beside special premiums of $4 and $3 for first and second best scores. First money and premiums were won by Hobart and Van Dyke on a total of 29 breaks. A special premium of $3 for the best score in No. 4 event at 25 bluerocks, $2 50 entry, was won by Miller on a clean score. Miller and Hobart shot in splendid form, the former averaging 97 1/10 and the latter 94⅗ per cent. The events were as follow: No. 1, 10 bluerocks, $1; No. 2, 15 bluerocks, $1.50; No. 3, 20 bluerocks, $2; No. 4, 25 bluerocks, $2.50; No. 5, 10 bluerocks, $1; No. 6, 15 bluerocks, $1.50; No. 7, 10 bluerocks, $1; No. 8, 15 bluerocks, (Two men team), $4; No. 9, 10 bluerocks, $1; No. 10, 10 bluerocks, $1.

Here are the full scores:

	No. 1.	No. 2.	No. 3.

The Final Day.

Saturday was a big disappointment to a large number of shooters who came a long distance to shoot at live pigeons and were unable to get their fill of the sport, only 365 birds being on hand. Six weeks previous to the shoot Mr. Heritage had contracted for a big supply of pigeons, but for some unexplained reason they failed to materialize. While it is a well-known fact that birds are exceedingly scarce, shooters dislike to be fooled after being assured that they will have enough for a day's sport. Among the visitors were A. J. Rust, champion of Pennsylvania, and John Rothaker, both of Philadelphia; Mahlon Fox, "the shooting blacksmith" of Trenton, N. J.; Frank Class, of Pine Brook, N. J.; Gus Griffen, Samuel Castle, C. H. Hedden, Harry E. Smith and W. G. Hollis, of the Newark Gun Club; Mr. and Mrs. M. F. Lindsley; of Hoboken; Capt. Wm. Jones and "Uncle" Wm. Hughes, of Jersey City; Eddy Collins, of West Hoboken; Wm. Apgar, of Frenchtown, N. J.; Mahlon H. Ruppell, of West Milford, N. J., and "Uncle Billy" Sigler, of Montclair, N. J.

The day was clear and cool, with a strong wind blowing diagonally across the line of traps from the left, and the birds were a fine lot of flyers. The opening shoots were $2 miss-and-out affairs, the results being as follows:

Class	110	1111111111111111111
Jones	111	0
Fox	10	11 1111111111111111110

Then came the regular programme events, the first being of 4 birds, $4 entry, two moneys; No. 2 at 8 birds, $6 entry, two moneys, and No. 3 at 7 birds, $6 entry, three moneys. Second money from No. 1 was carried over to No. 2 and decided by the total scores in the latter, Fox being the winner. Below are the scores in detail:

	No. 1.	No. 2.	No. 3.
White	0120—3	2121l021—7	0212122—6
Jones	2121—4	111o121—7	1111122—7
Class	0111—3	11011211—7	1121111—7
Fox	2201—3	12122222—8	1111111—7
Griffen	1221—4	12012121—7	(001120—3
Castle	1021—3	1011101—5	1102120—5
Lindsley	1122—4	12102202—5	2222202—5
Wanda	1201—3	0o1010o1—3	
Collins			1201121—6
Hedden			1200110—4
Rust			1112111—7
Rupell			1122222—7
Hollis			0200120—3
Smith			1111111—7
Wm Apgar			2101221—6
Sigler			1111101—6
Mason			2101111—6
Rothacker			1121122—7
Hoff			2221021—6

This exhausted the live bird supply, and the rest of the day was devoted to bluerock sweeps, in which the following to'als were made, No. 3 being at 15 singles and each of the others at 10 singles:

	No. 1.	No. 2.	No. 3.	No. 4.	No. 5.	No. 6.	No. 7.	No. 8.	No. 9.

Special event at 25 bluerocks, expert rules, $5 entry, 2 moneys: James 20, Collins 17, Post 16, Lindsly 16, Fox 14, Hoff 11, Heritage 6.

C. H. T.

Elliott—Fulford.

CHICAGO, Ill., April 30.—Mr. Elliott still retains his cup and probably will do so to the bitter end. Mr. Fulford's form is like that of the rainbow before mentioned. It isn't fast colors. In the contest at Kansas City to-day, for the championship, 50 live birds, Mr. Elliott missed 4 out of his first 5 birds. Mr. Fulford did the same. Mr. Elliott then proceeded to not miss any more. Mr. Fulford did not do the same. Score: Elliott 46, Fulford 43.

The birds were an immoral lot, which accounts for the fact that Mr. Fulford shot his Western gait of 86 and not his Eastern gait of 90 on "good" birds. E. HOUGH.

Mr. C. W. Budd, who umpired the match, sends us the score, with these comments by the local reporter:

"Considering the day the scores made by both shooters were remarkably good. The wind was blowing a perfect gale from the southwest, and once a bird got started from the traps and got up in the wind he went away like a streak of lightning.

"The difference in the style of the two men was in Elliott's favor under these conditions. The Kansas City champion shoots very quicly and thus was enabled to kill many birds close to the traps. Fulford, on the other hand, is rather a deliberate shot and he made difficult birds out of a number of them by letting them get too far away.

"In the drawing of the birds the men had about equal luck, each getting about the same number of drivers. The largest consecutive run was made by Elliott, who grassed his last 37 birds straight. The score shows that Elliott used his second barrel more frequently than did Fulford, but on a majority of the birds this was used simply for safety. There was a large attendance of shooting men and the victory of Elliott was well received. Immediately after the conclusion of the shoot James A. Bolen challenged Elliott to shoot for the cup.

"Elliott shot his Greener, weighing 7lbs. 3oz, and Fulford used his hammer Greener, weighing 7lbs. 1loz. Both men used Schmitz powder in both barrels. Charlie Budd ref reed the match and James Whitfield acted as official scorer."

The Onondagas.

SYRACUSE, N. Y., April 28.—The regular semi-monthly shoot of the Onondaga Sportsmen's Club for club medals was held at the Maple Bay grounds yesterday for the club medals. Day dark and target in a haze:

Class A.

Halloway	43	C Walters	43
Hookway	44	Courtney	42
Luther	43	Mowry	42
Becker			41
Ashton			withdrew

Class B.

Duguid	40	Ayling	30
G Mann	40	Williams	withdrew
Ginty	38		
D Walters			withdrew
Dey			withdrew

Halloway won in class A, he having been allowed from one to three birds by the others who tied or passed him in their scores. Duguid won in class B, he having a handicap over Mann, who tied him in actual record. On Thursday next, May 5, the club will send 25 members to Rochester to shoot a return match with the Rochester Club. At the recent shoot held here, Syracuse won by a score of 526 to 511 and Rochester is said to have prophesied a change in the order on the return day.

Rist Wins the Roseville Badge.

THE monthly shoot of the Roseville Gun Club, of Newark, N. J., took place on April 29; each member shooting at 25 bluerocks. E. A. Rist won the badge with a score of 22, C. Hughes scoring 16 and Geo. Huff 16. The following scores were made in a series of 5 bird sweeps:

Rist	3	4	5	4	5	3	3	4	3	3	4	4	3
Hughes	3	3	4	2	4	4	2	2	4	4	2	2	3
Huff	2	3	3	3	4	3	2	5	2	3	2	2	2

Grinnell Gun Club Tournament.

GRINNELL, Iowa, April 28.—The tournament of the Grinnell Gun Club opened Tuesday morning with a light attendance, owing to bad weather. The first day the wind blew a gale, with some rain. The second day was clear and pleasant. The third day the wind blew a gale and it was cold and chilly. Among the shooters present were, Hon. J. G. Smith and Henry Durant, Algona; C. M. Grim, Clear Lake; Dr. Kibby and J. Johnson, Marshalltown; McBride, of Victor; J. Smith, Marengo; H. Windsor Britt, H. Confer, California; A. C. Miller, Des Moines; J. Stump, H. Sloan, McMaine, Hoover and a number of others from Oskaloosa. The Grinnell boys did everything possible to make it pleasant for the visiting sportsmen. The match between Marshall and Budd, at 100 bluerocks, was not shot owing to Mr. Marshall not showing up.

The match between Grim and Budd, at 100 live birds, was close and exciting. The birds were a good lot and had a high wind behind them, causing a number to fall out of bounds that would have scored had the day been favorable. Mr. Grim was not in the best of form, but made some very nice kills, showing that on favorable conditions he is better than a ninety man. Some few events on programme were not shot. Bluerock targets and traps were used, giving good satisfaction in every way. In the match between Grim and Budd, Grim shot an L. C. Smith 7¾lb., 12-gauge, 3½drs. Schultze and No. 7 shot in both barrels. Budd used a Smith gun, 7¾lbs., 3½drs. wood powder and No. 7 shot in both barrels. Each had 8 birds dead out of bounds. Scores:

No. 1, 10 targets, entry $2. No. 2, 15 targets, entry $2. No. 3, 10 targets, entry $1 50:

No. 15, 15 targets, entry $2: Churchill 11, Grimm 13, Robberts 13, Stump 12, Budd 14, Hoover 7, Kibbey 14.

No. 16, 10 targets, entry $1.50: Budd 9, Grimm 10, Robberts 8, Hoover 6, Phelps 8, Kibbey 8.

No. 17, 10 targets, entry $1 50: Grimm 9, Budd 5. Robberts 2, Kibbey 2. C. W. B.

The South Side Gun Club.

SOUTH NORWALK, Conn., April 20.—The weather was all that could be desired for trap shooting, a brisk northwest wind blowing at times rendered some of the targets rather deluisive in their flight, No. 3 (straight away) and Nos. 2 and 5 being slightly erratic in their flight, but some of the boys were "in it" as the following scores attest: Keystones, Association rules, 25-cent sweeps, three moneys:

	1	2	3	4	5	6	7	8	9	10	11	12
E H Fox	8	8	8	8	9	10	8	9	7	6	9	8
Sanford	6	9	9	5	7	5	7	7	9	7	4	6
Drake	6	8	7	8	8	5	5	9	7	.	.	.
Hendrie	8	5	8	10	8	7	9	10	8	9	8	8
Coleman	.	.	9	9	9	10	8	9	9	7	8	6
Richards	.	.	.	.	.	.	.	.	4	4	4	6
McHugh	.	.	.	.	.	.	.	.	7	8	.	.
Craw	.	.	.	.	.	.	.	.	.	.	9	.

Sweep No. 12 was at five pairs, two moneys:

Fox	10 00 11 01 10—5	Richards	11 10 11 10 10—7
Craw	00 10 01 11 00—4	Remington	00 00 10 01 10—3
Hendrie	11 10 10 10 10—6		

No. 13, a walking match, use of both barrels, 5 birds:

Fox	11110—4	Remington	10101—3
Craw	10010—2	McHugh	11100—3
Hendrie	00101—2	Coleman	11010—3
Richards	00101—2		

Bluerocks at Pine Brook.

THE following scores were made in a series of bluerock sweeps shot at Frank Class's Pine Brook Hotel on April 26, the conditions in each being 10 singles, $1 50 entry, 3 moneys:

D Nafie	1100101101—6	1111000011—6	1100110101—6
Miss Smith	1011110111—8	1110111011—8	1110100111—7
J Riggott	1111011101—8	0100011100—4	1110101111—8
Fitzglvens	0000101010—3	1010100011—4	1000100111—5
Class	1111110001—7	1111111110—7	1111011111—9
Pierson	0100110000—3	0000010001—2	0000100001—2
Spur	1101010010—5	1101010101—6	1100110101—6

1111001010 -6	J Koster	0000010—2
1111011111—8	J Deacon	1111011111—8
1111011111—8	J Lott	0222221001— 7
1111011111—8	D Deacon	1211211122—10
1111011111—8	G Nostrand	2211022122— 9
1111011110—7	C A Sykes	0o1220122o— 6
1111011111—8	W F Sykes	1221100111— 8

Miss Smith and Frank Courter were to shot a match at 50 bluerocks each for a gold medal, but as Courter failed to appear Miss Smith won by default.

Auburn Gun Club.

AUBURN, N. Y., April 29.—Inclosed please find scores in detail of the last two shoots of our club. Eighth badge contest, April 13:

Class A.

Whyte	1011101111111111111—18
Carr	1111111101111101111—18

Answers to Correspondents.

☞ **No Notice Taken of Anonymous Correspondents.**

H. J. S., Shellburne Falls, Mass.—Write to H. Osborn, foot East Fifty-second street, New York.

J. C. Creedmoor, Long Island.—The game law now in force forbids the killing on Long Island, of "bay snipe, sand piper, shore bird" from Jan. 1 to July 10. The new game bill makes it unlawful to kill on Long Island any "plover, Wilson's commonly known as English snipe, rail, sand piper, mud-hen, gallinule, grebe, bittern, surf-bird, snipe, curlew, water-chicken, bay snipe or shore-birds of any kind," between Jan. 1 and July 1. The new law will permit fishing on Sunday in Jamaica Bay.

H. K. T., Dexter, Me.—1. I have sufficient paddlewood and osage orange to make a rod of each; but before expending my time on them, I would like to know if either or both are considered equal or superior to dagama or lancewood; also, if the rods are better made up entirely of one kind of wood or only in part? Moreover, what sized ferrules should be used on a 9½ or 10ft. fly-rod of these woods? 2. One more question. Where should a 30in. Radix be placed on a 16ft. open canvas canoe—*i. e.*, at what distance from the center—fore or aft—should the drop be? Ans. 1. We have never heard these woods mentioned as possible rivals of dagama and lancewood. Our choice would fall upon the standard woods. It is not customary to make rods entirely of one kind of wood; the tip may be of lancewood or something of equal qualities, the second piece of lancewood, greenheart, bethabara or wood of similar grade, and the butt should be of white ash. Rods are often made of greenheart, lancewood or similar woods, but they are too heavy for most persons. For a fly-rod 10ft. 3in. long the inside diameter of the femal ferrule, butt piece, is $\frac{9}{64}$in. Inside diameter of female ferrule, second piece, $\frac{13}{64}$in. These dimensions are for the Henshall black bass rod. 2. Depends upon model of canoe, probably the after end of board at middle of canoe will be best.

CORRESPONDENCE.

THE FOREST AND STREAM is the recognized medium of entertainment, instruction and information between American sportsmen. The Editors invite communications on the subjects to which its pages are devoted. Anonymous communications will not be regarded. The Editors are not responsible for the views of correspondents.

SUBSCRIPTIONS.

Subscriptions may begin at any time. Terms: For single copy $1 per year, $2 for six months. Rates for clubs of annual subscribers:

Three Copies, $10. Five Copies, $16.

Remit by express money-order, registered letter, money-order, or draft, payable to the Forest and Stream Publishing Company. The paper may be obtained of newsdealers throughout the United States, Canada and Great Britain.

Foreign Subscription and Sales Agents—London: Davies & Co.; Brentano's; Sampson Low & Co. Paris: Brentano's. Foreign terms: $5 per year, $2.50 for six months.

ADVERTISEMENTS.

Inside pages, 30 cents per nonpareil line. Special rates for three, six and twelve months. Seven words to the line, twelve lines to one inch. Advertisements should be sent in by Saturday previous to issue in which they are to be inserted. Transient advertisements must invariably be accompanied by the money, or they will not be inserted. Reading notices $1.00 per line. Only advertisements of an approved character inserted.

Address all communications:

A book to read *now*; and to be put in one's pocket for reading again in camp.
Cloth, 126 pages. Price $1.00.
FOREST AND STREAM PUBLISHING CO.,
318 Broadway, New York.

SOME anglers labor under the false impression that large dealers and manufacturers charge more for their goods than the keepers of small shops. A glance at our new Illustrated Catalogue and Price List for 1892, which we will mail on receipt of 6 cents to cover postage, will show how much they are mistaken.

ABBEY & IMBRIE,
Manufacturers of All Grades of Fishing Tackle,
18 Vesey Street, New York.

Notice to Fishermen! Cut Prices for 1892!

I am with you again with lower prices for Fishing Tackle. I find by experience that putting down prices and not decreasing the quality, it increases my business every year.

"Fine sense and exalted sense are not half so useful as common sense. There are a score of men of wit for one man of good sense. He that carries nothing about with him but gold, is every day at a loss for readier change."—Addison.

There are more men of sense now than in Addison's time. By men of sense we mean men who can comprehend the theory and advantages of a business that places the man or woman buying for his or her own wants, in contact with the makers of the goods. Practicing as we preach, we buy this way ourselves, cheaper and better. We know you can do the same.

ILLINOIS STATE FISH COMMISSION,
Office of S. P. BARTLETT, Sec'y.
QUINCY, Ill., Jan. 19, 1892.

Hon. John S. Cochennour, Olney, Ill.:

DEAR SIR—After two years' use of your "Little Daisy Minnow Trap" I find that it does its work well and satisfactorily. It is a source of great gratification to me to have fresh, lively minnows when I want them, and these your trap furnishes me. I can cheerfully recommend it to anglers as a valuable addition to their outfit.

Yours respectfully,
S. P. BARTLETT,
Sec'y Ill. State Fish Com.

Don't swear because your briarwood's burnt out. Get a new one and USE MASTIFF PLUG CUT hereafter. It is the only tobacco that leaves the briarwood pipe whole and sweet.

THERE ARE IMITATION MASTIFF POUCHES.

ANTI-STIFF

STRENGTHENS THE MUSCLES

It is a marvelous preparation for Strengthening the Muscular System. With Anti-Stiff there is no faith required; it goes straight for the muscles, and you can feel it at work. It has a peculiarly warming, comforting, and stimulating effect on all weak or stiff muscles and sinews. Quick in its action, cleanly and pleasant in use.

Rub it into the muscles every night for a fortnight, and you will be pleased at its supporting and strengthening properties. There is not, nor has been, anything like it till now. It differs from all Oils, Embrocations and Liniments, both in substance and effect. Some Athletes are so fond of it that they rub it all over them.

Price 20c. and 35c. per box.

Trainers size, $1,00.

MAY DAYS.

THE lifeless dun of the close-cropped southward slopes and the tawny tangles of the swales are kindling to living green with the blaze of the sun and the moist tinder of the brook's overflow.

The faithful swallows have returned, though the faithless season delays. The flicker flashes his golden shafts in the sunlight and gladdens the ear with his merry cackle. The upland plover wails his greeting to the tussocked pastures, where day and night rings the shrill chorus of the hylas and the vibrant trill of the toads continually trembles in the soft air.

The first comers of the birds are already mated and nest-building, robin and song-sparrow, each in his chosen place setting the foundations of his house with mud or threads of dry grass. The crow clutters out his softest love note. The flicker is mining a fortress in the heart of an old apple tree.

The squirrels wind a swift ruddy chain about a boll in their love chase, and even now you may surprise the vixen fox watching the first gambols of her tawny cubs by the sunny border of the woods.

The gray haze of undergrowth and lofty ramage is turning to a misty green, and the shadows of opening buds knot the meshes of shadows on the brown forest floor that is splashed with white moose flowers and spent arrows of blood root tossed aloof from the green quiver and yellow adder tongues bending above their mottled beds and rusty trails of arbutus leaves leading to the secret of their hidden bloom that their fragrance half betrays.

Marsh marigolds lengthen their golden chain, link by link, along the ditches. The maples are yellow with paler bloom and the graceful birches are bent with their light burden of tassels. The dandelion answers the sun, the violet the sky. Blossom and greenness are everywhere; even the brown path of the plow and harrow are greening with springing grain.

We listen to the cuckoo's monotonous flute among the white drifts of orchard bloom and the incessant murmur of bees, the oriole's half plaintive carol as of departed joys in the elms and the jubilant song of the bobolink in the meadows where he is not an outlaw but a welcome guest, mingling his glad notes with the merry voices of flower-gathering children as by and by he will with the ringing cadence of the scythe and the vibrant chirr of the mower.

Down by the flooded marshes the scarlet of the water maples and the flash of the starling's wing are repeated in the broad mirror of the still water. The turtle basks on the long incline of stranded logs.

Tally-sticks cast adrift are a symbol that the trapper's warfare against the muskrats is ended and that the decimated remnant of the tribe is left in peace to re-establish itself.

The spendthrift waste of untimely shooting is stayed. Wild duck, plover and snipe have entered upon the enjoyment of a summer truce that will be unbroken, if the collector is not abroad at whose hands science ruthlessly demands mating birds and callow brood.

Of all sportsmen only the angler, often attended by his winged brother, the kingfisher, is astir, wandering by pleasant waters where the bass lurks in the tangles of an eddy's writhing currents, or the perch poises and then glides through the intangible golden meshes that waves and sunlight knit, or where the trout lies poised beneath the silver domes of foam bolls.

The loon laughs again on the lake where again the freed waves toss the shadows of the shores, the white reflections of white sails and flash back the sunlight or the glitter of stars and the beacon's rekindled gleam.

Sun and sky, forest, field and water, bird and blossom, declare the fullness of spring and the coming of summer.

SUNDAY FISHING IN JAMAICA BAY.

THE Penal Code of New York forbids fishing on Sunday. In the vicinity of cities and large towns at least this law has long been a dead-letter. Thousands of the working classes of New York city—tens of thousands of them—go fishing on Sunday in the summer season. The city docks, the banks of the Hudson and East rivers are lined with them. The ferryboats to Staten Island and the suburban railroad trains carry multitudes of them Saturday nights and Sundays to near-by waters. The bays in the vicinity are crowded with their boats. The district protectors have never dreamed of interfering with this Sunday fishing. Last year, at the prompting of line and hook anglers in Jamaica Bay—most of them men from city workshops—the Legislature forbade net-fishing in the bay. Thereupon the net-fishermen for retaliation put into force the Sunday fishing law and caused the arrest of certain of the anglers for fishing on the Sabbath. The enforcement of the law in this case was not due to an awakened public sentiment; it was purely a deed of spite—a means resorted to by the netters to "get even" with the anglers.

To avoid further annoyance of this character the hook fishermen appealed to the Legislature to repeal the law which forbids Sunday fishing; and they armed Assemblyman Sulzer with a petition to that effect signed by 60,000 workingmen. The Legislature refused to make Sunday fishing lawful in all the waters of the State; but after much discussion finally adopted an amendment, which was designed to permit fishing on Sunday in Jamaica Bay. The particular section relating to the locality reads: "Sec. 172. Fish shall not be fished for, caught or killed by any device except angling, *which shall be lawful on any day of the year* between the first day of April and the first day of December in the waters of Jamaica Bay or the inlet thereof." The clause in italics was clearly intended to legalize Sunday fishing.

But Sec. 276 expressly provides, "Nothing in this chapter shall be construed to amend or repeal any provision of the Criminal or Penal Code" The only law which declares fishing unlawful is a part of the Penal Code. By Sec. 265 of the Penal Code "all shooting, hunting, fishing, playing," etc., are prohibited. If the new fish law may not be construed to amend or repeal this provision of the Penal Code, an interesting question arises as to whether the Jamaica Bay fishing is lawful or unlawful.

J. J. O'CONNOR.

THE death of Chief Clerk J. J. O'Connor, which occurred on May 4, has deprived the U. S. Fish Commission of one of its most devoted and efficient members. At the early age of thirty-three, almost at the outset of his career of usefulnes, he was unexpectedly called away by an incurable disease, leaving behind a sorrowing wife and five small children. Mr. O'Connor's association with the Fish Commission, and his promotion step by step until he had won the responsible post which his death has now made vacant, has continued for about ten years. During all of this time he was noteworthy for his energy, industry, earnestness of purpose, unblemished reputation and genial disposition. During the 47th Congress Mr. O'Connor was clerk of the House Committee on Education and Labor. He was for several years the secretary of Mr. George Alfred Townsend, and served in the same capacity to Mr. Pulitzer, of the New York *World*, when a representative in Congress. It will be difficult to find an officer possessing the same executive and administrative ability combined with such rare amiability and inborn strength of character.

NEW COURSES OF THE FISHING INDUSTRY.

RESULTS which Mr. Charles Hallock has repeatedly predicted through the FOREST AND STREAM as likely to follow the method of deep net fishing recently put into practice along the coast of North Carolina, from Bogue Sound to Roanoke Island, are rapidly manifesting themselves. Already the quantities of fish taken are so enormous that the stated markets of Boston, New York, Baltimore, etc., are not able to absorb them, and they are seeking new outlets in the Northwest. Important movements are now on foot in Newbern (which is the principal distributing depot) for the transportation of fish in suitable refrigerator cars to Cincinnati, Louisville, St. Louis, Kansas City, Omaha, St. Paul and Minneapolis; and sagacious men predict an immense business. Parcels of fish in transitu will be dropped off at intermediate points, like letter pouches from a mail car. The prices of fish at present are so inordinately low that a wide margin of profit is left for even close competition. It is stated that assorted marketable fish of all kinds can be furnished at an average price of two cents per pound.

We understand that Mr. Hallock is in communication with Canadian fishery officials, with a view to induce them to experiment with deep set nets in the Bay Chaleur, Gulf of St. Lawrence, and also for shore cod off the Labrador coast. We shall watch developments in all directions with great interest and with faith, for we incline to the belief that Mr. Hallock did a great deal to open up the deep-sea fishing on the Alaska coast by his miscellaneous writings, as well as by special reports and colored portraits of Pacific coast fishes sent to Profs. Baird and Goode seven years ago. A full chapter of his "New Alaska," intelligently treated, is devoted to this important subject.

THE NEW YORK ASSOCIATION.

THE approaching convention of the New York State Association for the Protection of Fish and Game gives promise of being a notable and important meeting. The committee provided for at the recent Syracuse convention will present to the association recommendations looking to a more active and useful service in game and fish protection. It is expected that President Horace White will, in our next issue, call a meeting of delegates to convene in Syracuse prior to the opening of the regular trap-shooting programme. Local clubs and associations in all parts of the State are earnestly requested to send representatives to attend this special meeting. The time is ripe for an enlargement of the field of activity; there is in the association to-day a substantirl membership of those who are anxious to see the organization actively engaged in protective work, and who are ready and waiting to take hold of such.

SNAP SHOTS.

Dr. G. Brown Goode, Assistant Secretary of the Smithsonian Institution, has returned to Washington greatly improved in health after a winter's sojourn in Mediterranean cities. While in Florence he had opportunity to study many rare and curious forms of deep-sea fishes related to American types which are described in the forthcoming monograph by himself and Dr. Bean. He found the museum in Florence extremely rich in the fishes to the study of which his best efforts have been devoted.

It is with genuine satisfaction that we record the reappointment of Maj. J. Warren Pond as Chief Game and Fish Protector of this State. Maj. Pond has done excellent service; his retention is a fitting recognition of his good record. The same may be said of the reappointment of Protectors Kidd, Hawn and others, who have been active, aggressive and successful in their official work.

Secretary of State A. A. Lesueur, of Missouri, has revised for the FOREST AND STREAM the practical hints on camping, published by him in the St. Louis *Republic*, and we print them in our game columns to-day. Secretary Lesueur is a veteran camper, and mingles sound philosophy and common sense with his practical hints.

The FOREST AND STREAM Amateur Photography Competition has been well received. The details are given again in another column.

The Sportsman Tourist.

A CHILD OF THE FOREST.

OH! yes, I know where the lady-slippers grow,
Where woodland lilies are thickest;
I know where the very first May flowers blow,
And mushrooms spring up quickest.

Where the wood thrush starts,
Where the brown hare darts
To its covert down the hollow;
And the partridge's drum
And the wild bee's hum
I know how to follow.

And the trees they beckon to me,
And the trees they whisper to me,
And the trees they listen to me,
And spread their broad arms over;
And when the wind blows free
The leaflets dance in glee,
And birds sing sweet in the tree,
To me, the forest rover.

J. M. HOOPER.

AFTER THIRTY-SIX YEARS.

DURING the first week of October, 1890, I visited the home of my boyhood, Theresa, N. Y., I did not go for hunting or fishing, as I did not expect to remain more than a day or two; but my friends persuaded me to stay a week, and I was not loath to do so. It was more than thirty-six years since I had left the old home. For the first ten years I made yearly visits, after which they were less frequent, and then five years would intervene; but the old home has not been forgotten, as one or both of my sons have visited it nearly every year.

The morning after my arrival was Sunday—I was up with the sun, and as none of the family were about, I stepped out of the house, to find it was the morning of mornings for a walk through what was left of the old wood adjoining the homestead place, within a hundred rods of the house, and I was not long in getting to it. I recognized the opening that was once the old farm wood road where it came out on the main road, where I was wont to let down the bars when I drove the cows to and from the pasture which lay beyond the wood through which we had to pass. It often happened that it was quite dark while going through these woods, and as there was a story that connected a man with a rope to a certain beech tree on the opposite side of the main road, I did not tarry to investigate it at such times. I did not have to let down the fence bars this morning, they looked as if they had not been put up since the last time I drove the cows through.

I had not gone ten rods into the woods when a streak of brown feathers started from nearly under my feet. I suppose that I should say with a whirring sound, as I know there must have been, for I have heard it many times when the same thing has happened in the same woods in my boyhood days; but as I do not hear anything now I am content to say that it was a streak of brown feathers that I saw disappear among the hemlock trees. As I stood wondering where it had gone so suddenly I caught a glimpse of something moving under a small hemlock shrub within a rod from me, and the next instant there was another streak of feathers and (I know as well as if I had heard it) another whirring sound, this time in a different direction. It did not pass out of my sight until it dropped to the ground, about fifteen rods away, without rising more than 10ft. above the ground. I walked up within good gunshot of it and there with my field glass I saw the lordly ruffed grouse, *the* game bird of America, in all his grandeur, as he leisurely walked about seemingly unconcerned as to my presence. After watching him for at least ten minutes I thought that I would see how near I could get to him. Now it was my turn to be seemingly unconcerned as to his presence, and I walked up within twenty feet before he took to wing and flew over the ledge down among the thick hemlock. I turned to resume my stroll in another direction, and had gone but a few rods when I flushed another, probably his mate, and the one I first put up. Undoubtedly they were having an early breakfast when first disturbed.

Besides the grouse, there were other species of birds in search of an early meal, most of them summer residents in that locality. I noted the olive-backed and the hermit thrushes; of the warblers there were the parula-myrtle, blackburnian, chestnut-sided, black-throated blue, black-throated green, black poll, cerulean and bay-breasted. There were also the golden-crowned and ruby-crowned kinglets, the smallest of our northern birds, with the exception of the hummingbird, its weight being about a quarter of an ounce or twice that of the hummingbird.

I must not forget the quiet little oven-bird, also with its golden crown; hence its name *aurocapillus*. When I speak of it as quiet I have reference to its movements while on the ground; as to its song, that is quite a different thing—I will not undertake to describe it, as I have not heard it for more than twenty-five years—but it is said to be one of our sweetest songsters.

But I cannot tarry longer with my little friends, for like them I am thinking of the breakfast that probably awaits my coming, and I turn toward the old home. When I came to the fence that divides the wood from the pasture lot, I perched myself on the top of it "and viewed the country o'er." Then my gaze returned to the near-by surroundings; and there, not two rods away, was the very spot where I witnessed my father kill the first "patridge" (we knew nothing of ruffed grouse then) that I ever saw shot. It must be over fifty-two years since then, but I remember it as well as if it were but fifty-two weeks. My grandfather—a soldier of the Revolution—was sick and wanted a "patridge" to eat. So father and I set out with grandfather's gun,* with which he claimed to have shot many an Indian across the Mohawk River. I remember that the bird was on the ground under a small sweet acorn oak tree, walking away when father called it "Biddy! biddy!" and then shot it. The next minute I had it by the feet with the wings flapping its sides, when father took it and wrung its neck, and then I was allowed to carry it, and a prouder boy "you never saw" as I trudged on behind carrying to grandfather his last "patridge." Years afterward I shot many in the same wood.

On the brink of the ledge to the left still stands the remnant of the old dead oak tree, from the top of which I shot the first crow while I was watching the cornfield in the spring. As I ran up to secure my trophy I noticed blood running from its eyes. As I reached to take it in my hand it rose in the air and commenced flying around in a circle, each circle larger as it gained in height, until finally it disappeared over the wood. A few days after I found it and hung it in the cornfield as a scarecrow.

Passing through the pasture lot I reach the ledge back of the house, and here, beside the rock that I am standing on, was where I found the hidden nest of the old turkey hen, and from this crevice at my feet my older brother found the broken blade of a sword more than two feet long; supposed to have been left there by the Indians after the war of 1812. But my walk has given me a good appetite for my breakfast, and I enter the house well pleased with my tramp among my old friends the pines, hemlocks and beeches with their feathery denizens, and I mentally promise that it will not be my last during my stay.

On Tuesday morning following I started for a trip in another direction. One friend offered me the use of his boat, another, a hardware dealer, loaned me his only remaining gun.

But to resume my trip down Indian River I took the boat at the old Indian landing, which is about twenty rods from the main street of the village, and where, in passing up and down the river, the Indians had to make a carry on account of a fall of about seventy feet. Taking the oars I was soon passing between the island and the cliff on the main shore, where fifty feet above me was "Lovers' Point," and directly under it and just above high water mark was "The Devil's Hole," a smooth, oblong hole, about two feet deep, cut in the solid rock. A quarter of a mile below the landing Black Creek enters the river, and about the same distance below on the opposite side Barnes Creek came in. In my boyhood days these were favorite places for ducks. I remember that on my first visit to the old home, in 1854, my younger brother and myself killed seven during the afternoon of the first day of our visit. Another mile below and I come to Mollie Brook, where over forty years ago I paddled my dugout canoe within good gunshot of a duck asleep with head under its wing, which I shot. At present I should not consider that a sportsmanlike way of shooting ducks, but at that time I considered it a great feat. Two miles from the village I passed Bullhead Rock, where, in the spring, three old fellows with a jug of whisky and fresh beef for bait would sit all night and pull bullheads into the boat with lines without hooks, and toward morning would go ashore, build a fire and skin the fish. On one such occasion one of them, who lived about three miles from the village, and who had taken more than his share, or at least too much, of the contents of the jug, allowed his companions to divide the fish. This they did by taking all the bodies and putting the heads and entrails into his bag, which they placed on his shoulders and started him for home, where he arrived covered with blood and full of whisky, just as his wife was building the morning fire, and when she asked him what he had in the bag he let it slip to the floor and answered, "Bull-hic-heads."

Half a mile from Bullhead Rock I landed at Stony Point, and taking gun and water jug start for the spring of cold water at the foot of the ledge, twenty rods back from the river. I take the gun expecting to find some partridge, as I had in my boyhood days. The sun was well up and shed its warm rays down among the small trees through which I was passing; and I was not long in finding among them many of my little feathered friends. The first to attract my attention was a towhee, busily scratching on the ground under the top of a fallen hemlock where I was looking for my partridge; while above him, on the trunk of a maple, was the busy little red-breasted nuthatch, circling it in search of the small insects; and in the branches above were a number of warblers of different species, also the chickadee and the kinglet. As I approached the spring I had to cross a low wet swale, and here among the low shrubbery I saw for the first time a live specimen of the Kentucky warbler, which, with the exception of being larger, is almost a counterpart of its cousin, the Maryland yellow-throat. I was anxious to secure this specimen, but as I had no shot smaller than No. 8, I knew it was useless to try to secure it in good condition at so short distance, and was content in watching it through the field glass for some minutes. In May last I saw the second live specimen of this species, but did not secure it. After loitering on the way for nearly half an hour, I reach the spring, quench my thirst, and filling the jug return to the boat, to find that there is a good breeze on the water in my favor; and cutting the top off a small hemlock shrub and fastening it up in the bow of the boat, I reverse my position by taking the stern seat, and what little rowing is needed is done forward instead of backward. I am on the "long reach"—so called on account of being a nearly straight stretch of the river of a mile and a half, at the end of which I come to the "bluff," a ledge of rocks 150ft. high, extending along the river more than a quarter of a mile. Near the middle of it is a square hole, about eighty feet above the water, where seventy years ago a pair of eagles had their nest. Opposite the hole was a large hemlock tree. I have often heard my father tell how Curtis Mann, a man more venturesome than his neighbors of the village, climbed the tree and in some way took the young eagles from the nest, which was fifteen feet from the tree. Nearly all the people in the village (of whom there probably were not over fifty) were there to see him perform the perilous feat. A few years ago, and after the old hemlock tree had fallen, one of the village youth had climbed the cliff and fastened the Stars and Stripes in the crevice of the rocks where the eagles built their nest two-thirds of a century ago.

Below the bluff the river's bank is low and level, and here forty years ago was a cornfield, planted ostensibly to produce food for the cattle and swine of the owner, but really on which fattened the coons, porcupines and squirrels, of which there was an abundance. My oldest brother and H. H. Thompson (at present of Passaic, N. J.) shot seven black and gray squirrels out of one tree: and it was a poor tree for squirrel, as it was not over forty feet high. In those days there was what was called "flood trash" along the river's bank, caused by trees falling into the river and driftwood lodging in them. Around these was good black bass angling. There was such a point just below the cornfield. Over thirty-five years ago I was hunting and fishing with Grover Cleveland down this river. He did the fishing while I did the hunting and rowing. When I got tired of the latter I would go ashore and hunt, leaving him in the boat fishing. I remember that in this bed of flood trash Cleveland hooked a large black bass, but while he was taking it into the boat it threw itself off the hook and disappeared through the driftwood. I remember also that he patiently sat there for an hour, expecting to catch that same bass, but did not get another offer. And I will "bet a cookie" that he was more anxious to get that fish than he is to-day to get the nomination for the Presidency, as he knows just how large the latter is, but he did not know just how large that bass was. The driftwood and most of the trees have disappeared, and with the latter the black and gray squirrels; but there is still good bass and mascalonge fishing, although I am not giving it much attention this day. I have dragged a stern line part of the time, but have kept it too far from the shore to be very effective.

I am now opposite Red Lake, which is less than a quarter of a mile from the river as the crow flies, but two miles by river to the outlet. About midway between river and lake is a home where fishermen are entertained, and good accommodations are furnished. As I pass around the bend in the river below the house a great blue heron rises from the bank and lazily flaps himself out of gunshot, although I had no idea of harming him. But I remember that on one occasion fifty years ago my father and the late Sewell Newhouse (of steel-trap fame) made a trip down this river to Mascalonge Lake, fourteen miles, when Newhouse wantonly shot fifteen of these beautiful birds. He was a good marksmen and on this occasion he carried a telescope rifle—which to me was the wonder of wonders at that time. After he had killed about a dozen herons my father told him he would not allow him to kill any more: but when he would see one sitting in the top of some dead tree he would say, "Now, Doc, just this one more;" and father, thinking it was impossible for him to kill it at that distance, would give consent. But after the fifteenth had been killed father concluded that Newhouse could kill them as far as he could see them and he would not allow the boat to be stopped to give him another chance.

But I have now turned the last bend in the river before coming to the outlet of Red Lake; and I find that the wind is against me instead of being in my favor, such is the winding of the stream. I throw my hemlock sail overboard and apply more power to the oars, and soon am in the more narrow channel of the outlet. What a change has taken place since the first time I passed through it more than fifty years ago, with my older brothers and the hired man to procure three natural bent white cedar trees, for the arms to the wagon hay-rack. At that time it was almost impossible to get from the river to the lake on account of trees that had fallen across the outlet. We had to chop out some and pull the boat over others; but now it is free from these and there are no overhanging trees on its banks. As I neared the lake an American bittern started up in front of the boat and flew over the marshy bank and dropped among the cattail flags.

Crossing the bay at my right, I land on a point where, in 1856, while on a visit to my old home, I helped build a camp, which has since been enlarged and used to entertain fishermen and tourists, and here as a tourist I sought entertainment; but to be disappointed, as it was closed. I never start out on an all day tramp without my lunch, and seating myself on the rocks near the landing, I proceeded to entertain myself and the rock bass in the water at my feet, who greedily partook of the "crumbs of bread that I cast upon the water." On the east side of the lake opposite the outlet and extending south half a mile, a bluff of rocks rises from the water's edge 150ft. in height. The smooth rounded top and front show strong indications of the glacial period. Robert Sixberry, probably the first white man to navigate Indian River and this lake, used to say that from the top of this bluff, he had seen Indians fall from a log while trying to cross the outlet. The distance is between three eights and one-half mile. As he did not live on very friendly terms with the Indians the people were at liberty to draw their own inference. Sixberry died near there about twenty years ago, at the age of 111 years 8 months. When about eighty years of age he met with an accident; and my father amputated one of his legs. Sixberry sat in a chair during the operation and bossed the job. One of the ten lakes in the town of Theresa is named after him: "Sixberry Lake."

In building the camp where I am taking my lunch we did not do any digging for the foundation, but a few years ago the water from the eaves disclosed to view some fine specimens of Indian pottery; and quite a number have been found since. I have a small one, also a very fine stone pipe that was plowed up on the bank of the outlet.

After my lunch I take the gun and start for a tramp through the wood, following an old deer runway along the lake for some distance, and then leading into the dense forest to a trail running through to Mascalonge Lake. The forest is clothed in all its grandeur—the maple with its green, yellow and red; the beach with its sere brown, and the hemlock in its sombre green—all intermingled with the bright sunlight of this October day. As I leave the high rocky shore of the lake and enter the more open wood below, I am again in the midst of my little feathered friends, all too busy to give me even a passing notice. They are feeding to-day, preparing for their flight of to-night, for to-morrow they may be many miles away toward their southern home. A few minutes later I notice a commotion among some kinglets and chickadees. As I get near to them I notice a large black snake lying doubled up on a small limb about 8ft. from the ground, and the same distance from the trail. On the impulse of the moment I raised the gun and shot it, and the next moment I was sorry that I had done so. I might have retired a short distance and watched them; but it was now too late, for the birds had taken themselves away at the report of the gun and the snake was writhing on the ground. The shot had taken effect about a foot from the head, and the same distance from the

*It was at this time a percussion pill-lock, having been changed from flint-lock. A few years later it was shortened 12 or 15in., had a new stock and was changed to cap-lock; yet it was "grandfather's old gun," although the grandfather had gone the way that all grandfathers and fathers must go. Then it was claimed by my two older brothers. Later it fell to myself and a younger brother. Later still we loaned it to a friend to go duck hunting, and it fell out of the boat and now lies buried in the mud at the bottom of Hyde Lake, about three miles from the village.

other end (is it tail or body?). As I approached it its head assumed a defensive attitude, and when I held my foot up to it, it struck the shoe with more force than I expected. I then held a stick near it and it paid no attention to it; but when I again held up my foot it struck a number of times. I left it in this condition, and on my return three hours later it still showed fight. I then killed and measured it and found it to be 5½ft. in length and 2in. in diameter—not the common water snake, but a real black snake. This was the second I had killed in the same position. Five years before at Stony Point, above mentioned, I shot one that measured 6ft. 3in.; the next moment after I shot it I saw a robin fly up from the ground within a rod of the snake.

I started on my return, and was hurrying along the trail, when a "streak of brown feathers" suddenly started up from the ground and disappeared around a ledge just in front of me. A few minutes after I saw something on a rotten log, about eight rods away, that I took to be a ruffed grouse; and knowing that I had a No. 6 shell in the left-hand barrel, I concluded to shoot from where I stood. To my surprise the grouse did not move, and I concluded it was not a grouse and started forward, when to my great surprise it took wing and disappeared. I walked up and examined the log where it had stood, and found no signs of shot marks. I then remembered that after shooting the snake I had felt a rattling in the gun. The recoil had loosened the wad, probably, and the shot had dropped out. On examining the shell in the right-hand barrel I found the wad was loose, and I came to the conclusion that I had fired a blank cartridge at the only grouse I saw that day.

When I reached the boat, I found it was 5 o'clock and that I had a six-mile row before me. I took it easy and reached the village at 7 o'clock, having had the most pleasant excursion since the one through the Adirondacks the year before.

The next morning I again visited the old wood back of the house accompanied by a cocker spaniel and carrying the gun; and had hardly got into the wood when the dog put up a grouse, at which I shot, but only had the satisfaction of picking up part of one of the tail feathers. The grouse passed out of the wood toward the village. When I returned the gun to my friend that evening, he said that during the morning a grouse had flown against one of the plate-glass windows of the store adjoining his and was killed. I presume it was the same bird that I had shot at; but, as it had been picked and cleaned, I could not prove my claim.

I had gone but a few rods when another got up; but he managed to put a large oak tree between us; and when I shot he was too far away. He fled over the ledge in the same place as on the previous occasion and into the thick hemlock below, where I followed, but without finding him. Here I strike the old cow path that led to the back pasture; and as I mount the hill I recognize the hemlock tree (forty years ago was but a small shrub) under which I killed my first game with the new gun, a 34in. 16g. double-barrel muzzleloading English arm. On that eventful day I was accompanied by my youngest brother. We had got an early start with the cows; and as we had often seen partridges under this small hemlock, we approached carefully. I saw what I took to be the head of a partridge, raised the gun, blazed away, and then there was a rush through the smoke for our game—to find that I had killed not a partridge, but an old hen and five well-grown chickens. We never before had seen a hen in those woods, and could never explain how they happened to be there at that time and under the very bush where we had time and again seen partridges.

Leaving this never-to-be-forgotten spot, I take the old wood road running along below the ledge, now thickly overgrown with small hemlocks and beeches—a perfect shelter for game; and come to the place where I chopped my first and only cord of wood, which I delivered to the local jeweler to pay for the first gold pen I ever owned. If I remember right, that wood was not first-class hardwood; but then the pen was not over 10 karat fine. To the west of me, and on the opposite side of the gully, was once a cornfield, and it reminds me of the time that we went coon hunting long time ago; also of the melon patch on the further side next to the wood, which made it convenient for the boys from the village. Following the old wood road south and passing through a clearing, I am where once was the old maple sugar bush, now shorn of all its majestic maples, wide-spreading beeches, shaggy hickories, rugged birches and the few large pines that reared their tops far above their neighbors. Not a vestige remains but a few blackened stumps and roots of the pines, while through the center of where all these once stood is a deep cut of the Utica & Black River Railroad, and the rest of it is so barren that a billy goat would starve to death if it were not for the dry pine roots and sheep-sorrel. I follow up a gully looking in vain for the spring of cold water that flowed from under the old hemlock on the hillside. A short distance from here my oldest brother and I with the aid of hound dug out the first fox that I ever saw run to hole. At the head of this gully was a large stone that time and fire had not destroyed. On this stone was where I had, alone and unaided, killed my first partridge when I was thirteen years old; and on the ledge just above six years later I killed five one morning and was back in the store by 8 o'clock; this was late in one September, and was done with the new gun. That faithful weapon is now nearly useless; but as I write this screed, it hangs with the powder flask and shot bag on a fine pair of antlers above the door of a room containing a collection of over three hundred mounted specimens of birds, among them the last grouse I shot with the gun. In the same case with this bird is treasured the first one killed by my oldest son with his new breechloader, thirteen years ago. But I have strayed a long way from my boyhood home.

J. L. DAVISON.

LOCKPORT, N. Y.

In my language class in school one day the sentence "He earns his livelihood 'by hook or by crook'" occurred, and I asked the class what "by hook or by crook" meant, and only one boy raised his hand. "What does it mean?" I asked of him. "Oh, catching fish or catching sheep, I'm sure."—*Youth's Companion.*

Customer.—Show me a hat to go fishing with.

Clerk (examining the one he has and making a selection).—How will this do, sir?

Customer.—That's all right. But I want it two sizes larger than ordinary.—*Clothier and Furnisher.*

Natural History.

SOUTH AFRICAN REPTILES AT HOME.

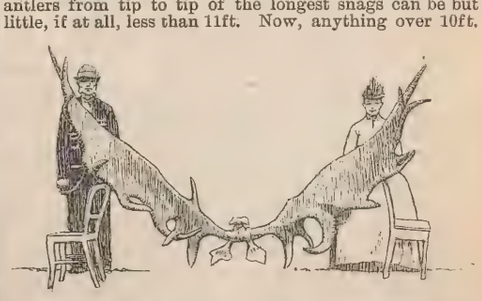
II.—CHAMELEONS.

ALMOST as frequent as tortoises in some parts of Cape Colony and quite as popular as domestic pets, are chameleons. A school boy on a holiday ramble would not find much difficulty in picking a chameleon off a bush did he know where to search for it. "Oh, I'll get you plenty of chameleons," say my young friends to me, not far from Port Elizabeth. On flowering shrubs they are most frequently found and in gardens. In a garden in Cape Town I one day gathered four off a pomegranate bush. Two were full grown and of a brilliant iridescent green with reddish markings; one was only half grown and had not full colors; the fourth was a tiny scrap like some stout-legged insect and was so exactly the color of the stem of the bush on which it was resting, that only the inequality and unevenness of the spray attracted my notice at first, when looking closer this mite was perceived. It did not change its tints rapidly and vividly like the others, but retained its pale, inconspicuous hue, excepting at night, when like the rest it turned "white," that is, extremely pale, the markings being then almost inconspicuous.

Chameleons, as no doubt the readers of FOREST AND STREAM are aware, all belong to the Old World, and particularly to Africa. In their tongue, their feet and their eyes they differ remarkably from other lizards. Their feet, though possessing five toes, are divided into two grasping groups, looking like a hand in mittens, and only by close examination you perceive the presence of the two or the three opposing toes respectively, but so close together as to appear like one broad one. On the padded soles or palms of these grasping limbs you can feel and see the small—may one say—palpi which enable them to grasp so firmly, that it is difficult to detach a chameleon from its foothold. These clinging feet, together with their prehensile tail, enable them to sustain themselves on the branches in the strongest gale. The tongue is wonderfully extensile and extensible. By the former word I mean the distance it can be thrown out of the mouth; by the latter word its own elongation is inferred, for I am sure there is not space sufficient in the lower part of the mouth to accommodate the eight-inch tongue which can be thrown out unless it is greatly contracted again. We know that it lies "folded" in the mouth, but it folds into a very small space, and when I have held a chameleon's mouth wide open to try and get sight of this remarkable member it lies so compactly in the loose lower lip that to see it is next to impossible. The more so because an angry chameleon (and who would not be angry to have his mouth held forcibly open) swells out his loose lower lip and the tongue lies in a well quite out of sight. Illustrations do not generally convey a true idea of this slender and delicate member with the expansive tip on which the glutinous saliva is secreted. For the most part a chameleon's tongue is represented as a stout and rigid club. The distance to which the little reptile can throw out its tongue on an emergency can be satisfactorily decided by those who have tame chameleons, or are on a visit to the reptile house in zoological gardens. Many of my readers have no doubt seen those at the London Zoological Gardens when the keeper is holding some enticing food within reach. Six inches is the usual distance and I have seen the food held as much as eight inches off, and caught by the quickly thrown out tongue. When at liberty and feeding themselves they approach stealthily and much nearer to the insect they covet.

Pet chameleons in Cape Colony are utilized as domestic fly-catchers. A lady of my acquaintance one day took the trouble to count the number of flies her tame chameleon caught while it was resting on her hand. When she saw a fly on the wall or table she held "chammy" near it, when out flew the tongue and the fly disappeared. She had the patience to count one hundred, and thought that was enough flies for one day and restored the fly-catcher to its cage. School boys make bets with each other to see whose chameleon will most quickly catch say twenty, or fifty flies, as may be. So chameleons in hot countries where insects abound are not without their use. In a large cage in which were several lizards, birds and chameleons, I threw in some locusts the other day, and was surprised to see one of the chameleons creep up to a large one, 2in. in length, and catch it. It was a big mouthful and the little green fly-catcher found that to swallow the stiff morsel was less easy than to catch it; but at last it disappeared and the feeder took several minutes to recover itself. They always creep upward wherever they may be. In a window they manage to cling to the frame between the panes of glass and by great perseverance get higher and higher, never looking but always feeling for foot-hold, and extending in turn each searching foot which moves cautiously and feels its way until it manages to effect a grasp, and this with much patience and perseverance, the wood-work of a window not being easy to grasp.

One of the chameleons, which had been a long while in a cage, had become so entirely the color of the wood that it was not easy to distinguish it. I placed it among plants and on the grass, but it did not turn green again, and then I left it on a vase of flowers, in the center of which I placed a tall stiff spray. Soon the creature found its way to the very summit and there it remained "as still as death," until a fly happened that way; then there was a very slight movement, a click was heard and the chameleon resumed its silent observations as if no fly had been swallowed. There is something cunning and weird, almost sinister, in the expression of that very small eye in the center or apex of its mobile globe, now turned upward, now downward, one eye forward the other backward, so quietly yet so watchfully, rarely the two eyes looking the same way. The chameleon must surely be endowed with duality of brain, for it certainly must take in two ideas at once through its two eyes, or why should it move both so ceaselessly in contrary directions? Motionless is the animal hour after hour, the eye being the only sign of life it displays. The one at the top of a spray in the vase of flowers remained in the same position day after day, only throwing out its tongue to catch a fly when one flew by, and otherwise moving only its ever restless eyes. At night it changed its color, growing gradually paler as the day closed and becoming almost white as darkness set in. If disturbed or touched it immediately became dark and thus remained until its anger subsided. The rapidity with which chameleons change their color is marvelous. You gather one from an outdoor shrub and immediately it becomes dark, almost black, hissing and with its mouth wide open, threatening to bite. Meanwhile it is never still, but continues to crawl upward whenever possible; up your arm, up your sleeve, always upward. By degrees the angry black changes into whatever color is nearest. If one's dress is of a brownish color so is the chameleon's. Upon a crimson cloth it becomes almost crimson, move it upon a gray surface and the bright tints will quickly subside. But at night, whether disturbed or not, it invariably assumes its palest tints. Those two which I caught in the Cape Town garden, which were of a very brilliant metallic green, were splendidly decorated. On the back or sides, sometimes saddlewise and sometimes lengthwise, were slashes of red. The markings vary in the individuals. The crest and decorations on the head and back are like fretwork, the whole body and limbs are dotted with very fine warts or tubercles like shagreen, and when angry all these distinctive features are exaggerated, the gills and crest are swelled and the skin of the chin is puffed out so as to show white stripes, while the creature opens its mouth wide, displaying the yellow, fleshy interior, and closing its teeth on your finger should you provoke it to do so. Otherwise it only emits the hissing sound, which, however, is not a true hiss but more like the sound produced by the expulsion of our breath with the tongue against the teeth. When very angry or suddenly alarmed chameleons utter a squeak like a young bird. My friend, the Rev. G. Fisher, of Cape Town, an enthusiastic naturalist, whose name is familiar to the visitors to the reptile house in the London Zoo Gardens from the number and frequency of his contributions there, informs me that one day he was surprised to hear a loud squeaking and commotion in an adjoining room where were some pet chameleons, and going thither he found that the disturbance really proceeded from these small reptiles on account of a cat who was surveying them through the wires. Cats, by the way, are their dreaded enemies, who catch and devour them whenever possible.



The bite even of the largest chameleons does not fetch blood, though the teeth leave indentations. I often provoke them to bite me in order to witness their habits, and only once, when one caught me between the fingers where the skin is tender, was I really hurt. On this occasion the thing held on so persistently and firmly that I could not for some time free my finger. At last I was obliged to call some one to get it off by forcibly opening its mouth. Even then it did not pierce the skin, its teeth are too fine and regular, but the dotted triangular impression of the little teeth was very red and distinct for some minutes. The instinctive habits were displayed even in that tiny creature which I picked off the pomegranate tree. It opened its mouth and hissed to the extent of its capacity, and when I inserted my finger in its wee but wide-open mouth it bit with a force astonishing in such a mite, and it was able to produce some slight indentation with its minute teeth and feeble jaws. It also became immediately darker, but not black like the grown-up specimens.

As chameleons become tame they change color less rapidly, showing the habit is protective and to render itself less conspicuous. Indeed the power of assuming the color of its surroundings is the only protection these helpless creatures possess. Mr. S. D. Bairstow, of Port Elizabeth, F. L. S., etc., and ex-president of the Eastern Province Natural History Society, of Cape Colony, informs me that he was watching a chameleon on a shrub when a wild bee or two came out of a nest close by, and immediately the chameleon doffed its bright green dress and became nearly black and therefore inconspicuous. Their turning white at night may find reason in the predominance of shining foliage in the South African trees. The leaves of most trees and shrubs glisten under the bright stars, and the moonlight and so appear white. A chameleon without reasoning on cause and effect, sees bright white leaves and imitates them.

SOUTH AFRICA. CATHERINE C. HOPLEY.

ANTLERS OF EXTINCT IRISH DEER.

THE photograph from which the figure of the skull and antlers of the gigantic extinct Irish deer (*Cervus giganteus*) is copied was kindly forwarded to us by Mrs. Graham Lloyd, of West Felton Grange, Oswestry, Salop, with the information that it was taken from the finest of a series of Irish examples obtained by her late father, the Rev. T. O'Grady. The height of the chair in the figure is 2ft. 11in., and we thus gather that the span of the figured antlers from tip to tip of the longest snags can be but little, if at all, less than 11ft. Now, anything over 10ft.

in span in the antlers of the Irish deer indicates an unusually fine example, although specimens are now and then obtained measuring slightly more than 11ft. in total span. There are, however, no such unusually large examples in the British Museum (natural history) at South Kensington; the largest antler in that collection measuring 10ft. 7in. in span, while three of the finer of the two mounted specimens are 9ft. 11in.

It is thus apparent that the specimen we now figure is an unusually fine one, and it is further noteworthy on account of its remarkably perfect state of preservation. That deer capable of carrying antlers of the enormous dimensions and weight of the above must have been of gigantic size goes without saying; and Professor Ball estimates the height of the largest stags at the withers at upward of 7ft. (21 hands). The cause of the total extinction of such a magnificent beast as the extinct gigantic

Irish deer within the human period has yet to be learned, as we can scarcely believe that it was effected by the early inhabitants of Ireland, armed with nothing better than stone hatchets.—*Land and Water.*

RECENT ARRIVALS AT THE PHILADELPHIA ZOOLOGICAL GARDEN.—Purchased—Two redbirds (*Cardinalis virginianus*), one diamond rattlesnake (*Crotalus adamanteus*), two ground rattlesnakes (*Crotalophorus miliarius*), one common hog-nosed snake (*Heterodon platyrhinus*), four black hog-nosed snakes (*Heterodon platyrhinus niger*) eight king snakes (*Ophibolus getulus*), one scarlet king snake (*Ophibolus doliatus coccineus*), one scarlet snake (*Cemophora coccinea*), nine common black snakes (*Bascanium constrictor*), eight coach-whip snakes (*Bascanium flagelliforme*), one pine snake (*Pityophis melanoleucus*), one corn snake (*Coluber guttatus*), two green snakes (*Cyclophis vernalis*), one indigo snake (*Spilotes cerberinus*), one glass snake (*Ophiosaurus ventralis*) and one mitred snake (*Contia pygaea*). Presented—One woodcock (*Philohela minor*), one mockingbird (*Turdus polyglottus*), one bald eagle (*Haliœtus leucocephalus*), one turtle dove (*Turtur risorius*), one sparrow hawk (*Falco sparverius*), one leather-back turtle (*Thalassochelys caouana*), one alligator (*Alligator mississippiensis*) and four bullfrogs (*Rana catesbiana*). Born—Three prairie wolves (*Canis latrans*).

Game Bag and Gun.

NEW YORK GAME LAW.

The New York game law bill was signed by Gov. Flower last Thursday. The full text of the new law has been put into type by the Forest and Stream Publishing Co., and will be ready for mailing on Saturday next. Price, 25 cents per copy.

A special edition will be printed for the use of clubs and associations, who may order in lots of 100 or more. These will be supplied at a normal price. Write for terms, stating the number wanted.

NEW YORK ASSOCIATION.

AT the Syracuse Convention of New York sportsmen the chairman of the convention was instructed to name four persons who, with himself as chairman, should constitute a committee of five to present to the Association at its June convention recommendations as to amendments of the constitution, and a scheme of more efficient protective service. In accordance with such instructions the undersigned has named as members of the committee Messrs. D. H. Bruce, of Syracuse; F. J. Amsden, of Rochester; J. C. Van Cleef, of Poughkeepsie, and Robt. B. Lawrence, of Flushing.

The committee will be pleased to receive suggestions and communications from all who are interested in the work of game and fish protection in this State.

CHARLES B. REYNOLDS.

OFFICE FOREST AND STREAM, 318 Broadway, New York.

HOW TO CAMP OUT.

HOW to camp out? Well, this is a great, big subject. A book could easily be written upon it and still leave unspoken much that should be said.

Just now the question with me is not so much "how to camp out," as how to get away from business, a thing I have thus far been unable to do this summer. Horace Greeley, poor fellow, used to say that he had been going fishing for twenty-five years, but had never gotten off. That is the way with too many of us, but it is all wrong. There is no doubt about it, the American man is the most persistent grubber in his business of any on earth. He delves and delves and never lets up, until the first thing he knows crow's feet appear under his eyes, the hair slips off the top of his head, a patch of gray appears upon each temple and his wife begins to call him "old man."

It won't do. The vertebrate mammal, man, is so constructed that his spine and the gray matter in his alloged brain absolutely require rest. If he does not take it voluntarily nature comes along and enforces it with chills, or grippe, or dyspepsia, or some other fiend of equally reprehensible character, and the worst of it is that the time lost with these is twice as great and forty times as uncomfortable as would have been necessary for a health-restoring, blood-invigorating, life-giving outing down on Big Piney or Current River.

Then see what an imposition it is on the woman for a man never to go fishing or hunting. Keeping his ugly phiz so constantly before his dear little wife that she does not have a chance to wish he would come, because he is always there, and instead of presenting his features wreathed in smiles, bringing them home at night elongated like a yard-stick because of his periodical attacks of mulligrubs.

Hie thee to the fields and the woods and the streams, O man! that thou mayest get a little tan on thy cheeks and sufficient muscle in thine arm to hug thy wife with seemly and becoming vigor. Of what use is a pale jellyfish of a creature to any woman on the top of the earth?

Then, what do you know about the world? Your view of it is a one-sided affair—it is of bricks and mortar, smoke and grime, money-chasing; recreation taken among the rustling of silks and satins, perhaps, or tinsel, amid fetid odors from gas and all other abominations.

There is more than this on earth, and better. There are the green fields, the grizzled mountain side, the lovely river and the placid lake. There are God's free creatures, the birds of many colored plumage and sweet throated melody; there the furred denizens of the prairies and the woods; for the contemplative angler there are the fishes of various hues and habits; the American forests in their grandeur and magnificence; and lowly and humble, but none the less beautiful and sweet, the flowers and ferns which nestle close to mother earth.

Go study these. Drink inspiration from the breast of nature, and breathe in health at every pore from the wholesome, balsam-laden breezes.

But how to camp out? That is what we are to get at. There are several ways of doing it, but whichever way you undertake be sure to think of it carefully beforehand. The less you take with you the more thought you should give to your preparation. I am not of those who go to the woods to "rough it." I go to enjoy myself, and queer as it may seem, I have never been able to be very happy when I was uncomfortable. We are all familiar with the observation that much of the pleasure of life lies in anticipation. In nothing is this truer than in the preparation for fishing, hunting and camping out. To the genuine lover of these sports the recounting of one set of experiences is closely followed by the preparation for new ones, and the man who would the most thoroughly enjoy them will learn to load his own shells, to sew his own tents, knit his own nets, tie his own flies, mend his own rods and tackle, patch his own boat, and so on. These are simple things, easily learned, and the knowledge of how to do them is necessary to the true sportsman.

There is a good deal said nowadays in sportsman's literature about "going light;" that is, carrying into the woods as little baggage and impedimenta generally as is possible. As a Frenchman would say, *cela depend*—that depends on circumstances. I have spent several years of my life under canvas, and there, as at home, a roof that does not leak, a yielding, warm bed, a comfortable place to sit and a good cuisine are enjoyable and conducive to a peaceful frame of mind.

Of course a man can live in the woods with what appliances for shelter and cooking he can carry on his back, and live with some degree of comfort, too, if he knows how; but if he is to be in a permanent camp while he is out, there is no reason why he should do so. I would divide ways to camp out into three general heads:

1. The permanent camp.
2. The movable camp, where there is a boat or wagon to transport a reasonable amount of baggage.
3. The movable camp, where from day to day the camper must carry his tent, firearms, fishing tackle, cooking utensils and provisions.

There are degrees between these, but this division is sufficient for practical purposes.

The most important thing toward a pleasant outing is the selection of your company.

In no other place is the human nature in a man so thoroughly developed as in camp. The gourmand, the grumbler, the egotist, the selfish man, the lazy one, all of these may hide their faults at home, where occupations and habits separate and soften, but throw them together under one tent, and cause them to rely more or less upon their own efforts for comfort, and if there is "dog hair," so to speak, it will get between the teeth. Make your parties small (four is a good number) for various reasons; there is not so much chance of disagreement, transportation and provisions are easier found, much crowding and discomfort are obviated, and it is generally more desirable.

Make one man the paymaster, let him settle all the bills, keeping an account thereof, and at the end of the trip square up, each man promptly paying his share. The haphazard way of one man paying here and another one there is never satisfactory, and frequently leaves the impression on every man in the party that he has paid more than he should have done. Gentlemen may never allude to these things afterward, but the right way is for each to meet his proportion of the expense.

Don't grumble! By all means, don't grumble! People don't go camping to be made miserable by carping fault-finding. If you can't keep from grumbling stay at home and grumble with your wife. Poor thing, she is, no doubt, used to it, but your camping companions are not married to you for better or worse, and if the only side of your character you can show them is the grumbling one be sure that the room you cumber is much better than your company.

Go out to have a good time. Throw care and physic to the dogs. Eat coarse corn bread for your liver and be jolly.

By the way, the subject of eating is touched upon, let me dwell upon it a moment. There is so much written and said about the splendid appetite that follows out-of-door life that many persons as soon as they get into camp begin to stuff themselves to repletion, eating twice as much as they could assimilate even though they were camped out in three or four different places at once. The next thing is indigestion, cholera mixture and misery for themselves and everybody about them. Temperance in diet is just as commendable in the woods as in the city. Of course you can eat more, and will eat more in camp; that is all right and as it should be, but still be careful and don't stuff. Another thing, don't go out in nature's bowers and sanctuaries to fill yourself with "bug juice." If you must befuddle yourself befuddle yourself in the town it is generally accustomed to it. Take a little bit of pure whisky with you for proper purposes—to use when you have received a wetting, or on damp and foggy mornings, for snake bites, etc., but don't turn a camping excursion into a debauch; the two things are incongruous.

You intend to start out camping, say in two or three weeks. Well, get ready; begin at once; do not defer it. You will enjoy the preparation nearly as much as the outing. The first thing to think of is shelter. The best article for this purpose is a first-rate wall tent covered with fly. "A" tents are not good for ventilation, and the persons on the sides have not sufficient head-room. Get your tent of ample size and heavy duck. It may be a little more bulky and heavy, but we are preparing for a permanent camp now where your "duffle" is hauled in a wagon, and a few pounds more or less do not count for much against the solid comfort of keeping dry in a downpour, *e pluvius wettum*. In addition to your principal tent take with you two or three flies—not the kind that tickle your bald place, but good, honest cotton ones, which may be converted into shelters for your kitchen, servant, extra baggage, etc., so that when all are stretched and the camp made you will have a picturesque little village near the spring or clear-water stream you have chosen for your temporary home.

For all your paraphernalia make a memorandum in a small book, which carry in your pocket, and jot down in it items as they occur to you. You will be astonished to find what a long list there will be, many of the articles small and inexpensive, but of great comfort when they are needed. First, there is the bed. Think well upon that point, for if you do not rest well at night you cannot enjoy yourself much in the daytime. There are so many devices for camp beds that I cannot stop here to expatiate upon them, but whether you take a simple piece of strong canvas, with hems, to be converted into a cot, a fixed cot, a semi-mattress, or depend upon leaves and browse, be sure to have a soft and comfortable bed. For clothing take some of your old suits, of substantial, warm goods. Special hunting clothes are expensive, unnecessary and frequently cumbersome.

If you must have a lot of extra pockets buy a dollar cotton sleeveless coat of a brown or a dead-leaf color. It will be as useful to you as would a $25 affair. You will need a change of under and outer clothing, an overcoat, a waterproof coat, rubber boots, a pair of slippers and a pillow. Provide plenty of warm bed clothing, and if later than May or earlier than October be sure to have a mosquito bar so fashioned that you can easily hang it upon a simple frame, which can be constructed of small poles. No matter what part of the country you live in you are apt to think you have the finest climate in the world except for its sudden changes. These changes occur in the woods as well as in the cities, and you should be prepared for them. A few camp stools, either a folding table or some planks to make one, and your tent outfit is complete.

For cooking utensils you should have a cast iron baker, a frying pan, water pail, camp kettle, smaller kettles, the latter made of tin, three or four deep pans, coffee pot, tin plates and tin cups that nest, common knives, forks and spoons, all constructed so they will nest in the space occupied by the camp kettle, which should be about the size of an ordinary three-hoop bucket. These utensils should be easily sufficient to cook for ten men. Properly made, there will be quite a number of vessels, and yet they will weigh but a little, and in their snug canvas bag will be a small lift for one hand. The frying pan, of course, must have a removable handle, and the loops and bails must be so contrived as not to interfere with nesting. My set cost about $6; it has been out time and time again, and is still as good as new. The secret of that is that it has been kept clean. The men who do not wash up their dishes and utensils in hot water and with soap after each meal are not expert campers.

It is a mistake to take into the woods a great supply of preserves and condiments. The fresh air and exercise will prove to be a sauce piquante for plain, substantial fare. But it is also an error to stint the larder of such things as should be taken. My list is about as follows: A boiled ham for use the first day or two while you are preparing camp, a bag of beaten biscuit, a few pounds of hard tack, corn meal, flour, breakfast bacon, lard (a plentiful supply), salt (about half of what is usually taken will still leave half to be brought back or thrown away), baking powder (the supply of this article is generally short), coffee, tea, a small quantity of beans and rice, potatoes and onions, butter (in tin vessel with close-fitting top that will not leak under any circumstances of tumblification), strong black bottle of vinegar, ditto of molasses and ditto of lucifer matches (these bottles to have first-rate rubber stoppers). As some of the newspapers say, this last parenthesis is official and important. Mustard, pepper, granulated sugar, baking soda, coarse soap and a few other knicknacks that are not mentioned here, though the above should be sufficient, as very few parties will fail to add to them enough fish and game to render the table epicurean.

To what has already been hinted at, for that is all that is attempted here, should be added a miscellaneous list, for instance: A ditty bag containing a "housewife," supplied with needles, pins, thread, buttons, buckles, etc.; court plaster, Sun cholera mixture, cathartic pills, quinine, etc. Besides the contents of this little bag there should be a sharp ax and hatchet, small wrench, nippers, a supply of tacks and nails, some pieces of leather, an awl, spade with removable handle, two thicknesses of wire, a good lantern (very necessary), rifle, shotgun, ammunition, fishing rods and tackle, coal oil (to be purchased at the last store you pass going toward camp), two or three candles for emergencies, plenty of small change (very useful in the woods, but does not grow on trees), a hammock or two, perhaps, twine and rope in rather liberal quantities, vial of neat's-foot oil for shoes, shaving apparatus, comb and brush, toilet soap, towels, tobacco, books, writing material, blacking and brush, etc. Please observe the and-so-forths in these lists, and do not neglect the consideration of small things, for very often in camp when you want a thing you "want it bad."

There are a few other observations which occur to me: First, the woman question, and then the servant question. I see no reason why a man should not occasionally take his sweetheart, wife or daughter out camping. The ladies, God bless 'em, enjoy an outing fully as much as the men, and I know one tow-headed girl that always beats me catching fish when I give her the chance, and, some way, when there are ladies in the party I can stay out longer without bothering about the office work than when the charm of their presence is lacking.

To gentlemen who do not care to swear or to drink more than is good for them, ladies who know how to be considerate are no restraint. Being a Missourian, and not a Kentuckian, I think a fresh, graceful woman the most beautiful of all nature's handiworks, and I have found their musical, rippling voices and merry laugh to add to the pleasure of the camp as well as the home. As to taking servants with you the answer seems to be this: If you can get a good one—a good cook—a quick and handy fellow, take him. If not, do without. There is a great deal of satisfaction in being independent of servants. If there are three or four persons in the party, one to cook, one to bring wood and water, one to straighten up camp, etc., the labor can be made light and pleasant. And such fried fish, and such burgoos! Oh, my! Don't talk! Where does food ever taste so well?

If you are going to a place where boats will be needed, be sure to think of and provide them beforehand. Don't trust to luck in this matter, as carelessness regarding it may spoil your whole trip. I use an Acme canvas boat everywhere with great satisfaction. It may hardly be safe enough for novices. Err on the side of safety every time in this respect, but be sure that you are provided with good boats. You should prepare for your trip well in advance and ship your "duffle" to where you are to take wagons several days beforehand by freight, and thus save considerable expense, unless you have a permanent outfit in boxes with handles that can go checked as baggage. I have done this for some years with success. Expensive trunks are unnecessary, as poplar boxes with strong hinges, handles and locks answer as well as Murphy's best.

When you drive into your camp-ground and John, Dick or Tom makes a break for his gun or rod to be the first to kill something, take him gently but firmly by the scruff of the neck and tell him that the first thing in order, and the only thing until it is done, is to make camp. Pitch your tent in the most cheerful place you can find, away from the possibility of falling limbs of trees. See that it is square and ship-shape—every rope drawing just as it ought. It should, if practicable, be on a piece of ground that sheds water in every direction, never in a depression. Ditch it thoroughly, at once. Make your ditches deep, and leading away from the spot occupied by the fire. The neglect of this precaution, just because the

weather is fine on the day you arrive, may cause you all to look like a parcel of drowned rats before the next morning. Prepare your beds carefully. If of leaves or browse, put down a substratum of brush, large at the bottom and getting finer toward the top, so as to render it springy and to elevate you well above the ground in case of rain. Stretch a line from pole to pole, high up, to hang little things upon. Out of an old box, a few pieces of board, or, lacking these, a few poles, make a kind of bureau at the back tent-pole, for brushes, combs, pipes, tobacco, etc. It will prove to be a great convenience. Stretch a fly in front of and at the same angle as the roof of your tent. This is to be used as a dinning and sitting room Let the front be supported by two leaning and interlocked poles, so that your evening fire may be opposite the middle, and shining in, make everything warm, cheerful and bright. Make two fireplaces, of stones if they chance to be lying around, if not, of logs supported by stakes driven in the ground. Burn good, solid wood, that will make coals, but not sparks. If you use brush you run the risk of having holes burned in your canvas by falling embers. A small fire is better for cooking than a large one. Coals are what you need for culinary purposes. Stretch your kitchen tent and what flies you intend to use. Drive big nails in a tree near your kitchen fire to hang things on. Stretch two or three long poles from tree to tree about 6½ft. from the ground for use in airing bed clothes. Camp convenient to good wood and water. Before you do anything in the way of recreation finish your camp, supplying all the little conveniences that your ingenuity can suggest.

If fishing is to be part of the sport always go prepared to catch and preserve your own bait. Many a trip of this kind has been rendered fishless by a neglect of this precaution. Take a few minnow buckets, a minnow seine, and do not forget the spade to dig the little red worms. Fish are as fastidious in these days as they were in those of Dame Berners and dear old Izaak. When they scorn the beautiful tied fly, the glittering silver fraud, the frog or the minnow, they will sometimes greedily devour the fatal barb, if from its end there dangles the wriggling "wum"—don't despise the "wum."

If your camp is to be movable from day to day, by wagon or boat, cut down the proportions of what you take. Make your tent so that it will be easily pitched and struck. Put up your various articles in a number of packages, canvas-covered and with handles, none to weigh more than 30 or 40lbs. The canvas will protect them from rain, and the handles be unto you, every time you load, a joy forever.

No trip can be finer than a float down one of the numerous lovely rivers of Missouri. The scenery is beautiful, sometimes grand. The motion of the rapids exhilarating. Fish and game come abundantly to your hand and new delights burst upon you upon rounding every bend.

And so, your camp made, your rods and guns jointed, your tackle ready, your boats lightly dancing upon the laughing waves, your commissariat disposed of so that it is safe from weather, vermin, then, my friends, you are ready to enjoy the very nectar of existence, the *dolce far niente* of camp life. The moon will shine for you more brightly, the stars will be like diamonds in the sky, the birds will warble more sweetly, the stream make music more melodious, and life will be for you one continued harmony and rest. Your muscles may occasionally become weary, but there will be repose for your brain such as watering places and many-peopled excurions here or there can never give.

Hie thee to the woods, O, man, renew thy youth and be happy. A. A. LESUEUR.

SAN JOAQUIN MARKET-HUNTERS.

ALHAMBRA, Calif., April 25.—*Editor Forest and Stream:* In this State duck hunting for the market is quite an extensive business, running up into the thousands of dollars every winter, and affording a good living to many hunters. Many thousands of ducks are shipped every winter from Tulare, on the S. P. R. R. An immense slough or lake a few miles from Tulare is in winter the resort of innumerable wildfowl. The principal shooting grounds for market-hunters in the vicinity of San Francisco (and therefore the best place for sportsmen) are the marshes on the San Joaquin River, the Sonoma Marshes, just below Sonoma, and the Alviso, Suisun and Alameda county marshes. The Alviso and Suisun are controlled in large measure by gun clubs, as are also the best, in fact the only half-way decent places around Los Angeles. Therefore, to the sportsman wishing wildfowl shooting unrestricted and with plenty of game, I would recommend first Tulare Lake, and second the marshes below Stockton. Most every variety of duck is here; and there are snipe, curlew, plover, etc.

The market-hunters on the San Joaquin Marshes generally summer in Stockton, which lies on a back water of the main river several miles distance. For many miles from Stockton there is nothing but continuous sloughs and marshes; and the hunters, who all, or the greater part at least, live in house-boats, drift down into the marshes when the season commences and do not return with their floating houses for many months. With their small skiffs they push out at an early hour for the day's hunt, and the game that they get is shipped on the steamers that leave Stockton for San Francisco every day.

Along the San Joaquin and the backwaters from the main river are many ranches that have been reclaimed from the swamp. This land is protected from the river by immense dirt levees and is the richest and finest land in the world for fruit and vegetables. The steamers make numerous landings, thus allowing the hunter to ship his game and get supplies quite handily. Most of these hunters are bachelors; and contrary to my expectations I found their homes to be models of neatness and comfort. They are as a rule the best natured men in the universe, and about the only thing that will make them angry is to speak lightly of their favorite gun. Some of these men make as much as $1,000 in a season. How much better this than to labor in the filth and dirt of a big city. The exciting outdoor life gives health and a good appetite, and they are also better morally for the life they lead.

I shall never forget the last time I took the trip to Stockton by the river. It was just after the late great floods in that vicinity; and of the five ranches I had seen before many were now scenes of desolation. Here stood a fine two-story house with the water up to the second story window, and long since deserted. The orchard was submerged many feet, and an immense volume of water, as large as some river, was pouring through the broken levee a short distance below. There was water as far around as the eye could see, and this dwelling was "in it" in great shape; in fact almost "out of sight." We let off here the owner of this watery farm; he had a boat and several men with him and intended to "angle" for a wagon, which they hoped had not floated off. The sun was sinking as we moved on, and the upper windows of the house shone like diamonds in the reflected rays; for many miles we could see these windows shining out of the vast sea of water, and I cannat say that I envied these men staying all night at that place.

C. B. W.

Rod and Gun and Camera.

THE Sportsman Tourist of to-day is an amateur photographer. The camera has a recognized place in the sportsman's outfit. The results of successful snapshots often constitute the most cherished mementoes of an outing.

From time to time we have been favored with highly interesting evidences of the skill and success of those who are no less adept with the camera than with rod and gun; and some of the views sent us have been reproduced by the marvelously faithful photo-engraving half-tone process for the benefit of our readers. Notable among these were the group of mule deer, in our "Boyhood Number," and on April 7 the happily successful picturing of the mountain goat. There must be a rich store of such photographs in the possession of those to whose notice this shall come. If they could be brought together for comparison the collection would supply abundant interest and study.

As a recognition of the important place of amateur photography in its relation to sports of the field and prairie and mountain and forest and stream, the FOREST AND STREAM offers a series of prizes for meritorious work with the camera. The conditions under which these prizes will be given are in brief as here set forth:

There will be ten prizes, as follows: First $25. Second $20, Third $15. Fourth $10. Six of $5 each.

The competition will be open to amateurs only.

The subjects must relate to FOREST AND STREAM'S field—game and fish (alive or dead), shooting and fishing, the camp, campers and camp life, sportsman travel by land or water.

There is no restriction as to the time when the pictures may have been or may be made—whether in 1892 or in previous years.

Pictures will be received up to Dec. 31, of this year.

All work must be original; that is to say, it must not have been submitted in any other competition, nor have been published.

There are no restrictions as to the make or style of camera, nor as to size of plate.

A competitor need not be a subscriber of FOREST AND STREAM.

All photographs will be submitted to a committee, shortly to be announced. In making their awards the judges will be instructed to take into consideration the technical merits of the work as a photograph, its artistic qualities; and other things being equal, the unique and difficult nature of the subject.

Photographs must be marked only with initials or a pseudonym for identification. With each photograph should be given name of sender, title of view, locality, date, and name of camera.

The photographs shall be the property of the FOREST AND STREAM. This applies, however, only to the particular prints sent us.

From time to time we shall reproduce by the half-tone process samples of the work submitted, and should the interest in FOREST AND STREAM'S Amateur Photography Collection prove to be what is anticipated, we may ask for an expression of opinion by a vote of all our readers after the manner of the successful and famous "Camp Fire Flickering Vote." Such popular vote, however, will be quite distinct from the award by the committee.

SOME CAMERA HINTS.

IN view of the fact that FOREST AND STREAM has offered ten prizes for meritorious work with the camera of subjects appropriate to its columns a few practical suggestions as to how to make such photographs may be read with interest by those intending to compete.

In the first place I should strongly advise the use of a hand camera with either cut films or a roll holder, as pictures may be made with such an instrument which are entirely out of the question with a tripod camera.

I will not undertake to suggest any particular hand camera for the purpose, as there are so many on the market, presenting so many and varying qualifications, that it is almost an impossible thing to say which one, all things considered, is the best instrument. In my own work I have used a hand camera which may also be used with a tripod when desired, and I thus command the advantages of a hand camera with many of those possessed only by the tripod.

Of course more exact photographs, and, technically speaking, better photographs may be made with an ordinary tripod camera and glass plates, than with a hand camera and cut films. But the pictures which are of most value to a publication like FOREST AND STREAM cannot be made with a tripod camera. The groups of hunters with their dogs, rifles, hunting traps, before an open birchbark camp, and with game strewn in plentiful profusion around it, or suspended from its roof, and pictures of this class, which may readily be made with a tripod camera, are not the only ones to be sent in for winning the prizes in the FOREST AND STREAM competition.

Still life subjects are much easier to photograph, of course, than living game, in its own wild country; but for that very reason there is more pleasure to be derived in making photographs of the latter kind, and when such photographs are made the amateur is entitled to a corresponding greater amount of credit.

With a hand camera there is always a large element of chance, even when the subject is a stationary one; for a hand camera requires a quick exposure, and the slightest change of position in the camera makes a great deal of change in the subject. Not must only the light fall in a certain direction so as properly to illuminate the object to be photographed from behind or at one side, but the photographer must approach his game from the direction toward which the wind is blowing, in order to prevent his quarry from taking alarm.

There is really a good deal of excitement to be experienced in photographing a subject of this kind, and a good hunter will soon become an expert photographer, so far as obtaining subjects and exposing his plate upon them is concerned. The after treatment is of less importance and may be done by the professionals after the return to civilization.

Let the amateur attempt the unusual subjects without thought of the difficulty which will be experienced in the development, for with our new developing agents, the quickest exposures may be developed into good printing negatives. It is much better of course, to do one's own developing, as the amateur, knowing just the conditions under which he photographed his subjects, is better able to bring out all the beauties of the original picture of nature than one who is ignorant of the circumstances under which it was exposed.

There are a number of good developers recently introduced which are capable of bringing out all there is in the plate. Para-amidophenol, the new developing agent, is my own favorite, as there is no staining of the film with it as with eikonogen and hydrochinon when development is prolonged, absolute transparency and opacity may be secured, and the time of exposure is reduced about thirty per cent. without injury to the half tones or middle tints.

My formula for preparing the bath is as follows:

Para-amidophenol, hydrochlorate	100 grs.
Carbonate of sodium (crystals)	2½ oz.
Sulphate of sodium (crystals)	2½ oz.
Water	32 oz.

In making the developing bath, take one ounce of this solution and add to it from three to four ounces of water, according to the length of exposure. The greater amount of water added the more softness of detail will be obtained in the negative, as the developer will be diluted and wet slower. The lesser the amount of water added the greater will be the intensity of the resulting negative.

Print in the manner best suited to the subject of the picture; that is, by the process which will produce the most appropriate tone, and mount on plain cardboard without gilt edges, for anything which detracts from the picture itself mars the effect. W. I. LINCOLN ADAMS.

HUNTING ON THE WEST COAST.

THE following extract from a private letter received by a member of the FOREST AND STREAM staff gives very briefly the results of a hunting trip made last autumn in Southern British Columbia. The writer was the packer for the hunting party and has been out on a hunting trip with his correspondent:

KERUMEOS, April 17.—We left Hope on Sept. 2. We followed the Skagit River down about twenty miles from the Hope trail. At the twenty-three mile post we camped for four days for the fishing and had good sport. We caught several trout that weighed from 6 to 7½lbs. Messrs. —— and —— said it was the best trout fishing they had ever seen. Leaving there, we went for bear near the Hussamem Mountain. We saw eight black and one grizzly and some deer. There were a good many shots fired with the result of only one black bear brought to bag, and that the Indian guide shot. He was with Mr. ——. Something went wrong with the rifle after he had fired five shots, some of which, the Indian declared, went 100yds. over the bear. He gave the rifle to the Indian to fix and return to him. The Indian fixed it and shot the bear. —— was as well pleased as if he had shot it himself.

Leaving there, we moved to the headwaters of the South Fork of the Smilkameen. There is a chain of small lakes there which support fish, duck and beaver. We got nothing at that camp, and moved down the South Fork, where we hunted for deer; got one buck; about ten shots fired. Then we moved on to where the Pasaten River empties into the South Fork, about forty miles above Allisons. We crossed both rivers and struck for the Ashnola. There is plenty of bighorn and goat the way we came. We were not very far from the boundary line all the way from the Skagit. The first place we came to on the Ashnola that I recognized was our old camp, where you got your first ewe. We were at the Twin Buttes one week. Fifty-seven shots were fired and one doe, one fawn and one goat were brought to camp. We hunted a week at Baptistes for goat, where you got your four, got five and two bucks. We then started for Hope via Allisons, camped at the fifty-two mile post one week and hunted for bucks and got two. We then left for Hope.

If they had been any good with their rifles every pack horse would have been loaded with all it could pack, but the most of them were without packs when we arrived at Hope on Nov. 12.

We had fearful weather, only about three weeks fine in the whole trip, both rain and snow fell almost constantly. Our trail was pretty rough in places. Eight horses were bleeding at the nose on account of the height we were up at two different times. We had good luck with both men and horses until we arrived at the Lake House (fourteen miles from Hope) on our return, where the best horse got poisoned and died. There were four different hunting parties in this vicinity last fall, and I hear all had very good sport.

We had some traps along and caught one lake beaver, one wolverine, one yearling black bear, one skunk, one very large golden eagle, two mountain beaver (*Aplodontia*). They claimed one each, and Johnny Wirth and I did our best to get one for you, but failed. Johnny was our cook. If the weather had been fine it would have been a pleasant trip from the Skagit to Ashnola. We were the first party that has been through that way.

R. RYDER.

IOWA GAME.—Ottumwa, Ia.—Quail have been increasing here for the last three years owing to the mild winters, and the former scarcity had a tendency to discourage sportsmen from hunting them. The outlook for next season is bright. Prairie chickens are gradually disappearing. We have no other game here to speak of. What few ducks and geese pass do not condescend to squawk at us, much less to alight.—J. W. H.

THE YELLOWSTONE PARK.

THE bill to establish the boundaries of the Yellowstone National Park was taken up in the Senate on Tuesday, and gave rise to considerable discussion. It was explained by Mr. Platt, of Connecticut, who had reported it from the Committee on Territories, as adding considerably to the extent of the Park. It took in, on the east side of the Park, the mountains and wooded country that had been deemed necessary as a retreat for the game that was being preserved there. The portion of the Park segregated by the bill was to the north of it, and contained little or no natural curiosities.

Mr. Vest said that he would submit to the passage of the bill, not because his judgment approved of it, but because he could not help himself. He did not believe, however, that the persistent and unscrupulous lobby that had always opposed legislation in the interest of the Park would permit the passage of the bill through the House of Representatives. There were no votes, he added, in the Yellowstone Park, either for the Republican party, the Democratic party, or the third party; and the result was that, outside of those Senators who were æsthetic and sentimental, in relation to the Park, there were few people who cared anything about it.

Mr. Sanders, of Montana, said that by its present boundaries the Park contained about 3,600 square miles, and that under the pending measure it would be enlarged about 33 per cent., and would then contain about 5,000 square miles. He supported the bill, not in the interest of the lobby so justly characterized by Mr. Vest, but in the interest of the "New World mining district" in Montana.

This is the bill which cuts down about one-half the recently established forest reserve, handing over the forest of the other half to the railways and the tie choppers. The bill was passed by the Senate.

"PODGERS" COMMENTARIES.

IN reading the last issue of FOREST AND STREAM I missed something and could not at first think what it was; but at last I discovered that it was the usual bear story—what is the matter? Have bruin's scrimmages given out? Have all the bears been killed off or all the bear killers? It won't do to have any falling off in the bear department at this late day. Are you short of material or have you concluded to give us a rest? After getting us into the habit of having bear on our regular bill of fare, you should not drop it out so suddenly—should have tapered down and let us up by degrees—never do in the world to cheat us out of our weekly bear.

Pretty soon you will want to cheat us out of our weekly refreshment of fish; stories and the talk of Ananias about "speckled beauties" what he caught and almost caught—by the way, what an interesting variation it would be to start a column of statistics of what were *not* caught. It would present a wider field for truthfulness, as there could be no proof called for. Could not weigh a fish that got away, could you? There could be no question of veracity.

As a fisherman I feel interested in maintaining the character of the Izaaks for veracity, and when a story is told of a fish that got away, what miserable skeptic can prove that he did *not* weigh ten pounds? On the principle that all are innocent until proved guilty—all fish tales should stand until the improvisator is convicted of romancing. Thus would we cheat the cold-blooded villain who is ever ridiculing and jeering at that noblest work—a fisherman. Gunners can rear up and hurl at this putting fishermen in the front rank if they want to. I don't care, as long as they don't shoot this way.

Mr. Albert Bruning writes very pleasantly of his little bass fishing expedition on the San Antonio. Having been there and knowing the stream by sight, I am rather surprised at the results of his fishing, but not so much so at the ducking that followed. As the San Antonia, just at the point where he received his bath, requires a good boat and skillful handling, and I suspect that they did not have the first, and possibly were not accustomed to that rather treacherous craft, a canvas boat, under such circumstances. I condole with him on the loss of his split bamboo—a thing that makes a fisherman say bad words, for no subsequent rod is ever as good as that last one was. As to those bass, I think if I were going to partake of the "catch" I should rather they were taken *above* the town than below.

The gentleman inquiring about the teal ducks he thinks hybrids is properly answered editorially. The variety alluded to is very common on the Pacific coast; in fact are rather more plentiful than the regular greenwings; and seem to fraternize and fly with them indiscriminately.

Mr. Heywood writes of the charms of the Dismal Swamp for the hunter and of the bear, coons and possums to be found there, and says there is talk of the building of a hotel for sportsmen of the North presumably; but I would not advise it. Northern sportsmen are not educated to possum and coon, in fact rather look down on that style of game as a specialty of the Southern colored brother. If he can show us good wildfowl shooting, we are ready to respond with enthusiasm, and will be there. By the way, his talk of bears suggests an opening for an expedition fitted out by FOREST AND STREAM to supply the bear department systematically with blood-curdling tales of bear fights. Please spell the word correctly as the tail of the bear is not a curdler—brevity being its principal feature.

"Pigarth" writes enthusiastically of your photographic pictorial proposition as a new feature in the way of enterprise; and proceeds to compliment you—to which I object. Editors are generally pretty well supplied, stocked, I may say, with self-appreciation and are likely, to become troubled with a complaint known in the Spanish as "cabasa grande," which your dictionary in that language will define.

But what "Pigarth" says about adding new features to the paper is all right as long as you confine your efforts to the features of animals, and especially such four legged gentlemen as Mike, Judge Greene's Gordon setter.

Speaking of dogs, how it would amuse them if they could read the communications of their owners and fights over their special qualifications, as if the fate of the nation depended upon an ear, a black or brown muzzle, the kink of a tail, and other so-called "makings." The owners do all the fighting for the dogs, doubtless, much to their satisfaction. I am an admirer of dogs from way back. The first recollections I have are of rolling over on the big open hearth of the old kitchen fireplace with our two dogs, Sport and Sym, hounds. We were all pups together and raised together. So all dogs (omitting bulldogs) are my friends; but sometimes as I look at a "Great Dane" or St. Bernard being led through the street, I cannot help thinking he would be a much happier dog if he did not have the dignity of such an aristocratic pedigree to support. I seems to weary and depress him and he looks at times as if he envied curs of low degree that had no family antecedents to support, and could go in for a real good fight, and roll over in the ditch, get all mud and enjoy himself. There are a great many people situated and afflicted just the same as these dogs are, wearing their souls out in their efforts to impress upon the world a sense of their importance, and utterly failing to do it.

If there is any difference, it is in favor of the dog, as he has a commercial value and will sell for something—whereas the other fellow, well, we won't attempt to set a value on *him*. He has already valued himself, and his price would appal Mr. Rockefeller or Mr. Vanderbilt if they were in the market for that breed of pups.

PODGERS.

REBOUNDING LOCKS.

IT seems as if deaths and injuries from the accidental discharge of firearms were increasing in a disproportionate ratio to the more general use of such weapons.

It cannot be accounted for by the old adage that familiarity breeds contempt, for those most accustomed to use the gun are most careful in handling it.

To what then can these often recurring casualties be attributed? It is my belief that they must be laid to that most delusive device of modern gun-makers, the rebounding lock, whereby the old and almost absolutely safe half-cock arrangement has become nearly obsolete.

There is no safety in the rebounding lock. A blow on the back of the hammer will discharge the shell almost as certainly as a like accident would occur with the hammer down on the cap of a muzzleloader, and if the hammer is raised almost to cock and then released, a discharge will as surely result as if the gun was cocked and the trigger pulled.

How else do all these frightful accidents occur? I cannot discover that there is anything to be said in favor of the rebounding lock but its convenience as an adjunct of the breechloader.

At least one American breechloader half cocks with the opening of the gun, which is then as safe as a loaded gun can be. Why should not all breechloaders be constructed on this plan.

If any one doubts the possibilities of discharge under the circumstances I have stated, let him test the matter with primed but unloaded shells. No breechloader should be carried in a wagon without first withdrawing the shells, nor a muzzleloader without first removing the caps.

AWAHSOOSE.

"OUR PAPER."

EACH and every published word of consideration of the new FOREST AND STREAM has been merited.

As many others have had their say in this matter I now crave the indulgence of the editor and his readers while I have mine.

Others with whom I enjoyed the pleasure and the honor of contributing to the "Boyhood" number will easily recollect that when we were boys together, and when the love of nature and the instinct of sportsmanship (like hidden magnets, of which none others felt or knew the power) drew us toward the secret haunts of game or fish, to which we alone had the clue, that we were scarcely disappointed when the smile of pity was detected upon the face of the chancely met acquaintance, surprised into betraying his disgust for such unbusiness-like proceedings.

And the editor who would then have attempted to publish a paper devoted to our interests and our pleasure would have met a storm of ridicule, compared with which the pitying contempt poured upon our own devoted heads would have seemed a veritable benediction.

How changed is all this in the year of grace 1892!

"The sun do move," and our old earth appears to have moved with it.

Once a week the United States mail brings me a paper which I never take the precaution to first examine in the fear of detecting the filthy details of crime and general hellishness all too common in the ordinary American newspaper world, but toss it upon the table before my wife, my sons, my daughters and the visitors who may honor us with their presence, in the absolute assurance that from cover to cover they will find it pure, clean and white, outside and in!

And what among earthly things can match this subtle sense of communion through this medium with others whom I have never seen, and whom I can never hope to see on this side of the Great Divide; but who give evidence of the possession of that drop of wild blood in the veins which thrills us all so wondrously at times, at the thought of adventures by flood and field in the long ago days so well remembered.

What a family is ours!

It is a pleasure also to remember that while no lady or gentleman expects or desires that a journal devoted to sportsmanship shall champion Christianity for them; that our paper at least does not go out of its way to outrage the hope that is dearest of all to the American sportsman and hunter from the days of Daniel Boone until now.

And we do not propose to forget either that it did not require a United States law against lottery schemes to keep the FOREST AND STREAM from advertising the Louisiana lottery or any other plan of theft and robbery. This much, I have felt, should be said upon this subject.

And now for the paper as it comes to us to-day. The sigh for the loss of the old time color of its cover is forgotten in our admiration of the wonderful pictures of wild animals photographed in their very lairs. Although the camera does not need any voucher for its fidelity to fact, I want to say right here that the picture of the family of mule deer in the issue of Jan 7 is a continual marvel to me.

The wide, strong limbs of these animals, so much larger than those of the white-tail deer, are here surprisingly exhibited. And how the photographer managed to creep so closely, and to work so silently as to catch the standing fawn humped up and just beginning to stretch himself, all untroubled by the fear of hidden enemies: and the old doe in the very perfection of such sleepy security that she neither sees nor hears; nor are her dreams troubled with even the fancy that she hears, for her great fan-like ears are not even pointed forward toward the hidden terror.

Surely this is a picture not to be surpassed in a lifetime.

The size of the ears of the mule deer is a cause of great surprise when first seen.

Seven years ago I killed a mule deer buck, the ears of which measured 11in. long and 5½in. wide each. Spread out straight horizontally they were just two inches longer than the two-foot carpenter's square laid across the buck's head.

The other and familiar features of our dear old paper need no words of commendation from any one.

One scarcely thinks of commending the Declaration of Independence or the Gettysburg oration of Lincoln.

In common with all others of our highly favored family of sportsmen I can only say my say, and, individually, stand ready also to throw up my hat (and moccasins too) for our own incomparable FOREST AND STREAM.

ORIN BELKNAP.

VALLEY, Washington.

NEW YORK PROTECTORS.

ALBANY, May 10.—[*Special to Forest and Stream*]. At a meeting of the Fish Commission the following thirteen of the fifteen game and fish protectors of the old staff were reappointed:

Chief Protector, J. Warren Pond, of Malone, office in the Capitol at Albany.
Robert Brown, Jr., Port Richmond, S. I.
Willett Kidd, Newburg.
Matthew Kennedy, Hudson.
Sherman F. Snyder, Davenport, Delaware county.
Harrison Hawn, Cicero.
Isaac Campbell, Indian Lake.
John Hunkins, Hermon.
Joseph Northrup, Alexandria Bay.
George Moyer, Lowville.
Henry C. Carr, Union Springs.
Charles Ripson, Youngstown.
George M. Schwartz, Rochester.
State Oyster Protector, Joseph W. Mesereau.

Seven protectors are to be named. The Commission elected H. L. D. Huntington, President; and Edward P. Doyle, Secretary; Commissioner Joline as the shellfish commissioner. The next meeting will be held in New York, May 24.

FOXES CLIMBING TREES.—Worcester, Mass., April 29. —*Editor Forest and Stream:* I noticed a note in FOREST AND STREAM of April 28 from Norris, Tex., in which your correspondent says that foxes climb trees. Why don't he state what kind of foxes climb trees? He might go to Europe and state that Americans live in tents and be just as correct, for when you would ask him to define his statements he would say the Indians do. Does "Rio Diablo" suppose that it is any news to the readers of this paper to state the fact that foxes climb trees? Why don't he state what kind of foxes he has there? For I make just as broad a statement that foxes do not climb trees. Now where are we? It is a well-known fact that in the South they have a species (a woods gray fox) that can and does, when pressed, and at other times, climb a tree. But the fox best known on the American continent, the red fox, the great game fox of this country, does not nor can it climb a tree where the branches are beyond its reach, any more than can a dog that has toenails only: for dogs nor the red fox neither have claws. Gentlemen, define yourselves when you make a statement, then we shall know where we are.—A. B. F. KINNEY.

A PANTHER INCIDENT.—A friend of mine who lives in one of the wildest portions of northern California, came into town last week to purchase food supplies. When down he always has something interesting to say about his life in the wilds. He killed eleven bears and ten panthers last winter, and it was not much of a season for wild animals either. Once on his rounds (for he is on the range looking after his sheep every day with rifle and dogs), he saw a deer acting in a queer manner. Being where he could see and not be seen, my friend quietly awaited developments. The deer was looking in a certain direction, evidently very much frightened. On looking around my friend saw a panther coming from an entirely different direction, but seeming to throw its voice so as to deceive the frightened deer. All the time it kept getting nearer and nearer. At last being near enough it gave a leap, landing on the deer and gave it its death blow. Then the time came for my friend to interfere and he did so by drawing a bead and hitting his mark "dead-center," thus getting two animals for one shot. I must not forget to state that they were both so poor that it did not pay to save their pelts.—F. P. NYE (California).

DUCKS AND THE NIAGARA FALLS.—A Buffalo correspondent wrote the other day: "Large numbers of ducks are being caught in the rapids and carried over Niagara Falls. They are either killed or so shocked that hunters in boats below the falls easily secure them." Commenting on this, Mr. John B. Sage writes: "I have heard nothing of it, but you may be sure that it's a mistake. I don't believe a duck was ever carried over the falls, unless he was wounded so that he couldn't fly. It is, however, a common occurrence for ducks and other birds to fly up the river from Lake Ontario on dark and foggy nights and fly right into the falls, and thus be killed or injured so that they are picked up in the river, and this is probably how the story originated."

OF THE CHEAT MOUNTAIN PRESERVE, in West Virginia, a visitor who spent a delightful time there last autumn, writes: We found every arrangement made for the comfort of the members of the club and their guests. They had brought a family from Pennsylvania to keep the house, and look after the preserve. The club has the hunting and fishing privileges of 57,000 acres of land, lying in one tract, from which none of the timber has been cut. They have built a large and comforaable club

house, on the lower end of the preserve, and have two other houses, used as camps, one four miles, and the other twelve miles, up the river. The river is full of trout, while there are a great many deer in the woods. Foresters are kept who patrol the preserve to keep poachers off; but as there is plenty of hunting all around it, this is not so necessary as it would be in a settled country. It was here, in this mountain solitude, away from the cares of business that we spent two weeks seeking the wary deer. As there was no snow we did not have a fair chance at them. We saw, by the signs, that they were there; but had the pleasure of bringing only one away with us. The other pilgrims were a little disappointed; but I had been in the same fix so often elsewhere that I was well satisfied with the trip. If we did not bring out a car load of game we had all that our families could use before it would spoil, and we had seen the wilds of the great wilderness of the Cheat River region, and the head waters of the Mississippi basin. Two miles from the club house is the Elk River which flows westward and empties into the Kanawha, and thence into the Ohio. If ever the opportunity comes, I want to get on that ground when there is a tracking snow, and if I do not get more venison it will not be my fault. When we met our friends at Pittsburg on our return the question on all sides was, "Who killed that deer?" And that question is still unanswered.—HOMERUS (Columbus, O.).

Camp-Fire Flickerings.

"That reminds me."

ONE day when we were fishing for black bass on the Potomac the fish did not rise well to flies, so John proposed to take my landing net and go into a field and try to get some grasshoppers. He had been gone about five minutes when I heard him shout, and a moment later saw him clear a five-rail fence at one jump, and never stopped running until he had reached me, crashing and tumbling through the rank growth of weeds that covered the bank of the river. I said, "What is it, John, a rattler?" and all he could say in reply, between gasps for breath, was—"Bull!" E. A. R.

Another time two of us went bass fishing, carrying our lunch in a tin pail. We ran our boat ashore and I went a short distance above, and wading in commenced fly-fishing. In a few minutes I saw my companion, who had waded in near where we had left the boat, making most frantic efforts to get ashore, splashing through the water and shouting at the top of his voice. I was startled, thinking he had met with some terrible accident, such as getting a hook in his body; and I made all haste possible to get to him. He emerged from the water, threw down his rod, rushed up the bank, throwing rocks and cusses at something I had not yet seen. When I got within speaking distance and asked for an explanation of his apparently insane actions, he told me that a hog had gotten into the boat and was eating our lunch. We proceeded to examine the amount of damage done, and found that the hog had thrust her snout right through the contents of the pail, leaving the print of her nose in a cup of butter that was in the bottom. As this seemed to be the only damage done, and we were very hungry, shortly afterward we eat the lunch. E. A. R.

One summer a young man from Staunton, Va., was making a canoe trip on the Potomac in a very small canvas canoe which was decked over all but a small cockpit. Ned R., an enthusiastic fisherman and canoeist, happened to meet the young man and asked permission to try the canoe. Now Ned weighs about 240lbs., and there was some discussion as to whether the canoe would carry him; but as he was not afraid to try it his request was granted. He got in and sat down, noticing as he did so that he completely filled the cockpit, in fact had some difficulty in passing certain obstructions on the sides, but after passing them he seemed to have plenty of room. He paddled up stream through a pool thirty feet deep, and as far up the rapids above it as he could. He then turned to come home, and feeling thirsty stopped at a spring for a drink, but when he attempted to get out of the canoe he found that he was securely fastened in. The obstructions he had forced his way by were screw eyes in the gunwale, put there to fasten the tent to, and it was impossible for him to force his way out again. A terrible feeling of his danger overcame him, and he paddled rapidly but very cautiously back to the landing, running the canoe up on a sandbar and shouting lustily for help to get him out of the "blamed thing." E. A. R.

BALTIMORE, Md.

Sea and River Fishing.

THE FULL TEXTS of the game fish laws of all the States, and Canada, are given in the *Book of the Game Laws*.

Trout and Bass Fishing.

WE have secured, for the private information of the readers of FOREST AND STREAM, knowledge of a number of streams and lakes easily accessible from this city, where we believe that good fishing for trout and black bass may be had. The information we shall be glad to furnish without charge to any reader of FOREST AND STREAM who will apply for it, either personally or by letter.

MAINE ICE IS OUT.

THE ice is out of the Maine trout lakes. It went out sooner than was generally anticipated, but no sooner than was pleasing to some of the Boston fishermen. Thursday morning, May 5, I received a dispatch from Mr. J. A. French, of Andover, saying that the ice left Richardson Lake the night previous. Within an hour from the receipt of the first dispatch, Mr. Prescott, of the Mooselucmaguntic House, at Haines Landing, telegraphed me that "The Mooselucmaguntic lake is clear of ice this morning." This was good news to some of the sportsmen, but others were scarcely pleased. In fact they had not expected the ice to go quite so soon, and they felt as though something had, somehow, interferred with some of their arrangements. But the interest in this item of the departure of the ice was great. Inquiries rapidly came in by telephone to know if the news was true. That evening another dispatch from Mr. C. A. Dennen, landlord at the Kineo, announced that the ice had left Moosehead. But it is a singular fact that up to the time of writing this letter, May 9, no news has been received of the going out of the ice from Rangeley Lake proper. On Saturday morning, the 7th, Mr. C. Bassett, of Geo. B. Appleton & Co., received a dispatch from Mr. Samuel Rano, already at Rangeley, saying that the ice had not then left that lake. It is a fact that the ice is generally out of Rangeley as soon as from any other in the Rangeley chain, with the exception of Umbagog, which always clears first.

The ice is out and the trouting season is fully begun. The parties are generally made up and the time set for leaving Boston. Some of them have already gone. The Shattuck & Stevens party, mentioned in full in the FOREST AND STREAM last week, left Boston on Saturday for Camp Vive Vale, in the Narrows. They are doubtless having fun fishing with ulsters and mittens on, and in remarkably low water. Mr. J. A. French writes me again that there has not yet been much of a rise of water in Richardson Lake, and that he expects the greatest fishing on record. But the lakes are reported to be very slowly filling. Mr. French is open for guests at the Upper Dam Camps. His old cook, famous with sportsmen nine or ten years ago, is with him. Mr. French and his son, Tom, are building a steamer at the South Arm. The boat is to be 60 feet long with ladies' cabin, and other conveniences of a sanitary nature such as these little trout-lake steamers have few of them been provided with heretofore. The Androscoggin Lake Transportation Co. is also repairing one of its boats to run on the lake. The boats on the upper lakes are reported in good order.

The Foster party left Boston Monday morning for the Birches, Mooselucmaguntic Lake, though they may give the landlocked salmon a try for a day or two, if the ice is out of Rangeley when they get there. This party, as made up at last, embraces Mr. C. Foster, of the boot and shoe house of Lamkin & Foster; Mr. J. Fred Rogers, formerly of Rogers & Sheldon; Mr. James T. Phelps, New England agent of the National Life Insurance Co.; Mr. B. J. Parker, fancy goods, Tremont street; G. W. Ingalls, of Thayer & Ingalls, boots and shoes; James B. Field, of Field, Thayer & Co., boots, shoes and leather; John A. Henry, of John A. Henry & Sons, boots and shoes. The party will make a stay of two or three weeks, and it is scarcely possible that any company will make a more enjoyable visit. Several of the gentlemen are old timers at these lakes. Mr. Foster has been there each successive season for many years, and has usually made fall trips also. The eight men included in the party are all there is room for, though three or four others desired to go.

The H. T. Rockwell party, one of the best known Boston parties to visit the Rangeleys, will not start before the 25th or 26th of May. They are scarcely fond of fishing in ice water.

The fishing parties for Moosehead are not fitting out as rapidly as usual this year, though it is a characteristic of that lake that the fly-fishing is more generally appreciated than the trolling, while the reverse is true of the early fishing in the Rangeleys. The lovers of Moosehead are more likely to go later. The Kineo Club, so well known at Moosehead, will go late this year, as usual. The first week in June is as early as this club will start. About the same names will make up the party as on former seasons. The Linder party will doubtless go a little earlier than the first of June, ahead of the starting time of the Kineo Club. The Harry Moore party will not go to Moosehead this year, but will visit the preserve of the Inglewood Club in New Brunswick instead.

Mr. John G. Wright, well known in the Boston wool trade, will leave this week for Moosehead. This will be Mr. Wright's first experience with Moosehead Lake trout, though he has fished a great deal in Maine waters. He has fished the Rangeleys, but not so much of late years. He is much interested in the Commodore Club, at Moose Lake, in Hartland, Maine. He has been there this spring, as already mentioned in the FOREST AND STREAM, to see what could be done toward stocking Moose Lake with landlocked salmon, by means of its tributary streams, unfortunately, pickeral are in the lake. He met the Maine fish commissioners while in the State, and received a good deal of encouragement. Mr. J. F. Dwinell, of the well known coffee house of Dwinell, Hayward & Co., will visit Moosehead this spring for trout fishing. Mr. Dwinell is "an old timer" at the Rangeleys, but of late years he has had a good deal of business in regard to town affairs on his hands, and his fishing trips have had to be passed. But he has found time to visit Upton, Maine, nearly every fall for partridge shooting. He thinks that he will try Moosehead this year. The size of the lake strikes him favorably and the method of getting about in steamers, without the trouble of rowboats. Parties go out with steamers in the morning, carrying canoes and guides, and return in the evening by the same method.

Mr. Reuben B. Foster, of the firm of Foster & Weeks, is one of the most genial of fishermen. Born among the hills of Old Oxford county, Maine, and having considerable early experience with her bears, as well as trout streams, the love of rod and line, shot gun and "camping out" has clung to him till well up to 60. His bright stories of camp and fishing have sometimes been laid before the readers of the FOREST AND STREAM, and always acceptable, if we may judge by the way more has been called for. But it is not a pleasant story I have from Mr. Foster this time. He has been on the sick list since Christmas. Early in the winter he went to Florida, with Mrs. Foster, both in hopes of great benefit from that most genial of winter climes. He filled his grip and his pockets with fishing tackle that Mrs. Foster did not know about. But, alas! he has not been able to use it. He has several times dreamed of beautiful trout streams and thought in his dream that never again should he be at loss to know just where to go to fish. But usually he has awakened from these dreams only to find the distressing cough and the pain in his side. He reached Boston again the other day, declaring that he is better, but very weak. May good health come again to him.

Later.—An Associated Press dispatch announced on Monday morning that Rangeley Lake had cleared of ice.

Mr. A. A. Sargent, wife and son, have gone to Camp Haverhill, Mooselucmaguntic. Mr. Sargent is a citizen of Haverhill, Mass., and the mainstay of the same name. He is an enthusiastic angler, and, best of all, he likes to take his family with him.

The Magee party is one of the best known and the best organized of Boston parties to visit the Maine lakes every season. The party includes some of Boston's first merchants, as well as men of wealth. About the same members are going this year as on former seasons. Ladies are foremost in the company, as they always should be, and sons and daughters are included. They are booked for Haines' Landing, as usual, but they will not start before May 25, or thereabouts, at which time a full list of names will be given. As now made up, the company includes Mr. A. N. Parlin, of the Magee Furnace Co.; Mr. John Magee, of the same company, wife and daughter; Mr. Frank A. Magee and wife, also of the same company; Mr. Rufus F. Greeley and family; Mr. Amos M. Kidder, of Plymouth, and family; Mrs. Dexter D. Bowman, of Newton. This company is not partial to cold weather for trout fishing, though the records of some of the members compare favorably with the best.

Trout fishermen about the Bay State continue to show some very good records, but it is generally done in preserved streams. Mr. C. A. Jones, president of the Woburn Savings Bank, has a stream in Billerica that he has fished on three or four occasions this spring with good success. He has already caught twenty-six trout from the stream this year. He caught eight on his last trip, the largest well up into the pounds. These catches are the result of restocking, done by the same gentleman.

Mr. L. A. Dow, with his friend Mr. Jordan, both of Boston, has just returned from a successful trip to Sunapee Lake, N. H. They made a total catch of thirteen trout, weighing from five to nine pounds. They were lake trout, of course, the larger ones, but none the less a good catch, as friends can testify.

Mr. H. H. Crocker is off for Quinamisset (I am not certain about the spelling of the word) Pond in Falmouth. With other friends he is interested in the control of this pond, with the stream that flows into it. Considerable pains has been taken in restocking, with good results. Landlocked salmon were put in some years ago, but none have ever yet been taken.

I learn from good authority that the salmon pool lease of the late Dr. Baxter, Surgeon-General of the United States, on the Restigouche River, is for sale. Senator Platt is the administrator, I believe. SPECIAL.

ANGLERS' ASSOCIATION OF ONONDAGA

SYRACUSE, N. Y., May 10.—[*Special to Forest and Stream.*]—The Anglers' Association met at their rooms last evening. The attendance was good and it was an enthusiastic session. Arrangements are well under way for a fly-casting tournament during the State Sportsmen's convention which will meet here. A large number of desirable prizes have already been secured.

The committee on fishing submitted report, recommending that effort be made to have fishways placed in the several dams of the Otsego and Seneca rivers. On the above recommendation the following resolution was offered and adopted:

Resolved, That the Commissioners of Fisheries be respectfully and earnestly requested by this Association to giv this important subject their serious consideration, and to use their official influence to have the Rogers fishway placed in the several dams in the Oswego and Seneca rivers from Lake Ontario to Cross Lake.

Henry Loftie offered the following resolutions, which were adopted:

Resolved, That the congratulations of the Anglers' Association of Onondaga be extended to the Fish and Game Commissioners on their reappointment by Governor Flower.

Resolved, That said Commissioners be respectfully requested by the Association, irrespective of party, to reappoint J. W. Pond as Chief Protector, and Henry Hawn as a protector, in recognition of faithful, diligent and successful services on their part.

Resolved, That in the faithful performance of protective work executed by our deputy, Henry Jackson, of this city, for the Anglers' Association of Onondaga, the past year, we urgently request his appointment as a State game protector; and that a copy of this resolution be sent to the Commissioners. HENRY LOFTIE.

SEBAGO LAKE.

PORTLAND, Me.—On Monday, April 4, word reached me from a friend that he went up to the lake Saturday morning, the ice opened in spots during the forenoon and in the afternoon he took the first fish of the season, a 3-pounder. On Monday the Portland contingent began to move in and during the week about fifty fish were taken, ranging from 2 to 7lbs. The following Monday, April 11, a friend of mine took eight fine fish, beating the record for the work of a single rod in one day. During the next weeks the catch was larger.

Several natural causes are credited with this increase in sport. The lake is very low, 9ft. lower than last year at this time, many places being dry where last year fish were taken. For this reason the fish are not running into the mouths of the streams, but are remaining in the lake. Most of them have been taken with minnow bait in the vicinity of Sandy Beach. Crockett's is the favorite resort for our fishermen. The prices are moderate, the fare and beds excellent and the company always good. Many small private camps have been erected about the shores during the winter and all are now occupied. Crockett's may be reached by the mountain division of the Maine Central R. R., leaving the train at Mattock's station. SPURWINK.

SALMON FOR THE HUDSON.—On May 3 there were shipped from Cold Spring Harbor to Glens Falls, N. Y., 50,000 fry of the Atlantic salmon. The fish were planted in Clendon Brook by Mr. A. N. Cheney. Since 1884, this little stream has received nearly 340,000 fry of the sea salmon, besides 150 yearlings. In addition to these, 50,000 fry were planted in Whipple Brook. Altogether they would appear to form a slender colony and we cannot forbear expressing the wish that the whole number had consisted of yearlings instead of fry. The cost would have been somewhat greater, but the results would certainly justify the increased outlay.

A CALIFORNIA TROUT STREAM.

Last week we arranged with a party of friends to go trout fishing in a little stream a few miles down the river, they to join us at our home bright and early yesterday morning. At the appointed hour all hands arrived, according to previous arrangements; but the modus operandi had been changed somewhat, as they had concluded to go over the foot-hills to Sulphur Creek instead of down the valley. This, we thought, would necessitate a harder drive than we ought to make in one day with our heavy phaeton and one horse, and we begged them to go on without us. But they insisted that we should go, and assured us that the road over the mountains was not nearly so hard to climb as it had been represented; and after much persuasion, with glowing accounts of the magnificent scenery, and lots and lots of trout, we were tempted to go, and we did. The boys (who had been over the route many times) declared that the road was good, just a little steep, but all right after you get "on top." I imagined there was a glimmer of uncertainty in the sparkle of a pair of laughing black eyes that I chanced to get a glimpse of while this statement was being made; but I wanted the scenery, and R. longed for the trout.

Off we started in the best of spirits, our guide (two jolly boys, a donkey, and a two-wheeled cart) leading the way, our vehicle next, and Mr. and Mrs. V. in the rear.

The morning was perfectly clear, just enough breeze to be exhilarating, and sun enough to cheer but not oppress.

The first few miles went off swimmingly, the scenery growing more interesting at every turn; but presently things began to slow up a little, and we began to climb. The next mile contained 640 rods, according to our calculations; the next 960, and so on, the increment never falling short a solitary rod. This state of affairs lasted about three hours, when we found ourselves up among the buzzards. Now and then we caught a glimpse of our guide away in the distance, winding up the rocky steeps, as only a twinkling donkey can; and we held our breath in despair of ever getting "on top." My amiable companion declared he'd "settle with those kids" for getting us into such a predicament. Next time he'd keep our lunch basket where he could get hold of it. By the way, the nimble donkey was in possession of the entire stock of eatables, and he, evidently, meant to go right through without feeding.

Higher and higher we climbed, until looking backward, we beheld a scene of grandeur and magnificence beyond my powers of description. It was the most extensive panorama I ever beheld. Russian River seemed almost at our feet, although we knew this to be an illusion, as we had been traveling away from it for hours; and the little railway towns, of which we counted four, were surprisingly near. Away to the southeast rugged St. Helena stood out in bold relief against the blue sky, and our view reached almost to its base. The extensive orchards, vineyards, and fields of grain down in the valley appeared in the neatest of little squares and oblongs, forming an attractive landscape.

At last the donkey came to a standstill, away up there somewhere, and a boyish voice shouted "Come on. We're on top." This was encouraging, and we pushed on with renewed vigor; but, where was the "on top?" We didn't find it. Another half hour passes and I spy a gate ahead, which I point to exultingly, thinking it must be at the summit. R. sarcastically mutters "Is St. Peter there?" No, he is not; for we pass through, and soon we're headed down a series of break-neck inclines that make our heads swim. The roadway overhangs dark and frightful looking canyons, extending to a depth of many hundred feet. One false move on the part of our animals and we would be precipitated. To one of a suicidal turn of mind, this descent to Sulphur Creek would be a god-send; but people generally might prefer some other route.

Just as we are nearing a more than usually frightful looking place where there has been a landslide, Mr. V. calls to us to "Drive carefully. A man met with an accident here last year. His horse stepped into a hole, stumbled, and threw the entire outfit down the precipice. The driver saved his own life by clinging to a green twig, but the horse went to the bottom of the gorge, breaking every bone in his body." After this cheerful statement, I am all right.

A sound, as of rushing waters, comes up from below, and soon we're on the bank of one of the loveliest of crystal streams. A grassy plat under some fir trees offers a delightful camping place, and here are the remains of many camp-fires. The donkey stands demurely where he has been tied, the cart containing the lunch basket is also on the spot; but the guide, his mission performed, has vanished.

The tired animals are quickly made comfortable, and I'm alone. Every soul has disappeared. I feel sorry for the little fishes when an army of cruel invaders turn loose upon the brink of their tranquil home. Too tired to fish, I sit down and study the surroundings.

A more picturesque spot than this it would be hard to find. Somehow, the place reminds me of Minnesota's celebrated Minnehaha; though there are no falls here. It is a perfect stream, flowing over the many-colored rocks for a bit—slowly, solemnly; then, bursting into a merry laugh, it dances away down stream, and disappears in the overhanging foliage. Longfellow's sweet words keep running through my brain as I sit and listen to the murmuring melody.

> "Near thee the self-collected soul
> Knows nought of error or of crime;
> Thy waters, murmuring as they roll,
> Transform his musings into rhyme."

The opposite bank is the base of a rugged mountain which towers to a height of nearly four thousand feet, almost perpendicularly from the edge of the water. The volume of water at this time of year, is perhaps thirty feet in width; and I find, upon walking up stream a few rods, a large pool eight or ten feet in depth. Just above this pool, an immense rock twelve or fifteen feet in diameter monopolizes the bed of the creek, forcing the water to flow in two divisions around it.

Now my watch tells me it is noon; and I proceed to prepare a lunch for the absent fishermen. I pile some rocks in a circle upon the ground, leaving a small opening on the windward side, and fill the center with little chips of bark from the fallen bodies of fir trees lying near; and touching a match to the pile, I soon have as fine a camp-fire as one need wish. Next, I bring some of the sparkling water from the creek, and—listen to the aroma of my Java and Mocha, mixed! It would do your soul good to drink a cup of it! It acted with a charm upon my weary body; for I didn't forget to bring a bottle of the most delicious cream, and the refreshment was complete. I helped myself first, for it was necessary that I should be in condition to administer to the wants of the others. Nor did I do it any too soon; for here comes Mrs. V. with a dreadful headache, she says, and nary a trout. I administer two cups of coffee, and that is the last I hear of the headache. R. is the next arrival; but we don't propose to give him a bite until he shows up his catch. After fumbling in his coat pocket a minute or two he throws four speckled fishes broadcast among the eatables. While I am vainly trying to fill him up with roast chicken, boiled eggs, hot coffee, and a lot of other things, Mr. V. comes shambling in and throws himself wearily upon a blanket, completely exhausted with the locomotion of his massive gum boots. Again we demand a showing, or no dinner, and he proudly hands out twenty perfectly lovely trout. R. looks quite crestfallen as he looks upon this goodly number; but brightens up considerably when V. tells him there is a big salmon in a pool about half a mile up the creek. Great heads are rapidly set to work to devise some underhanded means by which to take an unfair advantage of the intended prey; and in a few moments Mr. V. has dispatched his lunch, and a stampede follows. Three large hooks had been resurrected from R.'s ever inexhaustible store, and tied together so as to form a murderous looking machine; while a savage pocket-knife was fastened to the end of a green sapling, and with these formidable weapons they tackled the salmon in his retreat.

While they are gone I make another supply of coffee for the guide; but he fails to materialize. After a while I hear a shout that proclaims victory, and sure enough here they come with the unfortunate salmon. He measures thirty inches in length. While taking a rest of a few moments, they tell me how it was done. The knife answered the purpose of a spear, and the hooks were used as a grappling-iron; and with much strategy on the part of all three of them, the capture was made.

Presently I notice R. meandering off down stream accompanied by a pair of laughing eyes beneath a big straw hat, and thinking perhaps a word of caution will be in order, I call to him: "Don't stay long. You know we must start home at three o'clock." "All right," he answers, "we'll be back in a little bit."

I found one copy each of *Puck*, *Judge*, and *Wasp* (thanks to the literary taste of our guide) in the cart; and after reading them carefully through, looked at my watch, and found that one hour had passed. This was the hour to start, and that "little bit" wasn't up yet. I turned back and read the papers through again, trying to find something to read; but gave up in despair and again consulted my faithful timepiece. Four o'clock this time; and I'm getting a little out of sorts. Just as I catch the glimmer of a blue dress through a green foliage, I am prepared to administer something besides hot coffee; but, like most good folks, while counting my one-hundred, my mind takes a retrospective turn, and I recall a pair a pair of laughing blue eyes that could turn a whole long summer day into a "little bit" when at my side; and I smile beautifully as the truants confront me.

Six more trout are added to our store, and Mr. V. comes in and we prepare to leave. No guide yet, however. We start up the steep incline by ourselves, leaving the others to wait for the boys.

Just as we arrive at the "on top," of the morning, we are overtaken by the rest of the party—donkey and all. The boys shout that they caught 150 speckled beauties; but, of course, we don't take their word for it. However, Mr. and Mrs. V. were present at the count, and they say it is correct. The boys arrived at the camp in time to dispatch the remaining eatables with a relish; as they had fasted since a six-o'clock breakfast.

We are all in the best of spirits on the way home; even my companion could join in the laughter at the recollection of the day's exploits; in spite of the fact that he had survived the livelong day without a smoke. He even forgot to "settle with those kids." The footing up of 180 trout, and a big salmon, in one day, had a soothing influence upon us all.

One of the wheels of our phaeton was tied with a strap so that it could not turn, and we went down the mountains with a great deal more speed than we had toiled our weary way up in the morning.

Thirty speckled fishes and the salmon, fell to our lot; and we've been living sumptuously to-day

MARION.

GEYSERVILLE, Cal., April 12.

CHICAGO AND THE WEST.

[*From a Staff Correspondent.*]

DES MOINES, Iowa, May 6.—Crossing Iowa earlier in the week, the appearance of the country was that of a vast lake. The rainfall in Illinois and Iowa for the past few days has been unprecedented. What the effect on the shooting will be is of little consequence, but the fishing should be good this summer, for dams, nets and all obstructions are swept away in the floods now pouring down the streams.

At this point the Des Moines River is very high and still rising. Skunk River, 20 miles east, is out of its banks and flooding the country, the highest it has been for 10 years. They have been having good snipe shooting near Metz, on that stream, 30, 40 and 50 birds a day, but the flood will stop that. The Iowa and the Cedar rivers, still further east, are boiling full.

Back in Illinois matters are worse yet, as would appear by the despatches.

Kansas City, Mo., May 7.—The great flood demands even a longer story. Yesterday the country between Des Moines and this point was just beginning to show above the water. Little branches had become rivers. The Missouri River here has risen 4ft. in two days. Should the "June rise" follow upon this stage, earlier than usual, the flood will be hard to estimate. The Kaw River rose with fearful rapidity yesterday and the day before.

At Keokuk, Ia., the Mississippi River is close to its extreme high water mark. From our familiar shooting and fishing grounds near Chicago comes the following word by wire: "Ths floods of northern and central Illinois, northern Indiana and Michigan are playing sad havoc in every direction and it is estimated that millions of dollars damage has been done, while probably several lives have been lost. The rains came down with undiminished force last night and all the streams in the stricken regions are vast resistless torrents which are hourly adding to the ruin already done. The dyke of the marsh drainage district south of Peoria gave way last night, flooding a region five miles long by two and a half wide, all under cultivation and occupied by twenty families. The flood came with terrible suddenness and force and soon a breach 600 feet long was made and in a few minutes the whole section was under water. Rescuing parties were at once formed in both Peoria and Pekin and these spent the entire night searching for the people who lived in the devastated region. They went all over the section and found only six of the twenty families. It is not known whether the remaining families are safe or not. The destruction is complete and there is a scene of the veriest desolation, live stock, houses and barns all being swept away and crops ruined."

A fine prospect, this, for sport along our streams!

May 8.—The State fish hatchery at Keosho, Mo., is a notable one. It has 13 acres of land and 13 ponds, and the appliances are good—or were before the deluge of this week. The plain channel cat is more in demand than any fish the hatchery supplies.

Bass and croppies are reported biting well at Bear Lake—or were before the flood.

Kansas City anglers are discussing the advisability of organizing a fly-casting club for tournament purposes.

Apropos of fly-casting clubs is the following communication from Mr. F. B. Davidson, secretary of the Chicago Fly-casting Club, bearing date of May 4: "At a meeting of the executive and entertainment committees of the Chicago Fly-casting Club, Tuesday, May 3, it was decided to hold an informal fly-casting meeting at Washington Park, on Thursday, May 19, at 3 P. M., at which time several members of the club will give an exhibition of fly-casting, which will be followed by a lunch. The object of the meeting being mutual improvement and instruction in fly-casting, and the better acquaintance of the members. It is earnestly desired that a large number be present and make the first outing of the club a success. A short business meeting will also be held at the same time. Members who desire to be present, will kindly notify the secretary so that the committees may make complete arrangements for their entertainment."

The woolly commonwealth of Utah are planning to make a good, vigorous Wild West show a part of her exhibit at the World's Fair. If only this be made typical, I can imagine nothing more interesting. It is part of the plan to take a band of Ute Indians to the exposition.

I deem it my duty to state that Mr. George Larkin, who lives 8 miles south of Marshall, Mo., has plowed up 220 snakes, 48 of them rattlers, on a piece of ground 27 acres in extent. He killed all the snakes. This is all I know about the weather and snakes.

On the Iowa side of the Mississippi a hot fight is raging between the market fishers and anglers, though it seems still largely a war of words. Representative Shields introduced a bill in the Legislature looking to the protection of the fish along the Mississippi. This brought out the marketmen in a circular calling for organization and funds. The writer of the circular has the following interesting remarks: "I shall call on our houses that we deal with, who helped us liberally in our last trouble, and who I hope have been bountifully repaid by our patronage in return. I have my plans, but of course it would be unwise to put them in print, as more or less of these circulars are bound to fall into the hands of the enemy." The circular did fall into the hands of the enemy, and a correspondent of the Dubuque *Times* had the following in comment:

> The Mississippi River fishermen are not satisfied to confine their fishing to that stream alone, but by the use of wing nets spread across the mouths of the streams emptying into the Mississippi prevent the fish from passing up these streams, which is their custom in the spring, thus spoiling the fishing here, which would otherwise be good. It is the habit of game fish to pass down the inland stream again in the fall seeking the deep waters of the Mississippi for their winter resort, and fishermen take advantage of this navigation by building dams and traps through which it is impossible for a fish of any size to pass, and then begins a ruthless and terrible destruction. I have seen fish caught in this manner placed in overcrowded live-boxes which caused hundreds to perish, and these are then thrown out on the banks and a smell arises from decayed fish which it is impossible to stand in the near vicinity. Many more fish are caught in this manner than can ever be sold by the man making the catch and thus hundreds more are destroyed.
>
> Last fall I was not so observant, but in the fall of 1890 there were on the Volga River, between Elkport and Littleport, a distance of seven miles, not less than seven traps which took large catches every favorable night. About one mile above Elkport on the Turkey River, a trap is put in every year which is scientifically built, and through which it is utterly impossible for a fish to pass. I was told by the builder and owner of this trap that an employee of the State Fish Commissioner's office, whose duty it is to look up violaters of the law and punish them, sat by and saw him take fish out of his trap and excepted him from the law as it was the means of gaining his livelihood.
>
> This manner of fishing and wholesale destruction of fish is a shame and disgrace to the State in which it is tolerated, and if the above story of fishing illegally by the consent of the Commissioner is true he is very lax in the discharge of his duties and should be made to remedy the evil of this miscarriage of justice emanating from his office.
>
> It is no secret that seining is being carried on in the Turkey and Volga rivers every year. It is true that dynamite is used in these streams frequently. It is open talk along these streams that it will be resorted to again.
>
> Is there not a remedy? Every lover of legal fishing should take up this matter and keep the question agitated until the laws are enforced to the letter, and then, and not until then, can the angler have the assurance of a good catch with his rod when he desires to have a little sport with the finny tribe as in the days gone by, when game fish still existed in large numbers. Anglers, stir up the question and never rest until your efforts have been crowned by success.

In short, they are beginning to need an Iowa State Fish League.

But let me offer, before leaving this topic, the stalwart comment of the able editor of the aforesaid Dubuque *Times*. This able editor must be a sandful man, and not afraid of anything. He says:

"The *Times* is not overly interested in this matter, only that, if the charges made against some of the fishermen are true the law would be just, if not true it is a personal matter between those who fish with seines and those who do not, and we will watch the contest with interest."

A fence is a good place from which to watch a contest. I trust the able editor may not fall off and hurt himself.

The sportsmen's papers are too few. When will the dailies come to look upon these matters as news? When will they put their great shoulders to the wheel?

E HOUGH.

Hare-Hunting.—"Did you ever hunt rabbits, Count? "Non, madame," said the Parisian. "But in ze war with Geairmany I haf shot sousands of herrs."—*Harper's Bazar.*

AFTER BLACK BASS.

"Once again the pine tree sung:
'Speak not thy speech my boughs among;
Put off thy years, wash in the breeze,
My hours are peaceful centuries.
Talk no more with feeble tongue;
No more the fool of space and time,
Come weave with mine a nobler rhyme.'"
—*R. W. Emerson.*

SOMETHING of similar import was what Stephens said to me one May morning, which seemed to prophesy of a perfect May day. Lowell has sung:

"And what is so rare as a day in June,
Then if ever come perfect days;
Then heaven tries the earth if it be in tune,
And over it softly her warm ear lays."

But occasionally we have perfect days in May, even in northern Minnesota. "I'm tired out and cross, and don't feel a bit like work. Let's go fishing somewhere," Stephens said.

"Where?" I asked.

"Oh, anywhere, only let us get out somewhere. What do you say to going to Big Floyd Lake?"

"Just the place; we've never been there. Let's try it."

While we were hitching up Mrs. Stephens put up our lunch, and loading in our canvas boat we started for the lake, which lies three miles north of Detroit city.

"We'll try in the north arm of the lake first," said Stephens. We put up our boat, started out, and for two hours had a most aggravated experience. As soon as our lines were on the water the hook would be seized by a pike or a pickerel, mostly the latter, with an occasional pike perch. It made no difference what was on the hook, live minnow, rubber minnow or frog, flies of a dozen sorts, piece of pickerel, eye of pike—each and all were equally effective and as desirable for the fish's stomach. The pickerel and pike would now and then bite a snell off and go. If we had kept what we caught I believe we would have filled the boat. Just as our patience was exhausted it commenced to rain, our fair morning proving to have prophesied falsely, or we went wrong in our interpretations thereof. We pulled ashore and found shelter under a low, close-growing spruce. How the rain did come down! We built a large fire, ate a lunch and patiently waited, passing the time by talking about the bass, which it seemed we were not to get. That they were there we were certain, but they could get no chance on account of the voracious pickerel.

"Well," said Stephens, "if it stops raining we'll get out of here and try over in the main lake.

Presently the clouds did lighten a little, then a little more. The drops fell less and less thickly on the placid surface of the lake. Not a breeze was stirring, and the lake lay like a great grassy, somber piece of dark, cloud-colored glass.

Suddenly the sun shone through. "Let's get out of this quick," said Stephens. We rowed across the lake to where we had left the horse, which we had taken out of the shafts and tied to the rear end of the buggy. Tired of standing and annoyed by the rain, the horse had managed to turn the buggy upside down, and was standing complacently viewing the scene. We righted things up and drove around to where a long stretch of sand beach marked the shore of the main lake. Here we hitched our horse, put the boat into the water again and started for the north shore. We were just getting to the point we were aiming for when I had a strike, and called out, "A bass sure!" I brought the fish to net and found it was a 3-pounder. In a few minutes Stephens had one, then I one. We rowed a little further, then allowed the boat to drift back with the waves, catching three more as we went. We repeated this until we had eleven bass, and then the thunder, which had been growling for some time at a distance, became more distinct, a heavy black cloud rolled rapidly down over the lake, and we reached shore and found shelter just in time to escape a Minnesota squall. The inky blackness of the water lightened here and there into a bottle green, the waves foam-capped, the low-flying clouds, roaring thunder, gleaming lightning and rushing wind, all combined produced an effect which we thoroughly enjoyed. Soon the sun came out, and "the bow in the clouds" spanned the east.

While waiting for the waves to subside a little we ate our dinner and talked over the catch. "I've only one fault to find," Stephens said, "and that is they are all large-mouth and I'd rather catch one small-mouth than two large-mouth each of the same size."

"The way they bit reminded me of an experience I had before I ever knew you," I remarked. "It was the largest catch of small-mouth black bass that I ever made in a short time, and was made the first time I ever went to Lost Lake. Tell you about it, of course.

"The first frost had touched the leaves, and in response they were turning to red, gold and various shades of brown, when a couple of friends of mine and myself set up our tent on the thickly wooded bank of the Red River of the North, about half a mile below where it leaves Ottertail Lake, a beautiful place for a camp, too. The next morning after our getting there we went down the river to Lost Lake. This lake is divided into three parts of nearly equal size by two out-reaching pairs of gravel points, which, coming close together, leave only space for the river to rush through from first lake into second and from second into third, from whence it flows on its sinuous way to Lake Winnipeg and Hudson Bay. At the two rapids where the river rushes between the points is the best bass fishing, or rather, was the best. Not knowing this we fished in the first lake until near the middle of the afternoon, and all we caught was an occasional pike or pickerel. At length in disgust Jim said, 'Put me ashore and I'll lie down in the shade, smoke and take a nap, and you fellows can go and do what you please.'

"We left Jim lighting his pipe and started for the lower end of the lake. Here we found the river rushing through the narrow channel, and we concluded to land and explore for a while. I took my rod out of the boat with me, and before starting on our tramp of exploration I made a cast out into the current. Whew! I thought lightning had struck me by the way the line started to run out, the reel to hum and the rod to bend as I checked the line a little. I had struck a bass sure enough. A small-mouth, too, I felt sure, by the action of the fish. I called to Will, who ran to get his rod, and by the time he was back I had brought the fish to land; a magnificent fellow he was. I at once cast again, so did Will, and immediately we had each hooked a fish. We repeated the performance again and again, and inside of an hour we brought 21 fine small-mouths to land, ranging in weight from 2 to 4½lbs. We stopped at this number, not because the fish were gone, but because we had more than we could use already. This was the time I hooked the same fish three times. I was reeling in a fish when a second one took the upper fly, and after a few frantic struggles the snell parted and away the fish went. Without putting on another fly I put on a fresh minnow, and cast again with the minnow and the remaining fly. Almost as soon as the line touched the water a fish took the fly, and I had it nearly in when again the snell parted and the fish was lost. I cast again, using only the minnow, hooked and landed a good-sized fish, put on another minnow and made another cast, and was at once fast to a fish which I successfully landed; and as I unhooked him, to my great astonishment I found two broken snells hanging from his mouth and in the upper jaw my two lost flies. 'Yes,' growled Jim, as we picked him up on our way back and recounted our exciting hour's sport to him, 'that's always the way. If I'd gone there not a fish would I have caught, and if you'd stayed here you'd have caught fish on the sand or in the bushes.'"

ANTLERS OF WHITE-TAIL DEER.

Shot on the Little Missouri River, November, 1883, by W. H. Brummitt, Pontiac, Mich. From a photograph.

"You did have rare sport," said Stephens as I concluded, "but let's get out and try for some more big-mouths."

We caught four more big ones and three or four that weighed only a pound, which we put back, telling them "to grow a year or so more." The wind was now blowing very strong and it was hard work to keep the boat headed up and make progress, so we quit fishing and started for the place where we had left the horse. When we were near the shore a small boy came running along the sand called out, "Say, your horse is gone!" We landed and ran to where we had hitched the horse. A broken strap tied around the tree told the story. While we were considering if we should walk home and carry the fish a man driving a horse and buggy appeared, and, to our surprise, it was our runaway.

"I found the rig about two miles below here," the man said. "The horse was walking along toward town; I recognized the horse and made up my mind that you two fishing cranks were out here somewhere and had let the horse get away."

"How did you know where we were?" we asked.

"Oh, I just followed the track back, and kept watch to see where it turned off into the woods. 'Twas easy enough, the ground is so soft since the shower."

We loaded up and came home. After supper Stephen said, "I can work much better to-morrow; there is nothing like a day after fish to put life into a man."

MYRON COOLEY.

DETROIT CITY, Minn.

MY REVERIE.

AS the sun grows warmer and warmer each day, my thoughts go forward in anticipation of trout fishing and of the green woods, which so quietly and yet so sweetly welcome you once more to the shady nooks, away from the worry and care of business.

As I sit now, with eyes closed and the smoke lazily curling up from my corncob, mentally reviewing past outings, one in particular looms up before me for which I have special reverence, because it was the first fishing trip I ever made when I felt entirely satisfied with my catch, not that fifteen 1lb. trout were anything to brag of.

It was about the first week in May, 1887, when my friend E. got the trout fever "bad," and proposed that we start at once for a new stream he had heard of. I said, "Wait a few weeks, for, notwithstanding that the midday was warm, there was frost in the mountains each night and we should have our troubles for nothing." And I afterward learned I was quite right.

Well, on June first, we left on the West Shore Railroad, E. and myself, boots, creels, rods and other duffle, and at sunset were located in a small inn at S., way up in the mountains. We changed our clothes and went out for a stroll before supper.

How good it did feel to get off that starched shirt and stiff hat, and into easy fitting garments; a lamb shut up half the winter and just turned out for a run in the fresh green grass wasn't half so frisky as we felt that cool June night. And then the supper (shall I ever forget it?), served in such a clean and inviting little room, and consisting of fried brook trout and potatoes, fresh biscuits, and strawberries, too, rich cream, ice cold. Then after a smoke and a short walk we turned in, leaving word to be called at 7 A. M.

It seemed to me as if I had slept only ten minutes when I heard them knocking. The buckboard drove up to the door when we came out from the breakfast room, and in five minutes we were bouncing along toward the mountains, lying blue and dim off in the distance.

Midday found us in the dooryard of a small farm house, situated on the headwaters of a roaring brook whose waters finally empty into the Hudson, far away. The buckboard left with the understanding to call for us three days later. We were cordially welcomed by the old miller himself, who led the way to the low old-fashioned porch, whose sole occupants were two comfortable old rocking chairs and an inverted churn sunning in one corner, along with cornhusk mat immediately in front of the low door.

We rigged up our rods and after a hasty luncheon started for fish. Possibly 200yds. up stream from the house was located the old sawmill. Above this all the fishing had always previously been done, for below the brook ran through a deep gorge which was utterly impassable. We finally reached the forks of the brook above the mill. Here we separated. E. took the right branch and I the left. Having very poor success I changed fly after fly, cast after cast, light leaders and dark ones, fished on the banks and in the stream, wading up, then down, but try as I would I brought to creel only twelve little ones. Later we met at the farm house and compared notes. He had about thirty, one of which might have weighed a quarter of a pound.

That night while in bed I secretly resolved to try, next day, the hitherto inaccessible gorge; so when the time for departure came I told E. I would fish at the dam awhile, and if I had luck I would follow the stream (in which direction I did not say).

After he had left I took a hoe and went back of the barn and dug a tin boxful of "barnyard hackles," then started down stream to explore a little. Well, it was rough climbing and no mistake. The brook roared and tumbled between its precipitous sides 30ft. below me, making one's head swim to look at it steadily, and all along its course immense circular caverns had been worked by the rushing waters. Slowly I plodded along, crawling over fallen trees, around great rocks, always on the lookout for a place to descend to the cauldron-like holes; when, after half an hour, I noticed a large hemlock which had been uprooted and had fallen so that while its roots still held in the bank above, its top rested on the ledge below. Here was my ladder. I tried the tree; it was firm. Then fastening my rod, bait box and reel to my line, lowered them to the ledge, and after a descent more laughable than elegant, soon stood beside the pool. I lighted my pipe and proceeded to get ready, then I carefully crept along to within a few feet of the edge of the ledge. To my left the brook dashed into this cauldron-like pool between two immense rocks, and the water white with foam swirled and eddied round and round, finally overflowing at the lower end into the next basin. I could not see the bottom, but judged it to be 15ft. deep. I carefully baited my No. 6 sproat with a big worm, dropped it in the flume, letting it float as it would. It followed my side of the pool, swung to the other side, then slowly began to sink, when flash! my tip was jerked almost into the water. I peeked over the edge; my line showed that my victim had taken refuge under a sunken ledge of rock on the opposite side of the pool. I slowly

reeled in. My, how he did object. After a royal struggle I drowned him in the swift current, then laying my rod down hauled him up hand over hand. He would have weighed a good pound. I baited again and threw directly over the ledge. This time it sunk many feet. Tug! I had another and he proved larger than the first, and would weigh 1½lbs. easily; a beauty.

Well, I went on until 5 o'clock, and then I had a nice string of a dozen fine trout any one of which would tip a pound. Can you imagine how lightly I stepped; how short the distance to the house; how the good old miller stared at my string; and what E. said when he saw my beauties lying on a large dish in the kitchen?

That night as we lay together in bed he said to me, "My boy, you shall go fishing with me to-morrow."

NEW YORK. SEDGE.

THE PHANTOM FISH.

THIS fish—which to the "home-keeping hearts" is almost as mystical as the sea serpent—has been seen if not actually hooked by every angler who ever cast a fly, but as far as I can learn "by tale or history," it has never yet been landed. Proteus-like, it has the power of changing its form. Sometimes it appears in the likeness of a salmon, sometimes of a trout, again in the similitude of a pike, and (when the anglers are of tender years) it even condescends to transform itself into a perch or bream. But in one general particular it never differs, whatever its speceies—it is always of gigantic proportions, the finest and best-conditioned fish of its kind. How lovingly the angler dwells upon its exquisite form and its shining silvery scales! How his eyes sparkle as with extended arms he measures its—roughly estimated—length. No matter how tired, and wet, and heavily laden (?) he may return, he is always enthusiastic on the subject of "that fish," "that big beauty," "that monster" (meant in a complimentary sense) or occasionally "that confounded fish." Over and over again have we to listen to the account of the struggle; we hold our breath till it is almost in the basket, when lo! it is gone, vanished as if it had never been there (but, of course, it had), and the frying-pan is deprived of the honor of holding the most magnificent fish that ever the thought of housewife conceived. In imagination it has been served up with every imaginable sauce in or out of the cookery book, and many a time and oft it has served to flavor an otherwise fishless meal. Indeed, the flights of fancy with regard to its delicious flavor remind one of the story of the man who being gifted with a lively imagination and a frugal mind, placed a piece of cheese in a glass bottle and set it in the center of the table, then called upon his children—who happily inherited his imaginative powers—to rub their slices of bread against the bottle, by which device they enjoyed a perfectly satisfactory supper of bread and cheese. But the story does not end here. One night the father returned home late, and as the bottle containing the cheese was locked up, he condoled with his children on having only dry bread for supper.

"But we had cheese for supper, father," replied the children.

"How so, my dears?" inquired the father. "Did you unlock the cupboard?"

"Oh, no," they responded in chorus, "we rubbed our bread against the door."

So many an angler rubs his bread against his fishing rod, and imagines that not only has he landed his fish, but has cooked and eaten it. So much for imagination!

But to return to the phantom fish, can nothing be learned of its history? Is there no legend handed down from the days of Izaak Walton to throw light on the subject? Is its strange appearance and disappearance to remain forever shrouded in mystery? Is there no bait tempting enough to lure it from its lurking place, or no hook strong enough to hold it?

Surely here is an opening for an enterprising fishing tackle maker. What scope for a telling advertisement: "Notice to anglers. The new fly specially invented to catch the 'phantom fish.' N. B.—Order early and be the first to secure the prize."

The first to secure the prize! Think of that, ye piscators! Think of the immortal glory! Think of the price that would be offered by Barnum's successor for such a treasure!

But why raise false hopes? or rather, why deprive the angler of the *motif* which lends such powerful aid in the elaboration of those gems of imagination and narration, by which he one day hopes to win the "Copper Kettle?"
—*An Angler's Sister, in Fishing Gazette.*

VERMONT TROUT.

CENTRAL VERMONT, May 9, 1892.—*Editor Forest and Stream:* The Vermont trout season opened May 1, but the conditions in this section have been unfavorable for the usual amount of fishing to date. There is still some snow on the higher hills and the water in the larger mountain streams remains high and the water roily. The weather has also been cold for the season and this, with snow water running in the streams, has made it a late season, though we had unusually warm weather in April, and our anglers looked for early fishing in consequence. Many of our mountain streams are very "late" ones, and not much, if any, fishing can be done in them before May 30, and this season will probably be no exception.

The weather on opening day was not all that could be desired; a heavy overcoat was a necessity, while a strong wind helped to make it unpleasant. A few anglers report having been out and in one or two favored localities some fairly good catches rewarded them—generally where the fishing was done in ponds or inland streams.

Our party took about forty good trout, and say they were nearly frozen in getting them. The water was very cold and the trout sluggish, being taken usually in the deeper places and not biting well. Since opening day the weather has been such that little fishing has been done, and it is yet too early to make any predictions regarding the trout fishing for the present season, though our anglers can scarcely hope for any improvement over previous years for obvious reasons. Good fishing may yet be found in some parts of Vermont, but it is a thing of the past on many of our best streams, and bids fair to remain so.

Our present law regarding fish and game, covers the ground very well, and the six-inch law might possibly do great good if it was observed, but it is not, and in many places little, if any, attention is paid to it. The writer recalls a short trip through the western part of the State last season, when he enjoyed a half-day's fishing on a fine stream. While there he seemed to be regarded as a curiosity because he returned small trout to the stream—his host informing him it was the general custom there to keep all trout caught down to four inches in length. This was in a place where many of the streams were posted, so the natives could hardly plead ignorance of the law.

This state of things is not confined to one locality, but is more general than is known (or admitted) by those who are working for "reform" and who seem to think the one thing necessary is to *make* a law, proclaim it, and then tinker it over every two years. Meanwhile those who are anxious to see something done must saw wood and say nothing, as if they venture a remark they are promptly jumped on.

It seems to be impossible to enforee the six-inch law, but the majority cannot understand what is to be gained by claiming it is enforced, when the contrary is known.

CENTRAL VERMONT.

POTOMAC NOTES.

WASHINGTON, May 9.—Everybody is going fishing. A great many white perch have been caught. The run of these fish has been larger than for years. At Sheperdstown and Dam No. 6 some very fine catches of black bass have already been made. The water is getting into good condition and one of the most successful seasons for years is predicted. The bass have had a long rest; ever since the flood of 1889 the water has been muddy the greater part of each summer, so that comparatively few fish were caught.

I met Mr. Thos. J. Murrey the other day in market. Some of his famous dishes are still fresh in the minds of members of the Ichthyophagus Club. In the House restaurant Mr. M. has won new laurels with his dish of fresh-smoked Potomac herrings. He says the New Yorker does not know of the gastronomic qualities of the river herring as they are fresh smoked here. "It is the sweetest morsel that I have ever tasted in the shape of fish and I would recommend it highly to the gourmet of New York." Mr. Murrey has the fish cooked in the following manner: Wrap in common brown paper, place in an oven twelve minutes, remove from oven, take the outer skin off and backbone out, cover with sweet butter and serve hot. Members of both branches of Congress are said to be very enthusiastic over this dish.

A very pleasant occurrence took place in Mr. Murdock's office at the Smithsonian on April 30, when he was presented with a split-bamboo rod and bass reel by his assistants in the library. Mr. M. left here for his future home in Middleboro, Mass., on the 15th.

SPODGING AND SPODGERS.

VARIOUS indeed are the devices and means employed by man to capture the denizens of the streams. The Kentuckians have a method of taking the big catfish found in their rivers which they call "spodging." The habits of the fish, which are somewhat peculiar to itself, lead to its capture. It makes a passage from its hiding place under a ledge of rock along the mud at the bottom of the stream, which an expert "spodger" can readily detect with his bare feet. He operates in daylight, as at that time the fish is likely to occupy his den, whither he is traced by the slippery pathway he has formed. The instrument used is called a "spodge hook"—say a broom handle to which a big hook is fastened, no line being used. When the "spodger" has tracked the fish to his den he probes carefully with the butt end of his rod. If he feels the fish he thrusts the hooked end under it and with a vigorous "yank" hauls the fellow out. Sometimes a 40-pounder or larger is taken. On Dick's River, Kentucky, there was a noted "spodger" named Will Arnold, noted not only as a cunning fisherman of his class, but for his ability to remain a long time under water, and especially for his horrible emaciation, which, perhaps, was not less conspicuous than that of Calvin Edson himself. When the water was so deep as to necessitate immersion, this living skeleton would have one or more men to hold him under the water until he could secure his game, and he has even exhibited resentment when his assistants, through fear of drowning him, have "let up" too soon or before he could hook the mammoth bullhead. N. D. E.

WEST VIRGINIA.

KENTUCKY.—Taylorsville, Ky., May 5.—This is the time for fishing in Salt River and Brashears' Creek for channel cats, black bass, suckers and crappie, not to mention log perch, etc. Local anglers report fair success. Angling should be good here throughout the season, but it does not give the sport it should. Some think because of the clearing of the hill lands and consequent washing of mud into the streams. But when it is considered that there are kept in this vicinity many seines and nets, and that fish traps are maintained in the river, and especially that there are persons mean enough to use dynamite, the cause of poor fishing is not difficult to find. Our sportsmen are discouraged also by the action of the Legislature yesterday in defeating the fish and game bill. It begins to be apparent that no other method is feasible in this State in order to secure a fair amount of sport as to fish and game, than the formation of private preserves, and no country offers better advantages of this kind than the vicinity of Salt River.—J. S. MORRIS.

WHY A BOILED LOBSTER IS RED.—In all crustaceans, as, indeed, in almost everything in nature, there is a certain per cent. of iron. Upon boiling, the lobster is oxidized; the effect is largely due also to the percentage of muriatic acid which exists naturally in the shell. The chemical change which takes place here is almost similar to that which occurs in the burning of a brick. In boiling a lobster its coat ceases to be a living substance, and to a certain extent it takes a new character. It is as a brick would be after burning. This effect can also be produced by the sun, but necessarily not so rapidly, as the heat of that luminary, although more intense, is not concentrated sufficiently to produce the result. The sun also exercises a bleaching influence, which consumes the oxide almost as fast as it is formed, leaving the shell white, or nearly pure lime.—*Gloucester Times*, May 5.

LITTLE ONES FOR COUNT.—The editor of the *Progress* has treated in his paper, and at some length, of the bearing of existing statutes upon the question whether speckled trout may more properly be taken upon the first or upon the second day of May. Leaving out the Sunday question, it looks like a sort of hair-splitting which concerns only a limited number of people. To me it seems a matter of real importance to the trout, and therefore to every honest angler, that whenever these fishes are taken, the six inch law shall be observed. There are plenty of men who wouldn't fish Sundays, or steal the value of a nickel, but who will on Monday next catch and carry home three, four or five inch trout, well knowing that they are thus deliberately breaking the law. This is the real reason why our trout are growing scarcer and smaller. All sorts of reasons are given by these law-breakers for this constant defiance of the statute; "the trout won't live after they have been hooked," and all that sort of stuff, but the fact is that the man can not bear to return these fingerlings to the water, but fishes for count. If the hand is wetted, and the hook carefully removed, these trout will live, in a majority of cases; and if more attention is not paid to these matters, the trout supply will continue to decrease. Editors should discourage the publication of great catches of fish, unless the size of the smallest is given. I am in hopes that Warden Hampton will overhaul some of these men whose catches of trout so often appear in the papers. Wouldn't it look funny to see a man brought before Justice Kibby, because he had in his possession 250 trout, the aggregate length of which was little more than as many inches.—*F. H. Thurston, in Bellaire, (Mich.) Breeze.*

CONNECTICUT LAKES.—Pittsburg, N. H., May 2.—This vicinity, for fishing, cannot be surpassed and perhaps not equalled in all New England. The lakes and their tributaries abound with lake and brook trout, landlocked salmon and many other kinds of fish. There was in the winter, to my certain knowledge, one lake trout or 'lunge caught which weighed 21lbs., also many others weighing from 6 to 10lbs. each. Only a short time ago one weighing 8lbs. was caught by a lady. No logging has been done around the lakes for two winters past, which is favorable for fishing. The gates to First Lake will soon be hoisted and will not be shut during the summer, which is another advantage. Diamond Stream is also noted for good fishing, and Little Hell Gate on that stream can be reached from First Lake, which is the shortest route there, in a walk of four hours. It is also the nearest way to Deer Lick Camp, which was formerly called Hell Gate Camp, and is also a great place for trout fishing. First-class guides have been engaged, one of whom will guide ladies if desired. In 1891 an appropriation was made by the State for the protection of game, consequently the deer have greatly increased in number since that time. Partridges are plenty, and when the open season for game arrives there can be no better place for sportsmen than here. Any information desired in regard to this locality will be granted by addressing W. A. ABBOTT.

PIKE COUNTY TROUT.—The season for trout fishing in the famous trout streams of Pike county opened May 1. This time is fixed by special legislation. Dingman's Ferry is known far and wide as having the best trout streams in northern Pennsylvania. Men of prominence in every walk of life annually cast their lines in them. The winter has been specially favorable and splendid sport is anticipated. The High Falls Hotel is in the immediate vicinity of several of the best trout streams, one, in fact, within ten minutes walk, and Dr. Fulmer, the proprietor, is splendidly posted in fishing matters and can always give "points." Dingman Creek, Adams Brook, Trout River, Indian Ladder Creek are all near. This morning three gentlemen left the Doctor's hotel at 7 o'clock and returned in a few hours with their creels well filled with handsome trout. Report stream in splendid condition. Going out again to-morrow morning.—F.

LONG ISLAND TROUT.—New York, May 9.—I have heard much of late that trout fishing on Long Island is one of the things of the past, except on club property. I spent yesterday with some friends at Babylon, going down Saturday. Soon after my arrival the original of the inclosed outline was shown to me. It was a beauty, an out and out brook trout, and was caught by Sandy Blake, a young boy ten or twelve years old. The stream is known as True's Brook and the fish was caught below and within stone's throw of the shore road between Babylon and Bay Shore.—W. B. I.

LAKE RONKONKOMA, on Long Island, has been open to the public for bass fishing, but now Mr. E. M. Townsend comes to the front with a claim to its possession and issues a notice: "On and after May 30, 1892, persons trespassing on said property will be prosecuted as the law provides. Any one desiring to hire fishing or boating privileges on the property are respectfully requested to communicate in person or by letter with me." It is said that members of the Brooklyn Gun Club propose to make a test case for determining whether Mr. Townsend can enforce his prohibition.

A CONNECTICUT RIVER SALMON weighing 19½lbs. was caught near Saybrook on April 26. The fish, which was a very handsome one, was exhibited in front of the store of Newton & Butler, of Asylum street, Hartford, and attracted marked attention. Salmon appear in the Connecticut only occasionally—about one example a year, and in Hartford a salmon from this river is not found sometimes for a period of four or five years. Salmon and modern improvements do not seem to get along well together.

AFTER TWO YEARS.—The Fort Myers, Fla., *Press* records that Mr. B. B. McGregor caught a jew-fish weighing 150lbs., that had a pair of grains sticking in his head. Mr. Santa Vevis recognized the grains as his, that he stuck in the fish two years ago this summer, out in the river near where the schooner Quick was anchored. The fish ran under the schooner and thus Santa lost him. After two years, the fish is again taken and the grains recovered, though they were rusty and covered with barnacles.

THE UTICA FISH AND GAME PROTECTIVE ASSOCIATION has elected the folowing officers: President, I. C. McIntosh; Vice-President, Gustavus Dexter; Secretary, J. D. Collins; Treasurer, George L. Bradford; Directors—Dr. C. M. Hitchcock, W. E. Walcott, A. B. Gardner, W. K. Gilmore, Gustavus Dexter, Elon G. Brown, T. Jay Griffiths.—PORTSA (Utica, N. Y., May 5).

ADIRONDACK TROUT.—Number Four, N. Y., May 2.—Trout fishing, especially in May, is fairly good here. The first legal day is to-day; the only two who went out fishing caught 10lbs. of trout, five weighing a pound each. They did not go over 1½ miles from the house.—MUSSITT.

Where to Go for Trout.

MAINE and the Adirondacks are celebrated for their trout fishing, but are only reached at an expense of time and money that few men can afford in the spring of the year. Down on Long Island there are some good trout waters, but all the best are religiously preserved. North of New York City there are a few trout streams, but they are scarcely worth visiting. The nearest point to the city where a decent catch may be had, and in fact the only near point for non-members of clubs, is the mountainous country lying about the headwaters of the Delaware in Pike county, Pennsylvania, and Sullivan county, New York. Here, along the line of the Erie Railroad, are many prolific streams where from thirty to forty-five trout may be brought to creel in a morning's fishing. This country is easy of access from New York. From three to five hours run on the railroad after business hours one day will bring you to your stream, where, after a good night's rest you can have a full day's fishing, and if you wish, be back at your desk the following day. Any Erie agent will supply you with information as to streams, boarding houses, trains, etc. It is all contained in a little book published by the company, called "Summer Homes."—*Adv.*

Playing Cards.

You can obtain a pack of best quality playing cards by sending fifteen cents in postage to P. S. EUSTIS, General Passenger Agent, C., B. & Q. R. R., Chicago, Ill.—*Adv.*

Fisheulture.

NEW YORK FISH COMMISSION.

ALBANY, May 6.—Gov. Flower to-day appointed under the new game and fish protection law the following Commissioners of Fisheries: William H. Bowman, of Rochester, term of one year; A. Sylvester Joline, of Tottenville, term of two years; David C. Hackney, of Fort Plain, term of three years; Robert Hamilton, of Greenwich, term of four years, and Lawrence D. Huntington, of New Rochelle, term of five years. The Commissioners were to have had a meeting immediately after their appointment, but as only Messrs. Hackney and Hamilton were present it was postponed until Tuesday next. All except Mr. Hamilton are reappointments.

NEW YORK FISHWAYS.—Governor Flower has vetoed these appropriations for fishways: Eight thousand dollars for dam at Ogdenburg; $3,000 for dam at Rossie; for purchase of Pope's Mills Dam, $3,000; deepening Indian River, $1,000; Fish Creek, $1,500; Black Creek, $500; and has filed this memorandum: "I understand that these appropriations are to enable the State to co-operate with the Federal Government in maintaining the fish hatchery near Theresa, for which Congress has already appropriated $5,000. In my judgment, this undertaking, having been assumed by the United States Government, should be left to the discretion of Federal authorities. I do not think the public interests require an appropriation from the State treasury of so large an amount as is included in the items above quoted, and they are therefore objected to and not approved."

COLOR FREAKS IN LOBSTERS.—During the last two years lobstermen have taken in Fisher's Island Sound, L. I., five or six indigo lobsters, a color form which was almost unknown there before. In the waters of Maine during the same period three blue lobsters were caught. But one of the most singular of all the freaks in the form of a lobster was captured by G. M. Long in Fisher's Island Sound. This was an albino—white even to the end of its claws. Its eyes were pink. While the white lobsters are rarely met with we are told that indigo lobsters are more or less common. A good way to preserve the colors of these animals would be to cover them with shellac. The varnish also preserves the beautiful colors of the trout when applied to the skin.

DO SALMON EAT IN FRESH WATER?—Prof. Zschokke has published the results of some of his observations on the fresh water parasites of the salmon and Dr. Stiles has translated some of his conclusions for the April *American Naturalist*. The absence of fresh water parasites in Rhine salmon shows that in this stream no food is taken by them. The occasional presence of fresh water parasites in the salmon of the Tay proves that food is occasionally taken in that stream. The very frequent presence of fresh water parasites in the salmon of the Baltic Sea shows that it is the regular custom of this fish to feed in the rivers and brackish water of that region.

PIKE PERCH FOR KENTUCKY.—Car No. 3 of the U. S. Fish Commission rolled into Louisville on April 20 with 17,600,000 eggs of the pike perch, which were to be hatched and planted in Kentucky waters with the coöperation of Major J. Fry Lawrence, president of the Kentucky Fish and Game Club. The eggs were brought from Lake Erie, wherein the Commission collected 145,000,000 during April, notwithstanding the unusually stormy and unfavorable weather. There is great satisfaction in Kentucky with this important addition to its supply of food fish, especially one of the known good qualities of the pike perch. The fish began hatching April 20 and on May 1 all were developed.

LOBSTER TRANSPORTATION.—A man in Friendship, Maine, has constructed a lobster car which keeps each lobster fresh and firm, and in which they can be kept for a long time or carried long distances in perfect condition, alive and kicking. This might be utilized in transplanting lobsters.

One day last week a Gustavus man accosted me thus: "Do you know how a fox gets rid of fleas when tormented by them? If not I can tell you. One day last summer I saw a large red fox go into my barn where I had been scutching flax. Presently out he came with a mouthful of tow, and scampered for the creek near by. I had a curiosity to know what the fellow was going to do with that tow and so I watched him. He went to a deep hole in the creek, turned around and backed slowly into the water until he was entirely submerged, nothing to be seen but the tow. In about three jerks of a lamb's tail the tow was floating on the water, Mr. Fox was on the bank shaking himself, and the next minute was off to the woods. I then secured the tow and found it black with fleas." I can vouch for the truth of the above.—*Warren Chronicle.*

The Kennel.

FIXTURES.

DOG SHOWS.

May 4 to 7.—Annual Dog Show of the California Kennel Club, at San Francisco Cal. Frank J. Silvey, Sec'y.
May 17 to 19.—Androscoggin Kennel Club, at Lewiston Me. T. R. Cartland, Sec'y.
Aug. 31 to Sept. 3.—Second Annual Dog Show of the Blue Grass Kennel Club, at Lexington, Ky. Roger Williams, Sec'y.
Sept. 6 to 9.—Second Annual Dog Show of the Hamilton Kennel Club, at Hamilton, Canada. A. D. Stewart, Sec'y.
Sept. 6 to 9.—Rochester Kennel Club, at Rochester, N. Y. Harry Yates, Sec'y.
Sept. 12 to 16.—Fourth Annual Dog Show of the Toronto Industrial Exhibition Association, at Toronto, Canada. C. A. Stone, Sec'y.
Sept. 19 to 23.—Western Michigan Kennel Club, at Grand Rapids, Mich. H. Gale, Galesburg, Mich., Superintendent.
Sept. 27 to 30.—Dog Show at Ottawa, Can. Alfred Geddes, Sec'y.
Oct. 25 to 28.—Omaha Kennel Club, at Omaha, Neb. E. L. Marston, Sec'y.
Nov. 23 to 25.—American Pet Dog Club, at Madison Square Garden, New York. Marion E. Bannister, Cranford, N. J., Sec'y.

FIELD TRIALS.

Sept. 6.—Manitoba Field Trials, at Morris, Man. A. Holloway, Winnipeg, Man., Sec'y.
Nov. 6.—International Field Trials Club, third annual trials, at Chatham, Ont. Amateur Stake, Nov. 6. Open Stakes, Nov. 7. W. B. Wells, Sec'y.
Nov. 7.—United States Field Trials, at Elizabethtown, Ky. P. T. Madison, Indianapolis, Ind., Sec'y.
Nov. 8.—New England Field Trials, at Assonet, Mass. Geo. E. Stickney, Lowell, Mass., Sec'y.
Nov. 15.—American Field Trials, at Columbus, Ind. W. J. Beck, Sec'y.
Nov. 21.—Eastern Field Trial Club Trials, at High Point, N. C. W. A. Coster, Sec'y.
Nov. 23.—Philadelphia Kennel Club Trials, at High Point, N. C. F. G. Taylor, Sec'y.
Dec. 5.—Central Field Trials, at Lexington, N. C. Col. Odell, Sec'y.

LOS ANGELES DOG SHOW.

[*Special Report.*]

THE bench show that closed here to-day was the most successful show ever held by the Southern California Kennel Club. This club deserves great credit for their hard work. In the face of many obstacles they are doing wonders in the interest of thoroughbred dogs on this coast.

The show was held in a well-lighted, airy building large enough for four times the number of dogs entered, with convenience for special meetings, feeding, etc. The secretary, Mr. C. A. Sumner, is a thorough business man and the ideal secretary. Messrs. Benchley, Keifer, Holbrook, Bright, the secretary, and Mr. Wilson, the superintendent, were always at hand when wanted, and a better managed, more smoothly conducted show was never held. Mr. Jas. Mortimer judged all classes, and carries off the palm as the most popular judge that ever visited this coast. Unlike his predecessors, he withheld all prizes (except one) where such prizes should have been withheld. This is right, and the exhibitors thank him for doing so.

We must of course differ from the judge once in a while on general principle. The only exception was in the Newfoundland class. The winner in open dogs would have been just as good a dog had he carried a white ribbon as he was with the blue, and the owner, who knows how the brute was produced, would have a better opinion of the judge. His awards were remarkably well received, more especially when the fact is considered that many former decisions were reversed.

The pointers and fox-terriers were much the best, as well as the largest, classes. The pugs were not as good as last year. More or less improvement is apparent in all other classes. The performing dogs, goats, etc., proved a good attraction. The specials consisted of about thirty silver cups and many other articles of more or less utility.

MASTIFFS.—In open dog class Draco A., the winner, is a dog of moderate quality, with fair skull and muzzle, good body, back and loin, fair bone, has splay feet and is a poor mover, with poorly-carried tail. Amado, second, has an immense quantity of wrinkle, flew and dewlap that give his skull and muzzle the effect of being much larger than they are. I think him full the equal of the winner in head, but he is straight in stifles and a very poor mover. Bishop, third, has a shorter head than the others, good mask, but is shallow in chest and has flat feet. The balance of the class was only fair.

ST. BERNARDS.—Republican, first, has improved materially since he won here last year, and the San Francisco St. Bernard men may thank their stars that a Los Angeles citizen purchased him and will not show him again. He is a bit long in muzzle and not square enough, but has a good skull, lots of character, good shadings and markings, nice coat and color, excellent in hind limbs, but turns out in front feet. Grand Chancellor, second, is a promising puppy, standing 33½in. at 13 mos.; he has a good skull and depth of muzzle, but lacks in bone and substance, coat and color good, nice shadings, but lacks collar. The other entry is a self-colored chap that simply wasn't in it. In bitches a lemon and white undersized bitch, without character or anything else, got third, all that she was worth.

NEWFOUNDLANDS.—Scott, the winner, has St. Bernard character and nice formation of skull, double dew claws and a St. Bernard coat. No bitches were entered. In dog puppies, Rover, the winner, has quite a little character; coat curly.

GREAT DANES.—Only one showed up, a very indifferent specimen.

DEERHOUNDS.—Trojan, the winner, shows age and has had his back injured, but is much the best in quality of coat; in head he excels greatly, he is also good in legs and feet, barring one bad toe. Cervus, second, is a little flat in skull, has a well-arched loin, good neck, well-bent stifles and good feet. The other entry is not a good specimen. In bitches, Flora, first, has a fair head, but is lacking in coat; she is the best of the two in condition, has good body, is well bent in stifles, but rather high in hocks. Lady of the Lake, second, has the best head and best coat, but is badly out of form from weaning a litter.

GREYHOUNDS.—Leo, first, has a good head and neck, fine depth of body, well ribbed up, good shoulders, not over well arched in loin, straight in front but a bit too straight in stifles. Lap, second, is a little short in muzzle, good length of neck, the best of the two in ribs, good back and loin, well bent in stifles and straight in front; except for a certain unexplainable lack of quality I like him full as well as the winner. Handy, third, is fair in head, has excellent shoulders, good and straight in front, nice feet, fairly well bent in stifles, a bit high in hocks, the best of the lot in short ribs. Nemo, vhc., is a little weak in pasterns, otherwise good. Bitches.—Pronto, first, though full of quality and the best in the class in most respects, is too lacking in arch of loin to either run long or turn well; she is good in head, excellent in neck, good in body, straight in front, well bent in stifles, and well let down in hocks, with good feet. Silk, second, beats her in loin but is short in head and neck; she has good depth, is straight in front and the best in stifles and hocks in the show. Deno, third, has the best head of the lot, has good length of neck, but is not as well arched in loin or as well let down in hocks as Silk; she has good shoulders, front and feet. Fly, vhc., is well formed but is a bit light in flesh and limps slightly from a broken hind leg. Primrose and Fannie, hc., and Fleet, c., are outclassed. In dog puppies, Charleston, first, is a well made youngster though a bit high in hocks. Wallace Go-By, second, has a fair head but is short in neck, good in body, front and stifles, not let down enough in hocks and flat in front feet. Doc, reserve, is the better matured of the balance of the puppies and won rightly. Bitch puppies.—Lilyhaha, first, has the best head in the class, good straight front, but narrow in chest and lacking in second thighs; feet good. Brindle Duchess, second, is a bit light in loin but good in front, well bent stifles, hocks and body good.

FOXHOUNDS.—Yoicks, first, an English hound, is good in body and limbs, but very heavy in head. Warrior, second, is an American hound, much the best of the two American hounds in shoulders, and otherwise very good. Dixie, vhc., is a bit high on leg and poor in shoulders, otherwise good. Bitches: Music, first, has much the best head, ears are well hung, and is good in body, loin, legs and feet. Patty, second, has the best feet, but is plain in head; otherwise a typical American hound.

POINTERS.—In challenge class, dogs, any weight, Kan Koo was alone; he was shown a trifle fat, otherwise in fine condition. He is a bit short in neck and back, too thick in skull, but good in body, legs and feet. Open dog class, over 55lbs.: Ah Sing, first, is a little heavy in head, with an excellent square-cut muzzle; he is well ribbed up, but for his size is a little short in back; his feet and legs are good, tail worn at the tip, but well carried. Jap, second, is plain in head, ears well hung, good neck, shoulders too straight, ribs well sprung, a little too round in barrel and a bit spread in feet. Hindoo, third, is a fair-headed dog, straight in front, shoulder-bound, short in back ribs, and is not near the quality of those placed over him. In bitches over 50lbs., Amaryllis, the winner, was the only entry. She has as good a head as the writer ever saw. She is good in neck, body, back, loin, bone, legs and feet; tail well carried; she might be better in second thighs. Dogs under 55lbs.: Ko-Ko, the winner, has a good muzzle, but is very cheeky; short in neck and couplings and has flat feet, also carries his tail too gaily. Idstone Bang, second, is square in muzzle, but lacks depth of same, and is a trifle pinched under the eyes; he is the best in shoulder, neck, head and feet, but is handicapped by not having an entire tail. Ray F., third, beats Don F., vhc., in head and general quality. Bitches under 50lbs.—Tippetta, first, is a trim little bitch shown in good condition; she is a trifle plain in head but has good, clean limbs and considerable quality. Kioto, second, also shown in fine fettle, has good length and depth of muzzle but is thick in skull; she is a bit straight in shoulders and out at elbows; has excellent feet and bone. Bessie Jane, third, was removed from show shortly after judging and I did not get a good look at her. Fraulein, hc., was poorly shown; she is weak in pasterns and short in back ribs. Dog puppies.—Spot, first, is a flashily marked, catchy dog; he has a fair head, very fair body but lacking in depth of back ribs, and is not sufficiently bent in stifles; fine tail, well carried. Lemon, second, has a good muzzle, fair skull, ears folded, excellent in body and loin, but has open feet. Quail, reserve, has an excellent body but is a bit thick in skull, well ribbed and good in loin, legs and feet. Baldy, vhc., is good in head but has a sour expression, good in legs and feet but not a very nice mover. Commodore, hc., is light in eye and lacks the quality of the winners. Bitch puppies.—Dessy, second, got all she deserved. First withheld.

ENGLISH SETTERS.—Kash, first, is a good mover but otherwise I do not like him; he is thick in skull, only fair in muzzle, ears set on too high, shallow in back ribs, straight in stifles, light in loin, out at elbows, tail carried with too much curl, front legs, feet and body good. Stamboul, second, is a much smaller dog but an elegant mover; short and light in muzzle, ears a little too high set, good skull, excellent body, feet and legs. Roy T., third, is sour in expression, has a peaked dome, neck might be better, has good legs and feet and is a splendid mover. Prince Charles and Spot, vhc., are of the heavy type of head, more like a Gordon setter, but showing considerable character; they are heavy in loin. Prince is a bad mover and Spot also moves indifferently. In bitches, Lilly C. had almost a walkover, the competing bitch being simply not in it. She has a curly coat, is pinched in muzzle, short in head, and may be considered lucky in securing second. Lilly C. is undoubtedly the best-headed bitch on this coast, and is good in body, legs and feet.

IRISH SETTERS.—Brace, the winner, had a walkover, the other entry being absent. He is too heavy in skull and short in neck, but good in coat, color, legs and feet. In bitches, Nora Mavourneen beats Lady Josie in head and character, both are good in body, legs and feet. Lady Josie is much the best mover.

GORDON SETTERS.—The only entry in dog class, Donald, won first. He is only fair. Lady Clara Jane, first in bitches, is a bitch of considerable quality, though plain in head and out of coat, but good in body and limbs. All other prizes in Gordons were withheld.

The Irish water spaniels and spaniels over 28lbs. did not contain a single fair specimen, and all prizes were properly withheld. Gip, c., was first last year. He is a pretty spaniel, an overgrown cocker, and as broad across the back as a well-fatted hog.

COCKER SPANIELS.—The modern cocker was not represented in this show. Dan Slater, second in open dog class, is better than Duke, third, but sadly lacking in quality. Both of them are the Col. Stubbs strain, good dogs afield, but useless for bench show purposes. In bitches, Flirt was given first. She is of the toy spaniel type, baby-faced, a pretty little thing, but not a show cocker.

RETRIEVERS.—Of the retrievers entered Nigger is the nearest to the curly-coated retriever in type and was awarded second. Roy, second, won first last year; he is not a retriever, though doubtless he will retrieve.

CHESAPEAKES had one entry, the winner last year, a good useful dog, of good character and quality of coat.

COLLIES.—Fordhook Bravo, first, is the best in head and expression; outer coat of good texture, but under coat gone; it was nip and tuck between he and Perris, second. Perris loses to Bravo in skull, but beats him in coat and condition. Perris also won in bitches. Shep, in the vhc. contingent, is doubtless a good cattle dog, but not a bench show specimen.

BULL-TERRIERS.—These classes contained eight entries, only one bull-terrier in the lot, Twilight, by Hinks—champion Starlight, won in open bitches and puppies and special for best in the show. She is a very nice-headed bitch, uncropped, good in front and body. One hip was hurt when a puppy, and the hock is carried straight in consequence. She is not a particle lame, however, and was shown in splendid condition.

FOX-TERRIERS.—This class (38 entries) was the largest in the show, and showed considerable quality. Blemton Volunteer was alone in challenge class. He is well known to Eastern show goers, good in body, legs and feet, but perhaps a bit wide in front, good in skull but a little pinched in muzzle and too pronounced in stop. Blemton Reefer, first in open dogs, afterward beat him for special; Reefer is doubtless the best-headed dog on this coast, a bit high on the leg and shown too light in flesh, making him appear light in body. Blemton Vesuvian, second, is a little short in muzzle and thick in jowl, otherwise good. Jack C., third, is thick and short in head, ears too wide at base and poorly carried, good in coat, legs and feet. Winks, vhc., is too large and fat. Frisco Joker, hc., should have been placed higher, he is thick in skull and showed very poorly, being sick. Winifreda, first in bitches, is too high on the leg, long in body, a trifle too thick in skull, ears carried only fairly well, otherwise very good. Bonnie Buzz, second, is a little pinched in muzzle, but skull, front, coat and legs good, ears

a little heavy. Golden Chip, third, is a little weak in jaw and thick in skull, but is excellent in coat, body, legs and feet. Bonnie Bess, reserve, is too long in body, pinched in muzzle and light in bone. Blemton Lillian, vhc., is a bit short in head, but otherwise excellent. Fashion, hc., is short in head and weak in jaw, otherwise good. In puppies, Randy, the winner in dogs, is excellent in head; one of the best in the show in this respect, but is far too large. Hampden Tip, second, is too full over eyes, rather large and high on the leg. Rosy, first in bitch puppies, is a very nice-headed bitch, but I fancy she will never be large enough; she is excellent in body, legs, feet and coat. Bonnie Buzz, second, and Golden Chip, vhc., have been described in the open class. It is hardly fair to lay too much stress on coat in this warm southern climate, and in my notes and comparisons I have possibly not paid sufficient notice to texture and quantity of coat.

SKYES contained one entry, Jerry; he is a very typical specimen barring a smooth coat.

DACHSHUNDS.—One entry, Waldena, a six months puppy, promises well as regards shape but in color is a tan with freckled white spots on head and loin.

TOY TERRIERS.—Lady, the only entry, is a very good one of the apple-headed type.

PUGS.—The pugs averaged very poor. Neal, given second in dogs, has quite a little wrinkle but ears are badly carried and is otherwise only fair. Queen, second in bitches, is gray in muzzle, ears very badly carried and sadly lacking in character, but the best in size and coat. Topsy, third, is pinched in muzzle, grey in mask and sadly lacking in character. In puppies, Pug, first, is the best of the lot in skull and muzzle but has the worst ears of the entire company; otherwise fair. Belle, second, is pinched in muzzle, black in face and much inferior to the winner.

In spitz dogs, Toady, the only entry, is too large and coarse.

The Russian terrier or Russian setter, whichever it is, was an intelligent-looking brute, but I don't pretend to know what they should be like. If his tail were cut I know he would pass for a very good bob-tail sheep dog.

The specials were some 135 in number, including about thirty silver cups, some of which were very ornamental in design and in some cases quite expensive. Space will not permit of your mentioning them in detail, but the number and quality speak well for the working qualities of the members of the club. PACIFIC.

POINTS AND FLUSHES.

IN a personal letter from Mr. W. S. Bell, Pittsburgh, Pa., he informs me that he has accepted the invitation of the Central Field Trial Club to judge at the club's trials in December next. I think this will be Mr. Bell's first appearance in the capacity of judge, but I think also that the club was most fortunate in engaging him. I had the pleasure of meeting Mr. Bell at the Southern Field Trial Club's trials, in February last, and his keen discrimination in all the details of the competition, his fairness and impartiality, and his correct estimate of the dog's relative standing excited my admiration. The phenomenal memory with which he is gifted will be specially useful in judging. Very few men can follow the intricate and voluminous details of a field trial from memory as can Mr. Bell. The work of a dog in each series, the order of winning, the points, flushes, backs, time, place, in short, every item and feature are minutely and accurately remembered. In the spotting system a fairly good memory is essential. I do not think that Mr. Bell will approve of my saying this, for he is retiring in disposition and wholly unassuming. But I think that these things should be known, so I tell them. I have a profound respect for his opinions, which are always founded on good logic. In his letter to me he touches on the matter of retrieving, the pertinent parts of which I take the liberty of quoting. My own views are well known on the subject—they are opposed to retrieving at field trials. I think that Mr. Bell's views, however, are the best yet advanced for testing retrieving in a field trial. It is readily apparent that it is a waste of time to test poor dogs in retrieving when they have no possible chance to win. His ideas on better training are eminently sound and proper. Many dogs will not train and still retain their dash and industry. For this reason, if for no other, thorough training should be insisted on; for the dog which will not take a training and retain his industry is inferior to one which will. Mr. Bell writes as follows:

"I feel like insisting on better training, and I consider retrieving as being a part of training, and I would not like to see it abolished at trials. I think, however, that the judges might require the last three or four dogs in the stake to retrieve several times each, not less than three each, and more if at all practicable. It would consume too much time to have all the dogs retrieve often enough to make the results satisfactory. One chance at retrieving is no test. I should dislike to condemn a dog upon one opportunity, and I would not like to place merit upon one. In the preliminary heats or series of heats it is unnecessary to have the dogs retrieve, but in the final placing I should like to see retrieving, and especially so if the contest were close as in the Southern Derby (not that I mean that there should be retrieving in the Derby). I do not think retrieving injures the scenting powers, for I have repeatedly seen my dogs, while bringing in a dead bird, point and back, holding the bird all the while. The subject of retrieving is too vital to be disposed of on the jump. Let the matter take the proper channel after a very thorough test and discussion. It has its advantages and disadvantages, and there will be those who advocate its usefulness and its inapplication at field trials."

* * *

I agree fully that retrieving does not injure a dog's scenting powers, yet there are some who believe it does. It does, however, injure in many cases his manner of searching for live birds. It is strange how long a popular fiction will survive. It is not difficult to find sportsmen of the present day who believe that meat will injure a dog's nose, that a double nose has keener powers of scent than a single nose, that distemper can be cured by daubing the dog's nose with tar, etc.

* * *

The judges and reporters of field trials inferentially hold most unpleasant relations to each other, socially, officially and otherwise; that is, judging from the tone of some newspaper articles on these subjects which appear from time to time. As a matter of fact, they are not antagonistic. It would seem, from the views of many writers, that the reporter takes an uncanny delight in differing from the judges, and is ever alert to detect some error or quibble on which to hang an objection or argument. Then there is the man who scorns general reasons in explaining the reporters' depravity, and who goes into particulars, for instance: The reporter desires that a certain dog shall win; the reporter has a grudge against some judge or owner; the reporter wants to curry favor with advertisers; the reporter is afraid of somebody; the reporter is not truthful; the reporter don't know, etc. But happily, the eternal fitness of things establishes itself most charmingly. The judges do the best that they can, and are then criticised or commended according to the light or knowledge, or both, of the reporters, who saw the whole work or as much of it as possible. Then the critical and wise reader, who did not see any of the work, proves that the judge was correct from the reporter's own report or that he was wrong, or *vice versa* concerning the reporter, or the learned critics may deem it proper to differ from either. Thus a general equilibrium is established to the most delicate nicety, from year to year.

One great factor in promoting this unsettled state of affairs has been the erroneous theory on which reports have been written. Too much was attempted. Every point, flush, back, retrieve, etc., were enumerated with painful and prolix iteration and reiteration, without giving the circumstances pertaining to each incident, and which were important in estimating values. To explain at length wherein one point exceeded another in difficulty, or how a flush was no error or otherwise, or how a dog by his greater quickness, accuracy and finish in all details exceeded in merit one which happened to make more points, would be too voluminous for any newspaper report; yet when giving the reader a pen picture in detail the incidents omitted are quite as important as those presented. To say that a dog made a point conveys only the abstract fact to the reader. To tell all about how each point was made would be impossible. The theory of reporting has been erroneous. The true manner would be to describe how a dog performs, the character of his work, in what features he excels and in what particulars his work is faulty, with a general summary of the material work done, and an explanation in regard to opportunities or difficulties presented in doing the work. It may be asked why reporters have not followed these lines if they knew they were better. Simply because that, while reporters are not tied down to any rules in respect to the manner of gathering their facts, they are usually tied down by the papers employing them to certain hard and fast forms in making their reports for publication. While field trial matters have improved in every particular, the manner of reporting them has not progressed a particle. A bulky, voluminous affair, of cast-iron form and hardness, devoid of description but full of an ever-recurring jangle of points, flushes, backs, bevies and marked birds, is served to the reader as a good report, and the larger is this mass of dry rubbish the better satisfied is the reader who does not attend field trials. Then the good man with the poor dog who competes is quite as exacting as if his dog were a good one. He wishes every act of his pet to be embalmed in history so that he can read in print what he already knows or should know, and he fondly imagines that all the world reads it too, but the world don't. In the early history of field trials in this country, when the theory of competition was founded on points and flushes, the reports were in order accordingly, for that represented the state of progress. But field trials have gone through many styles of improvement and evolution, till they have reached the present stage of perfection, yet field trial reporting has remained where it was at the beginning.

The reporter is commonly the most indifferent person on the ground as to which dog wins. He is always pleased to see the judges make a correct decision, for it relieves him of the unpleasant duty of criticism. In most instances the judges are well known to the reporters and all are on friendly terms. Constant attention during the day taking notes, and late hours writing his report, afford ample occupation for the reporter without seeking to develop any irrelevant issues. Probably the future will bring its improvement in field trial reporting as it has done in field trials in the past. That there is abundant material in the way of capable writers who can report a field trial just as it should be, but who do not do so, is strongly in evidence on their own showing. B. WATERS.

TORONTO KENNEL CLUB SHOW.

(Special Report)

THE Toronto Kennel Club's one day local show, held May 6, closed in a halo of light. The committee never expected such an entry or such large attendance, and the coffers of the treasurer should show a decided enlargement. The hall was well filled during the day with visitors from the city and other places, and at night was crowded to excess. The total number of entries was 215, consisting of mastiffs 1, St. Bernards 16, great Danes 4, greyhounds 18, foxhounds 6, harriers 2, pointers 2, English setters 11, Gordon setters 2, Irish setters 6, collies 19, bull-terriers 8, poodles 6, field spaniels 8, cocker spaniels 26, dachshunds 8, beagles 12, fox-terriers 21, Irish terriers 5, Bedlington terriers 9, Skye terriers 2, Yorkshire terriers 4, pugs 6, toy spaniels 6, Italian greyhounds 1, miscellaneous 8.

The judges were: T. G. Davey, of London, well-known as a breeder of pointers and English setters, who gave the awards to the foxhounds, harriers, pointers, setters, dachshunds and beagles; J. F. Kirk, the well-known fancier, who assigned the ribbons to the great Danes, greyhounds, collies, terriers of all classes and spaniels, large and small; and S. F. Glass, of London, who distributed the cards among the St. Bernards and the mastiffs. The bench show committee, on which Secretary Thompson, Messrs. R. P. Forshaw, J. G. Mitchener and C. A. Stone were most industrious, may congratulate themselves on the show passing off most pleasantly and most successfully from every point of view.

The quality was very fair indeed for a show of the kind and the classes well filled. In St. Bernard dogs, Elector, a youngster of the correct color with a bad head and hindquarters, but good in front and heavy in bone, was placed over Geo. Bell's Sir John, who was suffering badly from chorea. Fascination had a bloodless win in the cocker puppy class, but for challenge dogs being debarred from showing he would easily have won in the open class also. A good bitch turned up in Spot, a red cocker; she has a nice head, good bone and body, good legs and should be heard from in the fall. The best of the English setters was Forest Sire, a lemon and white in bad shape but handled well, good head and bone and a fair mover. Irish and Gordons were poor. The pointer Hector has a good body and stands on good limbs, but his head is clumsy and neck thick. In collies Toronto Wonder, shown in good condition, carried off the $50 trophy. Nancy, first here last fall under Mr. Davidson, repeated her win. She is a bit light in bone but was shown very fit. Driver II., a good-looking dog, full of vim, was shown without preparation. Flurry IV., a nice all-over young bitch, first in puppy class, should be heard from again. The quality in other classes was good.

BLACK AND TANS AT PITTSBURGH.

NEW ROCHELLE, N. Y., May 9.—*Editor Forest and Stream:* Your issue of April 28 contained a letter from Mr. A. W. Smith which requires an answer, although I fear the subject is not one of interest to your readers. I have never claimed that my black and tan terrier bitch Broomfield Madge was not wide in front, but I will now state that when in form, as she was at Pittsburgh, she is but slightly so. Her form greatly varies according to her state of flesh and she is very hard to keep down in this particular. Mr. Smith quotes a newspaper criticism about her, but I should in no case argue a question concerning a dog upon such a foundation, for in my experience with the black and tan, a dog that has been on the bench a few times can by such criticisms be found good and bad in every point. Champion Broomfield Sultan, a dog that has been praised both in England and in this country for his exceptionally good head and character, was written up in one show report since he came here as having a greyhound head and lacking in expression and character. I do not think, Mr. Smith would have quoted this criticism had this dog been under argument.

At the first show in which Broomfield Madge competed, Toronto, 1890, her width in front, though greater than when she is at her best, did not prevent her beating so good a bitch as Desdemona under the judging of Mr. Mason. Her next competition at New York, 1891, resulted in her being placed over Meersbrook Empress, by Mr. Mayhew. At New York this year she was judged within forty-eight hours after whelping, and Mr. Raper rightly placed Louie over her and mentioned her width in front. She was in a generally relaxed condition then and she did greatly reduce in width as the tone of her system improved between the time of this show and Pittsburgh, where Mr. Raper considered that she beat Louie with considerable to spare. Had Mr. Smith had more experience as a breeder, he could better understand the change in a bitch that takes place from the time of whelping to a time five or six weeks after leaving her puppies. A bitch during this time does grow narrower in front and improves in all other respects as well.

The English correspondent in the last issue of the *American Field* states that in England Mr. Raper's decisions are not questioned. Mr. Raper is, no doubt, able to see something in a dog besides front, which is as far as the vision of a novice extends, and too often we hear of the great merits of a dog, because he has a couple of broomsticks to support him in front, regardless of what the rest of his make up may be. Perhaps Mr. Smith does not know that the type of straight front so desirable in the fox-terrier is not natural or desirable in a black and tan. The conformation of the front legs in the two breeds is quite distinct, and what would be an excellent front in a black and tan would be decidedly faulty in a fox-terrier and would be considered wide.

While I am on the subject of black and tans I would like to say a word regarding certain statements that have appeared in *Turf, Field and Farm*. In the letters of Mr. Mason and a correspondent who signs a *nom de plume* reference is frequently made to the Meersbrook Maiden muddle, as though Dr. Foote and a few of his friends were the only ones misled, while certain wiseacres knew the nature of the mistake at once and set the matter right. I know of but one person in this country to-day, and he is not Mr. Mason, who expressed an opinion that in any way helped me in determining 'tother from which; and I am at a loss to understand how Mr. Mason can claim to have lent any aid in this direction. We read: "It was prettily devised by Æsop; the fly sat upon the axletree of the chariot wheel and said, 'What a dust do I raise?' So are there some vain persons that, whatsoever goeth alone or moveth upon greater means, if they have never so little hand in it, they think it is they that carry it."—*Bacon.* H. T. FOOTE.

FLAPS FROM THE BEAVER'S TAIL.

TORONTO, Can.—Mr. T. G. Davey, London, has bought the pointer dog Molton Banner from the Forest Pointer Kennels, subject to a certificate from Dr. Mole, of Hamilton. The price, I understand, is $200.

The Hamilton Kennel Club purpose having an athletic entertainment on July 18 and hope thereby to reduce the shortage incurred at their last show.

Mr. Geo. Bell bought from Mr. G. W. Wambach, of Baltimore, for Mr. S. W. Thompson of the Queen's Hotel here, the pups Lord Baltimore (champion Kash—Nun Nicer) and Rustic Katti (Rustic King—Tra-la-la). They are the parents of Mr. Bell's Tip Top and have several wins to their credit.

Fisheries Commission, Superintendent, etc. etc. Stewart was, Several visitors from outside parts visited the Toronto Kennel Club's show yesterday (Friday). Mr. Alderman, of course, on hand, and rendered valuable assistance in Mr. Kirk's ring. I also saw Dr. H. S. Griffin, who has just bought the bull-terrier bitch Edgewood Robin, in whelp to Gully the Great, and Mr. A. Murdock, who told me his Irish terrier bitch Rugby Norah was soon to come over from England.

When two towns the size of Hamilton and Toronto can get up local shows of 167 and 210 entries respectively, it looks as if the fall circuit this year would be well attended and entries large.

One of our prominent spaniel men told me yesterday that he was negotiating in England for three or four dogs. We must have them.

At the executive meeting of the Canadian Kennel Club, held last night, the following members were present: Messrs. T. G. Davey (president), S. F. Glass, London; H. Gorman, Sarnia; C. A. Stone, J. S. Williams, J. G. Mitchener and H. B. Donovan (secretary), Toronto. Mr. A. D. Stewart, Hamilton, was present as a visitor. The secretary read a letter from Mr. Buchanan, of the World's Fair, stating that no limit would be made to the number of entries received of dogs from Canada. The matter of duty on thorough-bred dogs coming into Canada was again brought up, and Mr. Stewart kindly volunteered to use every effort in his power to advance the cause. Notice of motion was given by Mr. Gorman that at the next annual meeting he would move that a breeder's certificate must be furnished with each entry sent in for registration with the C. K. C. Prefixes and affixes may in future be registered at a fee of $1. This not to be retroactive. Twenty-four new members were received.

The following important resolutions were unanimously carried: "That the secretary be instructed to correspond with the Government and proper authorities with a view to appropriating a certain sum of money for the purpose of employing a superintendent, to be appointed by the C. K. C. to generally supervise and arrange necessary details in connection with the exhibit of Canadian dogs at the World's Columbian Exhibition bench show in 1893. That the executive of the C. K. C., representing all kennel clubs in the Dominion of Canada, unanimously recommend that Alderman A. D. Stewart, of Hamilton, be appointed for such position."

"That the executive of the Canadian Kennel Club sustain the action of the Ottawa Kennel Club *in re* suspension of F. H. F. Mercer and further add the penalty of disqualification, and that a copy of this resolution be forwarded to the secretary of the American Kennel Club, the secretary of the Ottawa Kennel Club and Mr. F. H. F. Mercer." It was decided to offer diplomas at one show each year for best kennel, best brace, best dog and best bitch owned and bred in Canada by a member of the C. K. C. All breeds will be covered, and Toronto has the first call. H. B. DONOVAN.

A SUCCESSFUL SETTER CROSS.—Ottumwa, Iowa. I have had twenty-five years experience in the field with dogs, and I now have the best except one that I ever owned. He is four years old, of medium size, orange and white. I have had him in the field in company with a great many dogs during the last three years, none of which compare favorably. His dam is a Gordon, his sire English. He is very fast, a splendid fielder, quarters his ground with remarkable intelligence, and will on chickens work a quarter section while I walk once across; has a splendid nose and will stand firm regardless of the distance I am away. In roading on game as at other times, he carries a high head, and I have many times followed him on a single bird as fast as I cared to walk a full quarter mile. I shot 274 chickens over him the first season, commencing when he was nine months old, and about the same the next year. I have worked him four consecutive days without his showing apparent fatigue. He does not retrieve, but will find dead birds readily. Rabbits do not bother him. I killed about 300 quail last season. One of my best day's shoot was in company with Wm. Carnes of Ottumwa. We bagged forty quail and one pheasant; leaving home at 9 o'clock A. M., and driving seven miles.

FIELD TRIALS AND FIELD TRIAL JUDGES.

Editor Forest and Stream:

A correspondent of the *American Field* in its issue of March 26, writing under the *nom de plume* of "A Scrub," has a long article on "The Method of Conducting Field Trials." This article should be carefully read by every member of a field trial club, and by every man who judges or expects to judge a trial. If what "A Scrub" says be true, certainly field trials have fallen very low and should be relegated to some one of those circles described in Dante's Inferno.

The writer believes in healthy criticism: some vices yield to criticism when they will yield to nothing else. All persons employed in a public capacity should quietly submit to public criticism, so long as the critic stays within the bounds of truth and his criticism intends to remedy existing abuses. Believing that the real object of "A Scrub" is the correction of errors in field trials, rather than a malediction against clubs and judges (which in reality it is) I have decided on its review.

The features of the article that most impress me are:

First—The fraudulency of the "spotting system."
Second—Its real object the placing of certain dogs.
Third—That judges and clubs are alike corrupt.
Fourth—That there is no actual competition.
Fifth—That no efforts are made to equalize chances.
Sixth—That errors in placing dogs are not errors in fact.
Seventh—That field trials are nuisances and should be abated.

The fraudulency of the spotting system—Quite a number of the younger members of field trial clubs and a large number of public patrons are not thoroughly conversant with the many changes that field trial rules have undergone for the benefit of these clauses, so I will give a short *resumé* of pre-existing rules:

The first public trial held in America of which we have any knowledge was held by the Tennessee Field Trial Club, near Memphis, in 1874 First money went to John Davidson's Isabella, and second to Arthur Wheatley's Countess, if my memory serves me right. This trial was run under what was then known as the "point system." Under this system a dog was given five opportunities to point, if he availed himself of all his opportunities to point his score stood 25, if he made a flush, intentional or otherwise, it represented 5 Now let us suppose a case: A's dog is very fast and going down wind makes three excusable flushes and then makes two points; his score will then stand 10—15——5. Suppose B's dog by careful pottering makes five points, his score will stand 25, and transferring A's 5 to B's side with a change of the — sign to + and the score stands A—0, B—30. It can be easily seen from the above that one of the three great requisites in a field dog (speed) would under such a system be eventually done away with, as under such a system a potterer could beat a fast and stylish dog. It is needless to say that the system became obsolete. Next came what was generally known as the "heat system"

This system was virtually the same as that now in existence in Europe for running the Waterloo Cup for greyhounds, so far as the heats are concerned.

The dogs were drawn in braces and at the end of each series, one half of the dogs went out unless there was an odd number of dogs, then one dog in the series won his heat by virtue of having no competitor. The bye-dog in this series generally ran with the dog that won the first heat in the first series. Now let us suppose a case, suppose the stake consisted of sixteen starters, and suppose the eight better dogs were drawn together and the eight poorer ones were drawn together; now at the end of this series four of the better dogs would remain in and four of the poorer; now suppose the weaker dogs should be drawn against each other and likewise with the stronger, we have the spectacle of three of the stronger dogs in the stake being left out and one of the weaker dogs running the strongest dog in the stake for first honor and money.

This system resulted in the placing of certain dogs that should have been spotted out early in the competition. To remedy the errors that crept in under this system, what is now known as the "spotting system" was introduced. The spotting system is intended to be a "diagnosis by exclusion," in other words at the several stages of the trials to exclude those dogs that have no chance to win. This system has proven not only the most satisfactory one yet introduced but has in some form or other, so far as I know, been adopted by all field trial associations both at home and abroad. A rule of one of the most prominent clubs says, "After each series those dogs shall be spotted out that have no chance to win." To me it seems that nothing could be fairer. Under the heat system some of the best were spotted out and some of the poorest.

We can readily see the fallacy of the heat system in the running off of the Waterloo cup this season.

Simonion was shut out in one of the heat series, but he turns up winner of the Waterloo Plate, a race for beaten dogs, and demonstrated that he was about as good a dog as his brother Fullerton.

Second—The real object of field trials, the placing of certain dogs. Surely "A Scrub" has not thought of the gravity of such a charge, its far-reaching and baneful influence. It charges the club with malice *prepense* and the judges with being *particeps criminis*. The charge is not only without foundation, but is unbecoming of its author and does not demand a refutation.

The third charge is virtually the same as the second, but collusion is charged as existing between clubs or governing committees and judges. Does "A Scrub" really believe that in looking for its judges a club looks for men who are morally and socially depraved? Does he really think that men are sought to judge trials who are unacquainted with field sports and who are unworthy of public trust?

It is safe to say that there is as much honor and brains represented by members of field trials clubs as by the same number of men in any other walk in life. No, the charge is without foundation.

Fourth—That there is no actual competition in the field trials of to day.—This charge could not have been made without one of three things existing: First, "A Scrub" does not know what competition is, or he was not in the procession the past season, or he misrepresents the facts. The writer has been at quite a number of the trials, including the first and the last, and can safely say that he has seen as keen competition in trials as he ever saw in any branch of sport, and that the keenest competition he ever saw in a trial was in the last.

There are no three men in America more competent to judge of competition than D. E. Rose, Charles Tucker and H. M. Short, and if either one of these gentlemen will say there was no competition in the field trials of the past season I will doff my hat and retire. In fact I was very much impressed with a remark made by Mr. Short, which was "That competition was so hot and the dogs were of such a high class that unless a man had something almost phenomenal in the dog line he had better be at home."

Fifth—That no efforts are made to equalize chances. This charge we know to be without foundation. During the past season I saw every effort made to equalize chances. In the Southern trials, when dogs were drawn to run in the middle of the day, if the dogs showed fine natural qualities they were called again, when the scenting was good. The writer was sent off to judge a side heat, being accompanied by the handler, H. M. Short, Mr. Tracy, the artist, and a press representative. Owing to the scarcity of birds, the grounds having just been drawn, time of day, scenting, etc., the dog made but one point, and that on a stale scent.

That dog went into the next series of heats. Why? Just because the judge thought the conditions were unfavorable, and that the dog should have an opportunity under more favorable conditions. I have known other similar cases.

THE DRAW.

THE POINT.

DUKE OF METEOR AND LAUNCELOT.

Owned by Mr. E. H. Richards, North Dana, Massachusetts.

Sixth—That errors in placing dogs are not errors in fact. This is another charge that should not have been made, it is untrue, and unfair to the many gentlemen who judge at our trials. Who have been the more prominent as field trial judges, John Davidson, D. C. Bergundthal, Capt. Pat Henry, Maj. Taylor, P. H. Bryson, F. I Stone, Arthur Merriman, etc Now I will guarantee that these gentlemen stand as high for honesty and uprightness of character as any men in the country, they are the peers of any men in the country in any sense of the word. It is an outrage against common decency to charge them with corruption. I have been impressed for years with the fact that but few men are capacitated to play at games of chance, they neither know how to win or lose; they can never see the errors in things of their own. I was impressed with an owner's reply to certain inquiries regarding his dog's loss of a heat at a field trial the past winter. The dog was known to be a good one, and it was thought he would be somewhere in the money, but he struck one of the winners and was shut out. A gentleman asked: "Well, how did your dog do?" "Just as well as I ever saw him." "Well, how did it happen you got beaten?" "The other fellow had a better dog." That gentleman had traveled a thousand miles, saw his dog beaten, and knew it. He was capable of seeing work as it actually was. He will run again, and such are the men who sooner or later own winners.

Seventh—That field trials are nuisances and should be abated. No field trials are here to stay, revolutions never go backward, "A Scrub" may enter his protests, but the car of progress still moves upward and on.

Phœbus will still whip his fiery steeds amain; Neptune will wave his trident over the sea; the wrathful Juno may importune Boreas to turn loose his cold blasts on "A Scrub," but field trials are here to stay.

In conclusion I wish to ask a few hypothetical questions:

First: Knowing a field trial club to be corrupt and its judges no better, does not the man who runs before them become *particeps criminis*?

Second: Is not the man who consorts with thieves, engages in their forays and attempts to share in their spoils (knowing them to be thieves) as guilty as they?

Third: Is he not estopped from saying anything against a club knowing it to be corrupt when he runs under it?

TARQUIN.

The smart little Pomeranian, Sheffield Lad, helped to vary some of the miscellaneous classes at the shows this spring. Few who admired him knew him for anything but a "Spitz," and credited him with the probably merited reputation for variable temper, which is attributed to the more or less mongrel Spitz as known in this country. The Pomeranian is an invaluable watch dog, and we wonder he does not become more popular. In England they have toy Pomeranians. A Mrs. Gordon Lynx owns the smallest one, Lissel, which weighs but 3½lbs., and which has, according to *Fanciers' Gazette*, exploded the popular idea that a dog can be too small to breed by having two puppies recently by the same lady's Commodore Nutt, who himself can only pull down the scales at 4lbs. Lissel is quoted as having a typical long face and small, sharp ears. She must be "too cunning for anything."

WOLF AND COYOTE HUNTING IN ALBERTA.

I SAW in FOREST AND STREAM of Feb. 25 an article, "Chicago and the West," by E Hough, in which he mentions a wolf race between the Borzois and Western greyhound. This race will be watched with great interest by many sportsmen of this province. In winter wolf and coyote hunting with wolf, stag and greyhounds is the chief amusement here. Hundreds of miles are ridden over our prairies and foothills in quest of these destroyers of our flocks and herds. There are six packs of dogs within fifty miles of my ranch, nine to twelve hounds in each.

In '76 and '77 most of the buffalo left this country and drifted on to the great plains, never to return. The Sioux crossed the Missouri into the Northwest Territory after their fight with General Custer in the Little Big Horn, intercepted the buffalo and prevented them returning to their winter home. The wolves followed the buffalo in large numbers, but many remained behind to subsist on the old bulls left in the "drag." Most of these were killed by "wolfers." In '80 and '81 there were very few wolves to be found on the plains and foothills. But soon cattle, horses and sheep in thousands were driven into these then desolate plains until in '85 there were over one hundred thousand cattle, beside many thousand horses and sheep to take the place of the departed buffalo. Wolves and coyotes increased enormously. Poison apparently made little or no impression upon them.

Wolves prefer fresh meat and are quite able to kill anything they come across, seldom returning to a kill after satisfying their ravenous appetites. The cattlemen decided to procure dogs and see what effect that would have in destroying these cunning pests. A large number of dogs were imported, and with very few exceptions were found utterly useless. They took no interest in hunting or killing wolves as they had not been entered when young. I may say we had no good dogs until they were bred on the range. The method usually followed here in hunting is this: When a den of wolves is found, three or four ranchers with their dogs meet at a rendezvous and camp for the night. Before dawn horses are saddled and all are ready to start. Each one is told the line to be ridden, and at the first sign of day the riders are off seeking the wily wolf. Coyotes go unmolested, unless they jump up near the dogs, in which case it is hard to hold them back. Mr. Coyote is broken up in a very short time when the dogs run into him, but fights wicked to the end and is no mean adversary. I know of a few dogs that can catch and kill a coyote, but they do not care to repeat it often; as a rule it takes three dogs to do it, and they will not stand killing over two or three in a day. Of course a great deal depends on the length of the run and the strength and fighting qualities of the coyote. I have killed seven coyotes in a day with three greyhounds; in all cases I got in and gave the *coup de grace*. It saves your dog wonderfully and gives them courage to know help is coming, and unless one has five or six dogs they are very apt to get cut when tired. When dogs run into a timber wolf then the fun begins; with hair on end, back arched, a sweet smile showing a full set of teeth, the wolf means business, and it takes four tried dogs to turn one over and hold him until help comes. I mean four dogs that can catch him. No doubt there are two dogs that could hold a wolf, but they have not the speed to overtake him. This autumn I ran into a very large bitch wolf with eight dogs. They turned her over several times, but she broke away just as often and ran with six dogs clinging to her and making a running fight, when a cowboy rode up and shot her. Last year I rode into a band of fourteen wolves with ten dogs and killed five, but in every instance I assisted the dogs in killing. This autumn I ran into an old dog wolf, I had six good dogs. The lead dogs (two greyhounds) ran into him and turned him over when the other dogs coming up, they turned him over several times, seized him by the neck, breast and hindquarters and flank, and tore and worried with all their might. The wolf would break away, turning like a flash, snapping to the right and left, his teeth coming together like a fox trap. The dogs ran him down into a coulee; here I left my horse, it being too steep and rough for him to follow, as the edges were lined with huge projecting rocks. The dogs appeared to be having the best of the fight, and I yelled to them to go to him, but the wolf broke loose and ran to the top of the coulee with most of the pack holding on to him; at the top they turned him back, and dogs and wolf came on the run to the bottom of the coulee. I could not shoot for fear of hitting one of the dogs, as they were making side jumps to keep clear of the wolf's jaws. At last the dogs pulled him into the dry bed of a stream and as he was getting out I gave him his medicine. The dogs were quite blown. I gave them thirty minutes rest and took them to water and killed two coyotes on my way home. These the dogs killed before I could get to them. They just held them in the air and tore them up.

I give you the height and girth of some of my dogs, as it may be of interest to some of my brother sportsmen:

Greyhounds—Pedro, height, 27½in; girth, 30in.; Rowdy, height, 27in; girth 31in.; Buz, height, 26in.; girth, 29½in.

Staghounds—Poison, height, 29in.; girth, 32in.; Parson, height, 30in.; girth, 33in.

Cross-bred boarhound and staghound—Jack, height, 29½in.; girth, 33in.

The man who has two dogs that can catch and kill a big timber wolf can make lots of money on them if he wants to gamble on it.

SPORTSMAN.

ALBERTA TERRITORY, Canada.

WILL BEAGLES FOLLOW A DRAG?—Ottawa, Can. —*Editor Forest and Stream:* Can any of your readers tell me if beagles are ever used to follow a "drag," and, if so, will they kindly give any information they have on the subject through your valuable columns?—ALFRED GEDDES.

DOG CHAT.

ONE of our oldest breeders, more especially of Gordon setters, is Mr. C. T. Brownell, of New Bedford, Mass. He is one of the workers in the vineyard, literally, being quite content to leave the contentious elements of dogdom to others. Mr. Brownell's kennels are called the Mount Pleasant Gordon Kennels and are situated on the outskirts of New Bedford. At present his kennels include several prize winners, among which are Beulah, Duchess, Queen, Nora, Murkland Ranger, Gordon Grouse and Dash B. Duchess was the winning Gordon pup at Boston a few weeks since; Gordon Grouse won first at Boston last year in open dogs. Beulah is the matron of the kennel, and won prizes at New York and other shows some five or six years since. Murkland Ranger is a local prize winner. Mr. Brownell manages to dispose of about fifty pups a year, and is an old and appreciative advertiser in FOREST AND STREAM, his sales during the past six months numbering 33. When dog shows are on the tapis at New Bedford Mr. Brownell is one of the hardest workers.

"Ten thousand dollars for a dog!" he exclaimed as he looked up from his newspaper. "Do you believe any one ever paid such a price, Maria?" "I'm sure I don't know, James," she returned without stopping her needlework even for a moment. "Does the paper say that much was paid?" "Yes, there's an article on valuable dogs, and it speaks of one that was sold for 10,000. I don't believe it." "It may be true, James," she said quietly. "Some of these blooded animals bring fancy prices, and there's no particular reason why the paper should lie about it." "I know that, Maria; but just think of it—just try to grasp the magnitude of that sum in your weak, feminine mind. You don't seem to realize it. Ten thousand dollars for a dog! Why hang it, Maria! that's more than I am worth!" "I know it, James, but some are worth more than others." She went calmly on with her sewing, while he fumed and sputtered for a moment and then dropped the subject, especially the weak, feminine mind part of it.—*Humane Journal.*

When it comes to getting together a representative gathering of dogs, Scotland is not so very far behind England in this respect. In connection with the Ayrshire Agricultural Association, at Ayr, a show with 1,500 entries took place a couple of weeks since. In some of the breeds record entries were made, notably in the national breed—the collie—which attained the unprecedented entry of 394. Ormskirk Ormond won the Scottish Collie Club Derby for dogs, and though beaten in the open dog class by Mr. Lumsden's Kintor Diamond, he won for Mr. Stretch the Scottish Collie Club 25 guinea cup for best owned and bred by exhibitor. Scotch terriers had also a banner entry, no less than 148 facing the judge, a collection that would have puzzled any less clever judge than Mr. Thomson Gray, who also handled the Dandie Dinmont classes, which were also very large. Fox-terriers numbered 150 and Irish terriers 60. Sporting dogs were well represented, and special mention is made of the class provided for black or black and white pointers, which used to be, and is still, a popular strain in the North. The judging of this large show was done by five men, and commencing at 11 A. M. we are told that most of the awards were made by 5 P. M.

Fanciers' Gazette in its report of this show says that "A Dandie with an unlevel jaw—no matter if perfection itself in all other points—is now practically ineligible for the show ring, and we wondered what some of the breeders of days gone by would have said had they seen the careful manner in which the judge investigated each mouth before paying any regard to any of the other points of the dog." As showing the high pitch of perfection this famous breed has now attained the judge did not find it necessary to throw one specimen out for this defect.

Mr. W. W. Spellman, who is a noted breeder of Scottish terriers, is also the owner of the celebrated champion Dundee. This dog has been before the public since 1884 and has been shown seventy-five times, winning one hundred firsts, cups and medals. His challenge and champion class wins alone number twenty-seven.

The White Star liner Nomadic, which sailed from England April 29, is bringing, among other stock, a pack of foxhounds for Mr. E. D. Morgan.

Mr. John Hawkes, of Cincinnati, O., seems to have a leaning toward dogs that are "bred" in the Land o' Cakes. When he was over on the other side last year he bought the collie Grange Nellie, which has not yet had a fair chance to show herself properly. Now he has purchased a Scottish terrier, a full brother to Hawthorn of Riverside, from Mr. Joseph Hall.

The Gordon setter field trials that were to have come off May 4 on Lord Salisbury's estates at Hatfield, England, have been postponed, and as the season is pretty late now they will probably be postponed till autumn.

Zerry, the Psovoi bitch owned by Mr. Huntington, is still in England under Mr. Sewell's care. We wonder her owner does not bring her home now and breed her to his Argoss.

At the toy dog show held last week in London there were 120 toy spaniels benched, 154 entries. Pugs numbered 98, entries 141; Pomeranians 27, entries 50; Schipperkes 31, entries 51, and Yorkshires and toys 51. This should make a particularly interesting exhibition, and we expect to publish a special report of the show by Miss A. M. Holdsworth, the noted writer on pet dogs.

Stock-Keeper this week in giving the account of the recent "wolf coursing" at Denver, Col., goes to a good deal of trouble to point out that the American idea of the capabilities of the Psovoi is all wrong. There was hardly any need for this. We are quite willing to believe, judging of the dogs that have been tried, that their strong point is not to kill the wolf themselves, but to allow their master to do it for them. That journal claims that Zloeem and Osmaday did their duty and that when it was found that they could not hold "Greeley," another pair should have been slipped to their help, and another still till the wolf succumbed, instancing a case where it took twenty Psovois to hold the wolf so that the hunter could give the *coup de grace.* While we agree with our contemporary that the owners of these dogs are to blame for any ridicule that may have been heaped on the breed, the fact still remains that had they had the pluck they should have, Zloeem and Osmaday would not have left the wolf while they had a leg to stand on. There are greyhounds now in Colorado that can do better than that.

Some time ago we drew attention to the evil effects of a continued dosing of arsenic and such drugs to fit dogs for showing purposes and to give them that sleek appearance that in many minds is the sign of condition. The following letter in *Stock Keeper* strikes us as useful in the cause and a warning to lazy kennelmen: "How is it that people so frequently complain that a dog which a few weeks before was bought in the pink of condition rapidly loses flesh, becomes staring in coat, refuses food and presents other symptoms of ill-health? In a great number of these cases the animal has been previously 'doctored' with arsenic, generally the solution, the system has been artificially stimulated and natural waste of tissue prevented. When this agent is withdrawn the power of assimilation is diminished, the animal suffers from derangement of the stomach, liver, etc., and frequently exhibits, with other symptoms, cough, indigestion, vomiting, falling off of hair, and in some cases convulsions. It has acted on the protoplasm, the vital part of the organism—if I may so put it—and by preventing oxidation, converted it into a substance resembling fat. We now have fatty degeneration of the heart, liver and other most important internal organs. These, now the stimulus is withdrawn, are quite unable to perform their proper functions. In a great number of cases where the owner has been previously using arsenic they seem to have an objection to tell the veterinary surgeon, and this sometimes leads to mistakes on the part of that much blamed individual. These cases do no good to the dog, its owner, the vet. or any one else, and the sooner the wholesale administration of this irritant poison—except by the order of a properly qualified man—is stopped, the better for all concerned. I am quite sure we should have fewer cases of paralysis, puppies and dogs with bone and joint diseases, and bitches not breeding, about which there is at present such an outcry. I trust that the insertion of this note in your widely read paper may start abler pens than mine, or make people think before playing with this useful, but too often improperly used drug. —EDWARD J. FOWLER, M.R.C.V.S."

We have received a copy of the Manchester (Eng.) dog show catalogue, and we must admit it is the handiest one we have yet seen. Every one knows what a bother it is to find the different breeds in the catalogue when one is in a hurry, and it is nearly as much trouble to find the breed index. In the catalogue before us the edges are indexed with the name of the breed, so that in turning the leaves of the book one can place one's finger at once on any breed required and open it at the proper place without any interminable turning over of leaves. This must be a boon to many an exhibitor, especially in the ring, with a dog tugging at the other end of the chain he holds in one hand. The rules are indexed at the edges in a similar manner. The entries at this show numbered 1,075, and the show commenced on Tuesday, March 22. A marked catalogue was issued on Wednesday. The stewards detailed for each ring make quite a formidable list, and as most of them are exhibitors everything worked very smoothly.

The Queen of England will soon have quite a dogly library if the efforts of our contemporaries, *Stock-Keeper* and *British Fancier*, have full sway. The betting was very even till the mail that brings the news that Mr. Krehl had been presented to her Majesty, "who graciously deigned" to accept a pair of Irish terriers from this well-known editor. As the *Stock-Keeper* also presented the Queen with a handsomely bound copy of their Christmas supplement, this journal seems to be one ahead. It will now be in order for Mr. Marples to trot out one of his "Moonstones" and keep up the show of loyalty, etc. Amid it all the *Fanciers' Gazette* pursues the even tenor of its way.

Stock-Keeper (Eng.) speaking on the formation of a "Barzoi" club in England says: "It may safely be assumed that the designation of the club was not decided upon without due deliberation, and the conclusion arrived at to adopt the title "Barzoi" may well be allowed to set at rest the many puerile discussions which have of late cast ridicule on the breed." Because *Stock-Keeper* believes "Barzoi" to be the proper name, that does not make it so any more than the breed's reputation as wolf killers is sufficient to encompass the death of that savage beast. Investigation has proved that Barzoi is not the correct term, but that Psovoi or Psovoi Barzie is. A coursing meet for Psovies will likely be held next season under the auspices of the specialty club for that breed.

The Duke of Newcastle, who, with the Duchess, has the finest kennel of Psovois in England, sailed on the Teutonic for a visit to this country. From his kennels came Mr. Huntington's Argoss. The Duchess of Newcastle, who is a keen fancier, will open the Leeds dog show which opens May 10.

Young Bute is considered a good dog in England at present and he has still further added to his laurels in siring a litter of 17 out of Rustic Beauty. Messrs. Sidney W. Smith and Baker are the lucky owners. Four of the pups have since died; the rest of the dogs are well marked and of solid body color.

If Col. Ruppert, who is due May 11, brings over a crack dog it will more than likely be Donnybrook Fair, which is said to have a splendid head. He will, however, bring with him two bitches, one a half sister of Marvel and the other by the late Scottish Prince, which Col. Ruppert owned at the time of its death.

We hear that Mr. "Dan" Foster has refused $4,000 for his smooth-coat St. Bernard Leicester. Mr. Foster "wants" $5,000.

Fanciers of Dandie Dinmonts may be interested in hearing that old Ch. Tweedmouth is dead. During his career he won twenty-six firsts and six challenge prizes. His pedigree was of the finest, according to *Stock Keeper*, extending back to the dogs owned by James Davidson, of Hindlea, or Charlieshope (the original "Dandie Dinmont").

The Seminole Kennels have just had a taste of bad luck in losing their pug Kash, Jr., well known to show goers. He was killed by a St. Bernard.

Mr. Hughes writes that the weather is very cold in Rochester, but hopes it will warm up before a litter of mastiff puppies arrives that he is expecting this week. We hope that the coming litter will in part make up for the losses this kennel has incurred the last year, for we know it is Mr. Whitney's dearest wish to raise some pups from the exceptionally good stock he has in his kennels. Another piece of hard luck was the death of Princess, the dam of Melrose Prince. Princess was killed in a fight with some other bitches in the kennel. Mr. Whitney sails for Europe June 4.

We draw the attention of those interested in field trials to the announcement in our business columns of the United States Field Trial Derby to be run at Elizabethtown, Ky., for pointers and setters whelped on or after January 1, 1891. Each breed to run separately. The prizes in each division are $250, $200 and $150, the winner in each stake to compete for title of absolute winner and $200 additional. Entries close with Mr. P. T. Madison, lock box 4, Indianapolis, Ind., June 1. First forfeit $10, second $10, payable Sept. 1, and $10 to start.

The Bulldog Club of America will offer two of their handsome silver medals at the English Bulldog Club show on May 24, at the Royal Aquarium, London. One will go to the owner of the winner of first in the American class at that show and the other to the breeder of the dog winning that prize. Entries in the American class will be received up to Friday, May 13. It is probable that the English club will reciprocate by offering two of their medals at the next annual bulldog show, which every one knows is the Westminster Kennel Club show.

Mr. Geo. Jarvis will breed his pointer bitch Lass of Kent to the W. K. C.'s King of Kent on Friday next, afterward taking the boat on Saturday with nine good entries for the Lewiston show next week.

Mr. George S. Mott is now the superintendent of the Westminster Kennel Club, having taken Mr. Mortimer's position May 1.

The Greyhound Club's quarterly meeting announced for May 9, did not take place as there was not a quorum.

A few members of the Rochester Kennel Club met at Messrs. Fanning & Williams's office last Monday afternoon, intending to discuss the bench show to be held next fall. The meeting was adjourned till Saturday at 8 o'clock without any business being done. At present there is a conflict of dates between the Rochester and Hamilton clubs, and before either can hope to hold a successful show, this difficulty will have to be adjusted.

Mr. W. C. Reick has sold the St. Bernard, Marquis of Ripon, to Mr. Barry, Peabody, Mass. Marquis of Ripon was imported last year by Mr. Reick and is by Prince Regent out of Lady St. Gothard, and therefore a litter brother to Lady Gladwyn.

The new advertisements which we draw attention to this week are those of the Forest Beagle Kennels who have beagles for sale; John Feulner, English setter pups; George Smith, pointers; H. W. Page, a pointer bitch; C. E. Glass, English setter pups; F. C. Boles, St. Bernard pups; Rieth, a trained beagle; Room 449, Irish setter pups. In the stud: Tubby Hook Kennels' bull-terrier, Ch. Carney, and Herbert S. Bevan's English setter Whyte B. Attention is also drawn to the Hillside Kennels' special offer in their stud advertisement of noted fox-terriers.

Mr. Cyril Jackson, writing to the *Stock-Keeper*, complains that Rule XII. in the E. K. C. rules, which relates to the "warned off" people, is a dead letter as far as it prevents a disqualified exhibitor from competing at a show, because the secretaries of shows do not know who is on the black list. In this respect the A.K.C. is ahead, as a list of such members is forwarded by the secretary to clubs and the list is suspended on the walls of the club rooms.

W. O. Hughes Hughes wants to know if any St. Bernard breeder can give him any information as to who owns the St. Bernard Medor, the sire of Apollo, Sirius and Dignity. Medor was purchased in 1882 from Herr Ruchti, of Interlaken, by some English-speaking lady, and Mr. Hughes fancies she must have been an American. The only man in America who would be likely to know is Mr. K. E. Hopf, who is now in California, or possibly Mr. W. W. Tucker, who imported Apollo.

The Tubby Hook Kennels, of which Messrs. E. D. Hayes and C. F. R. Drake are the proprietors, are fast getting together a good kennel of bull-terriers with the well-known Carney at its head. Their fancy inclines rather to the light weights. They have two capital bitches by Chesset's Flyer that will be brought out in the fall or spring shows, and through Mr. Senn they have just imported a very well formed white bitch weighing only 8lbs., from a Birmingham (Eng.) breeder. Edgewood Fancy, that won so many prizes during the spring circuit has been bred this week to Gully the Great. The dogs will be kept at the new kennel at Lawrence, L. I., of which "Andy" McGregor is the manager. The above gentlemen have had some hard knocks in losing Chesset's Flyer and a litter brother of the mastiff, Beaufort's Black Prince, that was thought to be little, if any, inferior to that grand dog, but the right spirit is there and they are going into the fancy stronger than ever.

The Blue Grass Kennel Club have arranged with Mr. John Davidson to judge all sporting classes at their coming fall show, Aug. 31, Sept. 1-3. Mr. Geo. H. Hill will be the superintendent. The club has secured Tattersall's Pavilion, adjoining the State fair grounds, and as the fair will be in progress at the time a good attendance is assured. They had 465 entries at their inaugural show, and there is every reason to believe that the next show will pass the coveted 500 mark. Premium lists will be issued June 10. Mr. Roger Williams is the secretary.

TORONTO K. C. DOG SHOW.

PRIZE LIST.

MASTIFFS.—1st, J. Massey's Minting Minor.

ST. BERNARDS.—*Dogs:* 1st, J. S. Williams's Elector; 2d, Geo. Bell's Sir John. Very high com., W. M. Moore's Maxyino, A. J. Grover's Premier. *Bitches:* 1st, J. S. Williams's Bentah; 2d, W. Cooley's Sperlo; 3d, H. F. Gordon's Flo. Very high com., A. Trebilcock's Cora, H. Lyon's Jennie. *Puppies:* 1st, C. H. Howard's Safety; 2d, A. J. Grove's Premier; 3d, Miss Clara E. Shilton's Hero. High com., J. W. Isaac's Roscoe.

GREAT DANES.—1st, A. McL. Howard, Jr.'s Bismarck; 2d, D. Gordon's Captain. Com., S. Stewart's Don Cæsar, Jr., I. E. Robertson's Rocker.

GREYHOUNDS.—*Dogs:* 1st, F. L. Mabee's Fawr; 2d, R. Hulse's Common; 3d, F. Habart's Misterton. High com., E. R. Marks's Voltaire. Com., F. Habart's Blucher. *Bitches:* 1st, Hynes & Sheedy's Erminie; 2d, H. P. Thompson's Bed-of Stones; 3d, Campion Bros.' Nellie. Very high com., J. T. Fotheringham's Elsie II. Com., Campion Bros.' Princess Beatrice.—PUPPIES—*Dogs:* 1st, E. Alberti's Frank; 2d, R. Hulse's Ormond. *Bitches:* 1st, E. Alberti's Topsy.

FOXHOUNDS.—1st, F. Hobart's Banjo; 2d, H. E. Cooper's Bugle; 3d, F. Habart's Trueman.

HARRIERS.—1st, J. F. Scholes's Diplomen; 2d, R. Hulse's Dash.

POINTERS.—1st, J. G. Robertson's Hector; 2d, T. and J. Mackle's Shot.

ENGLISH SETTERS.—*Dogs:* 1st, C. S. MacDonald's Spot; 2d J. Kennedy's Jake; 3d, John Fogg's Chief. Very high com., R. A. Shutt's Ponto. *Bitches:* 1st, C. A. Stone's Forest Lou; 2d, Wm. Leach's Canadian Sport; 3d, C. A. Stone's Forest Gladys.

IRISH SETTERS.—*Dogs:* 1st, D. Bruson's Roany; 2d, B. F. Bull's Rex; 3d, J. Quinney's Flash. Very high com., S. McCurl's Moncreith. *Bitches:* 1st and special, Mr. McKea's Bella.

GORDON SETTERS.—1st, Miss E. Bethune's Jeff; 2d, W. Patterson's Victor.

COLLIES.—*Dogs:* 1st, Mrs. H. P. Harrison's Toronto Wonder; 2d, Capt. Harston's Driver II.; 3d, R. Brown's Bonnie Charlie. Very high com., Miss Helen Dick's Turk. High com., H. Robertson's Scottish Prince. *Bitches:* 1st, Mrs. H. P. Harrison's Nancy; 2d, Campion Brothers's Nellie; 3d, George Stephenson's Jennie. *Puppies:* 1st, A. Hastings's Flurry IV.; 2d, J. S. Williams's Ben Nevis.

BULL TERRIERS.—*Dogs:* 1st, J. Smellie's Siloric; 2d, Mr. Cureston's Dan; 3d, W. Fox's King. High com., J. Elder's Starlight. *Bitches:* 1st, H. Hammall's Vesper Belle.

POODLES.—1st and 3d, F. H. Elmore's Pretty and Flossie; 2d, Mrs. Dr. McFaul's Frost.

FIELD SPANIELS.—1st, Geo. Bell's Newton Abbott Farmer; 2d, P. J. Keating's Raven; 3d, Miss Maud H. Douglas's Billy. High com., Mr. Davidson's Sport.

COCKER SPANIELS.—BLACK—*Dogs:* 1st, L. Farewell's Black Brant; 2d, J. G. Mitchener's Dono; 3d, G. B. Sweetman's Tuck. *Bitches:* 1st, L. Farewell's Topsy; 2d, R. Hulse's Lobe. High com., I X L Kennels' Gyp. Com., E. R. Mark's Maid of Mist.—PUPPIES—*Dogs:* 1st, G. Bell's Fascination. *Bitches:* 1st, L. Farewell's Topsy; 2d, E. R. Marks Maid of Mist; 3d, P. J. Keating's Cassie. Very high com., Mrs. Fairclough's Tripp.—OTHER THAN BLACK—1st and 2d, Trebilcock & Rogers's Canadian Girl and Queen. Very high com., S. J. Giles's Northern.

DACHSHUNDS.—*Dogs:* 1st, J. F. Scholes's Duke; 2d, Miss M. Reid's Dock; 3d, G. T. Irwin's Pat. Very high com., Campion

Bros.'s Bismarck. *Bitches:* 1st, T. Blogg's Lena; 2d, J. C. Morgan's Queen Hilda; 3d, A. Douglas's Maybrook.

BEAGLES.—OVER 13IN.—*Dogs:* 1st, J. Smellie's Roscoe. *Bitches:* 1st, J. Smellie's Melody; 2d, Mr. Vasey's Beauty.—UNDER 13IN.—*Dogs:* 1st, J. H. Ames's Tramp; 2d, J. G. Mitchener's Guy. *Bitches:* Com., Campion Bros.'s Royal Queen.

FOX-TERRIERS.—*Dogs:* 1st, T. J. Fitzsimmons's Pewter; 2d, E. O. Bennett's Pepper; 3d, Mrs. A. L. Davidson's Robert Burns. Com., F. Emond's Pawnbroker. *Bitches:* 1st and high com., E. O. Bennett's Vic and Pacquettes; 2d, T. J. Armstrong's Flash; 3d, George Bell's Blemton Edelweis. Very high com., T. J. Fitzsimmons' Elora Tatters.—PUPPIES.—*Dogs:* 1st, T. J. Fitsimmons's Pewter; 2d, Fred Esmond's Pawnbroker; 3d, T. J. Armstrong's Baby. High com., D. Gordon's Jack. *Bitches:* 1st, E. Bennett's Vic 2d, C. M. Garrett's Arden John.

IRISH TERRIERS.—1st and 2d, P. Brown's Peggy and Blarney. *Puppies:* 1st, P. Brown's Blarney.

BEDLINGTON TERRIERS.—1st, W. Chalmers's Jumbo; 2d, W. Hugdon's Duke; 3d, W. Morris's Terry. Very high com., J. S. Gordon's Bed. High com., Mr. Mycott's Piper. Com., A. Trebilcock's Nellie.

SKYE TERRIERS.—1st, J. F. Scholes's Mack; 2d, Dr. Spencer's Friday.

YORKSHIRE TERRIERS.—1st, F. J. Dinnigan's Lady; 2d, G. P. MacDonald's Tatters; 3d, A. G. Thorley's.

PUGS.—*Dogs:* 1st, S. H. Thompson's Lord Baltimore; 2d, Fred Burgess's Jerry. *Bitches:* 1st, S. H. Thompson's Rustic Kitty; 2d, Mrs. Webster's Toppy.

KING CHARLES SPANIELS.—*Dogs:* 1st, A. Trebilcock's Royal Duke. *Bitches:* 1st, Trebilcock & Rogers's Tops; 2d, B. Davis's Ross; 3d, Trebilcock & Rogers's Ruby.

PRINCE CHARLES AND RUBY SPANIELS.—1st, A. Trebilcock's Romeo.

ITALIAN GREYHOUNDS.—1st, R. P. Forshaw's Dainty Lass.

MISCELLANEOUS.—OVER 30LBS.—1st, A. Trebilcock's Fritz (Pomeranian); 2d, B. Hulse's Belle.—UNDER 30LBS.—1st, W. J. Melling's Daisy; 2d, J. Foot's Jim.

SAN FRANCISCO DOG SHOW.

THE third annual dog show, under the auspices of the California Kennel Club, opened May 4 at the Wigwam, San Francisco, and during the afternoon and evening a fairly good attendance was present. English setters and greyhounds are not well represented though other sporting dogs show up well. The greyhounds on exhibition are a poor lot compared with the animals that are owned in San Francisco. Fox-terriers, contrary to expectation, judging from Los Angeles show, are not well represented. Judging by Mr. James Mortimer commenced at 1 P. M., and below is given the list of awards made the first day, which seem to have given general satisfaction.

PRIZE LIST.

MASTIFFS.—*Dogs:* 1st, 2d and 3d, Gavin McNabb's Irgleside Crown Prince, Lion and Duke. *Bitches:* 1st and 2d withheld; 3d, W. S. Whitewell's Vernist.

GREAT DANES.—*Dogs:* 1st, Dr. F. P. Muff's Hector; 2d, A. Wiermann's Jumbo; 3d, A. W. Schreiber's Cæsar II. *Bitches:* 1st, A. Johnson's Leda. *Puppies:* 1st, J. F. H. Wohler's Nora; 2d, C. Dresser's Bell; 3d, Louis Hirsh's Carlos.

ST. BERNARDS.—ROUGH-COATED—*Dogs:* 1st, F. H. Allen's California Alton; 2d, Capt. William Pool's Gillot; 3d, John Heffernan's Grand Chancellor. *Bitches:* 1st, E. P. Schell's Lady Gladys; 2d, G. S. Gracie's Victoria. *Puppies:* 1st, B Coryell's St. Elmo.—SMOOTH-COATED—3d, Dr. M. Regensberger's Lorls.

NEWFOUNDLANDS.—1st, R. B. Monk's Nero; 2d, M. J. Doolin's Prince; 3d, Dalton's Jack.

GREYHOUNDS.—*Dogs:* 1st, C. S. Wieland's Examiner; 2d, Mrs. H. M. Cracken's Donuard; 3d, C. S. Wieland's John W. *Bitches:* 1st and 2d, C. S. Wieland's Lady Emma and Lady Olga; 3d, H. McCracken's Bessie.—PUPPIES—*Dogs:* 3d, C. Wieland's Badge. *Bitches:* 1st, C. S. Wieland's Minnie.

DEERHOUNDS.—*Dogs:* 1st, Mrs. George Eggleson's Scott; 2d, N. A. Robinson's Nero; 3d, E. J. O'Kell's Stag. *Bitches:* 1st, Capt. Colin Salmond's Swift; 2d, N. A. Robinson's Queen.

AMERICAN FOXHOUNDS.—*Dogs:* 1st, F. W. Sanderson's Paddy; 2d, C. Roos's Carlo; 3d, R. D. Lacazette's Duke. *Bitches:* 1st, W. H. Staniel's Julie; 2d, John W. Bourdet's Princess. *Puppies:* 1st, Mrs. W. H. Staniel's Slot, Jr.

POINTERS.—CHALLENGE—55LBS. AND OVER.—1st, H. Huber's Duke of Vernon.—50LBS. AND OVER—*Bitches:* 1st, H. Huber's Sally Brass II.—OPEN—55LBS. AND OVER—*Dogs:* 1st, B. Power's Wade Hampton; 2d, Mrs. B. F. Napthaly's Pat P.; 3d, J. Coryell's Sir Fourth. Very high com., H. G. Burton's Billy, R. W. Bliven's Jack Robinson.—50LBS AND OVER—*Bitches:* 1st, H. G. Golchei's Verr; 2d, B. N. Dow's Queen Croxteth T.; 3d, J. B. Lewis's Gypsy Queen. Very high com., F. Merryfield's True M. CHALLENGE—UNDER 50LBS.—*Bitches:*—1st, A. B. Truman's Patti Croxteth.—OPEN—UNDER 55LBS.—*Dogs:* 1st, A. B. Truman's Kent of Bloomo; 2d, R. E. Wilson's Rap; 3d, J. R Anson's Fire. Very high com., B. W. Paxton's Croxteth T. *Bitches:* 1st, A. B. Truman's Meg Merrilies.—PUPPIES—*Dogs:* 1st, H. R. Brown's Duke, Jr.; 2d, H. J. Brand's Grand Duke; 3d, J. B. Lewis's Dick. Very high com., L. Carrigan's Tick. *Bitches:* 1st, T. L. Potter's Midget P; 2d, C. H. Harris's Dede; 3d, C. O. Brown's Betsy B. Very high com., T. Mahon's Lillie K.

CANADA AT THE WORLD'S FAIR.

IT is gratifying to know that the matter of the exhibit of Canadian dogs at the World's Fair in 1893, has been taken up by the Canadian government. No pains will be spared to get together a thoroughly representative lot of animals, and it is not too much to expet that from 400 to 500 dogs will be sent on from the Dominion.

The expense of shipping dogs to Chicago will be borne by the Dominion government, and as no entry fee will be charged, the humblest faucier who has a dog worth showing, will be able to send him on to swell what will undoubtedly be the largest and finest bench show ever held in the memory of man.

A Canadian superintendent will be appointed by the Canadian government to collect entries, arrange for shipments, and attend personally to the wants of Canadian exhibitors and their dogs at the show.

The Canadian Kennel Club has unanimously recommended Mr. A. D. Stewart, of Hamilton, Ont., for the position, and that gentleman has signified his willingness to accept it. A better choice could not have been made; Mr. Stewart is the right man in the right place, and Canadian breeders may now rest assured that their interests will be thoroughly looked after down to the minutest details.

INFLUENCE OF A PREVIOUS SIRE.

Editor Forest and Stream:

Breeders who have had experience by intent or bad luck, would expect a litter of "kyoodles" as the result of crossing pointers and Newfoundlands. But they would not find or expect anything but straight goods when the respective breeds were bred straight. The farmer drops his corn and never gets or looks for potatoes, so it is with the much talked of previous sire influence.

I have bred many bitches to various dogs, and in no instance was able to discover the influence of the previous sire. Beginners may rest assured that if by chance their high-cost, high-bred bitch makes an alliance with the rankest mongrel of a dog, no fear need be entertained as to the mongrel's influence on the next litter when the bitch is bred straight. I am assured by an old friend who is a careful observer and an honest man, that he was present when a bull-terrier bitch was mated to a bull-terrier dog, and scarcely five minutes afterward a pug dog accidentally gained access to her. When this bull-terrier bitch whelped, a certain number of pugs were born; they were delivered first, then followed a certain number of bull-terriers. The bull-terrier pups and pug pups were in all respects up to the average litters of their respective breeds. In this case the influence of a previous sire was not seen till after the pugs were born. LAW.

NEW YORK CITY.

KENNEL NOTES.

Kennel Notes are inserted without charge; and blanks (furnished free) will be sent to any address.

NAMES CLAIMED.

☞ **Prepared Blanks sent free on application.**

Bell Bondhu. By T.W. Stoutenburgh, Des Moines, Ia., for black and white English setter bitch, by Dick Bondhu out of Cosette.

Corpsicoolias. By T. W. Stoutenburgh, Des Moines, Ia., for English setter dog, whelped April 14, 1892, by Toledo Blade out of Bell S.

The Bard of Al De Ber. By B. A. Smith, North Attleboro, Mass., for sable and white points collie dog, whelped Jan. 4, 1892, by Archie L. (Roderick of Ruthven—Airedale Duchess) out of Petunia (Cremorne—Barby Rose).

BRED.

☞ **Prepared Blanks sent free on application.**

Lady Lee—Storm. Forest Beagle Kennels' (Lynn, Mass.) beagle bitch Lady Lee (Fitz Hugh Lee—Reed's Nell) to Somerset Kennels's champion Storm (Lee—Countess), April 15.

Princess Bendigo—Clito Rex. B. A. Smith's (North Attleboro, Mass.) collie bitch Princess Bendigo (Barck—Topsa) to Cocasset Kennels' Clito Rex (Strephon or Rex—Mavis), May 1.

Lass of Kippen—Pontiac. G. W. Lovell's (Middleboro, Mass.) pointer bitch Lass of Kippen (Naso of Kippen—Juno II.) to his Pontiac (Milton's Bang II.—Climax), April 18.

Dixie—Pard. D. S Seymour's (Hartford, Conn.) pointer bitch Dixie (imported Brown Stout—Clytie P.) to A. C. Collins's Pard (imported Bob—Flyshot), Feb. 11.

Lady Nsruf—King of Kent. W. H. Judd's (Ypsilanti, Mich.) pointer bitch Lady Naruf (Wonderful Lord—Devonshire Kit) to Westminster Kennel Club's King of Kent (Priam—Kent Baby), April 26.

Topsy S.—Tony Weller. National Beagle Kennels' (Waltham, Mass.) beagle bitch Topsy S. (champion Frank Forest—Juno II.) to W. H. Child's Tony Weller, March 19.

Virginia M.—Fitzhugh Lee. National Beagle Kennels' (Waltham, Mass.) beagle bitch Virginia M. (Diamond Forest—Topsy S.) to Glenrose Kennels' champion Fitzhugh Lee) March 5.

East Lake Virgie—Grif. Eberhart Pug Kennels' (Cincinnati, O.) pug bitch East Lake Virgie (champion Bradford Ruby—Puss B.) to their Grif (Eberhart's Cashier—Flossy II.), May 8.

Lalla Rookh—Bradford Ruby II. Eberhart Pug Kennels' (Cincinnati, O.) pug bitch Lalla Rookh (Lee—Dimple) to their Bradford Ruby II. (champion Bradford Ruby—Puss B.), May 7.

WHELPS.

☞ **Prepared Blanks sent free on application.**

Dutch Graphic. Leamington Kennels' (Leamington, Canada) pointer bitch Dutch Graphic (Young Graphic—Lassie Foust), May 5, twelve (six dogs), by J. R. Daniels's Bipp III.

Dixie. D. S. Seymour's (Hartford, Conn.) pointer bitch Dixie (imported Brown Stout—Clytie P.), April 18, seven (six dogs), by A. C. Collins's Pard (imported Bob—Flyshot).

SALES.

☞ **Prepared Blanks sent free on application.**

Morey Teddy. Fox-terrier dog, by Morey Kennels, Fairfield, Conn., to W. J. Nes, Pittsburgh, Pa.

Blemton Rapture. Fox-terrier, by Morey Kennels, Fairfield, Conn., to J. B. Martin, San Francisco, Cal.

Warren Silby. Fox-terrier, by Morey Kennels, Fairfield, Conn., to Wilton Kennels, New York city.

Morey Desire. Fox-terrier, by Morey Kennels, Fairfield, Conn., to M. Hilgert, St. Joseph, Mo.

Oriole Baccarat. Fox terrier, by Morey Kennels, Fairfield, Conn., to Mr. ——, Syracuse, N. Y.

Al De Ber. Sable with white points collie dog, whelped Jan. 2 1890, by Stewart's Roy out of Bonnie Kate, by B. A. Smith, North Attleboro, Mass., to E. W. Parker, Lynn, Mass.

Princess Bendigo. Black, tan and white collie bitch, whelped Feb. 9, 1891, by Barck out of Topsa, by B. A. Smith, North Attleboro, Mass., to E F. Pfaff, Boston, Mass.

Answered by mail.—J. G. S., Auburn, N. Y; B. A. S., North Attleboro, Mass.

A. K., Carlton, Ore.—Consult our advertising columns for fox-hound breeders.

J. H. M., Harrisburg, Pa.—You can show your dog whether you have his pedigree or not, by "listing" him at the Kennel Club offices, 44 Broadway, New York city, fee 25 cents. The measurements and weight you give are only moderate; he should weigh 150lbs. and stand over 30in. The dog is small and too long-faced.

SUBSCRIBER, Gainesville, Ala.—My pointer is troubled with sores on his ears; they are on outside and inside, extending about an inch from the edge; they dry up and return in some places; there is considerable discharge of pus. The same kind of sores have appeared on head between the ears. Ans. Apply oxide of zinc ointment after washing carefully with warm water and castile soap. Pay particular attention to food; let it be nutritious without heating the system.

G. D. B. D., Philadelphia, Pa.—Last February I had two fox-terriers that were due to whelp about the 15th. About two weeks before they were due the fence in their run was painted with a pure linseed oil paint (no turpentine). The kennels are raised about a foot or fourteen inches from the ground, so that the dogs have to jump slightly in going in and out. When they whelped both bitches gave birth to dead puppies. Do you think either of these could have been the cause of the pups being born dead? Ans. It is never advisable to put brood bitches in a kennel where they must jump at all to get to their beds. This very likely was the cause of the dead pups. In future place the bed on the floor, so that the bitch does not require to exert herself to get in.

S. D.—Two of my dogs have sores on their ears or head, causing them to shake their head. A dark wax or fluid runs from the ear. I have kept them washed out and they seem to improve and then get worse again. Will I treat for canker of ear? Ans. Yes. Wash carefully with warm water and castile soap, drying the ear thoroughly afterward. Then inject the following two or three times a day:

Acid carbolic	3ss.
Zinci sulph	3j.
Sod biborat	3j.
Glycerine	3ij.
Aquæ	ad 3vj.

Wash before every application, and feed nourishing foods and give plenty of exercise.

B. A. S., North Attleboro, Mass.—Please give me the breeding for three generations with register numbers, if any, of the following collie: (1) Minnie Garfield (2,720), (2) grand parents on paternal side of Lady Shep II. (4,023), Home Nellie (7,402), also if she is the same dog I had reference to in my letter in last issue? Ans. 1. Minnie Garfield (A.K.R. 2720), by Garfield (A.K.R. 1571 out of Lady Orient (A.K.R. 1746), by unknown sire out of imported Fangs. Garfield by Rex (A.K.R. 149) out of Gather, imported by Mr. Lindsay, April 3, 1879; Rex was bred by Dr. Jas. Kirkby Lonedale, Westmoreland, England. 2. We cannot trace Lady Shep's sire, Jobson's Tweed, imported 1869. 3. Home Nellie (A.K.C.S.B. 7,402), by Ben Nevis (A.K.C.S.B. 4,348, Vol. III) out of Sans Souci (A.K.C.S.B. 4,719, Vol. III.), by Woodlark (E. 11,891) out of Toco, by champion Yarrow out of Peg Woodlark by champion Highlander out of champion Helen McGregor; Ben Nevis, by Eclipse (E. 12,949) out of Meta, by Lord Elcho (E. 10,707) out of Maggie; Eclipse by Bissel's Charlemagne (E. 10,69.) out of Flirt (litter sister to Charlemagne). This dog (Home Nellie) is not the dog you had reference to in your previous letter, as she was whelped May 11, 1887.

If FOREST AND STREAM continues to grow it will soon be a weekly book instead of a journal. The issue of last Thursday consisted of 36 pages of well arranged and interesting matter.—*New Albany* (Ind.) *Ledger.*

NAMES AND PORTRAITS OF BIRDS, by Gurdon Trumbull. A book particularly interesting to gunners, for by its use they can identify without question all the American game birds which they may kill. Cloth, 220 pages, price $2.50. For sale by FOREST AND STREAM.

THE MARINE AND FIELD CLUB REGATTA.

THE fourth annual regatta of the Marine and Field Club, of Bath Beach, on June 18, promises to be the important event of the early season about New York, bringing out a larger field of entries than any of the regular canoe club regattas. The programme is as follows:

Morning.—1. Senior sailing, 4½ miles. 2. "War" canoe paddling, 1 mile.

Afternoon.—3. Club "representative," one man from each club, 4½ miles. 4. Marine and Field Cup, 4½ miles. 5, Canoe gymnastics, or hurry scurry.

Morning.—First race called at 10:30 o'clock. Afternoon at 2 o'clock.

All sailing races will be around a triangle marked by flag buoys, and will be sailed under the rules of the A. C. A. The first gun will be fired five minutes before the start. Second gun, one minute before. Start at the third gun.

The paddling race will be started by the word.

No. 2. No limit to length or crew. Individual prizes will be given to the winning crew.

No. 3. Club race. Entries limited to one man from each club who shall represent his club, and who shall reside within twenty-five miles of New York.

No. 4. The Marine and Field Club challenge cup, won in 1891 by Mr. D. S. Goddard, of Lowell, Mass., becomes the property of the winner when won twice in succession.

Entries must be made with the regatta committee not later than Saturday, June 11.

W. S. ELLIOTT, Chairman,
107 Hudson street, New York.
W. T. WINTRINGHAM,
H. C. WARD.

THE A. C. A. FLAG.

Editor Forest and Stream:

The A. C. A. signal as prescribed was derived from the signal of a certain canoe club.

The A. C. A. members disregard the proportions of the device, I apprehend, because the narrow white stripe prescribed would make the white field too small to contain (A. C. A.) initials of appropriate size. The A. C. A. certificate of membership bears the design complained of in the FOREST AND STREAM (April 1) but the design has evidently become popular on its merits by reason of its superiority to the signal prescribed by the rules.

The A. C. A. should acknowledge this reform by amendment. The rules would accordingly prescribe the white longitudinal stripe to be of a width equal to one-third or one-fourth the flag hoist.

Periods of abbreviation for initial letters in flags, signals or pennants do not seem to be required. RED WING, A. C. A.

April 27.

[From 1880 until 1887 the A. C. A. flag was made according to the regulation size without any complaint of insufficient width for the letters, and hundreds of these flags are in use now. The change which we pointed out came about through mere carelessness, but if not corrected will result in serious confusion. Many members at make use of the regulation flag, and it would be unjust to them to replace it by a new standard merely because some choose to disregard entirely the printed rules of the Association.]

PRIZE FLAGS.

Editor Forest and Stream:

The regatta committee of the American Canoe Association begs to acknowledge receipt of contributions or promises of contributions, for prize flags, as follows, and to cordially thank the respective clubs and members:

Holyoke C. C.	$5	
Brooklyn C. C.	5	
Shuh Shuh Gah C. C.	5	
Vesper B. C.	5	
Owanux C. C.	5	Prize flags.
Dr. Sidney Bishop	..	2
C. V. Winne	..	5
Previously acknowledged (cash)	40	..
Previously acknowledged (flags)	..	1
Totals	$65	8

R. W. GIBSON, Chairman.

VESPER B. C.

WEDNESDAY evening, May 4, witnessed one of the largest gatherings of members of the Vesper Boat Club of Lowell, Mass., that has occured in its history. There were also a large number of former members present. They were brought together by an announcement that there would be a smoke talk on the evening mentioned with sundry attractive features. The principal of those features consisted of about 90 stereopticon slides, made from negatives by sundry members of the club, thrown on the screen and described by President Butler. During the last eight or ten years it has been the custom of the canoeing men of the club to transport canoes to the headwaters of many of the small streams in this vicinity, and cruise down stream in company. Seldom if ever has such cruise been made when there was not one or more amateur photographers in the company. Accordingly, President Butler was able to obtain a complete pictorial memoranda of such events. The pictures included pretty bits of scenery, groups of the canoeists at luneh, rapid running, capsizes, and scores of interesting incidents of the occasion which have been preserved. There were views also of the sailing contingent, covering the last eight years, showing in the most interesting way the development of boat and rig in that time; reminiscenes of the meet held at Winn's Bluff, on the Merrimack, in 1885, in which the A. C. A. officers co-operated with the Vesper club, and where Dr. Neide gave the first impulse to local interest in the Association; scenes from the Eastern Division meets at Tyng's Pond, in 1890 and 1891; selections from Vesper camps and Vesper men in the races, at various meets of the Association, including Lake George, Lake Champlain and the St. Lawrence, as well as many memorable and enjoyable events at Calla Shasta on the Connecticut, races of the Field and Marine Club at Gravesend Bay, etc. The very rafters of the boat house vibrated with peals of laughter and applause as well remembered incidents of mishap and achievement were again brought to view. Then followed refreshments, and this was the bill of fare: A sheet-iron pan about 3ft. square, of macaroni, prepared with cheese and cream, nicely browned, forming the *piece de resistance;* fried sausages, ham and chicken sandwiches, olives, pilot bread and other crackers. Coffee was provided and beer by individuals. On this occasion also the qualities of a new piano were exhibited. The instrument was purchased from contributions of about $350, subscribed spontaneously for that purpose, at the last meeting of the club. Included in this fund were a large number of checks for $5 and 10 from men who formerly were members, a significant indication of the good will the club enjoys among those who have removed from the city or who feel themselves to have outgrown the sports to which it is devoted. The piano gave general satisfaction. A coterie of musically gifted members of the club

rendered an original version of "Ta-ra-ra-boom-de-ay," and a German burlesque drinking song. One of the boys, too, who enjoys the unique confidence, of the Chinese residents of the city, brought out a quartette of Celestial musicians, with the queerest of instruments and still more curious melodies The fun was kept up until midnight. A field meeting in June is the next event for which plans are being made.

CANOE NEWS NOTES.

We have received from Mr. F. Joyner, formerly of Glens Falls and now of Scehnectady, N. Y., a neat and attractive catalogue of canoes, pleasure boats, steam and naphtha launches. Mr. Joyner is well known to canoeists through his famous Pecowsic as well as many later canoes, while his rowboats and small sailing craft are equally noted. All the canoes and boats are built with the "ship lap," making a very smooth, tight and durable joint. Among the novelties in the catalogue which will specially interest canoeists are an ice-canoe, a miniature ice-yacht for two persons, fitted for any canoe sails, and a plate centerboard using a very low watertight trunk. The quality of Mr. Joyner's work in all styles of boats is too widely known to need special mention.

The Toronto C. C. has ordered from the Gorham Mfg. Co., of New York, a very handsome silver trophy costing $300, to be called the Toronto C. C. International Paddling Trophy. It will be raced for each year on Toronto Bay, being held by the winner until the next race. The conditions will shortly be published. The first race will probably be on July 9

At the annual meeting of the Peoria C. C. the following officers were elected: Com , H. C. Morse; Vice-Com., F. C. Howe; Purser, C. D. Suib; Ex. Com., T. Pearson, C. C. Green.

A. C. A Membership —Eastern Division: Charles E. Cartwright, Boston, Mass ; Albert H. Crosby, Hartford, Conn.; C. E. Goulding, Lowell, Mass. Northern Division; L. McI. Spackman, Montreal.

The new Taunton Boat Club, of Taunton, Mass., has a membership of 50, and will build a suitable house. Some of the members are canoeists.

Mr. L. B. Palmer, of the Ianthe C. C., will probably do no racing this year, and his canoe Cricket is offered for sale on another page.

Yachting.

SAILING LENGTH.

Sailing length, commonly called "corrected length," is obtained by adding together the length on waterline and the square root of the sail area, and dividing the sum by 2, the result being in lineal feet. In this method of measurement, adopted by the Seawanhaka Corinthian Y. C. in 1884, and since known as the "Seawanhaka rule," the sail area is measured from the spars, club topsails not being included. The principal clubs now using the Seawanhaka rule are the Seawanhaka Corinthian, New York, Larchmont, Atlantic, Eastern, Beverly, Hull, Massachusetts, Philadelphia, Riverside, American, Knickerbocker, Royal Canadian, Royal Hamilton, Queen City, Oswego, Rochester, Marine and Field, Corinthian of New York, Marblehead, Philadelphia, and Corinthian Navy and Corinthian Mosquito Fleet. The full details of the rule were published in the FOREST AND STREAM of Feb. 25, 1892.

RATING

The rating of a yacht is obtained by multiplying the length on waterline by the sail area, and dividing the product by the constant number 6,000, the result being a measurement in cubical units approximating to the old Thames tonnage. In this method of measurement, adopted by the Yacht Racing Association in 1887, the sail area is calculated from the drawing of the sail plan, such topsails, working, sprit or club, as are carried being included in the measurement. The established rating classes and the varying proportions of length and sail found in practice, are as follows:

½-rating.....16ft. l.w.l.×188 sq. ft. sail to 17ft. l.w.l.×178 sq. ft. sail.
1-rating.....18ft. l.w.l.×323 sq. ft. sail to 20ft. l.w.l.×300 sq. ft. sail.
2½-rating.....25ft. l.w.l.×600 sq. ft. sail to 28ft. l.w.l.×536 sq. ft. sail.
5-rating.....28ft. l.w.l.×1071-q ft. sail to 33ft. l.w.l.×909 sq. ft. sail.
10-rating.....34ft. l.w.l.×1765sq ft. sail to 36ft. l.w.l.×1666sq. ft. sail.
20-rating.....45.5 l.w.l.×2637-q. ft. sail to 46.5 l.w.l.×2580sq ft. sail.
40-rating.....59ft. l.w.l.×4067sq ft.
60-rating.....64ft. l.w.l.×5625sq. ft. sail to 68ft. l.w.l.×5294sq. ft. sail.

The rating rule is used exclusively in Great Britain, but is used in America by only one club, the Royal Nova Scotia Yacht Squadron, of Halifax, N. S.

CLASSIFICATION.

In America yachts are classed by some clubs by their waterline lengths alone; in others by their sailing length.

In Great Britain all yachts are classed by their rating, and not by waterline.

30. Douglaston, Opening, Little Neck Bay.

The old fleet of wooden side-wheelers with beam engines that has held its place for so many years on Long Island Sound is rapidly disappearing; iron and steel hulls are already quite common, and of ate the triple-expansion engine and screw have invaded the waters so long sacred to the river boat type of machinery, with a result which can easily be foretold. Just now there is a strong rivalry between the new steel screw boats lately added to the Sound fleet and the more modern side-wheelers; and passengers between New York and Boston are treated at times to a keen bit of racing.

The latest addition to the fleet, launched on April 28, is notable from the fact that she is the first of the class turned out by a yacht designer, her design and construction being the work of Mr. A. Cary Smith, of New York. The vessel is the Richard Peck, owned by the New Haven Steamboat Co. and intended to run between New York and New Haven. The hull is of steel, 300ft. l.w.l., 316ft. over all, 48ft. beam, 62ft. over guards. She is a twin screw craft, with two sets of triple expansion engines of 4,000 H.P. driving two screws 10ft. 6in. diameter.

This class of vessel is entirely outside of Mr. Smith's practice, and he undertook the work of the solicitation of Mr. C. W. Chapin, one of the owners of the line, for whom he has at various times designed the very successful schooner yachts Whim, Iroquois and Yampa. As the result at his observations of existing steamboats prior to beginning the design, Mr. Smith has departed entirely from the conventional builder's model, and turned out a thoroughly original design. The "hollow ground" bow that is considered so essential to speed has been entirely abandoned, and in spite of the vast difference in size and proportion, the design is harmony with the general practice of the leading yacht designers.

The bow shows a moderate hollow, the forefoot being well rounded off, the midship section is full, but with no hard bilge, there is no straight-of-breadth, but at the same time the fulness of the ends is merged easily into the middle body. The run is very clean, but with no marked hollow in the lines, as distinguished from the short, full middle body with long hollow ends, or the long straight-of-breadth amidship with shorter but equally sharp ends, the new model approaches nearer to the full spindle, or cigar form, the diagonals and section lines being convex and giving a good fore and aft distribution of the large displacement.

The construction has been very carefully planned, with a web frame at every station in the engine space, and at every alternate station throughout the rest of the vessel. The floor construction is specially strong, with a complete system of side keelsons. The superstructure of the vessel will be handsomely finished, the dining hall being on the upper deck, lighted by large windows, a vast improvement over the hot and uncomfortable saloon in the hold that is found in all Sound steamers.

The engines and boilers were designed and built by Messrs. Harlan & Hollingsworth, of Wilmington, builders of the hull; who have kept up to their high standard of work throughout. Though the largest firm of steamboat builders in the country, they are well known to yachtsmen through the Iroquois, Sea Fox, Priscilla, Yampa, Alva, Almy, Alicia, Susquehanna and other yachts built by them. The new steamer will be in commission in about three months, and her performance will be watched with interest by yachtsmen as well as steamboat men.

One of the most astounding items of news which has appeared for a long time in a New York paper is to the effect that the new Wasp recently capsized off the Herreshoff shops while in charge of Captain Barr. It is hardly necessary to say that 46-footers with over 20 tons of lead under them can no more capsize than they can fly, the real culprit being the new Herreshoff centerboard, 21ft. l.w.l., 9ft. beam and with no ballast, which turned over a couple of weeks since just as she was getting under way. Something went wrong with her jib, the yacht took a sheer and ran on one of Wasp's mooring lines, and Mr. Nat Herreshoff. Captain Barr, and two or three of Wasp's crew, who were on board the small boat, all took a swim.

Another interesting item of news is to the effect that Meteor (late Thistle) will have a hollow jib boom and white topmast and gaff, in order to increase her speed. The idea was quite prevalent in New York and Boston about five years since that a white yacht was faster than a black one, but painting the spars white is a new discovery.

The passengers on the North and East River ferries between 5 and 6 P. M. of April 27 were treated to a fine view of the new Wasp, on her way from Bristol, R. I., to Hyde Park, well up the Hudson, Mr. Rogers's home. She made a very pretty picture as she reached up the river with the sun on her new sails. She left Newport on April 26, with Mr. Rogers on board and Captain Charles Barr in command.

The latest proposal for a renewal of international racing comes from Mr. David Banks, the spirited commodore of the Atlantic Y. C., in the form of a proposed challenge cup for 46ft. yachts, presumably to include the 20-rating class of the British Yacht Racing Association. It is proposed to establish a cup on fair and liberal terms, open to yachts of all nations.

YACHT NEWS NOTES.

Gladys, steam yacht, P. M. Stewart, New York, was wrecked off Lake Worth Inlet, Fla., on May 4, while bound from Jacksonville to Cuba, all hands being saved.

Mariquita, cutter, has been sold by August Belmont to Henry Lippitt, of Providence, R. I.

Golden Fleece, steam yacht, has been chartered for the season by the estate of her late owner, F. P. Osborn, to Perry Belmont, and will take up moorings at Newport

Peri, sloop, has been sold by Gouverneur Kortright to Col. C. McK. Loeser.

Comet, schr., W. H. Langley, was launched at Poillon's on May 7 after lengthening and re building.

Queen Mab, cutter, the new centerboard 40-rater designed by Mr. Watson, was launched last week at D. & W. Henderson's yard on the Clyde. She bears the name carried by the noted 10-tonner and later by the 2½ rater belonging to her owner, T. C. B. West,

Nautilus, cutter, has been sold by J. Roger Maxwell to Com. W. D. Dickey, Marine and Field Club.

Cosette, steam yacht, formerly Marina, has been sold by C. C. Worthington to F. L. Osgood, Norwich, Conn., for $13,500.

Seneca, steam yacht, has been sold through Hughes's Agency to A. B. Claflin, of New York.

Viking, steam yacht, has been sold by R. H. White to a New York yachtsman.

El Chico. This name has been given to the new Herreshoff fin keel owned by H. Maitland Kersey, of New York.

Pixie, keel sloop, Oswald Sanderson, built by Wood Bros. from a design by Mr. Gardner, was launched two weeks since at City Island.

Freyja.—This name has been given to the centerboard yacht built a year ago by Wintringham and lately sold to T. W. Davis, of New York.

Silvia, steam yacht, built at Salem for Dr. C. G. Weld, has been launched and tried.

Iderim, cutter, the 46-footer built last year for Cornelius Vanderbilt, has just been coppered at Lawley's and will be in commission this year.

Yampa, schr., C. W. Chapin, is fitting out after two years of idleness at Teb o'r, with Capt. J. W. Eldridge still in command.

Admiral, steam yacht, designed by the late D. J. Lawlor, and built for R. W. Comstock, of Providenee, was launched on April 28.

Marguerite, schr., R. S. Palmer, has completed her alterations at Lawley's and will sail this week for New York.

Vision, sloop, was recently offered at auction in New York, being bid in at $1 000.

Reaper.—There is a suggestion of gathered seaweed in the name Reaper just given to the fin keel launched at Herreshoff's last week for H. P. Benson, of Boston.

Gorilla, c.b. cutter, built for R. P. Carroll, and recently owned by Wm. Kent, has been sold to Odin B. Roberts, of Boston, and reached that place last week.

Oriva, cutter, has been sold by G. L. Ronalds to Herman Clarke for $3,500.

Cruising.—Utowana, steam yacht, W. W. Durant, was at Pera, Turkey, when last reported.... Alva, steam yacht, W. K. Vanderbilt, was at Havre, France, last week.... Reva, steam yacht, Pierre Lorillard, was at Charleston, S. C., on May 3, from Florida to New York. .... Golden Rod, steam yacht, A. Watt, and Alert, schr., J. N. Luning, were at Bermuda on May 5.... Sanibel, steam yacht, Rutherford Stuyvesant, sailed from Beaufort, N. C., for New York on May 5.

A number of rumors have been afloat this winter concerning the American yachts in foreign waters, the latest to the effect that the steam yacht Sultana, Mr. Trenor L. Park, was lost, being cabled over while the yacht was safe in port at Southampton. Mr. Park has lately returned to New York, and the yacht will follow as soon as repairs are completed. Sultana has made a long cruise since she left New York in October, 1890, the past winter having been spent in the Mediterranean. It is reported that she will have new canvas from Lapthorne & Ratsey, and will make the passage to New York mainly under sail.

The new Corinthian Y. C. of Philadelphia opened its house at Essington on April 30, a large number of members being present. Comm. E. R. Coleman, schr. Norma, offered his resignation, as he did not intend to fit out this season, and the following officers were consequently elected: Com., Ogden D. Wilkinson, schr. Speranza; Vice-Com., Molton H. Forrest, M D , steam yacht Silva; Rear Com., W. Barklie Henry, cut. Narina. The schooner Telfer has been purchased from Stephen A. Cooper, of New York, by Wm. A. Parry, a member of the club, and the keel sloop Roamer has been purchased from Com. Connolly, of the Corinthian Navy, by Harry Boyer, another member.

Pappoose, cutter, recently purchased by Mr. John T. Mott, of Oswego, lately made the trip from that port to Detroit, encountering some winter weather by the way. She sailed from Detroit on April 20, lying at Bar Point all night, getting under way at 1:45 P. M. and reaching the Welland Canal, 226 miles, at 9 P. M. on April 22 She entered Lake Ontario from the canal at 5:30 P. M. on Saturday, running across the lake with a very cold northeast gale blowing, making ice on the decks and rigging. The run of 156 miles was made in twenty hours.

The Winchester Arms Company are now making the carriages of the Lavinge yacht cannon of teak as well as mahogany. They report a large and increasing sale of this standard cannon, which is made of all sizes, from 50m. down to the canoe size.

We have received from the secretary, Mr. Dixon Kemp, the yearbook of the Yacht Racing Association for 1892, containing the rules, lists of officers, members and yachts, and minutes of meetings.

The Rochester Y. C. has issued a very neat pamphlet containing a list of its officers and yachts and the full programme of the season's events. The fleet includes 29 sailing and 7 steam and naphtha yachts, among the former being Cinderella, Choctaw and Madge. The season will open on May 28 with a cruising race to Great Sodus Bay, three classes, with two pennants as prizes in each class. On June 9 the squadron review will take place, on June 16 there will be a sail for the ladies, followed by dancing, and on June 23 will take place the club race, for 4 classes. The annual cruise will be to Oak Orchard on July 2, a cruising race, and on July 21 the L. Y. R. A. regatta will be held off Ontario Beach (Charlotte); Aug. 11 and Sept. 15 will be ladies' days, the latter being also the final squadron review, and on Sept. 3 there will be a cruising race to Presque Isle Bay, for four classes. The Madge cup, won by Madge in 1888, Velnette in 1890, and retained by Velnette through a tie with Amelia and Romola in 1891, will be awarded to the yacht making the best record during the season's club races and cruises. The club now has a fine house at Charlotte and handsome quarters in Rochester, and it starts the present season with better prospects than ever in the past. The officers are: Com., Matthew Cartwright; Vice-Com., E. N. Walbridge; Capt., J. George Cramer; Sec'y, Thomas B. Pritchard; Cor. Sec'y, F. G. Newell; Treas., William H Briggs; Meas., James Pillow: Fleet Surgeon, Dr. F. H. Sawers. Regatta Committee: R. G. Saunders, Chairman, George W. Browne, Thomas B. Pritchard, J. E. Burroughs, Charles S. Davis, Henry Willis and George H. Clark.

Breeze, schooner, formerly owned by the late Lawrence Barnett, has been sold to J. J. McKinnon, of South Boston, for use as a party boat, and Mr. McKinnon has sold the schooner Kittie to Gore Bros.

Melissa, steam yacht, built by Lawley last year for C. S. Eaton from a design by Mr. Burgess, has been sold to W. H. Crane.

The Marine and Field Club has already issued the programme for its yacht regatta on June 11, which will be open to all sloops, cutters, yawls and cabin catboats in the classes named below, enrolled in the New York, Seawanhaka, Larchmont, New Rochelle, Corinthian of New York, Knickerbocker, Riverside, Brooklyn, Corinthian of Marblehead and Eastern clubs. The classification is as follows, the length being load waterline: Class 1, over 46ft. and not over 54ft.; class 2, over 40ft. and not over 46ft.; class 3 over 35ft. and not over 40ft.; class 4, over 30ft. and not over 35ft.; class 5, over 25ft. and not over 30 ft.; class 6, those 25ft. and under, including the 25ft. S. C. class, and class 7, cabin catboats. The prizes in cash will be as follows: Class No. 1, $10 ; class No. 2, $150, and if four or more start a second of $50; class No. 3, $75; class No: 4, $75; class No. 5, $50; class No. 6, $75, and if four or more start a second of $25, and class No. 7, $40. The courses will be first, from stakeboats anchored off the club grounds, Bath Beach, to buoy No. 14, near Southwest Spit; thence to buoy No. 12 and north of the bell buoy, off the point of the Hook, to Sandy Hook Lightship, turning it from north to east and return the same way; course No. 2 the same, the outer mark being the Scotland Lightship; course No. 3 the same, but going only to the bell buoy off the point of the Hook. The longer course is for classes 1 and 2, the Scotland Lightship course for classes 3 and 4 and the shortest for classes 5, 6 and 7.

The Larchmont Y. C. will open the season with the usual ceremonies on May 21, and on May 30 there will be a race for the 25ft. s. l. class. The house of the Hull Y. C. will open on May 14, and will afford every convenience for members, including a good restaurant. The Atlantic Y. C. house, at Bay Ridge, will be open on May 16, but the regular season will not begin until May 30, after which date a *table d'hote* dinner will be served every afternoon.

The St. Lawrence Skiff Sailing Association has elected the following officers: Com., H. S. Wiser, Prescott; Vice-Com., S. G. Averill, Ogdensburg, N. Y.; Sec'y, A. R. Forte, Ogdensburg; Purser, Frank Jones, Gananoque. Executive Committee: R. W. Travers, Brockville; J. Ormiston, Gananoque; C. F. Lyon, Ogdensburg; W. J. White, Montreal; J. G. Fraser, Clayton, N. Y.; H. C. Haldane, Prescott, and K. A. Cameron, Kingston. The association appointed a committee to fix upon a uniform style of skiff for amateur rowing, and will add this branch of sport. It is likely that some of the St. Lawrence skiffs will visit Toronto this year.

Still another 21-footer is building for Boston, by Partelow & Co., of Marblehead. She will be 25ft. 6in. over all, 20ft. 9in. l.w.l., 10ft. beam, 2ft. 6in. draft, with an iron keel of 1,700lbs. and a dipper board of ⅜in. steel plate, weighing 833lbs. The mast is 32ft., deck to truck, boom 33ft., gaff 18ft. and bowsprit 18ft., with 23ft. hoist of mainsail.

Mr. Vanueusen, of Philadelphia, has nearly completed a very handsome little sailing boat, designed for himself by Dr. W. W. Hollingworth, of the Atlantic Corinthian Fleet. The boat is designed for racing under the various local rules, and is thus limited to 15ft. length over all, 11ft. 6in. length of keel, measured between scarph of stem and sternpost, and 108sq ft. of sail. Under the rules extra sail may be carried, but all above 108ft. is taxed. The boat is 14ft. 11in. over all, 12ft. 11in. l.w.l., 5ft. 2in. extreme beam, 4ft. 9in. beam at waterline, 10½in. draft, 15½in. freeboard at stem and 12in. at stern. She has a round stem overhanging the waterline, and a very neat counter; the midship section is fair and easy, with good bearings, and all of the fore and aft lines are round, but very clean, the bow having no hollow. One sail is used. The centerboard will be of steel, 4ft. 10in. long. The boat is half decked, with a cockpit 5ft.x3ft. 4in. The timbers are of steamed oak, ½x⅝in., with half inch smooth planking and a deck of white pine and California redwood ⅛x⅞in. The builder has turned out a very neat and fair job.

The entries thus far for the Corinthian Sweepstakes at Newport in August are Wasp, Harpoon, Gloriana and Alborak.

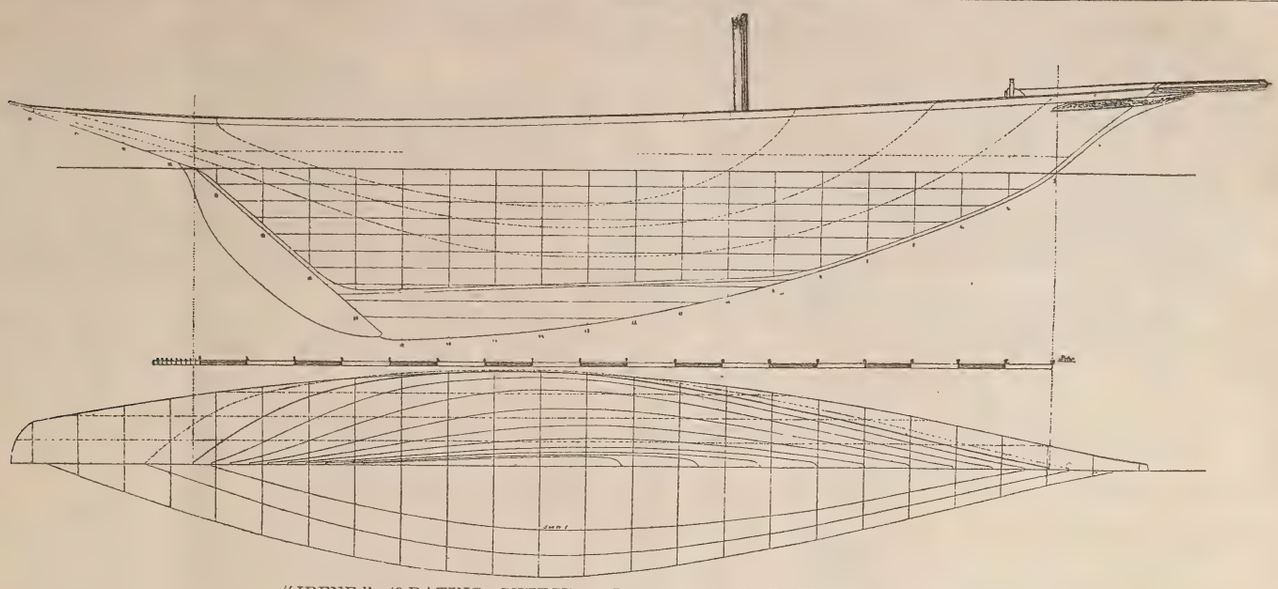
Avenel, steam yacht, formerly Narod, has been sold by J. H. Hanan to E. M Fulton.

The Buffalo Y. C. has issued a full programme of its races for the season, as follows: May 28, opening cruise; June 11, first pennant regatta; June 25, ladies' day; July 4, open regatta; July 9, ladies' day; July 30, cruising sweepstakes, all classes; Aug. 8, annual cruise and first meet of the Lake and Straits Racing Association; Sept. 3, second pennant regatta; Sept. 24, third pennant regatta; Oct. 15, closing cruise. The Buffalo Y. C. has adopted the Seawanhaka rule, for both measurement and classification, the classes being: 35 to 40ft. sailing length, 30 to 35ft., 25 to 30ft., 20 to 25ft. and 16 to 20ft. The fleet is improving by the addition of more modern yachts than were found a few years since. The club has for competition this year the cup presented in 1891 by Mme. M. de Zielinski, to be sailed for annually by the yachts of the old second class, to be held by any yacht winning it thrice in succession. The officers of the club are: Com., B. F. Hower; Vice-Com., A. S. Chisholm; Fleet Captain, L. G. Northrop; Cor. Secty., H. L. Campbell; Rec. Secty., F. W. Caulkins; Treas., W. C. Cowles; Meas., H. A. Baker; Regatta Com., E. P. Sears; Chairman, H. D. Pulsifer, J. de Zielinski.

The success of the "Illustratrated Coast Pilot," issued last year by Mr. N. L. Stebbins, the yacht photographer, has led to a continuation of the work, a second volume being now ready, covering New York harbor and the coast from Nantucket to Cape Henry, outside, including Delaware and Chesapeake bays. Photo reproductions of all the leading lighthouses, lightships and beacons are given, from views made by Mr. Stebbins last fall, with the courses and sailing directions. The book is bound in canvas, uniform with the first volume. A two-page supplement to Part I. has also been prepared, noting changes since it was issued.

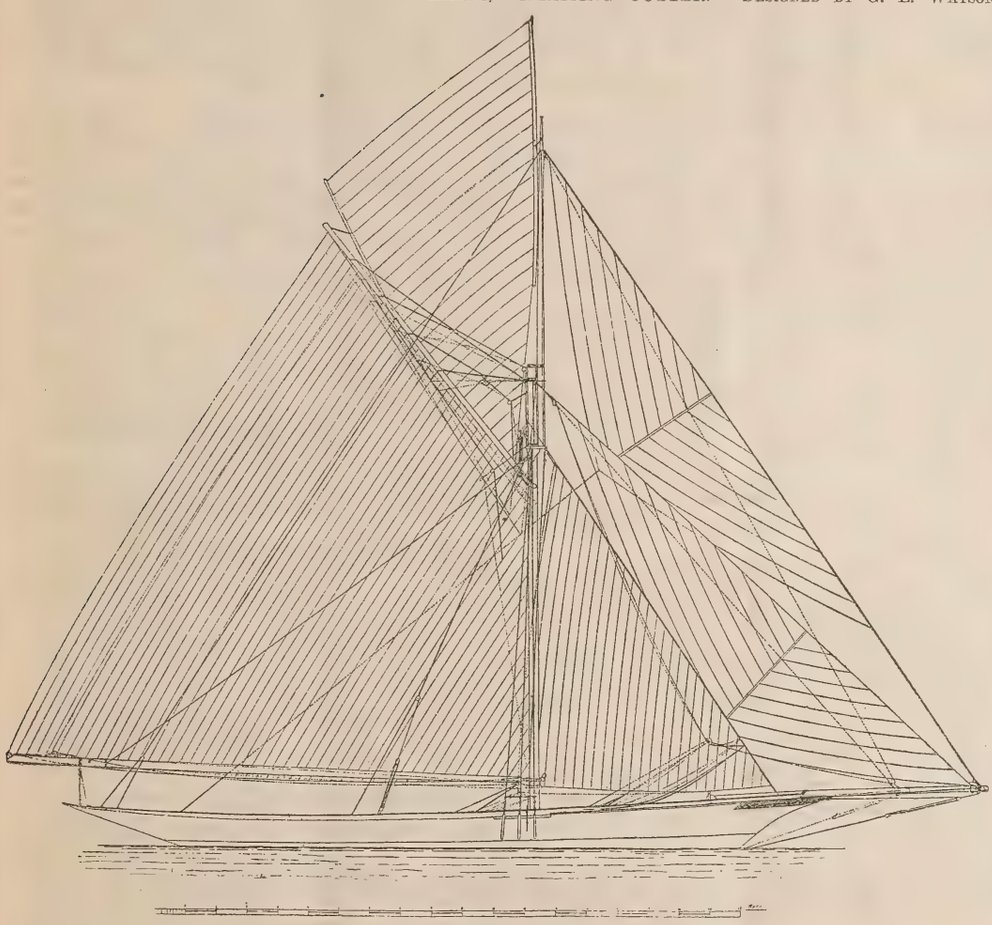
The *Yachtsman's Guide*, published every year by M. J. Kiley, Boston, shows a marked increase both in size and quality of contents this year. The text has been extended and improved, there are many new photos of yachts and yachtsmen, the charts are still an important and valuable feature, and the large collection of advertisements makes a complete directory of all goods used by yachtsmen.

The J. A Seeley Mfg. Co., of Ogdensburg, N. Y., have issued a very complete catalogue of brasswork of all kinds for sailing and steam yachts, rowboats, canoes and pleasure craft generally.



ATLANTIC CITY CORINTHIAN FLEET.

FOR some time past Atlantic City, N. J., has been the headquarters of quite a fleet of small sailing boats, there being now between 35 and 40, mostly of 15ft. over all length. Last year there were two clubs, the Mosquito Fleet and the Cricket Fleet, the former sailing a variety of skiff with dead rise and a rounded bilge, while the latter used mainly a skipjack or bateau model. The rules of the former club are by no means up to modern requirements, and on April 1 fourteen members of the Mosquito Fleet, being dissatisfied with the spirit governing that organization, determined to form a new fleet.



Their object was to advance the interest in all things appertaining to boating, with special care for that branch known as "small boat sailing," to cut loose from obsolete rules and organize under a constitution and by laws which would encourage not only members, but others who seek health and recreation from the sport of boat sailing and racing.

The organization was accomplished on the date mentioned and the following officers elected for the ensuing year: Com., Dr. E. L. Reed; Vice-Com., Wm. Westcott; Sec'y-Treas., Dr. W. W. Hollingsworth, 805 Atlantic avenue, Atlantic City, N. J.; Meas., Geo. Bullock. Regatta Committee, O. Reed, Geo. Curry and W. A. Ackerman. The name adopted for the organization is the Atlantic City Corinthian Fleet. The fleet is in the most prosperous condition, with 31 members and a total of 24 boats and yachts, built, building and ordered.

The waters about Atlantic City are exceptionally adapted for small

"IRENE," 40-RATING CUTTER. DESIGNED BY G. E. WATSON, ESQ., 1891.

SAIL PLAN, "IRENE."

boat sailing, and the club extends a cordial invitation to those loving the sport to come and give them a trial with the assurance of a thoroughly hearty welcome. The racing rules of the club are those of the Philadelphia Y. C. the Seawanhaka rules. The policy of the new club is energetic, liberal and progressive, and it is likely to meet with success from the start. The regular dates for the season are: May 21, June 6, July 22, Aug. 5, Sept. 5, Sept. 15, Oct. 1.

SEAWANHAKA CORINTHIAN Y. C.

THE new club house at Oyster Bay is now ready for use, and the club is getting together quite a fleet, independent of private yachts. The Gas Engine and Power Co has turned out a very fine 25ft. naphtha launch for the club, to be used for the stewards department, for general service about the fleet, and on occasions when the steam launch is not in use. She was taken from the builder's to Oyster Bay two weeks since. The large steam launch building by Seabury Co. for the regular service between the club station and Oyster Bay will be ready in a short time. The fleet of four catboats is now ready at Wallins and Gorman's, Bay Ridge, and will soon be sailed up to Oyster Bay. The following regulations have been adopted for their use, the races being divided into two series, the "Saturday" and the "Oyster Bay:"

The Saturday Races shall be sailed on Saturdays, and the Oyster Bay Races on any week days, from June 1 to Sept. 30, under the Racing Rules of the Club.

Each race shall be directed by any member of the Race Committee present, or by a Judge chosen by the entering helmsmen, who shall appoint helmsmen by lot when the entries exceed the available boats, apportion choice of boats by lot, and register the names of helmsmen, crew and boats with times of finish, and declare the winner.

Each helmsman elected shall choose his crew of one. Guests may be carried and may assist in handling by common consent of helmsmen.

No helmsman shall race twice during one day until after all present who desire to race have had opportunity.

Except when otherwise prescribed by the Judge, the races shall be sailed over the "Cat-Boat Inside Course."

Handicaps may be instituted by the Race Committee at any time during the season.

Disputed points may be appealed by the Judge in writing to the Race Committee.

Saturday Series.

After starting no boat can withdraw (from record).

The Judge shall credit on the register each helmsman, crew and boat respectively, with the number defeated.

To the helmsman and crew making respectively the highest scores during the season suitable championship prizes will be awarded. Second and other prizes may be awarded in the discretion of the Race Committee.

Oyster Bay Series.

Members may enter for the entire series by written notice addressed to the Secretary of the Race Committee the day previous to any race. Those so entering shall have preference in appointment of helmsmen, while members and guests may make informal entry for any single race.

Tokens will be awarded to the winning helmsman for each race, and the number held shall determine his grade.

Helmsmen shall be allowed to compete only with others ranking within the same grade. Token grades to be adjusted by the Race Committee.

To the helmsmen and crew making respectively the highest scores during the season suitable prizes will be awarded. Second and other prizes may be awarded at the discretion of the Race Committee.

Cat-Boat Inside Course. Starting from the Club House dock and rounding Cold Spring Light, keeping it on the port hand, thence rounding Moses Point Buoy, keeping it on the port hand, and thence to the finish off the Club House. Four nautical miles. *Cat-Boat outside Course.* Starting from the Club House dock, and rounding Cold Spring Light, keeping it on the port hand, thence rounding Center Island Buoy, keeping it on the starboard, thence rounding Lloyd's Point Buoy, keeping it on the starboard hand, and thence to the finish off the Club House. Ten nautical miles.

The following circular was sent out last week:

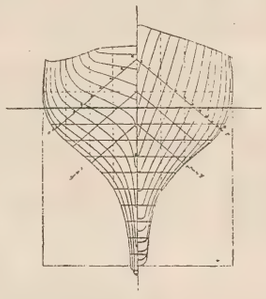
The House Committee have the honor of announcing that the new Club House at Oyster Bay will be opened on *Saturday, May* 28. The steam launch "Seawanhaka," which will meet all trains from New York at the end of the railroad pier, Oyster Bay, will begin running on Friday afternoon, in order to accommodate those who wish to spend that night at the Club House. The opening exercises will be continued on Monday, May 30,—Decoration Day. A time table and announcement of special trains for the opening will be issued later.

The programme for Saturday will include races in the smaller classes and catboats, naptha launch races, a breakfast at one o'clock and a dance.

Certain rooms in the Club House have been fitted up for the accommodation of ladies, who will be always admitted to its privileges when introduced by a member of the Club.

The House committee will be prepared during the yachting season to supply the yachts of the Squadron at all times with fresh vegetables, ice, milk, cream, wines, &c., and water can be obtained from the hydrant at the end of the Club pier, where vessels of 15ft. draught can lie alongside. A long distance telephone connection has been arranged for, so that supplies can be ordered by wire from Oyster Bay or New York.

For the use of members a naphtha launch, 4 cat-boats, rowboats, &c., have been provided and there are facilities for tennis and other out-door games.



If you desire a room for the opening days, please notify the committee (7 East 32d Street) at once what accommodation you require. There are four double rooms and eight single rooms. If more applications than can be filled are received, the choice for the opening will be decided by lot.

Accommodation has been provided in the dormitories for 14 persons.

Rooms can be obtained for any time in the summer in advance and can be occupied for two weeks, and longer if no other application is made for them after the expiration of the two weeks.

IRENE, 40-RATER.

WE are indebted to the *Wassersport* for the designs herewith reproduced of the 40-rating cutter Irene, designed last year by

BODY PLAN.

Mr. G. L. Watson for Prince Henry of Prussia. Her dimensions are as follows:

Length over all	76ft. 11in.
L.W.L.	59ft. 6in.
Beam extreme	13ft. 6in.
L.W.L.	13ft. 2in.
Draft extreme	11ft. 10in.
Sail area, Y. R. A. rule	4,050sq. ft.

NEW YORK Y. C.

THE annual dinner of the New York Y. C. will take place this evening, and on May 19 the third meeting of the year will be held, at which the following amendments will be voted on:

CONSTITUTION.

First—Amend Article 1 of the constitution by striking therefrom the word "measurer," so that the same as amended shall read as follows: "The officers of the club shall consist of a commodore, vice-commodore, rear-commodore (each of whom shall be the owner of a yacht), secretary, treasury and fleet surgeon."

Second—Amend Article 3 of the constitution by striking out the concluding section, which now reads as follows: "It shall be the duty of the measurer to measure all yachts and calculate their measurements as prescribed by the by laws and make a return of the same to the secretary."

Third—Amend Article 6 of the constitution by adding thereto the following, "Officers of the United States navy on the active list, when elected, shall after payment of the initiation fee, be exempt from annual dues."

Fourth—Amend Article 11, paragraph 3, of the constitution to read as follows: "This provision shall not exclude the nomination of any other candidate, but no member shall be eligible for election to any office unless his name shall have been posted as a candidate, together with that of the person nominating him on the bulletin board of the club house for at least ten days before the election."

BY-LAWS.

First—Amend chapter 4 of the by-laws by adding thereto a clause which shall read as follows:

"For the purpose of the chapter a yacht under charter shall be considered not in commission."

Second—Add the following at the end of chapter 6 of the by-laws: "Each yacht shall have a number assigned by the regatta committee, which shall be entered opposite her name in the club book, and shall be known as her official number.

"A yacht entered for a race shall display her number on both sides of the mainsail, just above the lower reef band, and in the middle of the sail. Such numbers shall be 30in. square and shall be issued by the club on application; but no yacht shall be entitled to more than one set at the expense of the club in any one year.

Third—Amend the number of the present chapter 25 of the by-laws by changing the same to 26.

Fourth—Add a new by-law, to be known as chapter 25, to read as follows:

"Chapter 25—It shall be the duty of the flag officers to appoint at the May meeting of the club a measurer, to serve for one year, who shall measure all yachts and calculate their measurements, as prescribed by the by laws and sailing regulations, and make a return of the same to the secretary."

The following committee has been appointed to consider the request of the World's Fair committee for an exhibition of yacht models, made to the leading yacht clubs: R. P. Lounsbery, John E. Brooks, J. L. Hutchinson, J. H. Sterling, J. C. Bergen, F. W. J. Hurst, John H. Bird, and Secretary J. V. S. Oddie.

PHILADELPHIA Y. C.

THE third lecture delivered before the Philadelphia Y. C. was by Mr. Wm. Gardner, the yacht designer, and his partner, Mr. C. D. Mosher, the engineer, the designer of the hulls and machinery of the fast steam yacht Buzz and Norwood. The cosy winter quarters of the club on Chestnut street, Philadelphia, were well filled on the evening of April 27, Com. Brown being in the chair. Mr. Gardner devoted himself mainly to sailing yachts while Mr. Mosher dealt with steam craft. In addition to drawing and blackboard sketches, a stereopticon and screen were used for additional illustrations, the accompanying explanations extending the lecture considerably beyond the following *resume* which by no means does justice to the lecturers. Mr. Gardner gave a particularly interesting description of the action of waves both in retarding and in affecting the steering of a vessel; also of the action of the wind on the sails, and of the shifting of the center of effort due to the heeling of the vessel. Mr. Mosher described in detail the boiler invented by him and used in the Norwood, showing working drawings of the details. The substance of Mr. Gardner's remarks was as follows:

Yacht designing is not an exact science as many have supposed, especially in the case of sailing yachts, it is really a compromise in the selection of good and bad qualities, the better boat possessing the fewest bad qualities. Steam yacht designing approaches more to an exact science. In a yacht we have three main factors: Resistance, seagoing qualities and structure. The resistance can be estimated with very great accuracy after one has become thoroughly acquainted with the results of the model experiments carried on by Mr. Froude and Messrs. Denny, and has made very careful experiments on any new form or model he may find advisable to use. These experiments are very valuable, and sometimes show very remarkable results. A gentleman for whom we had made a design objected to the appearance of the boat in one particular. We ran the model for him just as designed, and then in a few minutes made the change suggested. With the same power applied, the model instead of lifting slightly at the stern as at first, drew an equivalent of 7ft. more water aft.

It is an error to suppose that it is impossible to get a roomy boat and a fast one at the same time. My experience is that the model best adapted for very high speed produces an extremely roomy boat for the dimensions, and while the boat is somewhat quickened in her motion owing to the greater buoyancy, she is not necessarily a bad sea boat. In fact, with the proper care bestowed on the design, such a craft can be made an excellent sea boat.

Now as regards the structure. A light boat is not necessarily a weak one. People who depend entirely for the scantlings of their boats and vessels on rules such as Lloyds and others, as a rule soon lose sight of the fact that a boat has very marked individual characteristics. Rules and surveys are for the purpose of giving to the public the results of the very best practice in certain types of vessels, protecting the public and the insurance companies against the mistakes of the incompetent naval architects and ship builders, and also against faulty workmanship. Rules are extremely valable where they cover types of vessels that do not vary to any great extent, but a yacht or war vessel has its own distinctive individuality and should be so treated. All the parts of the structure should be proportioned to the stress that comes on them; every pound of useless weight only increases the stress on some other part. A lightly built boat is in consequence often much stronger than a heavy one.

High class materials are very essential, and the very best of materials are always sought for in high speed boats; the main expense, however, is the workmanship, which must be of very high class. To attain the best results it is absolutely necessary that the engineer and naval architect should be in harmony, and that each should be familiar with the other's work. In order that a correct estimate of the speed of a boat may be made the naval architect needs to know the following things: the detailed weights of the hull and machinery, the frictional and eddy making resistances, and the thrust of the propeller on the shaft.

Very few people realize that the boat at rest is not the boat in motion, and also that the lines that are suitable at one speed are not at another. In the case of a cargo ship the lines are dependent on the peculiarities required in the trade, length of voyage, cost of coal and rate of freight. With the proper data at one's disposal, a successful vessel may be built, while were a small change to be made one way or the other the vessel would be far less profitable to the owner.

The sailing yacht, as I said before, is a compromise. The problem is not to produce the model of least resistance, but the one best adapted to the conditions. The resistances of a yacht are wave making surface eddy making and rudder. The wave making of sailing yachts is very great, owing to the large displacement for the length; it amount to 60 and 70 per cent at high speed, while in fast steam yachts and torpedo boats it is as low as 50 per cent. at top speed. In a light wind frictional surface is the important element of resistance, and designers, appreciating this, are apt to cut it away too much, thus making the boat leewardly or unsteady.

As the surface is an important factor, its conditions should be very carefully looked after. Copper is very good, but there is no inherent virtue in copper paint or any other compound on the market; one is as good as another. The proper bottom for a boat is, first, to put on several coats of any good paint; during the winter these should be rubbed down with sandpaper; two or three coats of any good antifouling paint should then be put on, and these should be rubbed down to a smooth surface. Whenever the boat is hauled out, go over it with fine sandpaper or pumice stone. No paint should be put on during the season unless a large proportion of the bare wood is exposed. By treating the boat this way in the winter, money will be saved in the summer.

In the legitimate yacht, viz., one having good accommodations, there necessarily must be considerable bulk; but the object of the designer is not to eliminate the wave making, as that is impossible, but to produce waves that, although appearing large at high speeds, require but a moderate amount of energy to produce them; that is, to produce a true wave formation. Minerva was a remarkable example of this; her wave making was much more pronounced than most of the boats she sailed against, but she was traveling faster with less sail.

Eddy making is caused by undue fullness or leanness in some one place. If the after edge of a rudder is leftwide, there is considerable eddy making, and all edges should be made as sharp as practicable. The rudder forms a very important factor of resistance, and when a boat takes a hard helm, her speed is materially reduced. The helm is materially influenced by the movement of the boat; if the run is fine, the quarters wide and the bow wedge-shaped, the boat will go down by the head as she heels, this throws the center of the lateral plane forward, and makes the boat gripe. A large portion of the water must pass under the boat, or at any rate she must keep her head up. Volunteer was a remarkable example of this, she always kept her head up, and was in consequence an easy boat to sail, while Gloriana possesses the same characteristics in a still more marked degree.

The transverse wave is very marked in all deep boats; the deeper the boat, or rather the more bulk there is low down, the more marked it will be. When the boat is heeled, the bulk is on the lee side, so the wave is formed on that side; as the water on the weather side is nearly straight, there is more surface exposed to leeward, and consequently greater friction on that side, so the boat tends to run off her helm.

The deep boat has the greater transverse wave making, less diverging waves and less rudder, but has more displacement.

The object of a designer should not be to foster one type of boat but when the type has been determined, either by the waters to be navigated or some particular requirement of the owner, to produce the best boat of the type possible, always remembering that each particular type has its own characteristics.

On account of his knowledge of the characteristics possessed by boats of different types, the designer may be of great assistance to the sailing master, and where the highest results have been obtained, the designer and sailing master have worked together.

The sailing master is full of ideas in regard to the design, and in many cases he wishes to make changes, very often in his effort to eradicate all faults. He does not realize that the designer has voluntarily accepted certain faults as the lesser of two evils. The owner goes to no end of expense to satisfy him, but every change makes a slow boat. It is the sailing master's place to indicate the faults, but it is the designer's place to remedy them.

The clever sailing master will work at his sail until he gets it in the proper form, which is of a parabolic nature. It is wonderful what a perfect parabola a good setting sail is. "Liph" Willis, one of New York's most famous sailors, always worked his sails into this form. You often hear of theory and practice. The practice referred to is often the most subtle theory unconsciously worked out in the mind; a great sailing master will go through as many unconscious calculations in a few hours as our best mathematicians could go through in as many days. A sailing master is not a servant, and should never be treated as such.

I have spoken of steam and also of sail, but one of the great types of the future is a combination of the two; the auxiliary sailing yacht; the auxiliary steam yacht is practically a thing of the past. There is a greater field of improvement in the auxiliary sailing yacht than any other type of vessel; this class has not kept pace with the advance in other directions. The great improvements are to be made in vessels over 120ft.

The tendency has been to build steam yachts of heavy displacement and give them sails. The proper auxiliary should be to all appearances a pure and simple sailing yacht. The machinery should be purely auxiliary and should be designed for that purpose. The yacht should be fast under sail and show good speed under steam. The machinery should show the greatest economy possible, both in space and fuel consumption.

Mr. Mosher's remarks were as follows:

The subject of high speed steam yachts and their various details covers a very wide scope, in fact it is very elastic in its conception, comprising a great range in size and in the requirements of the owner. The modern steam yacht as a whole involves a knowledge of nearly every branch of science and mechanics. In many cases it serves as a model for trying new devices before applying them commercially to large vessels. Until recently the steam yacht generally has been constructed from an assumed knowledge, and the designer has had to depend upon some one else for the engines, boilers and screws, of which the builders had patterns in stock of a type originally designed with an entirely different end in view; the result being that they are very inefficient and occupy a great deal of room, and generally in the direction most objectionable, necessitating a reduction of the owner's accommodations and being extremely heavy.

When the yacht is given her official trial for speed every one is surprised at the result, the owner especially, who then realizes that any particular pains in making an accurate report of her performance would materially affect the sale of the yacht. The owner who has watched the construction with great interest and expectation, meets with general disappointment, and he now has a boat on his hands that he is not satisfied with, while an offer to sell her immediately invites suspicion of her inefficiency. The proper metacentric height has not been realized, as the designer had to accept the engine builder's weights of machinery, which usually prove to be entirely wrong; so the boat is anything but satisfactory in a seaway, and steam yachting begins to appear not what had been expected. The coal capacity is very limited from the inefficiency of the engine; the boat is very loggy in a seaway, having insufficient speed to hold an easy position on the waves, it being generally known that the motion of a boat may be greatly eased by adjusting her speed to agree with the form and period of the waves. The engine and screw not having been properly designed and balanced, the vibrations are excessive, and are particularly fatiguing in only a very limited cruise.

The engineer generally loses his interest, as he cannot produce any results which he takes pride in showing, and he is more or less blamed by every one on the boat; he fails to take proper care of the machinery, and a continuous source of expense results. The engineer is really a very important man on a steam yacht, and usually does not receive the credit due him, as he furnishes the mechanical ingenuity in almost every emergency, and if he is really worth his position it has cost him a great deal of study and consideration of all the individual details under his care, and his attention cannot be relaxed for a moment while under way, besides he must be a constant student to keep up with the rapid strides and new features that are continually being placed in his hands.

I regret to say, however, that a great many engines have proved to give continual source of trouble and break-downs, mainly due to the utter inability of their engineer to properly care for them.

After one or two seasons of these experiences the owner becomes dissatisfied with steam yachts, especially if he had intended to realize high speed, and by this time he has found that he is not alone in his misery, and so the steam yacht falls into disfavor from a yachtsman's point of view, and he reverts to the sailing yacht, which is free from many of these annoyances, although he is very far from being satisfied with the uncertainty of reaching his destination to meet an appointment, as he is dependent upon power over which he has no control. Their lack of adaptation to rivers or inland waters, and their very low speeds compared with the steam yacht, makes them begin to appear out of date, while the steam yacht may be constructed with twin screws and two independent sets of machinery, thereby avoiding delays due to an accident to either set of machinery and assuring the yachtsman of an arrival at his destination, and at a speed almost equal to that of a railroad train.

Generally the designers of the hull and the designers of the machinery have not been equally interested and familiar with each other's requirements, and various examples might be mentioned of very unsatisfactory results in which, while each individual part was not radically wrong, the combination produced the failure; so it is quite necessary that the really successful designer should have a great deal of general knowledge of all the requirements of individual parts of the hull and machinery in order to provide their best combination, as the really satisfactory yacht is a general compromise of the selection and adaptation of its various parts. Thus the hull might seem very satisfactory when considered alone, yet its period of vibrations might agree with that of the machinery at the highest speed and produce strains so severe that no quantity of workmanship and material could continually withstand.

With regard to the best models for a high speed, I am satisfied that only a limited success can be obtained by a purely theoretical design, especially if a new set of combinations of conditions exist, as there are undoubtedly a great many counter currents and a great deal of resistance data that we can have no conception of, and I very much prefer, after it has been theoretically designed to perfect a model by actual experiment, especially for extreme speeds, rather than to trust solely to calculations from assumed data. I have here a pair of small engines I have designed for this purpose; these engines are of 1in. diameter and 1in. stroke, and have been run at a speed of 6,000 revolutions per minute, and together are capable of everting as much as one-fourth of a horse power and yet weigh only about 8oz. each, or both together 1lb.; they are intended for a model about 5ft. long by 7in. beam, and the entire weight of the model, including the engines, screws, shaft, steam generator and connections, will weigh under 120lbs., and as far as form and displacement it will represent a yacht 150ft. long on ¾in. scale. This model is intended to show all the characteristics of the completed yacht under all the various conditions she might meet with.

The form of fast swimming fishes has been investigated in the hope of perfecting a model, but the investigators seem to have lost sight of some of the main factors. The fish being a submerged body, its model should be far different from that of a body moving on the surface of the water. The form in most fishes is no doubt adapted to the normal speed, but in the case of our modern vessels we have realized speeds far in excess to that of the fish. Again, the animal kingdom has the capacity to exert a tremendous amount of energy for a short space of time, for instance, a man can exert for a few seconds as much as two horse power, as in running up a flight of stairs, and yet his normal capacity is not more than one-tenth of a horse-power, thus having exerted twenty times his normal power. When a fish is frightened that is what takes place, and the fish is only seen for an instant and his rate of speed is estimated accordingly.

One factor, however, that we are behind in, is the quality of the frictional surface of our vessels compared to that of the fish. I have experimented by towing a fish and a model, each attached by a cord to opposite ends of a beam, and another cord attached to the center of the beam for towing the same. The model was formed of parafine wax which was run into a plaster mould taken from the fish; the weight of the wax model was then adjusted to exactly agree with that of the fish; the wax model was then tried, also one having its surface painted and rubbed smooth, also one having its surface varnished, and one having its surface shellaced and also their surfaces oiled or greased with various oils, glycerine and vaseline. I found that the fish towed much easier than either of the models, although the clean wax model showed the best results compared to any other surfaces tried.

The designer having a knowledge of the probable characteristic of the yacht, should be able to furnish her captain with a great deal of valuable data, as to the proper conditions and speed to run in a seaway for easing the motion and strains encountered in bad weather.

Within the scope of this paper it is possible to give but a passing glance at the various details that enter into a modern steam yacht so I will point out only the most important features and the advantage in the various details that recent experience has placed at our command.

I have attempted to take up only such parts as enter into a steam yacht and treat the subject generally, yet to refer to a few of the essential details that should receive careful attention, and to point out the refinements that modern science and experience has suggested to an extent that we can realize the difference in most of our present yachts and those which we may have at our command.

Among the most annoying features of a yacht, and especially one of high speed, is the excessive vibration that has heretofore generally accompanied it; so every feature that has a bearing on the vibrations is of the utmost importance.

In the screw propeller we have some losses which can never be wholly overcome, viz., the loss due to the displacement of the water to allow the blade to pass through, the losses due to frictional surface, and the losses due to the oblique action of the blade on the water and the slip.

In the screw propeller its efficiency is largely dependent on its adaptation to the yacht, both in diameter, pitch, blade area, and lastly, its position with regard to the hull. In some cases the blade area has been varied as much as 50 per cent. without any appreciable change in its efficiency. The diameter is also very elastic, yet a great reduction in this area brings us into the same condition as using a small jet in jet propulsion, and produces excessive slip; while the very large diameter or disk area meets with a loss by too much frictional surface, but provides us with means to handle a much larger load than that due to the normal resistance of our boat, as in the case of a tugboat. The most efficient part of the blade is at or near where it stands at an angle of 45° from the line of shaft, and the losses of its efficiency from this point toward the hub are due to an oblique angle, and the resultant is very far from at right angles to the shaft; besides, a large amount of centrifugal tendency is created unless the blades at that part have a decreasing pitch of as much less as the mean slip of the screw, whereby that part of the blades may pass through the water edgewise and thereby reduce their losses at that point to a minimum, while at that part of the blade outside of the angle of 45° the losses are due principally to fractional surface.

Another very important point in the screw propeller is to have the blades somewhat elastic, as the top blade of one acting near the surface of the water encounters much less resistance than the lower blade, that is the deepest in the water. So it follows that if the blade were perfectly rigid that there would be a series of shocks continually imparted to the boat, while if the blades are somewhat elastic the blade that is deepest in the water is sprung forward and the thrust on the boat is lessened, while that blade when nearing the surface of the water springs back toward its normal position, and its velocity being thereby increased its thrust is also increased, thereby equalizing or producing a more constant thrust and materially reducing the vibrations. It also acts very effectually in reducing the strains due to racing in bad weather should the screw rise above the water.

Another detail affecting the screw propeller is the inclination given to the shaft by most designers in the hope of lifting the stern or preventing the boat from squatting. Very little assistance in supporting the stern is rendered by this position of the shaft, while a considerable loss in efficiency of the boat as well as the screw is created, as the blade that is descending strikes nearly flat on the water, while the blade that is ascending toward the surface passes through the water nearly edgewise and produces a series of shocks which sets up serious vibrations; besides there is a great loss in the thrust resultant of the screw in the line of the motion of the boat, which is still further exaggerated by the increasing of the apparent angle of the shaft by the water at the stern of the boat flowing toward the surface, as it must after the boat has passed through it.

Among the most essential parts of a steam yacht or steam vessel is a satisfactory boiler or steam generator. With the present high pressure of steam and the probable still higher pressure that will soon be in general use, the boiler presents an entirely different problem, and what was satisfactory with the lower pressure and moderate demand of steam in a given space is becoming entirely inadequate. The present demands of a boiler are extremely difficult to fully satisfy, notwithstanding that they have received the attention of our most brilliant engineers, and still there are many features that have continued to give trouble when attempting to get the required quantity, pressure and quality or dryness of steam out of the space at our command for a boiler. We will first look at a few of the features that experience has shown to give trouble; flat or stayed surfaces have come to be looked on in a boiler as not up to the needs of modern times, and to invite trouble, especially in boilers of large size and high pressure, and certainly this form is not a scientific adaptation to meet the required end.

The circulation is of the greatest importance. In a boiler where the steam formed has to rise through the water that is attempting to descend to replace that evaporated, the upward currents of steam conflict with the downward currents of water, so the heating surface fails to be protected by solid water, and besides being very inefficient it is liable to become overheated and rupture is invited; also priming or wet steam is supplied. If a considerable quantity of steam is demanded per unit of surface our only alternative is to provide separate passage for the water to return to the same generating surfaces, and these passages it is found must be placed outside of the furnace and entirely away from the heat, otherwise steam will be formed in them and the center-currents produced. This feature exists in many water-tube boilers.

The arrangement of the heating surface is also another very important factor, as it is found that when the gases of combustion pass along or parallel with the heating surface, their efficiency is only one-half as great as it is when the gases pass at right angles or impinge directly on the surface. Again, it is found that in water tubes arranged over a fierce fire at an angle less than 15 degrees from a horizontal, steam is delivered spasmodically and the water is kicked out of the tubes in each direction, only to be replaced and the process repeated, so that serious priming or foaming results, besides the danger of rupture.

Screwed joints, riveted joints or seams of any kind in the fire are a great source of annoyance; as under a fierce fire they invariably give trouble, as a joint is the weakest part and under constant heating and cooling the continued expanding and contracting settled in the seams or joints and leakage or rupture soon results.

Again, in a screwed joint the thread weakens the tube or pipe by reducing its thickness just as it enters the fitting or any rigid part of the boiler, and continued springing due to expansion or vibration centers in this which is the thinnest part, and crystallization or weakness results in fracture. Our only complete cure is to have absolutely no joints near the fire.

Another very important feature is that all generating tubes or parts in the fire should be of small diameter, so if accidental rupture should take place only a small quantity of steam will be released and a disastrous explosion avoided. Also one of the most vital and important conditions, and one that has almost always been overlooked in the design of a boiler, is that the steam drums, main body, or part carrying the larger quantity of steam and water, should be placed entirely away from the fire, so in case of that part becoming short of water it will not become overheated and an explosion avoided. Had this feature always been provided, thousands of disastrous explosions would have been prevented and many lives and valuable property saved, and the general fear of high steam pressure would not exist. It is also very important in a boiler to have a large water level or surface area, so that in case its feed supply is interrupted it will have a reasonable latitude of action without receiving any water. When the above characteristics and conditions are avoided, pressures two or three times as great as those generally carried can be satisfactorily provided with absolute safety; besides a boiler may be run to several times its normal capacity with satisfactory results.

The engines for a steam yacht have rapidly changed from the single cylinder to the compound, and thence to the triple expansion engine which at present is on a sure footing, having passed the experimental stage, and to-day is being supplied for nearly all modern steam plants, while the quadruple expansion engine is just making its appearance in a substantial form, and bids fair to soon become the standard of excellence where the finest results are required. The delay in the progress of these engines has no doubt until recently been largely caused by the lack of satisfactory boilers to produce the required pressures of steam for their successful results. Each advance in these engines has resulted in greater economy in fuel and more equal distriouion of the strains, until with the quadruple expansion engine there seems to be little to be gained. With the quadruple expansion engine we may place each pair of cranks opposite each other, thereby nearly balancing the reciprocating parts of each other, and make use of pressures as high as can satisfactorily be used in the cylinders of the present materials at our command. With the multiple cylinder engine there has come a multiplicity of parts. Any further additions to these is extremely objectionable, while any reduction in them is very desirable, as the engineer's care and danger of derangement will be correspondingly reduced.

In the designs that will now be placed before you economy, compactness and simplicity yet the retainment of all important features and some special provision against vibration has been my greatest effort.

Rifle Range and Gallery.

New Jersey Rifle Shooting.

[*Specially Reported for Forest and Stream.*]

THE Miller Rifle Club held their first regular semi-monthly outdoor shoot at the Union Hill Schuetzen Park last Wednesday afternoon, the 4th inst. Only a few members appeared, but the next shoot, on the 18th inst., will no doubt bring out no less than twenty. The scores made are appended below. The conditions were 25 shots off-hand, 25-ring target, possible 625, distance 200yds.:

Geo Schlicht.	24	24	21	21	21																					
	22	19	19	20	22																					
	21	24	23	21	21																					
	18	21	21	21	23																					
	25	24	19	25	21–541																					
Aug Meyns.	22	23	24	22	23																					
	23	23	23	20	18																					
	22	24	19	20	20																					
	19	21	18	14	23																					
	18	22	20	20	17–310																					
F Brandt.	16	16	15	21	20																					
	19	23	20	18	21																					
	15	10	22	20	22																					
	21	17	23	22	17																					
	18	19	24	20	21–475																					
F Kammel.	23	21	21	20	9	18	12	12	15	15	20	18	17													
	17	18	15	16	16	12	14	16	15	9	18	16–404														

J H Kruse.	24	23	9	12	14																					
	16	20	18	20	20																					
	24	20	18	19	19																					
	14	17	20	13	21																					
	18	18	20	16	14–436																					
H Meyer.	20	22	16	14	16																					
	10	18	13	15	12																					
	21	16	18	18	15																					
	23	22	12	12	16																					
	15	18	15	20	20–417																					
F Kloepping.	20	20	16	16	18																					
	12	12	14	15	14																					
	15	14	16	20	18																					
	12	14	16	18	18																					
	24	22	20	19	20–416																					

At the next regular shoot every member present will fire a string of 50 shots.

Several three-shots-a-man team shoots took place. The scores were:

Meyns	19 17 19—55	Schlicht	22 19 21—63
Brandt	16 21 19—56	Kruse	17 16 18—51
Kloepping	15 18 20—53—164	Meyer	18 14 16—48—162
Meyers	23 22 23—68	Schlicht	19 20 21—60
Brandt	20 18 21—59	Kruse	19 21 16—56
Kloepping	16 19 16—51—178	Meyer	16 23 20—59—175

Out-door shooting with the Miller Rifle Club will soon be very popular, as soon as the warmer weather strikes us. As regards some of the poor scores made, as will be seen above, Meyer, Kruse and Kloepping are new beginners on the long-distance shooting.

The Germania Schuetzen Bund, Washington Rifles, of New Jersey, hold a monster shoot and festival at Saal Brothers' Schuetzen Park, Paterson, on Monday and Tuesday, June 6 and 7. Five hundred dollars will be distributed among the best marksmen, while the lovers of bowling will find $100 hung up in prizes. The prizes, which number twenty, will vary from $15 to $2. The programme arranged by the efficient committee of arrangements is laid out as follows: First day, June 6, 9 to 11 A. M., arrival of all Germania Schuetzen Bund companies throughout the State; 12 M., review; 1 to 7 P. M., shooting for prizes. Second day, June 7, shooting 9 A. M. to 12 M., intermission until 12.30, shooting then to continue until 6 o'clock; 8 P. M., crowning of the king of the festival and general distribution of prizes. The Schuetzens expect an enormous crowd in attendance, as the Bund alone contains 1,500 members.

Miller Rifle Club, Wednesday, May 4. The regular monthly meeting and weekly shoot brought out quite a number of members. Ten shots, off-hand, 25-ring target, possible 250:

First Class.

D Miller	25 25 25 24 24 24 24 24 23 22—240		
C Judson	25 25 25 25 24 24 24 23 23 20—238		
G Schlicht	25 25 25 24 24 24 24 24 22 21—238		
A Meyns	25 25 25 25 24 24 23 23 22 21—237		
E Fischer	25 25 25 24 24 24 23 23 21 21—235		
F Liell	25 25 25 24 24 24 22 22 21 21—233		
J H Kruse	25 25 24 24 24 23 23 23 22 20—233		
L Sohl	25 25 24 24 24 23 23 22 22 21—233		
J Vozel	25 25 25 25 24 23 23 22 22 20—231		
F Brandt	25 25 24 24 25 23 23 23 22 20—233		
J Meyer	25 24 24 23 23 23 22 22 22 21—228		
Capt Dewey	25 24 24 23 23 22 22 22 22 20 19—224		

Second Class.

D Peters	25 25 24 24 24 23 23 22 22 20—230		
F Kloepping	25 25 24 24 23 23 23 21 21 20—229		
A Thurk	25 25 25 24 24 23 23 22 19 19—229		
W Forkel	25 25 24 24 24 23 23 22 20 19—229		
J Carragher	25 25 24 23 23 23 23 23 20 18—227		
F Landvet	25 25 24 24 23 23 23 23 20 17—227		
H Seltenreich	25 24 24 24 23 22 21 19 19 19—220		
F Drewes	25 25 23 23 22 22 21 20 20 19—220		
W Rogers	25 24 24 25 23 23 20 20 19 18—219		
C Prien	25 25 23 22 22 22 21 20 19 18—217		

Third Class.

A Stadler	25 25 25 24 24 23 23 22 21 20—232		
H F Meyer	25 25 24 24 23 23 23 20 20 19—226		
F Kammel	25 24 23 23 22 22 22 16 16 16—209		

The committee of arrangements reported that all details for the coming festival had been attended to. A special meeting was ordered for Sunday, May 29.

Lischke Rifle Club, Capt. A. Lischke, Jersey City Heights, Friday, April 26. The scores made to-night in the regular weekly shoot for the several class medals are appended below. The conditions were 10 shots, off-hand, 25-ring target, possible 250, distance 110ft.:

F Steidel	25 25 24 24 24 23 23 22 22 19—231
Capt A Lischke	25 25 25 24 24 23 23 21 20 20—230
A Langenberger	25 24 23 23 23 52 21 20 19 18 18—213
O Schulte	25 24 24 23 21 20 19 17 17 16—204
H Strater	25 25 23 23 21 20 20 18 18 17 16—203

The medal winners in their respective classes were: First class, Capt. Lischke, 230; second, H. Strater, 203; third, F. Steidel, 231. The club considers its small membership list due to the length of its range, which measures fully 110ft. They think that if the range was shortened about 36ft., making it 75ft. long, better shooting would be done and a bigger list of members would be the result, as at the present time, the distance being so long, poor scores are in the majority. The challenge from the Palisade Rifle Club for either a five, eight or ten-men team match for the team championship of Jersey City Heights was received. Upon due consideration it was decided to refuse to meet that club, as the Lischke Club is at present not overburdened with good shots, it containing only several who can "hold."

The Hansa Rifle Club of Hoboken, with headquarters at the Hansa Hotel, held a well attended prize shoot at Henckel's ranges, 34 Grand street, on Saturday evening, April 30. Marksmen of many neighboring clubs were present. At the close of the shoot the winners were found to be: First prize Chas. E. Bird, Palisade and Hudson Rifle Club, with scores of 25 23 23—71—23 24 24—71; gold medal; Second prizes, Captain John E. Reinhardt, Palisade Rifle Club, 25 23 23—71—23 22 25—70; silver medal; Third prize, William Weber, Excelsior Rifle Club, 25 25 24—72—24 22 23—69; one pig; Fourth prize, Lambert Schmidt, Hansa Rifle Club, 24 21 21—69—23 21 23—70; one case of wine; Fifth prize, Herman Rosenthal, Palisade Rifle Club, 23 23 23—69—25 22 21—68; one umbrella; Sixth, Adolphus Rosey, Palisade Rifle Club, 24 21 23—68—25 22 21—68; one cane; Seventh and last, E. Neukranz, 23 24 20—67—25 25 18—68; one hundred cigars. C. E. Bird, after the distribution of prizes, remarked that he was extremely sorry Capt. Reinhardt had not won the pig as it would have given him much pleasure to see the genial captain endeavor to take the "porker" home.

Captain Henry L. Hansen and ex-Captain John Rebhan of the Hudson Rifle Club, of Marion, are matched to shoot a hundred shot match with two of the ablest shooters of the North Ward Rifle Club of Newark. My Newark "constituency" are requested to look out for a surprise as the Hudson men are shooters, and if the latter come home beaten, I can account for it in one way only, the others were better shooters.

Palisade Rifle Club, Captain John C. Reinhardt, Jersey City Heights, Thursday, May 5. The scores made to-night in the two classes are appended below. The conditions were 10 shots off-hand, 25-ring target, possible 250:

First Class.

F Liell	25 25 25 24 24 23 23 23 23 23—238
G Graf	25 25 25 24 24 24 23 23 23 22 22—235
A Metz	25 25 25 24 24 23 23 23 22 22 21—224
J H Kruse	25 25 24 24 24 24 24 23 22 22 21—234
Capt Reinhardt	25 25 24 24 24 24 23 23 22 22 21—233

Second Class.

J Kahrwald	25 25 24 24 24 23 23 22 20 20 20—227
A Rossy	25 25 25 24 23 23 22 22 19 19 19—224
H Rosenthal	25 25 24 24 23 23 22 21 20 20 19—223
C Burk	25 25 24 23 23 22 20 20 19 19—220

Gustav Russ and L. Fischer were elected members in the meeting that followed. A committee was also appointed to make arrangements for a shoot at Floral Park.

In the medal shoot now in progress at the headquarters of the Palisade Rifle Club, at 354 Palisade avenue, Jersey City Heights, Henry E. Bordley still leads the first class members with scores of 25 24 24—73, 24 25 24—73 and 25 23 25—73. Herman Rosenthal now leads the second class men with scores of 25 22 25—72, 25 24 21—70 and 23 23 23—68. Chas. Burk being close behind with scores of 22 23 22—67, 24 23 20—67, 23 21 23—67.—The shoot closes on June 12, when the winners will be presented with handsome gold medals.

Lady Miller Rifle Club, President, Mrs. Stadler, Hoboken, N. J., Thursday, April 28. The scores made to-night are appended below. The conditions were 10 shots, rest, 25-ring target, possible 250:

Mrs Stadler	25 25 25 25 25 24 24 24 23 22—242
Miss M Miller	25 25 25 25 24 24 24 23 23 22—240
Mrs H Meyers	25 25 25 24 24 24 23 23 23 23—239
Mrs L Vogel	25 25 25 24 24 24 23 23 23 22—238
Mrs B Katenkamp	25 25 25 24 24 23 23 23 23 22—257
Mrs H F Meyer	25 25 24 24 24 24 23 23 23 22—231
Miss A Clausen	25 25 25 24 24 23 23 22 22 22—232
Mrs E Petrie	25 25 24 24 24 23 23 22 22 22—230
Mrs A Cordts	25 25 24 23 23 23 23 22 21 21—230
Mrs M Bessett	25 25 24 24 23 23 23 23 21 21—230
Mrs D Miller	25 25 24 24 24 23 23 20 20 19—227
Miss K Born	25 24 23 23 23 23 21 21 20 19—217
Mrs M Windler	25 23 23 23 22 20 20 19 18 18—211
Mrs C Keuft	25 24 22 20 20 19 18 18 18 18—202

The club is making rapid strides in shooting, as the above scores will show. The membership list is being added to considerably, several new members being elected every week.

Empire Rifle Club.

NEW YORK, May 4.—The following scores were made by members of the Empire R. C. at their weekly shoot on the 9th inst. at their headquarters, 12 St. Marks place. Distance 100ft.: H. Zahn, 236; C. Zettler, Jr., 230, G. Hillmeyer 222, W. Fetzer 203, H. Fetzer 205.

"FOREST AND STREAM" TOURNAMENT

FOR NEW JERSEY RIFLE CLUBS.

Howard Rifle Club vs. Greenville Rifle Club, shot on Howard range, April 26; distance 25yds.:

HOWARD R. C.

F Suing	25 23 25 24 20 23 25 23 23 23—234
J Burger	22 22 24 22 21 23 19 24 25 24—226
A Aurnhaner	25 24 24 24 21 23 22 25 23 25—236
J Mayer	24 22 25 24 22 24 22 24 23 24—234
A Graef	21 23 24 25 25 24 24 24 25 22—238—1168

Captain, Adam Gaef. Scorer, P. Nichols.

Zettler Rifle Club.

NEW YORK, No. 219 Bowery, May 5.—*Editor Forest and Stream:* On Tuesday evening, May 3, the season '91-'92 gallery shoot of the Zettler Rifle Club (Pres., B. Walther) came to a close, and the successful marksmen were presented with the prizes. The top scores were made by those reliable old marksmen Dr. J. A. Boyken and M. Dorrler, who each made the wonderful scores of 249 out of possible 250 points, off-hand, on the 75ft. range, in a string of 10 shots. The total scores and percentages are as follows:

	Points.	Percentage.	Highest single score.
Dr J A Boyken	4 942	247.10	249
B Walther	4 910	245.70	248
C G Zettler	4 908	245.40	247
M Dorrler	4 907	245 30	249
L Flach	4 906	245.30	247
H Holges	4 903	245 30	248
M B Engel	4 889	244.30	247
F Ross	4 889	244 00	247
B Zettler	4 851	242 50	246
G Nowak	4 849	242.40	247
G W Plaisted	4 830	241.15	245
F Lindkloster	4 759	237.95	245
F Hecking	4 674	233 70	241
M Tropp	4 651	232 55	241
F Farbarius	4 514	225.70	233

Dr. Boyken was not only successful in making the top individual score and winning the first prize, but he also succeeded in winning the club medal, emblematic of the club gallery championship in making the highest scores on the first target of each night's shoot to count only, no sighting shots allowed, he having won on seven different nights and having tied twice.

After the distribution of the prizes there were several team matches shot. The first was won by the side captained by M. Dorrler, 5 shots, 25-ring target, possible 125 points:

Capt Dorrler	123	Capt C G Zettler	116
Walther	123	H Holges	120
Ross	111	Engel	119
Nowak	114	Percival	118
B Zettler	115	Plaisted	118
Hecking	118	Watson	113
Busse	121—926	Tropp	118—922

The second match resulted as follows, conditions same as before, won by Ross's team:

Capt Dorrler	123	Capt Ross	120
Busse	116	Holges	118
C G Zettler	117	Engel	116
Walther	120	Nowak	118
M Tropp	117	Plaisted	122
B Zettler	117—710	Hecking	120—714

After the team matches a very pleasant evening was closed by all hands participating in a bullseye shoot on the 4in. bullseye target; the nearest center shot in 3 shots on one target to take first prize, three prizes. The victors were: G. Nowak first, M. Dorrler second, R. Busse third.

A vote of thanks was tendered to FOREST AND STREAM for the kindness shown to the Zettler Rifle Club in allowing space every week for publishing the respective scores on each shooting night; and our genial president, B. Walther, directs me to inform you of the above resolution, which pleasant duty I hasten to comply with.

GUS NOWAK, Sec'y.

Garden City Rifle Team.

THE Garden City Rifle Team met for their weekly contest Tuesday evening, May 3, at Geo. McCune's shooting gallery, 146 South Halsted street, Chicago, Ill.; conditions were 25yds., 25 shots each, open sights, free off-hand position, Massachusetts paper target, possible 300:

W J Gibbs	276	W J Myers	259
C A Hankle	265	R McBean	258
J Paletus	260	Thos Ford	254
R Taylor	259	Geo McCune	254
W Frisbie	252		
F Areckson	251		

In an interesting sweepstake shot after regular club shoot Mr. Gibbs won the purse by a score of 109 out of a possible 120 points.

Beideman Rifle Club.

BEIDEMAN, N. J., April 30.—The Beideman Rifle Club shot their weekly scores on their out-door range, being the first shoot of the season, with excellent results. Week ending April 30, at 25yds., ½in. bullseye, ¼in. 25-ring targets, possibly 250, strictly off-hand, with the following results:

H J Darnet	245	Dr Gardner	239
A J Yergey	244	Geo Bosler	236
J L Wood	239	Harry Meyers	233
Walt Gilbert	230		

WALT GILBERT, Sec'y.

Heidenreich Rifle Club.

NEW YORK, May 3.—Scores at our weekly shoot at our range, 425 West Fifty-third street, distance 100ft.: Val. Horn 241, John Aigeldinger 238, Frank Goodman 231, Wm. Steckel 229, Wm. A. Hicks 229, John Kaufman 219, Jos. Hippold 222, Wm. Muller 213, Gus Reinholdt 213, Wm. M. May 205, Geo. Eberhardt 208, A. Busch 204.

The prizes for the bullseye shoot, distance 120ft., are as follows: For best center shot: First prize, Val. Horn, $16.64; second prize, Wm. Muller, $13 31; third prize, Danl. Dineen, $9.98; fourth prize, W. M. May, $6.65; fifth prize, Wm. Dalton, $3.32. Premiums for most red flags, Val Horn, first, $6.65; John Aigeldinger, second, $5.82 and Wm. Dalton, third, $4.16.

When the bullseye shoot closed we enjoyed the good things that our chef, Reinholdt, provided for us, and before we left our club house the majority were in an elated and enthusiastic state of mind: general good feeling prevailed. The prize winners were cheered, and when the boys were about to depart for their respective homes three rousing cheers with a tiger were given for the Heidenreich Rifle Club.

MAY.

Massachusetts Rifle Association.

BOSTON, May 7.—The regular weekly shoot of the Massachusetts Rifle Association was held at its range to-day. The attendance was good but the scores made were few, the shooting conditions being so bad that even the old veterans gave up in disgust. Harris, Brooks and Francis won pistol medals, and Prescott and Patridge won rifle medals. Following are the scores made to-day, distance 200yds., Standard American target, all being entry matches:

Silver Pistol Medal.

Won on 10 scores, 86 or better, by L. Brooks 91 87 88 86 88 88 88 87 89 90

Bronze and Silver Pistol Medal.

Won on 10 scores, 81 or better, by H Harris 88 88 85 90 85 89 91 92 86 90

Bronze Pistol Medal.

Won on 10 scores, 75 or better, by C. Francis 77 90 76 83 78 79 83 77 87 77

Silver Military Medal.

Won on 10 scores, 42 or better, by Prescott 42 42 43 44 43 42 43 43 44 43

Bronze Membership Badge.

Won on 10 scores, 65 or better, by Patridge 71 65 74 63 76 73 72 71 71 66

All-Comers' Off-hand Match.

E E Patridge	86	B C Snow	75
A G Stevens	83		
D Martin	79		

The Winans Cup, Bisley, 1892.

BELOW are the rules for this cup, which will be shot for during the coming rifle meeting at Bisley, England.

The Albert, entrance fee $7, open to all comers, $500 given by the N. R. A. for first stage, which consists of 10 shots each at 800 and 900yds., 22 prizes ranging from $100.

Second stage, Winans cup, value $250, presented by W. L. Winans, to be shot for at 1,000yds. by the 50 highest scorers in the first stage; no entrance fee.

THE WHITEHEAD REVOLVER CUP.

The principal revolver prize at Bisley this year, constituting the revolver championship of England, will be the Whitehead cup, value $150, donated by Henry Whitehead, the celebrated long range rifle shot (cousin of the maker of the torpedo of that name). The cup is the first prize in the grand aggregate for revolvers. The competitors will have to shoot 54 shots, 42 at 20yds. at targets moving in different ways and 12 at 50yds. at a stationary target. Half of the shots with military revolvers and ammunition, and half with any revolvers and ammunition. This will be the best prize and with hardest conditions ever offered for revolver shooting in England.

Trap Shooting.

All ties divided unless otherwise reported.

FIXTURES.

If you want your shoot to be announced here send in notice like the following:

May 9 12.—Texas State Sportsmen's Association tournament at Dallas, Texas.

May 10-12.—The Ohio trap-shooters' annual tournament, Columbus, O.

May 10-12—Mankato Gun Club tournament, at Mankato, Minn.

May 10-12.—Geneseo Gun Club tournament, at Geneseo, Ill.

May 10-12.—Williamsport Rifle and Gun Club, fourth annual tournament, at Williamsport, Pa.

May 10-13.—Nebraska State Sportsmen's tournament, Grand Island, Neb.

May 11-12.—Cortland County Gun Club, kingbird tournament, Cortland, N. Y.

May 12.—Unknown Gun Club, at Dexter Park, Long Island.

May 12.—Newark Gun Club, Bloomfield ave., Newark, N. J.

May 14.—New Jersey State Trap Shooter's League, at Rutherford, N. J.

May 16.—Paterson Rod and Gun Club, regular shoot, at Paterson, N. J.

May 16-19.—Capital Gun Club annual tournament, at Washington, D. C. Arthur S. Mattingly, Sec'y.

May 17-18.—Oregon State Sportsmen's Association tournament, Salem, Ore.

May 17-19.—Grand tournament at Indianapolis. For programme, etc., address Chas. Polster, 149 Indiana avenue, Indianapolis.

May 17-20.—Annual tournament of Kansas City State Sportsmen's Association, at Council Grove. G. W. Cleek, Sec'y.

May 19.—Essex Gun Club, Marion, N. J.

May 19.—Falcon Gun Club monthly shoot, at Dexter Park.

May 19-20.—Big Four tournament, Burlington, Iowa.

May 20.—Marion, N. J., 50 live birds, $50 entry. Name of shooter, with $10, to be sent to C. H. Townsend, 318 Broadway, New York.

May 20.—Jeanette Gun Club, at Dexter Park.

May 20.—Parkway Gun Club, Dexter Park, Long Island.

May 20.—Atlantic Rod & Gun Club, at West End, Coney Island.

May 23-25.—Altoona, Pa., first annual tournament, at Wapsonock Shooting Park. For programme address W. G. Clark.

May 24-26.—Iowa State Association tournament, at Des Moines, Iowa.

May 24-26.—Knoxville Gun Club, annual tournament, at Knoxville, Tenn.

May 24-27.—Windsor Keystone Gun Club tournament, at Windsor, Ontario, Canada.

May 25.—Glenmore Rod and Gun Club, Dexter Park, L. I.

May 26.—Emerald Gun Club, at Dexter Park.

May 26-27.—Harrisburg Shooting Association, third annual spring tournament, at Harrisburg, Pa.

May 26-27.—Carmen Gun Club tournament, Carmen, Ill.

May 27.—Linden Grove Gun Club monthly shoot, at Dexter Park, Long Island.

May 30.—Canajoharie Gun Club, king bird tournament, at Canajoharie, N. Y.

May 30.—White Plains Gun Club tournament, White Plains, N.Y.

May 30.—Open shoot and team match for Connecticut Keystone Trophy, under the auspices of the Bridgeport Gun Club, at Bridgeport, Conn.

DRIVERS AND TWISTERS.

THE Capital City Gun Club, of Washington, D. C., will hold its record-breaking tournament on Monday, Tuesday, Wednesday and Thursday, of next week, and the management expect to draw the biggest list of entries of the season. Jolly Jack Parker, of Detroit, Mich., will have charge of the events and traps and Billy Wagner will act as a reception. If this combination does not draw a crowd nothing will.

* * *

Seth Clover and George Cochran declare that it was the sultry weather that lulled them to sleep on the train last Thursday morning and caused them to ride from Pittsburgh to Braddock instead of leaving the train at Homewood. However, they found the walking good from Braddock to Homewood.

* * *

The big attractions next week will be the tournament of the Capital City Gun Club, at Washington, D. C.; Oregon State Sportsmen's Association, at Salem, Oregon; Chas. Polster's tournament, at Indianapolis, Ind; the Big Four tournament, at Burlington, Iowa, and the Kansas City State Association tournament at Council Grove, Mo. There is also the sweepstake at 50 live birds, $50 entry, to take place at Al Heritage's Marion grounds, which is expected to draw a big crowd.

* * *

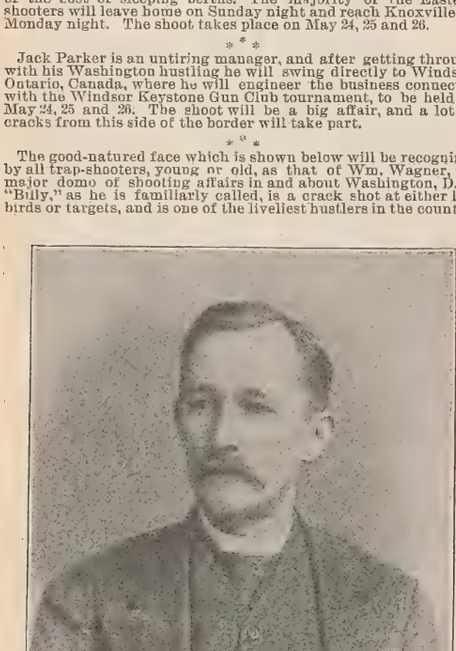
Saturday will be a great day on the grounds of the Boiling Springs Fish and Gun Club, at Rutherford, N. J., when the fourth team shoot of the New Jersey Trap-Shooters' League will be held. The traps will be in position at 8:30 A. M., and a very attractive series of events will be shot off in addition to the team shoot.

Trains from Chambers street ferry will leave at 7, 8, 8:30, 10:22 A. M., 12 M., 1 and 1:50 P. M.

* * *

The following letter from J. Howard Brouse, anent the coming tournament of the Atlantic City (N. J.) Gun Club, will be of interest to the army of trap-shooters: "The second annual tournament of the Atlantic City Gun Club, to be held on July 4, 5, 6 and 7, promises to be the largest of the season, as it comes during the holidays, and just at the season of the year when people want to be at the seashore. The management have received communications from all parts of the country asking for programmes and hotel rates, and the indications are that there will be a larger number of shooters than at any other tournament this year. Some of the people that were there last year say they enjoyed themselves so much that they are going this year if they have to walk. The management have decided to offer a gold watch charm, valued at $10, to the team making the highest score. Teams to consist of 5 men from any one club and to shoot at 25 birds per man, entrance $10 per team. Money divided, first prize, 30 per cent. and gold watch charm; second prize, 30 per cent.; third, 20 per cent.; fourth, 12½ per cent.; fifth, 7½ per cent. All teams to make their entrance to J. Howard Brouse, Atlantic City Gun Club, Atlantic City, N. J., by July 1. Applications to be accompanied by 20 per cent. of entrance money, $2, and in making application to mention the day they want to shoot, and send list of not more than ten men from whom their team will be selected. Teams not shooting on the day selected by them will forfeit their entrance money deposited, which will be added to the purse and divided among those who do shoot."

* * *



Mr. J. E. Prindle, New York passenger agent of the Norfolk & Western R. R., informs us that his road will make a sweeping reduction in rates between New York and Knoxville and return during the tournament of the Knoxville Gun Club. The fare for the round trip will be cut to the very low figure of $28.14, exclusive of the cost of sleeping berths. The majority of the Eastern shooters will leave home on Sunday night and reach Knoxville on Monday night. The shoot takes place on May 24, 25 and 26.

* * *

Jack Parker is an untiring manager, and after getting through with his Washington hustling he will swing directly to Windsor, Ontario, Canada, where he will engineer the business connected with the Windsor Keystone Gun Club tournament, to be held on May 24, 25 and 26. The shoot will be a big affair, and a lot of cracks from this side of the border will take part.

* * *

The good-natured face which is shown below will be recognized by all trap-shooters, young or old, as that of Wm. Wagner, the major domo of shooting affairs in and about Washington, D. C. "Billy," as he is familiarly called, is a crack shot at either live birds or targets, and is one of the liveliest hustlers in the country.

WILLIAM WAGNER.

Possessed of an inexhaustible fund of good-nature he is immensely popular wherever he goes. He will be in the hey-day of glory next week during the Capital City Gun Club's tournament and intends to keep the boys on their mettle from early morn until dark.

* * *

And anent this same Washington shoot I see that a big attraction is added to the programme in the way of a contest open to teams of six men from any organized club in the country, each man to shoot at 25 single bluerock targets. The entry fee is $20 per team. First prize is $60 cash, $25 of which is donated by J. T. Moylan, of the Owen House (where all the shooters will hold forth); second prize is a Parker hammerless gun, and there will be numerous other valuable trophies. In another column will be found the full programme for the four days. A number of shooters from New York and New Jersey will go to Washington on Sunday night via the Pennsylvania Railroad.

* * *

A new gun club has been formed in New York by several old members of the New York German Gun Club, which will be known as the Down Town Gun Club of New York. Their headquarters are at Leopold Marsché's, 384 Pearl street. It is proposed to hold the regular monthly shoots at Dexter Park during the season, the first to be held on Monday, May 16. The officers of the club are: President, F. Hemmers; Vice-President, A. Goetz; Secretary, W. Joost; Treasurer, H. Fagen.

* * *

On March 28 the Colt Patent Firearms Company shipped a tent and other property to Staunton, Va., to be used during the Interstate tournament at that place. The outfit, however, did not reach Staunton until April 20 and consequently it was immediately reshipped to Pittsburgh, which it reached in time for last week's shoot.

* * *

A letter to H. A. Penrose from the Baker Gun and Forging Company, of Batavia, N. Y., states that as soon as the company gets its new hammerless gun on the market they will have a tent, etc., as well as a competent man to represent them at the Interstate tournaments.

* * *

The people in and about the city of Pittsburgh solemnly affirm that FOREST AND STREAM is *the only* trap shooting paper published. Curious, isn't it, that a similar opinion should exist in so many different parts of the country.

* * *

All communications for publication must be addressed to the Forest and Stream Publishing Company, and not to any individual. Several reports have been delayed because this rule has not been observed. C. H. TOWNSEND.

Mount Morris Gun Club.

MT. MORRIS, N.Y., May 7.—A gun club has recently been organized at this place and starts off with a membership of 25. Besides arranging shoots, that its members may improve in the art of wing shooting, the club will endeavor to stock the stream in this locality with fish, and will also take an interest in the movement being made throughout the country toward forestry preservation. The officers of the club are: Pres., Geo. S. Ellicott: Vice-Pres., A. J. Crissy; Sec'y-Treas., Chas. Gamble. At the regular shoot last Friday afternoon the following score was made, bluerocks, 16yds.:

C Galbraith	1001001010011111001011110—14
O Sickles	1000911000110011111001010—16

Crissy	0010001101611010001100010— 9
J Galbraith	1000110111111111110010010—17
Ellicott	1010111011101110011111110—17
Matteson	0001011010011w.

Tag-Ends of Kansas City.

KANSAS CITY, Mo., May 7.—Mr. Fred Lord of Chicago has a railroad known as the Maple Leaf, on the "Diagonal," or sometimes as the Chicago, St. Paul & Kansas Railway. It is usually among shooters called "Fred Lord's road," and I suppose he owns it. Fred Lord's road was out of gear yesterday and the day before. A good many roads were. The Rock Island got no trains west of Bureau Junction for two days. The "Q" had seven miles of track out in one gap in Iowa. The Santa Fe had a fearful accident at a wash-out near Fort Madison, Iowa. All lines were stopped. Railroad men have not seen the like of the present floods for a quarter of a century. Traffic was utterly demoralized. Perhaps we can not blame Fred Lord's road for declining to run a night train when the run meant probable disaster. The day run made all the passengers glad it was not night, for the works of the flood were everywhere. All the same, thirty-six hours added to a delay in Iowa already unavoidably too long, brought the writer to Kansas City only in time to say good bye to the shooters of the Missouri fifteenth annual State Shoot. It must be tag-ends only, therefore, which the writer can offer, even were more needed after Mr. Budd's report of the event, which covers it very nicely.

The weather was simply awful this week, including one electrical storm. Only two good shooting days offered. In spite of this, the shoot was a success, more especially so through Kansas City enterprise. St. Louis sent four shooters. Jefferson City sent two men, St. Jo four, Cameron not a single man. Top entry was fifty-three.

Missouri shoot is essentially a live bird affair. About 5,000 birds were shot this week, an average of 885 daily. The King traps, spring pull, were used. Shooting was in squads of 5; but the traps were filled after each shot, so it was 5 unknown traps for each shooter.

The target events did not amount to a great deal, the lighter shooters holding back from the strong class of experts. There was no handicap. In one 50 targets race there were 3 men who got 48, one 47, one 46. This kept the timid out. The target entries did not swell till the big guns let up a little. The bluerock folks had a set of 5 traps, and the U. S. Pigeon Co. also had a set of 5 traps, the latter a present to the park, which since Jan. 1 has been in the hands of Messrs. Kinnan & Bennett, who bought out Mr. Elliott.

The birds averaged good through the week, barring those shot in the rain and those left at the close of the shoot. A novel method of starting slow birds was adopted. There were no flag ropes at all, but the trappers had a basketful of croquet balls, and when the bird refused to take wing he early wished he had, for the unerring croquet ball of Billy the Kid was apt to threaten him with sudden death if he didn't fly.

St. Louis sent over only four men, but they took away some glory. Col. Haggerty, with the diamond, won the St. Louis Gun Club medal, which by custom has always carried the State championship. In the 4-men club teams shot St. Louis tied the O.K.'s and won in the shoot-off, eight teams entered. St. Louis also shot into the divided tie in the 2-men team shoot, in which there were nineteen teams.

A great deal of discussion arose over this St. Louis medal and the involved question of the championship. The conditions call for only ten birds, too few to make the race a test of skill. Under the terms the winner takes all the next year's entry, there being only one money. This would appear a good winning, but it is a grave question if this system of gambling on futures, though a common one in State tournaments, is not radically wrong, and moreover in practice it worked very badly this year. There were only five entries this year and two of these only, Mr. Haggerty and Mr. Elliott, stayed in after the first round of ten. Such a shoot does not represent a State championship. It will be seen that Mr. H. C. Myer, who won this medal last year, won next to nothing for his shooting, and was not paid pro rata for his skill actually displayed in comparison. This latter should be the test and the winning should base itself thereon. This matter was taken up at the convention, and Mr. Myer offered a resolution providing for the establishment of a definite State championship race, the conditions of which shall be twenty-five single birds under prevailing rules, entrance fee the price of the birds, and the club or clubs under whose auspices the tournaments shall hereafter be held to provide a suitable trophy emblematic of the State championship, which shall become the individual property of the winner of that race each year. The resolution was discussed at length and unanimously adopted. Independence has the shoot next year, and the Independence Gun Club will offer the winner of the new championship match either a gold watch or a suitable medal. The St. Louis medal may now be said to be practically out of existence as a championship factor. I am disposed to favor a system which determines the winnings at the time when the winning is done, and which gives a winner something tangible to keep. The hand-me-over State medal is not a very useful object to the man who wins it. St. Louis is satisfied with the new arrangement. She will bring back her medal next year but probably with three moneys attached, division to be made on actual entry. The convention will fix upon some plan to remunerate Mr. Haggerty next year, when his winnings would be determined under the old system.

The convention decided to hold the next shoot at Independence. This point is well chosen, being only a few miles from Kansas City, but far enough away to avoid jealousy of a second term for Kansas City. The officers for the ensuing year are J. J. Owens, president; R. D. Mize, recording secretary; Chas. R. Thomas, corresponding secretary; Oscar Cogswell, treasurer; all of Independence. Mr. F. P. Dallmeyer, of Jefferson City, was chosen vice-president. These officers will later choose a board of directors.

I have called these tag-ends of the shoot, but I find it impossible to keep from among them a little scoop, of the exclusive sort which is always somehow following FOREST AND STREAM around. This is about that new shooting park earlier whispered of. The contracts are closed for the purchase of ten acres of ground between Kansas City and Independence. The purchase is made by a stock company composed of the united gun clubs of Kansas City and Independence. The park will be the best and most complete of its kind in this section. It will have bowling alleys and quoit grounds, a rifle range, and all modern improvements in bird and target shooting. There will be a fine club house, a telephone, a resident manager, and all things needed for a place of practical access for sportsmen in search of manly amusement. The new tract is well chosen, near a pleasant grove. It is six miles from Kansas City, reached via cable to the dummy line of the K. C., I. & Park Ry., and in time is nearly as convenient as the old Elliott Park, against whose famous side-hill so many alien shooters have leaned in vain. The grounds will be controlled absolutely by the corporation.

An amusing incident occurred the other evening, in which Dr. Pitts, of St. Louis, Mr. E. D. Fulford and Dr. W. F. Carver, the noted wing-shooter, all figured. Dr. Carver happened to be in town this week, and had his guns arrived he would have engaged in the tournament festivities. He was not known to the gentlemen above mentioned, but all three fell into a shooting discussion in the hotel lobby one evening. The unknown shooter made a few statements of a positive nature, and Dr. Pitts and Mr. Fulford lit into him. They cited Dr. Carver as a shooter of small worth, and pulled his record to pieces. Mr. Fulford started in on Jack Brewer, and about what he said can be easily guessed. The unknown just listened, and finally went to bed—not that his retiring early had anything to do with the listening. The next day the wily Doctor, who had seen himself as others see him, appeared out at the ground arrayed in all his English glory, flowered vest, trousers with four different-colored streaks in them, etc., etc., and it quickly leaked out who he was. Then Mr. Fulford wished he had said less about Jack Brewer, and Dr. Pitts was glad the stranger had not accepted his proposition to shoot 100 birds, $100, as made the evening previous in the heat of the discussion.

Dr. Carver will have a chance to get a little race here if he wants it, for $1,000 to $5,000, grounds to be staked out anywhere in this vicinity, any time within 60 days. Certified checks to the above lie quietly backing the willingness of Jim Elliott and his friends to go against or be gone against in an entanglement of this kind.

Missouri State shoot this year brought out about as hot a class of shooters, take them straight through, as ever assembled at a tournament. It was give and take among the good ones, and mostly give.

Capt. J. H. McGee, one of the best known shooting characters here, refereed the shooting, and settled all cavil by his usual remark, "That's what I said." Capt. McGee is now fifty-five years old. He organized the first gun club ever known in Kansas City. That was in 1866. Since then he has been shooting and engineering shooters, and is much sought after as a referee.

SHORT SAYINGS OF THE SHOOTERS.

J. A. R. Elliott.—I shall shoot only one more race for the championship cup. It is an expensive luxury. Mr. Bolen, of this city, will be my last opponent. I did not find Mr. Fulford a hard man to beat. We had $164 gate money in our match, and this Mr. Fulford insisted be divided. I tried before the shoot to arrange that the winner should take the gate, but he would not concede. I will shoot Dr. Carver for any sum up to $5,000 or even more. He always says the stakes are not large enough. Did you say Chicago was afloat? That's a good thing, but it would be better if the blame place was sunk. I'm coming up there before long, though.

J. A. Bolen.—Yes, I am to shoot Mr. Elliott for the cup, and I hope to make a score as high as the lowest in the dozen or so races he has shot for it and won. Of course I have no cinch, but if I hold my gait I have a fighting show at least. (Mr. Bolen is a wealthy coal merchant here, and during the tournament has shown himself familiar with the traps. The match will probably take place in early August.)

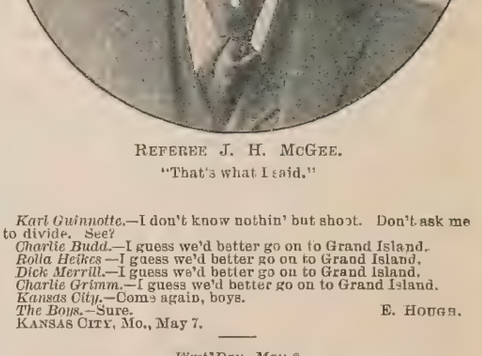
Dr. Carver.—I have not been shooting much of late, and I don't care to go into any matches. My guns are not on hand yet, or I would try a little whirl in the sweeps with the boys.

Uncle Jimmy McGee.—I don't like this idea of having so many different sets of shooting rules, all over the country. Our rules here don't agree with the American Association rules. I think we ought all to have stuck to those and improved them to a point where all the large cities would use them in common. These odds and ends of rules are no good. I want to say a word for a single, univeral set of shooting rules for American shooters. Then we could tell something about the shooting we read of.

Official scorer Jimmy Whitfield.—The FOREST AND STREAM new trap type, showing flights, is the best thing out. You remember I had some such idea three years ago, only I would have had signs and letters instead of arrows. Isn't this a hot old shooting crowd, though? They don't scare 'em up much hotter. Wait till I score this fellow.

Dick Merrill.—The lightning the other night scared all the waiter girls out into the halls at my hotel. I crawled under the bed. I never saw such thunder in my life.

W. T. Irwin.—I am training a kennel at Coffeeville, Kan. We have lots of quail as well as chickens there, down in the Nations. I have got a big race on hand now, with Mr. Elwell, 100 birds at $250 a side. I hope I'll beat him, I'm sure. We have had some good shooting around Coffeeville.



E. W. Kinnan (of the park owners).—We have shot about 2 600 birds a month since we took hold of the park. Every thing is going will, and we find the shooters here a grand lot.

Frank J. Smith.—Only one Kansas City. Get in my buggy and I'll take you over the boulevard. Kansas City will hold the cup. She'll be full of something good if Jimmie Elliott shoots safe next time. Aint but one Kansas City.

The Secretary.—We are not using the figure 2 in our scoring, but employ only 1 and 0. The second barrel is used so often for safety that the figure 2 means nothing.

Billy Rieger.—This is no baby shoot. We sent out programmes announcing that the shoot was open to the world, barring four State events. We had no handicap. When they asked me to bar or handicap the experts, I said I couldn't do it. This is a men's tournament, and don't you forget it, and we shoot according to schedule. That's the only right way to do.

Walter Halliwell.—You ought to get around a little earlier next time, so you'd have more chance to say good-bye.

REFEREE J. H. MCGEE.
"That's what I said."

Karl Guinnotte.—I don't know nothin' but shoot. Don't ask me to divide. See?

Charlie Budd.—I guess we'd better go on to Grand Island.

Rolla Heikes.—I guess we'd better go on to Grand Island.

Dick Merrill.—I guess we'd better go on to Grand Island.

Charlie Grimm.—I guess we'd better go on to Grand Island.

Kansas City.—Come again, boys.

The Boys.—Sure. E. HOUGH.

KANSAS CITY, Mo., May 7.

First Day, May 2.

The day was ideal for shooting, the birds trapped were a good lot, the arrangements for carrying out the programme of the tournament were perfect and the sport of a high order throughout.

Among the noted shooters present were E. D. Fulford, C. W. Budd, of Des Moines, Ia.; Charles Grimm, of Clear Lake, Ia.; Richard Merrill, of Minneapolis; Paul Franeke, James Batchellor and W. E. Everhart, of St. Joseph; F. B. Dallmeyer and J. M. Doehla, of Jefferson City; L. Steiger, C. Steiger and M. Love, of Moberly; Harvey H. Dixon, of Joplin; and A. D. Brasher, of Orick. Kansas was represented by W. T. Irwin, of Coffeyville; J. H. Hersney, of Osage City; and R. S. Dinsmore of Troy. Captain James H. McGee was selected as referee and James Whitfield as official scorer. Owing to the large number of entries in the live bird events but two of the three on the programme could be brought off. In these two shoots the moneys were well split up, all the experts getting a piece. The shooting was exceptionally good throughout, many clean scores being made. Elliott was in good form, killing his ten straight birds in each of the shoots.

Elliott, Grimm, Smith, Bryant, Bennett and Hall divided first money after shooting out the other ties on ten; ties on nine divided second money; Bradley, Dinsmore, Kearns and Bederman divided third money, shooting out the ties on eight.

The annual meeting was held in the evening, with President Guinotte in the chair.

Under a resolution offered by Mr. Meyers, of St. Joseph, the present holder of the St. Louis Gun Club medal, which has in the past represented the individual championship, a new twenty-five bird race for the championship was provided for to be shot at all future tournaments, the prize to be a medal or a watch, to be presented by the city in which the tournament is held each year.

Independence and Jefferson City were placed in nomination as the city in which the tournament shall be held next year, and on the vote by clubs Independence was selected. The following officers were then elected for the ensuing year: J. J. Owens, Independence, President; F. Q. Dallmeyer, Jefferson City, Vice-President; R. D. Mize, Independence, Recording Secretary; Chas. Thomas, Independence, Corresponding Secretary; Oscar Coggswell, Independence, Treasurer.

The number of noted sportsmen already in attendance was increased yesterday by the arrival of a delegation from St. Louis in which were James E. Haggerty, Dr. Parrish, H. C. Griesendieck and John Coles.

The principal event on the progromme was the two team shoot. This resulted in a very exciting contest between the many good pairs which entered. First honors were carried off and money div. by Haggerty and Greisedieck, Smith and Baker and Hickman and Hall, the only three teams which succeeded in making clean scores of 20 straight. Six of the teams succeeded in getting 19 birds, and these shot off for second money, with the result that Coggswell and Mize, of the Independence Gun Club, carried off the prize. Third money was div. by the ties on 18 and fourth by the ties on 17.

Haggerty	1111111111	10	
Dickson	1111111111	10	20
Hickman	1111111111	10	
Hall	1111111111	10	20
Baker	1111111111	10	
Smith	1111111111	10	20
Batcheller	1111111110	9	
Essig	1111111111	10	19
Coggswell	1111111111	10

Chanslor	1111111111	10	
Nickell	1011111111	9	19
Kearns	1111111111	10	
Choteau	1111111011	9	19
Shacklett	1111111111	10	
Wilmot	1111111101	9	19
L Staiger	0111111111	9	
C Staiger	1111111111	10	19
Bradley	0100101011	5	
Elliot	1111111011	9	14

When this team shoot had been concluded the first shoot on the regular programme for yesterday was taken up. This was a shoot at 10 live birds, and it attracted the large number of 46 entries.

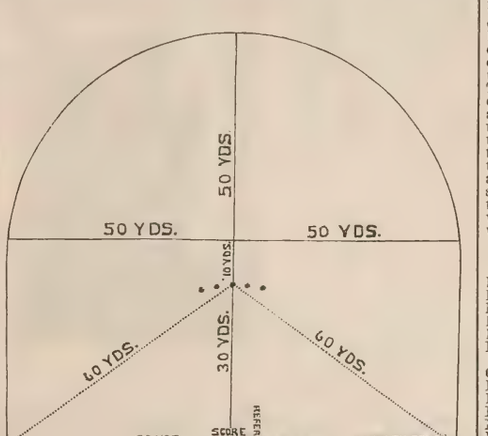

DIAGRAM OF THE BOUNDARIES.

The contest was a fine one, the birds being good ones, and many large scores were made. Elliott, Budd, and others of the cracks shot up to their form and helped to cut up the first money, which was split by the ties on 10. Second money was divided by Meyers, Smith, Kearns, Essig, Wasson, Barber and Groves after shooting off the other ties on 9. Third money was divided by Haggerty, Beiderman, Fields and Fulford, after shooting out the other ties on 8. Fourth money was divided by Moore, Dallmeyer and Sturgis, who shot out the other ties on 7:

Thomas	101111101111011	12	
Mize	111111111111114		
Coggswell	011111111111001	12	48
Lexington Gun Club.			
Nickell	111110011111101	12	
Sturgis	111111111101112	14	
Chanslor	101110111111113		
Davis	011110011010001	8	47
Kansas City Gun Club.			
Halliwell	011111010100111	11	
Gordon	011111111111011	13	
Schroeder	111101111011001	11	
Smith	001011111111101	11	46

In this shoot the team which makes the highest score does not get any of the money, but gets the championship medal and $100 when the medal is shot for again next year. Therefore, first money went to the Forester Gun Club, of Kansas City; second to the St. Joseph Gun Club; third to the Gate City Gun Club, of Kansas City; fourth to the Independence Gun Club. The shooting was exceptionally good throughout, and, with few exceptions, all of the selected men made high scores. The race between the St. Louis and O. K. Gun Clubs created a great deal of interest, especially as it neared the end with the score a tie. The St. Louis club had a chance to win it without a tie, but Dr. Pitts, who was the last man to shoot for that club, dropped his fourteenth bird. The tie between the two clubs was decided, under the rules, by each man shooting at three birds. On the first round Lee Porter and Maegley lost their birds, and after that the O. K.'s waited until the St. Louis men had shot their three birds down. This they did, losing only one bird, and as the O. K.'s had already lost two birds, and thus had no chance to win, they did not shoot their tie birds out. While the Kansas City boys were sadly disappointed at their failure to carry off the honor for the third time in succession, they took their defeat with good grace and did not begrudge the well-earned victory to the St. Louis team. The rain interfered with the sport in the morning, so it was late when the team shoot was started. It was after 4 o'clock when it was finished.

Fourth Day, May 5.

No. 30, entry $2, 10 singles:

Bennett	1010111110	7	
Coggswell	1100011111	7	
Essig	1111111111	10	

The second shoot was open to the world, ten birds, 30yds., both barrels. Ties, three birds, 30yds., both barrels. Entrance $7, including birds. Divided 40, 30, 20 and 10 per cent. Twenty-nine entries were made but Essig withdrew after his fifth shot, having lost two birds with two others dead out of field. Ellwell, Gordon and Fulford caught ten straight and divided first money, $53.60. The ties on nine for second money were Bradley, Bryant and Elliott, who divided $42.25. Baker, Smith, Grimm, Hall, Orr, Myers and Framp tied at eight for third money, $26.80, which was divided between Hall and Myers in the shoot off. In the tie shoot for fourth money Batchelor, Merrell and Heikes were winners. The score:

Baker	011011111	8	
Smith	101111110	8	
Grimm	111110101	8	
Bradley	110111111	9

Hickman	1101013010—7	Myers	1110011111—8
Coggswell	1111101101—8	Framp	1110011111—8

For the St. Louis Gun Club gold medal, 10 live birds, there were only five entries. Haggerty, of St. Louis, and Elliott tied on 10 straight birds. In the shoot-off Haggerty beat Elliott and won the gold medal. Elliott lost his third bird. The score:

Francke	0111001011—6	Youmans	1110111100—7
Myers	1101111001—7	Haggerty	1111111111—10
Elliott	1111111111—10		

Fifth Day, May 6.

The big event of the day was the guaranteed purse of $500, 10 birds, entrance $10, 28yds., both barrels; ties, 3 birds, 28yds. Divided 30, 25, 20, 15 and 10 per cent.; open to the world. This shoot was begun Thursday. There were 53 entries. Dr. Carver, who entered Thursday, withdrew. Eight out of 53 shot 10 birds and came in for first money, $158.40 and divided it, receiving $19.80 each. There were nine ties of 9 birds for second money, $119.25, allowing $13.25 each upon division. Third money, $95.25, was shot off and went to Knoche, Coggswell, Elwell, Halliwell and Beiderman. Fourth money was shot off at 2 shots each and went to Jones, L. Starger and McGee, $21.20 each. The ties on sixes were numerous and were shot off at 4 shots, going to Shacklett, Hall, C. Starger and Hershey. The score:

Grim	1111111111—10	Myers	1101111110—8
Fulford	1111111101—9	Kearnes	1110111111—9

Bennett	1111111111—10	Everhart	0111100001—5
Keene	0111111111—9		

Following this comes the special prize shoot, 10 birds, 28 yards, both barrels. The shoot had 39 entries and was over with the next day. Scores: C gswell, Chouteau, Batchelor, Essig, Moore and Peters, 10; Elliott, Hall, Kearns, Knoche and Schacklett, 9; Groves, Bryant, Hickman, Keene, Bennett, Beiderman, Bolen, Holmes, Smith, Judge, Dowell, Jones, Scott and Gordon 8; Rickmers, Franklin, Orr, Thompson, Halliwell and Baker, 7; Myers, Everhart, Bradley, Dick and Hughes, 6; Casey, Self and Stark, 5.

Cogswell and Chouteau shot out the ties on ten for the first prize (Lefever gun), and W. G. Peters bought it for his nephew. Elliott and Hall shot out the ties on nine for the second prize (Parker gun) and they compromised. The ties on eight for third money made a pretty race in the shoot-off. There were fourteen in it, and Keene, Bennett Jones and Bolen divided, after shooting out the other ten. Other ties divided.

The rest of the day was spent in shooting sweepstakes at both live birds and targets.

Trap at Watson's Park.

BURNSIDE, Ill., April 30.—The following is the score made here to-day by the Gun Club of Chicago for club medal, 15 live pigeons, A. A. rules:

Hamline	1010112101222220—12	Gardner	1011120202w.
Place	2110121012212120—12	Jones	2022001122222l—12

In shooting off the tie at 3 birds each, Place won, killing straight.

Match for cost of birds:

Place	1202220121222010112—15	Jones	2000222211101020w
Hamline	2221022220121011220—16	Willard	2221101220101110w
Gardner	1111212021011120202—16	Pride	2002200212010110w

At 20 bluerock targets: C E. Willard 15, D. L. Pride 14, J. L. Jones 12, F. A. Place 14. L. M. Hamline 10.

May 5.—The following is the score made here to-day by the Lake Country Club, 10 live pigeons each man, for the club's medals, gold for best and leather for poorest, Illinois State rules:

J T Hastings	1222222111—10	W S Bond	1202202200—6
N H Ford	0100120101—5	Nic Lewis	0000010101—3
J W Edbrooke	1211222121—10	C Bockelman	2120000221—6

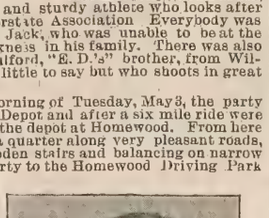
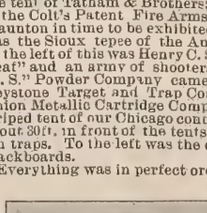
BLUEROCK.

Three Days' Sport at Pittsburgh.



PITTSBURGH is a great city not only for smoke and natural gas, but it is a great place for shooters as well. Situated almost within a stone's throw of a fine game region, almost every man and boy in the town owns a shotgun and is an adept at manipulating the same. Not only at field work but at trap work as well do the Pittsburghers excel. Whenever a shoot is held in or near the city the "locals" turn out in large numbers, as do their friends from surrounding places. This rule obtains not only for target events but for live-bird contests as well, as is evidenced by the fact that at a recent club shoot, at 10 live birds per man, 58 members of the Pittsburgh Gun Club took part. At this shoot fifteen entries were refused, owing to a scarcity of pigeons. It is no wonder, then, that the tournament of the Pittsburgh Gun Club, assisted by the Interstate Manufacturers and Dealers' Association, held on May 3, 4 and 5, was an immense success.

When the writer, in company with "Little Neaf" Apgar, of Henry C. Squires; Enoch D. Miller, of the Standard Keystone Company; Wm. H. and "Doctor" James Wolstencroft, of Philadelphia, entered the Union Depot in the Smoky City after a twelve-hour ride the first person to greet them with a fraternal hand shake was jovial Elmer E. Shaner, the major domo of shooting affairs in and about the city, who at once informed them that the town belonged to them as long as they chose to remain within its sacred precincts, because the Pittsburgh Gun Club said so. A few moments later the party reached the palatial Hotel Anderson where they were speedily greeted by Hal. A. Penrose, the Standard Keystone hustler, and Walter C. Cady, treasurer of the Standard Keystone Company, both of New London, Conn. Here they also met jolly Jack Parker, of Detroit, Mich., the stocky and sturdy athlete who looks after the management of the Interstate Association. Everybody was immensely pleased to meet Jack, who was unable to be at the Staunton shoot owing to sickness in his family. There was also quiet and sedate John W. Fulford, "E. D.'s" brother, from Williamsport, Pa., who has very little to say but who shoots in great form.



ELMER E. SHANER.

Bright and early on the morning of Tuesday, May 3, the party boarded a train at the Union Depot and after a six mile ride were deposited on the platform of the depot at Homewood. From here a walk for about a mile and a quarter along very pleasant roads, clambering up and down wooden stairs and balancing on narrow plank-walks, brought the party to the Homewood Driving Park where the big tournament was to be held. The grounds are situated in a very picturesque valley, on the slopes of the surrounding mountain peaks being finely cultivated farms. The driving park proper is one and a half miles in circumference, with a splendid oval mile track; just inside the main entrance are several commodious grand stands. Just inside the track, near the judge's stand, were the tents of the stockholders of the Interstate Association. These tents, nine in number, were arranged in a semi-circle directly behind the line of traps. Occupying the premier post of honor, the right of the line, was the canvas mansion of FOREST AND STREAM, which the Pittsburg people recognize as "the leader" in trap as well as other sportsmen's news. The invitation to "come in and sit down," painted on four sides of the tent, was taken advantage of by hundreds of friends of the paper during the three days. To the left of FOREST AND STREAM'S tent was the tent of Tatham & Brothers; then came the new canvas house of the Colt's Patent Fire Arms Company, which failed to reach Staunton in time to be exhibited to the Virginians. Next in line was the Sioux tepee of the American Wood Powder Company; on the left of this was Henry C. Squires's big wall-tent with "Little Neaf" and an army of shooters as its occupants; the tent of the "S. S." Powder Company came next, then that of the Standard Keystone Target and Trap Company, then came the tent of the Union Metallic Cartridge Company, and on the left of the line the striped tent of our Chicago contemporary. The firing points were about 30ft. in front of the tents and 16yds. further out were the ten traps. To the left was the cashier's office and the association blackboards.

F. F. DAVISON.

Everything was in perfect order for an early opening, Manager Parker, assisted by members of the Pittsburgh Gun Club, having devoted several days to the preliminary arranging of the grounds. F. F. Davison, a prominent sporting goods dealer of the town, was in charge of the financial department, and his work from start to finish was carried out promptly and systematically. The direct management for the Pittsburgh Gun Club was in the able hands of Elmer E. Shaner, the club secretary, F. F. Davison, Dr. James Dickson ("Jim Crow") and Charles M. Hostetter ("Old Hoss"). The same able quartette of well-known sportsmen were in charge of the tournament of the Pittsburgh Gun Club held in 1891. Thoroughly posted in all essential details they succeeded in going through the entire three days without a hitch. The same gentlemen constituted themselves as a reception committee and were untiring in their efforts to cater to the welfare and comfort of the visiting shooters.

"JIM CROW."

It was nearly 11 o'clock before the opening gun was fired, and at this time a big crowd was on hand, the first event calling out forty entries, the largest number of entries recorded for an opening at any of the Interstate tournaments of this season.

Among the more prominent shooters present, besides those previously mentioned, were W. C. Clarke, of Altoona, Pa., who has recently opened a model trap-shooting ground on Wopsononock Mountain, 1,500ft. above the city of Altoona and 2,650ft. above sea level; Wm. R. Fieles, the good-looking and jovial expert from Christiana, Pa., who shoots "for love of the sport;" Chas. Crosby and David Creelman, of Braddock, Pa.; Jas. S. Ross, of Homestead, Pa.; F. W. Fox, of Lamont Furnace, Pa.; Dr. Meyer, J. E. Burt and R. S. Lemon, of Wheeling, W. Va., and last, but by no means least, the inimitable Seth Clover, of Erie, Pa., who for a number of years disported himself in the professional arena along with Buffalo Bill, his specialty being fancy shooting with the rifle.

The weather during the opening hours was fine; the sun shone clear and very strong, sweaters and even the thin Thurman blouses being discarded. A northwest wind gave some erratic flights to the light Keystone targets, but despite this drawback the work during the day was of a high order. During the day the crowd kept increasing, and some of the events had as many as 47 entries. The number of spectators reached close to 500 during the afternoon. At noon a substantial dinner was served at the Driving Park Hotel.

About 4 o'clock a heavy shower came up and the rain fell at a lively rate until after 5 o'clock. This did not interfere with the sport, however, as the shooting went merrily on until the full programme was run through.

The subscriber's tents were all provided with chairs for the accommodation of the shooters and visitors, and these were liberally patronized. The management also placed a chair behind each of the firing points and as one squad neared the end of its string the members of the next squad were hustled out and obliged to place themselves in these chairs, the result being that no tedious waits occurred. During the day 5,050 targets were thrown, the total amount of surplus over guaranteed purses being $278. Of this amount $152.90 was added to the purses, and $125 10 was divided among the shooters as average premiums. First average money in each class was $27.80 and second money $13 90. Willy Wolstencroft, who at previous shoots this season has been shooting poorly, pulled up into his old-time form and rolled up an average of 88 8-10 in the expert class, a splendid showing under the conditions. E. D. Miller was also in close-shooting form, getting second average money in the expert class with 86 6-10. The first average money in the semi-expert class went to Wm. R. Fieles on 82 9-10, Walter C. Cady being second with 81 4-10. Seth Clover jogged along all day at a winning pace, securing first average with 89 6-10, breaking 121 out of 125 targets. John W. Fulford chased Clover closely all day, but had to be content with second average on 88 8-10, breaking 120 targets. It was 6:30 when the last shot was fired and 7:10 when the tired party boarded the train for the city. About the time they reached their supper tables the clouds had burst again and the rain began to fall in torrents. At the hour for retiring the rain was still falling with every prospect of continuing to do so on the morrow. The full scores of the first day's events are shown below:

No. 1, 10 singles, entry $1.50, $20 guaranteed. No. 2, 10 singles, entry $1.50, $20 guaranteed. No. 3, 15 singles, entry $2, $30 guaranteed. No. 4, 10 singles, entry $1.50, $20 guaranteed:

The Second Day

opened dark and threatening, the rain still coming down heavily, and there being no sign of clearing weather. Long about 8:30, however, the rain ceased, and at 9:30 the sun showed its face. The rest of the day was very warm, shooting blouses and even vests being discarded by the shooters. The entry lists were not as heavy as on the opening day, the rain during the previous night and the threatening look of the early morning having kept many shooters away. Nevertheless some of the events had 37 entries and in only a very few events did the entries run under 30. The rain had left the ground soft and muddy, and rubbers were in demand. The number of visitors was even larger than on the first day and all seemed to be deeply interested in the work of the shooters.

Among the new comers to the ranks were J. A. Penn and W. H. Lemon, of Wheeling, W. Va.; J. E. Wempler, of Irwin, Pa.; T. J. Langhrey, of Ligonier, Pa.; Noah Johnston and C. W. Moyer, of Canonsburg, Pa.; T. F. Cummings, of Scottdale, Pa.; Timothy McNamara, of Penn Station, Pa.; W. Jones, of Braddock, Pa.; J. Crable, of East Liverpool, O.; and George Cochrane, of Gilt Hall, Pa. Both John W. Fulford and Seth Clover received promotion to the semi-professional class, as a reward for their superior performance of the previous day. The wind blew from the same quarter as during Tuesday. During the day the shooters were enlivened by the trotting and pacing of a number of fast horses which were being exercised on the mile track.

The shooting was fully as good as on the opening day, first honors in the expert class again going to Wolstencroft, 87½, Neaf Apgar being a good second with 85½. In the semi-professional class Fieles was again first with 80, Fulford and Clover being tied for second average on 72½ each. The amateurs were in prime form, W. S. King, who captured first honors, having an average of $95^{1}/_{10}$, while $93^{1}/_{10}$ each was made by George Cochrane and Young, who divided the second pot. The surplus amounted to $112.50, of which $61 87 was added to the purses and the balance devoted to paying the average moneys. First money in each class was $11.25 and second money was $5 60. The number of targets thrown were 4,385. The full scores follow:

No. 1, 10 singles, entry $1.50, $20 guaranteed. No. 2, 15 singles, entry $2, $40 guaranteed. No. 4, 20 singles, entry $3, $50 guaranteed:

The Final Day

started in with a fairly strong northwest wind which was a boon to people who were obliged to spend the day out of doors, tempering as it did the edges of the sun's rays, Old Sol having a decidedly hot temper. It was 9:30 when the first shot was fired, the opening event, an extra sweep at 10 targets per man, having 15 entries. The first regular programme event had 20 entries. The ground was nicely dried out by this time. The attendance was light during the entire day, and three of the events ran short of the amount guaranteed. In No. 3 event there was a shortage of $2; in No. 5 $9.20, and in No. 9 55 cents, an aggregate of $11.75. On the day's work, however, there was a surplus of $11.25. In the regular events 2,675 targets were thrown. About 600 to 700 were also thrown in extra events. For the third time Wm. H. Wolstencroft forged to the front in the expert class, making an average of $88^{5}/_{10}$, Miller being second with $86^{4}/_{10}$ and Neaf Apgar being a close third with $84^{2}/_{10}$. Fieles $81^{2}/_{10}$ and Clover $81^{2}/_{10}$ were winners in the semi-professional class. In the amateur class "Dr." James Wolstencroft was first with 85 and W. C. Clarke second with $82^{8}/_{10}$. The average moneys were $1.12 and 56 cents respectively, for first and second in each class. Despite the small turnout of shooters the day was a thoroughly pleasant one to all concerned and every one of the contestants regretted the close of what was one of the most enjoyable tournaments of the season. It was a few minutes after five when the tournament was declared closed.

The projectors of the Interstate Association were pleased to be able for once to run through their programme, as at both Baltimore and at Staunton the elements took a hand in and cut short the sport. Too much cannot be said in praise of the manner in which the details of the affair were handled by E. E. Shaner, F. F. Davison, "Jim Crow" and "Old Hoss," each of whom worked like Trojans from early morn until the last gun was fired each day. Not only in the routine work of the shoot did they busy themselves, but they also did the bulk of the entertaining of the visiting shooters both during and after schedule hours. To these four whole-souled and hustling sportsmen is due the success of the entire tournament which will go upon record as one of the most successful and enjoyable of the season.

The scores of the third day's events are here shown in detail:

The East Side—Mutuals.

THE monthly shoot of the East Side—Mutual Gun Club took place at Weidenmeyer's Park, Newark, N. J., on May 5. Each man shot at 25 targets, Van Dyke breaking 23, Koegel 22, Hedden 20, Young 18, Hague 18, Cramer 17, Baar 16, Schraft 16, Fisher 15, Bitz 14 and Schork 14.

In a series of sweeps the scores follow:

	10 birds.	15 birds.	15 birds.	10 birds.	10 birds.
Hedden	10	13	13	10	10
Schraft	6	12	12	7	7
Baar	8	11	13	9	8
Van Dyke	8	12	13	9	7
Bitz	4	..	..	..	..
Hague	4	9	8	8	8
Schorck	4	..	..	..	..
Kramer	7	..	..	..	..
Fisher	3	..	..	..	..
Young	6	9	11	..	..

Officers of the Hartford Gun Club are: President, S. J. Bestor; Vice-President, Sidney E. Clark, Secretary and Treasurer, Louis J. Webb.

The Tomato Can Shooting Club.—II.

March 1.—Dr. Tooley told me that the report which I wrote about the beginning of the club and the pigeon shooting was not quite in form like the reports of other clubs, but as he had enjoyed reading it he thought it would be printed, and that I should write up to date. The boys fe t pretty sore about pigeon shooting, and as the club wasn't made up we had made up our minds to let shooting go. But one day Dr. Tooley told us that we could get along better with artificial targets by standing close to trap, that the targets would go straight away, only rising and falling. But the boys said that they wouldn't put money in it, that it would just fizzle as pigeon shooting had done. Then one day the Doctor met us and said that we could make a trap that would cost nothing but work, a trap with a hickory spring, that would throw potatoes, apples, etc.; apples were plentiful last fall. Then he showed us a drawing and explained it. Lef Haughawaught was present, he is a carpenter, don't shoot any, but said that he would make it if material was found; 6ft. of 10×1¼in. plank, 6ft. of 2×4in. dry hickory, a piece of board and some old lightning rod iron.

So we got things together, and the trap was made. All of us were anxious to see trap work and ready to try it next day. Pete Oberholtzer bought a basket of big Falawalder apples, and one was placed on the bent spring, and all of us tried it, but the apples got to the ground before anybody could shoot. Some one said that by adding the long piece of an elliptic wagon spring the trap would make a longer throw. The man that brought the spring from blacksmith shop also brought some spiral springs of an old sofa. About the time we had them fixed, the Doctar came with two elastic straps, which acted after the other springs had exhausted their power. When all was done the Doctor said that it was an unparalleled combined complication of various forces, which needed only the addition of electricity and a big dam-site to be perfectly unique. Thought a drawing should be sent for illustration. Bill Auker picked up a tomato can from a heap of old rusty ones lying near, and, after getting the spring triggered, he put the can on the pieces of curved strap-iron which held the targets. I forgot to say that the plank was canted upon a sawhorse at an angle of 45 degrees, end braced against a log and some big timbers to brace the horse.

Then Bill stood ready to shoot, about fifteen steps, a little to one side and said pull! There was a rope to the trigger. Bill got his gun off and the can took a second flight, giving out a metallic ring. Everybody knew that Bill had hit and Bill was the proudest champion shot, Doctor said, that he ever knew. That can was a curiosity; every one examined it and carefully counted the five No. 4 shot holes and dinges. Doctor said we must get No. 7 or 8 shot, but No. 4 is the smallest size kept in our stores or used by us. We had much shooting before all the cans were hit. Several of us had hit a can, and the Doctor said that is a revelation; lots of fun for the boys. Mr. Fox was going to Sudbury next day, and said that he would bring a big lot of cans from the big hotels, who would be glad to have them hauled away. So the next Saturday the crowd was big, some to see the trap, some to see the shooting at flying targets, and all to have a good time. Mr. Fox had filled a spring wagon bed with cans—tomato, peach, corn, peas, bean, salmon, lobster, etc. Nearly all had pictures on.

It was the difference in size which brought on the first kick; the Doctor said that was the word used for trouble at shoots. Jake Wurst is always obliging, and he volunteered to set and load the trap. But every time it was Bill Auker's time to shoot there was a little can on the spring and Bill missed. Doctor said Bill wasn't in good shooting form. Bill got so mad and rattled that he couldn't hit the big peach cans which Jake gave him afterwards, so we had to make Rule 1st. Doctor said it was the beginning of a promising organization. Rule 1st, every shooter to have the same number of same size cans. Then Doctor said we could classify each shoot as a lobster, corn, peach, etc., shoot. These hotel cans were better than the home put up cans, as all had their tops partly to them, and the openings could be nearly closed, so would fly better. We just had lots of fun, every one hit some, and the missers didn't care for the teasing. We, and everybody, said it was jolly, and Mr. Fox too; he said that he would furnish all the cans we wanted.

The next Saturday the Doctor brought his gun with him and a square box. He said that the club was now big enough and so eager to shoot that he thought we could raise money enough for a set of traps and targets. That to start with, he would shoot against the whole crowd for $10. That if he won he would donate the whole $20 to the club. If he lost only the $10 was to go to the club. Terms to be, that the Doctor was to put more holes in five cans than were in all the five cans of all the other shooters; he to shoot last. As the shooting went on the boys seemed to have improved, and more than usual holes were in the cans. The boys had a good deal of fun with the Doctor's prospects, not lessened any when the Doctor took a little short gun out of a canvas bag. It had no hammers and only weighed 7lbs. It had no ramrod. After the Doctor had put it together, he opened his box and took out shells, he called them. The gun opened on a hinge and the load was put in behind. Then the Doctor was ready to shoot, and said "Pull!" We all thought that a cap had snapped, as there was so little sound or smoke; but the tin can, just at the highest point, made a big jump, the strike of shot was loud.

When the can was brought in, retrieved, Doctor said, it was too full of holes to be counted. When the Doctor's five cans were laid together there was no counting. The boys had learned that they could learn to shoot at flying targets. They didn't feel mean or poor. The Doctor told us all about trap shooting, smokeless, soundless powder and chokebore guns, that many American guns, hammer and hammerless, were made by different makers at low prices, that were entirely safe and reliable shooters with any decent charge, and that right here and now, he moved and resolved that this club shall be called the Tomatoe Can Shooting Club; adopted unanimously. The Doctor moved and resolved that the club adjourn to meet next Saturday for the purpose of more fully organizing, electing officers and appointing committees, etc. Adopted unanimously. YONEY WINKLEBLECH, Sec'y.

Lakeside Semi-Monthly.

GENEVA, N. Y., May 6.—The Lakeside Gun Club held their semi-monthly shoot in a pouring rain. The following are the scores: First contest, 10 kingbirds, entrance 50 cents, four moneys: Sheriden 10, Purcell 7, Becker 7, Banks 8, Robinson 3, Stacey, Sr., 9, Stevens 6, Loomis 7, Dey 5.

Second contest, 15 kingbirds, 9 singles and 3 pair, badge shoot:

Class A.

Class B.

Banks	100010011	11 11 11— 9	Becker	111001100	00 10 01— 8

Tie for badge in class A won by Stacey. Banks won badge in Class B.

Third contest, 5 pair, entrance 50 cents, three moneys: Sheridan 6, Purcell 6, Banks 8, Loomis 4. Next shoot May 19.

J. G. S.

Willimantic Gun Club.

NEW LONDON, Conn., April 30.—The one-day shoot of the Willimantic Gun Club, held on their grounds on Friday, April 29, was a grand success in spite of the steady down-pour of rain all day, which kept a good many away who had intended being present. The visiting sportsmen were O. R. Dickey, Chas. Barrett, "Climax" Burns, Frank Cowee, Gail Woodruff, from Boston; Whittiesey, Decker and King, from Hartford; Bill and Pitt, from Middletown; Bristol, Savage and Bates, from New Haven; Bush, Ames, Strong, Cady and Penrose, from New London; Sterry, from Tolland, and a number of others.

During the afternoon a meeting was held on the grounds to appoint committees to act in the interest of the tournament to be held for the benefit of the Connecticut and New Jersey Leagues' tournaments, the first of which will take place in New London the latter part of May or the first of June, dates to be determined upon not later than May 5. Mr. H. L. Edgarton, the secretary of the Willimantic Gun Club, acted as cashier and general hustler, and did everything up in first-class order. Mr. Nelson and other prominent members of the gun club were on hand and took an active part in the management of the shoot, as well as participating in the shooting. Taking all in all, regardless of the rain, every one had a pleasant time, and most of the shooters shot in good form. Sterry, of Tolland, only missed one bird out of his first hundred; Ames, of New London, dropped only 12 out of 170; Strong, of New London, dropped only 14 out of 130; Penrose skipped 14 out of 255. Dickey, Barrett and "Climax" of Boston, also shot in good form, as well as Bates and Savage, of New Haven. The following gentlemen were appointed to act as committee for Connecticut: Bates and Bristol, New Haven; Webb and Nelson, Willimantic; Whittlesey and Decker, Colt Gun Club, Hartford; Pitt and Bill, Middletown, and Cady and Penrose, New London. Mr. Webb was elected chairman and H. A. Penrose secretary. There will be no pains spared to make this shoot one of the pleasantest two-days' shoots ever held in Connecticut. There will be a two-days' open sweeps, and on the second day the team race will be shot between New Jersey and Connecticut, 10 men on a side, $50 per team, race to be the best two out of three. Following are the scores:

Rochester Defeats Syracuse.

THE second team match between teams of the Rochester Rod and Gun Club and the Onondaga Sportsmen's Club took place at Rochester, on May 5, the weather conditions being unfavorable. Peoria blackbirds were used and each man shot at 25 from 5 traps under the rapid-firing system. The teams comprised 24 men each. The scores were as appended:

Rochester.		Syracuse.	
McVean	17	Hudson	17
J Rissinger	23	Hadden	21
Borst	21	Howell	17
F Smith	24	Dennison	16
Truesdell	18	Becker	20
Schmitt	18	Ayret	19
Weller	19	Le Force	22
O S Stull	20	C Walters	21
H J Stull	30	Duguid	17
Wilkinson	19	D Walters	22
Van Ostrand	20	Lansing	22
C Smith	20	Ashton	13
Meyer	19	Hookway	21
C Rissinger	21	Hilloway	18

CORRESPONDENCE.

THE FOREST AND STREAM is the recognized medium of entertainment, instruction and information between American sportsmen. The Editors invite communications on the subjects to which its pages are devoted. Anonymous communications will not be regarded. The Editors are not responsible for the views of correspondents.

SUBSCRIPTIONS.

Subscriptions may begin at any time. Terms: For single copy $4 per year, $2 for six months. Rates for clubs of annual subscribers:

Three Copies, $10. Five Copies, $16.

Remit by express money-order, registered letter, money-order, or draft, payable to the Forest and Stream Publishing Company. The paper may be obtained of newsdealers throughout the United States, Canada and Great Britain.

Foreign Subscription and Sales Agents—London: Davies & Co.; Brentano's; Sampson Low & Co. Paris: Brentano's. Foreign terms: $5 per year, $2.50 for six months.

ADVERTISEMENTS.

Inside pages, 30 cents per nonpareil line. Special rates for three, six and twelve months. Seven words to the line, twelve lines to one inch. Advertisements should be sent in by Saturday previous to issue in which they are to be inserted. Transient advertisements must invariably be accompanied by the money, or they will not be inserted. Reading notices $1.00 per line. Only advertisements of an approved character inserted.

Address all communications:

FOREST AND STREAM PUBLISHING CO.,

No. 318 Broadway, New York City

A Fine Programme for Washington.

BELOW will be found the full programme for the second annual tournament of the Capital City Gun Club, to be held at Washington, D. C., on May 16 to 19 inclusive. The shoot will take place at the Ivy City race track.

First Day.—No. 1, 10 bluerocks, entrance $1. $10 guaranteed; No. 2, 15 bluerocks, ent. $1.50, $15 guar.; No. 3, 15 bluerocks, ent. $1.50, $15 guar.; No. 4, 20 bluerocks, ent. $2, $20 guar.; No. 5, 15 bluerocks, ent. $1.50. $15 guar.; No. 6, 15 bluerocks, ent. $1.50, $15 guar.; No. 7, 10 bluerocks, ent. $1, $10 guar. Second Day.—No. 1, 10 bluerocks, ent. $1.50, $20 guar.; No. 2, 15 bluerocks, ent. $2, $30 guar.; No. 3, 20 bluerocks, ent. $2.50, $40 guar.; No. 4, 25 bluerocks, ent. $3, $50 guar.; No. 5, 15 bluerocks, ent. $2, $30 guar.; No. 6, 10 bluerocks, ent. $1.50, $20 guar.; No. 7, 15 bluerocks, ent. $2, $30 guar.; No. 8, 25 bluerocks, ent. $3, $50 guar.; No. 9, 15 bluerocks, ent. $2, $30 guar.; No. 10, 20 bluerocks, ent. $2.50, $40 guar.; No. 11, 15 bluerocks, ent. $2, $30 guar. Average Money—10 per cent. will be deducted from all purses each day for average money, divided as follows: 30 per cent. to first and 20 per cent. to second average in expert class, to those shooting in all guaranteed purses this day; 25 per cent. to first, 15 per cent. to second and 10 per cent. to third average in amateur class, to those shooting in all guaranteed purses this day. Third Day.—No 1, 10 bluerocks, ent. $1.50, $25 guar.; No. 2, 20 bluerocks, ent. $2.50, $40 guar.; No. 3, 15 bluerocks, ent. $2, $35 guar.; No. 4, 25 bluerocks, ent. $3, $60 guar.; No. 5, 15 bluerocks, ent. $2, $35 guar.; No. 6, 10 bluerocks, ent. $1.50, $25 guar.; No. 7, 15 bluerocks, ent. $2.50, $40 guar.; No. 8, 25 bluerocks ent. $3, $60 guar.; No. 9, 15 bluerocks, ent. $2, $35 guar.; No. 10, 20 bluerocks, ent. $2.50; $40 guar.; No. 11, 15 bluerocks, ent. $2, $30 guar. Fourth Day.—No. 1, 10 bluerocks, ent. $1.50, $25 guar.; No. 2, 15 bluerocks, ent. $2, $35 guar.; No. 3, 20 bluerocks, ent. $2.50, $40 guar.; No. 4, 15 bluerocks, ent. $2, $35 guar.; No. 5, 25 singles, team race, 6 men, entrance $20 per team; first prize $60, $25 of which is given by J. T. Moylan, proprietor Owen House; second prize, Parker hammerless gun, and other valuable prizes to be announced during tournament. The shooting will commence at 9 A. M. sharp each day. All purses except No. 5 (team race) will be divided 30 and 30, 20 and 20 per cent. Target money deducted from purses when entries will allow. Extra events if time permits.

Rules Governing.—American Shooting Association rules, except the following changes: The gun may be held in any position; the load of shot for both 10 and 12-gauge guns must not exceed 1¼oz. struck measure. Disposition of ties—All ties divided. Bluerock targets will be used. The Amateur Protected—All experts will be classified, and amateurs will have an equal show for winning purses with the best shots. Ten traps will be used and contestants shoot in squads of 11. The experts must shoot first at known traps and unknown angles. All experts will be debarred from entering the contest after the last gun of the first squad has been fired. While rotating from No. 1 to No. 5, these traps will only be sprung. After passing No. 5, the shooter will get birds from Nos. 6 to 10. After all the experts have finished their score, the amateur squads begin firing and shoot at known angles from the trap directly in front of them. All teams must be composed of bona fide members of the club they represent. Any club may enter one or more teams, but a member can shoot on only one team.

Answers to Correspondents.

☞ **No Notice Taken of Anonymous Correspondents.**

H. W. H., Covington, Ky.—What black bass flies should I use on Kentucky River in June? Ans. Professor, silver-doctor, the hackles, grizzly-king, royal-coachman, scarlet-ibis, Parmachenee-belle, polka, Montreal, oriole.

M. R., Lakewood, N. J.—What trout flies should I use in the southern part of Maine for brook trout? Ans. Silver-doctor, red-ibis, Parmachenee-belle, polka, professor, Montreal, coachman, cowdung, white-miller, the hackles, grizzly-king, great-dun, Jenny-Lind.

T. W. N. F., Foxburg, Pa.—What is the weight and length of the largest speckled or brook trout that you have a record of? Ans. Hallock, in his "Sportsman's Gazetteer," mentions one of 17lbs.; Dr. P. F. Hoy saw one weighing 12lbs., caught by Seth Green at Sault Ste. Marie; Geo. Shepard Page obtained a Rangeley specimen that weighed 11½lbs. The lengths are not stated.

A BOOK ABOUT INDIANS.—The FOREST AND STREAM will mail free on application a descriptive circular of Mr. Grinnell's book, "Pawnee Hero Stories and Folk-tales," giving a table of contents and specimen illustrations from the volume.—*Adv.*

THE SPRING SHOOT.

When you get a bird or beast from Florida or Hudson's Bay, the Chesapeake or Puget Sound, and want it mounted true to life, send it either skinned or in the flesh well salted, to

Ward's Natural Science Establishm't
ROCHESTER, N. Y.

Also all kinds of fish handsomely and correctly mounted. Write for booklet "Heads and Horns."

THE SALMON FISHER.

BY
CHARLES HALLOCK.

CONTENTS: Distribution of the Salmon. Life History of the Salmon. Technology of Salmon Fishing. Salmon Fishing in the Abstract. Luxury of Salmon Waters. Itinerary of the Salmon Rivers.

A book to read *now*; and to be put in one's pocket for reading again in camp.
Cloth, 126 pages. Price $1.00.
FOREST AND STREAM PUBLISHING CO.,
318 Broadway, New York.

SOME anglers labor under the false impression that large dealers and manufacturers charge more for their goods than the keepers of small shops. A glance at our new Illustrated Catalogue and Price List for 1892, which we will mail on receipt of 6 cents to cover postage, will show how much they are mistaken.

ABBEY & IMBRIE,
Manufacturers of All Grades of Fishing Tackle,
18 Vesey Street. New York.

Notice to Fishermen! Cut Prices for 1892!

I am with you again with lower prices for Fishing Tackle. I find by experience that putting down prices and not decreasing the quality, it increases my business every year.

BUILT ON HONOR

SOLD ON MERIT

Such are the goods we handle; nothing else if we know it; when we find it out we drop 'em; no trash; no worthless or useless goods or foolishness, even at a lower price than others.

Our idea is to please every buyer; we want to sell things which will be of some use. Few establishments are as philanthropic.

Chas. Daly Hammerless Guns

We are constantly receiving unsolicited testimonials from gentlemen throughout the United States expressing pleasure in having a gun of this make. We mention a few here:

IRONTON, O., April 15, 1892.

GENTLEMEN—I have a Daly 3-barrel, 12-gauge, .32 cal., and there are three guns of the same kind in this town, and we are beating the regular target rifles with them at 100yds., etc., etc. Yours, etc., E. C. SLOAN.

COLD WATER, Mich., Nov. 13, 1891.

GENTLEMEN—My Daly Gun has been used constantly for twenty years, yet there is not a loose thing about it, not even the least rattle. I think so much of that gun that the only gun I ever would want would be a Daly. What will you charge me for a Diamond Ejector? Yours truly, J. S. CHANDLER.

SARATOGA SPRINGS, April 26, 1892.

Messrs. Schoverling, Daly & Gales:

GENTLEMEN—Enclosed find check for Daly gun. A shooting trip and a most thorough trial of the gun meets every expectation. The left barrel makes the best "close" pattern at 50yds. I ever saw. It is the strongest long-distance shooting gun I have ever seen. I shot a duck at 70yds. with No. 2 shot, and with the rifle barrel I put 30 shots in the bullseye at 50yds. Very truly, DR. E. B. ATKINS.

The above and many other testimonials are received almost daily by us from gentlemen who buy the

Charles Daly Hammerless or 3-Barrel Guns.

HAVE YOU SEEN THE
"KOSMIC?"

This question we are asking the anglers of America, and have received many answers. Here is one of them:

I send you herewith a Photograph of trout (McCloud species) taken by me in Prosser Creek, at the head of the Serrie Lake Ice Company's pond, last September. They were taken in the night, between 9 and 10 o'clock, with the red spinner dressed on size 8 Sproat hook, and only one fly in the cast. The trout weighed, when taken from the water, 6½, 6¾, 5 and 2 lbs. The rod used was a 5oz. Kosmic, made by A. G. Spalding & Bros., New York. The 6¾ pound trout was hooked foul, the hook fastening at the base of the caudal fin, and the fish had the full power of all his fins, and gave me quite a tussle, which lasted over thirty minutes, but I finally brought him to the landing net, tail foremost.

Advertisements under this head, strictly limited to WANTS AND EXCHANGES, will be inserted at the special rate of three cents a word each insertion. The money must accompany the order.

BEAUTIFUL BIRD PICTURES.

I have several plates of Audubon's Birds which I will sell cheap. These are the edition of 1856, on heavy paper, and give the birds the size of life and in their natural colors. Among the species represented are: White-headed eagle, price $12; duck hawk, $10; pine grosbeak, $7; kingbird, $4; wood wren, $4; black duck, $12; and some others. These when framed would make superb ornaments for a sportsman's dining room. Address J. J. A., FOREST AND STREAM office.

WANTED.—A PURCHASER FOR TWO W. & C. Scott & Son's hammerless shotguns, one 12-gauge, 7½lbs., full choke, 30-14½-3, a fine trap gun. Also one 12-gauge, 7lbs., cylinder bore, 28-14½-3, a fine field gun. Will sell together or separate. Price $150 each. Cost originally $225 each. The field gun is perfectly new; the trap gun has been used a few times. Address H. P. FESSENDEN, 297 Washington st., N. Y. City.

ENGLISH FACTORY, COVENTRY, ENGLAND.

Athletes, Cyclists, Baseball and Football Players, Horse-back riders, Boxers and Oarsmen; when you want to ride, run, walk, row, skate or swim a long distance,

ANTI-STIFF

It is a marvelous preparation for Strengthening the Muscular System. With Anti-Stiff there is no faith required; it goes straight for the muscles, and you can feel it at work. It has a peculiarly warming, comforting, and stimulating effect on all weak or stiff muscles and sinews. Quick in its action, cleanly and pleasant in use.

Rub it into the muscles every night for a fortnight, and you will be pleased at its supporting and strengthening properties. There is not, nor has been, anything like it till now. It differs from all Oils, Embrocations and Liniments, both in substance and effect. Some Athletes are so fond of it that they rub it all over them.

Price 20c. and 35c. per box.
Trainers size, $1,00.

IN NORTHWEST WOODS.

WHERE shall be found woods so impressive as the untouched forests of the Northwest coast? Silent and sombre, in their drapery of living green, the mighty tree trunks stand like pillars of some vast cathedral, supporting its dark roof. No sound is heard of bird or beast. The traveler's footfall alone breaks the stillness, and often even this is not heard on the soft carpet of moss which covers the ground. Rarely does a ray of sunshine penetrate the foliage to lighten the twilight of the forest. It is a solemn place. One feels as if he were in church and hesitates to speak aloud. Save for the green, there is no bit of color to be seen, except on the ground, where careful scrutiny will detect bright red or brown cups o f mosses, or tiny flowers half hidden. Sometimes the woods are open, giving long vistas between the tree trunks, or again, dense thickets of fern, umbrella plant and sallal make passage impossible.

Journeying through such forests, the traveler may come to some little stream whose course is wide enough to let the sunlight in. Here are falls and rapids, where the trout hide, and wider quiet pools which even yet are the homes of a few beaver, living reminders of a race now approaching extinction. Along the stream is more life. A sheldrake or two may be seen now and then, an ouzel, quaintly plying his fishing along the shore, dark-colored song sparrows among the bushy thickets, sweet-voiced thrushes in the taller trees. Perhaps, too, may be heard the alarm note of a grouse, and the rattling chatter of the tiny pine squirrel falls upon the ear.

If the trail follows up the stream, a change takes place in the life met with. This is not noticed all at once, but will be seen in the course of two or three days' travel. The giant trees, 300ft. in height, do not grow here. Their place is taken by smaller, hardier pines, which clothe only a part of the whole landscape. Open parks and stretches of meadow land are passed now and then and rocky cliffs overhang the way. From the loose fragments which have fallen at their base comes the trumpet note of the little chief hare, and in the meadows and among the pines feeds the mule deer, who has taken the place of his cousin, the blacktail of the lower lands.

Still climbing higher, and facing steeper slopes, the panting pack horses reach the mesa above, home of the dusky grouse and the mountain woodchuck, whose piercing whistle often shrieks through the quiet air. Here is seen the sign manual of bruin, who has plowed up the ground, turned over rocks and torn to pieces old rotten logs, in search of the small game on which he preys. Perhaps the woodland caribou has left in the soil the impress of his broad hoofs. Here, too, the wild sheep feeds, close to the safe refuge afforded in time of danger by the towering peaks of naked rock, which rise above the rolling table land.

Much beyond this a rider cannot go. He must leave his horses at the base of these rocky peaks, and his further advance must be on foot. If he climbs still higher among the snow banks and the ice rivers of the mountain's top, he will find on the cliffs of the narrow ravines the slow white goat, about the little lakes at the glacier's foot the shy bighorn, and everywhere on the summit the white-tailed ptarmigan.

All these things are good to see and to hear and to be with. To have been with them leaves happy memories, and longings perhaps never to be satisfied.

DANGER TO THE PARK.

IN another column we print extracts from the debate in the Senate on the bill relating to the Yellowstone Park, which was introduced by Senator Warren, and passed the Senate May 11. These extracts will repay perusal, for they set forth very clearly many facts in connection with this reservation.

It is acknowledged by all familiar with the Park that its boundaries should be fixed, but when we consider that this bill sacrifices a considerable portion of the reservation, it is a serious question whether the loss by its passage would not more than counterbalance the gain.

The short of the bill is that it makes the cut off on the northeastern boundary and cuts a slice off the southwestern boundary, including in such slice a part of the Falls River country, the best moose country in the reservation. Only one-half of the forest reservation is included within its boundaries. The balance of that reservation is thrown open. All these changes, therefore, are changes to the disadvantage of the Park as it now exists—for the forest reservation is set apart under Executive proclamation, which is as effective as an act of Congress. All of the legislative features in the Vest bill for the protection of the Park are eliminated in the present measure, but those features are the most important ones of any proposed legislation.

The Park is threatened now by serious dangers. There are selfish influences pressing upon it in every direction, and the very people who should have its interest at heart, that is the inhabitants of the surrounding States, are the ones most intent upon accomplishing its destruction by fostering private and corporate encroachments upon it. The Park belongs to the whole country, and this very thing is its misfortune, for what belongs to all belongs to none, and no one esteems it his particular duty to look after or care for it.

EFFECTS OF GARBAGE ON FISH.

IN the summer of 1891 the city authorities of Newport, R. I., begun the practice of dumping garbage in the sea off the harbor, thereby causing widespread fear of shore pollution and injury to the fishing industries. The Newport Sanitary Protective Association appointed a committee consisting of J. J. Van Alen, Esq., Prof. C. E. Munroe and Dr. C. A. Siegfried, members of its council, to investigate the subject and make a report. The committee sent to fishermen in the vicinity, to chairmen of health boards in other cities and to public officials a circular with a series of questions as to the effect produced upon the fishing by casting garbage into the sea. From information obtained from these sources a preliminary report was made to the association in which are formulated the following propositions:

1. Garbage cannot be considered as food for our edible fishes.

2. It does not attract food fishes; it repels desirable varieties.

3. It spoils fishing grounds.

4. When consumed by lobsters it spoils their flavor.

5. It destroys shellfish beds.

6. It is liable at any time, and unexpectedly, to return to shore, and pollute beaches.

The testimony goes to show that only such scavengers as dogfish and other sharks seem to be attracted by garbage, while such fish as furnish sport for hook and line fishing are driven out of the polluted waters. Not only is offal offensive to them, but its fine particles lodge in their gills and impede respiration. The committee received a letter from Mr. Eugene G. Blackford stating that "his experience proves that fisheries and shellfish beds are destroyed by garbage dumping in a short time, and that lobsters and crabs are similaly affected."

The subject of beach pollution is also a serious one. Scum and other surface floating materials contaminate the water to the great annoyance of sailing and fishing parties, and the discomfort of bathers.

The committee would permit dumping of garbage only in the open sea, remote from shallows, beaches and fishing grounds, on a beginning ebb tide and with due regard to winds and currents. They would recommend the better way of destroying it by fire, either by householders or in public crematories.

SNAP SHOTS.

COMPRESSED sawdust, by clearing the streams, saves the trout and serves an excellent purpose as kindling and fuel. Thousands of tons of this baneful product of the Maine lumber mills have been utilized in the form of compact blocks and bundles, and herein we see a solution of the very difficult problem, what to do with the sawdust. Compress it, make it a source of revenue, and at the same time prevent the destruction of trout spawning-beds by its hurtful presence. If the water-soaked masses of sawdust already in the streams could be turned into a veritable mine of wealth, none would rejoice more than the anglers in the hope of the possible benefit to trout.

The 21st annual meeting of the American Fisheries Society, composed of fishculturists, anglers and others interested in the increase and protection of fishes, will be held in New York on Wednesday and Thursday, May 25 and 26. The first meeting will be called at 10 o'clock, May 25, at the Holland House, Thirtieth street and Fifth avenue. Many interesting papers have been promised for the sessions, and a good attendance is assured.

In our angling columns will be found an opinion written by J. S. Van Cleef, Esq., of the Poughkeepsie Bar, as to the lawfulness of Sunday fishing in Jamaica Bay. Mr. Van Cleef gives a clear exposition of the principles involved in interpreting the provision of the new law with respect to this, and reaches the conclusion that fishing is allowed on Sunday. What a commentary is here afforded on the game and fish legislation of the day. A codification committee is provided to draft the law, the legislators discuss it, hear arguments, indulge in protracted debates, finally pass the measure, and then the layman must appeal to a lawyer to discover what it means.

Undaunted by the treacherous defection of Senator Wm. Lindsay, which killed their former measure in the Legislature, the Kentucky advocates of fish protection have introduced another bill, and entertain strong hopes of its adoption by both houses. It is an omen of promise that some of the Senators who were formerly opposed to such a measure are now counted among its supporters; indeed the new bill has been introduced by Senator George who voted against the first one. Interest in this Kentucky reform movement is by no means confined to the limits of the State; and we hope to chronicle in the passage of the fish bill the triumph of common sense and sound public economy.

Few sportsmen have ever enjoyed a more substantial claim to grateful recognition from their fellows than Judge O. N. Denny, of Oregon, who has just been presented by the Willamette Rod and Gun Club with a handsome testimonial for having added a new game bird to America. The man surely was worthy of such a gift, and the gift itself, a group of Mongolian pheasants, is both beautiful and appropriate, and speaks volumes for the good taste of the donors. Through the courtesy of one of the participants in the presentation we are enabled to add to our account of the event portraits of some of those who took part in it, and an excellent illustration of the testimonial itself. As here pictured only a portion of the massive frame is shown.

Just as we go to press we learn that the Minister of Fisheries has given favorable consideration to the salmon anglers' petition so far as to assure the petitioners that existing regulations shall be strictly enforced, although political and other influences make any further restrictions at present impossible. If their action shall thus have led to an observance of the present rules regulating the use of nets, the efforts made by the American and Canadian petitions cannot be said to have been wholly fruitless.

Amateur photographers—and most sportsmen use the camera nowadays—should read the amateur photography plan of the FOREST AND STREAM as set forth in our last issue.

The Sportsman Tourist.

THE HUNTER'S HORN IN THE OZARKS.

WHEN I read some of the conflicting accounts of Mr. Weaver's adventures in the Ozarks, his failure to find game, and the fair sounding replies of the recalcitrant guides; I determined to write a letter to the FOREST AND STREAM and tell its readers, once and for all, where the game lies and where the guide errs; not only in the Ozarks, but everywhere in this blessed country where game is supposed to be at all. And I want to say that the key to this valuable piece of information came to me, after many years experience, only when I read about brother Weaver's trials, and the no less mortifying trials of the guide. Now I have never hunted except in the way good Americans ought to hunt: once in a while by way of a holiday and as a relaxation from other pursuits, so that I am not a past grand master of the plains and mountains. I do not know all game localities but only a few where I have hunted. I have hunted various kinds of game in one or two Eastern States and in Illinois, Iowa, Minnesota, Dakota, Colorado, California, New Mexico, Missouri, Arkansas and Nebraska. So it will be seen that I have had rather a diversified experience, though, as I say, not an extended one, and many moons ago I learned to seek no information from guides and local hunters. I was forced to the belief that if they knew a good place they would not tell a stranger where it was and that, in the majority of cases, they did not know what they presumed to know. And then, reading the accounts above referred to, I began to get the hang of the whole matter as I believe, and that is, that the whereabouts of all game is as uncertain as the weather and as variable as the lay of the land, and for the matter of that, very largely dependent upon those two elements. The thoughtful sportsman should be and I believe can be a better judge of the whereabouts of game then the local guide, or at least just as good a judge, and my own experience has taught me that he is far more reliable. Of course there are many professional hunters who know all that any man can know of the habits of game and thus of its probable whereabouts, but they sometimes keep those places for special occasions.

I was once trying to shoot a few miserably suspicious ducks in a slough in central Dakota, and when I had about given up the whole territory as profitless a lank and lazy individual drove by in a buckboard with the traditional old muzzleloader and the conventional string of mallards. Of course, he told me that he got his ducks "back yonder" on the prairie, although I did not ask him for any such information nor for anything. He went on his way, and I called to my companion and took the back track of that buckboard for over three miles until we came to a slough that from that day to this, any day in September, is good for a plumb wagonload of mallards in the middle and two dozen jacksnipe on the outside. I will be there in September.

There are a couple of cattlemen at the mouth of a little cañon in southeastern Colorado who wont let tourists ride up their way because they say they stampede the cattle; and I know just as well as I know I am alive that about two miles beyond their shanty are slathers of blacktails; and the next time I am in that country there is where I'll hunt. I knew it at the time because it was in the track of a belt of country that was not touched by miners, railways, stage lines nor Ute Indians. The deer naturally run in there from twenty miles around.

I wish I had time and the FOREST AND STREAM had the forbearance to admit of my telling even the little I have found out about where game is to be found. It would all be about where game ought to be.

I have hunted ruffed grouse on the steep hillsides, where the books tell us they are to be found, and again I have gone down in the bottoms and jumped them out of the alders along little streams. One day they will all be in one place and another day they will be all in the other—depending upon the weather.

About the Ozarks. Last winter the Captain, the Senator and myself took our tents and things and went down there, and the hunters met us at the railway with the dogs and teams and we went over on to the river. We knew the stands and the country, and had plenty to fill the one and hunt the other, because they are a right cordial, friendly people, and as many as could came out and stayed with us. They are such white, clean, square people down there, that we all said it did us good to be with them. But we never started a single deer. Ideal country. A clear stream of water. Had not been hunted any. Heralded as a hunter's paradise. Clearly a case of guides again. Only these guides could only be mistaken. That night we held a council of war, wisdom and weeping. The Captain for war, the Senator for wisdom and the writer for weeping. There was one little thing wrong with this country—a strip of burnt ground across the river. In five minutes we were pitching our tents, and by nightfall had moved half-way back to the railroad. No water except a little puddle of a trickling stream that you could dam anywhere with one of the Captain's boots, and that began about a hundred yards above the tent and disappeared as much further below. But some of us had walked coming out from the railway, and we had seen that here was a little valley, with hogbacks and hollows alternately dipping into it from all sides, with good timber and plenty of undergrowth. We knew that we had hunted in places like this where the deer could not be driven out, and that they ought to be here.

And they were.

I had not got to my stand next morning when old Eph Brazwell's 11×44 shotgun woke the morning echoes, followed by one fatal leg-breaking crack from the Village Blacksmith's rifle. And while their horns wound up and down the valley the mellow and gladsome sound of success, the dogs broke forth again in a perfect pandemonium, and, as the glorious burst of sound swung around the hills, I saw far below me, making for the tent, as big a deer as grows in that country, and a doe at that. Her track in the woods road was as broad as a column of this paper. I kept still, hoping there might be a turn at the tent and a break across to my side, or that there might be another close behind that would come across my way. There was another, too, but she followed her ma, and the two of them went and looked over some bushes at the Senator engaged in his legislative function of putting things out of the frying pan into the fire.

A curious thing happened in that camp. We were aroused one night at 2 o'clock by the sound of a hunting horn. The Captain heard it first. We were all loath to believe it was a horn, but it certainly was. In the cold, dark, starless night, away off in the bleak hills, some home-going mountaineer must have been cheering himself on his way. The genial and generous Captain stirred up the fire and got some hot water with which to make a steaming and comforting decoction, which he dealt out to the recumbent forms by the light of the candle and then we all dropped off to sleep again, wondering, as we have ever since wondered, who blew that mellow blast up and down the frozen hills so far from home, so late at night.

GEORGE KENNEDY.

ONE OCTOBER IN THE FIFTIES.

MY baby girl, just in from school, sits at the piano, and from her finger ends there drops some sweet and simple music that she calls "Forest Scenes," and as she plays the spirit moves me to write some lines about my boyh'od days—to wit:

Those days of old, how well do I remember
The wood of gold, the sere and brown November.

Hold up—that will not do. My story belongs earlier in the season, and loyalty to nature forbids departure from her truth even under the plea of "poetic license." As it comes back to my mind that time bears a mantle of brilliant crimson and flashing gold, with enough rich shades of brown and russet to harmonize the vivid variety. The morning sun is bright, the morning air is crisp and full of motive power. The days which begin with vigor and freshness, at noon ripen into a softened, quieting temperature in which the sun seems to linger in the midst of his fleecy attendants to enjoy gazing down upon the fruition of the year. The distant hill, with its crest of rock or forest, stands out clear cut against the deep blue sky, while down the nearer valley float the misty veils of the Indian summer fairy hosts. Never could pen describe to full perfection the pleasures that October brings to boyhood, joys that after a half century of work and worry still live in memory with a "bouquet" too delicate, an effervescence too piquant, a coloring too vivid for portrayal. We do not join with the love-sick opera singer,

"O joy, O joy, too bright to last."

We celebrate the joys that linger, shining down the years, earning compound interest, paying daily dividends and accumulating surplus at the same time.

The noonday breeze had carried from the church tower down through the village the warning echoes of the stroke of twelve, and the boys and girls from "the academy" swarmed home to the old style 12 o'clock dinner. I well remember it was on Tuesday—ironing day, and many a meal of corned beef and cabbage had doubtless been eaten during that noon hour. However sturdy my health might have appeared, and how much additional proof might have seemed to be furnished by a good appetite, there lurked in my system the seeds of a disease that has, since early years, attacked me at periods regular and irregular; never curable but yielding in a measure to a sort of homeopathic treatment. The doctors give it various names—spring fever, fall fever. Call it what you please. Its attacks used to come as early as when the ice had gone from the trout streams in the spring time: it frequently broke out later on when the bobolink with his tinkling babble and the meadow lark with his pee-cu-liar note called aloud and joyfully to the field, or the shimmer on the river or the silver-plated sound told of cove breezes and dancing waves. In the fall, why of course, it would surely break out in the fall with so many causes in the heavens above, in the fields beneath and in the waters along the shore. Whatever the cause, whenever the time, the only relief for the disease lay in a close and more or less continuous exposure to the contagion. *Similia similibus.*

This was long "befo' the wah" and before the incoming tide from the continental peoples had brought contamination to the New England idea and *morale.* The most violent Sabbath recreation then permissible to the boys was to go after the cows or to take a walk. Perhaps I should say—except in cases of sickness—for I recall one Sunday when word came that old Mrs. Picket was very sick, and that as Uncle Charlie's horse was lame, and as nobody else wanted to handle the Messenger mare, I was drafted to take Aunt May over to Mrs. Picket's. I remember that I felt some and expressed much sympathy for the poor old invalid, but didn't I enjoy that Sunday ride. It was only a couple of miles, bad miles, over there, but the road home over Candlewood hill and Quancatog was so much better that I spared the mare and took the six-mile route back—but I wander—I was always prone to wander.

On the Sunday previous, after church, I had taken a ramble over old Pequot hill, the picket line in rear of the old town, through "Paradise," down back of "Uncle Sanford's" to "Great Brook," now a shrunken thread of water or a chain of almost stagnant pools, and in my cruising had walked up two fine coveys of quail, and so had incurred a very violent attack of the fever. The symptoms followed me all through Monday in spite of Cicero and the subjunctive, and by that memorable Tuesday noon the malady was in a fully developed stage.

I believe it is now recognized as a fact that physical health has a marked influence on the mind, and, as a sequence, on the conscience; it may have been this which quieted my scruples, but in those days it would not have done for a boy to plead any such thing as an excuse for playing hookey. Without going into any niceties of theory I will simply say that my cousin and I had planned to take our schooling in the woods and fields that afternoon. He was to "borrow" Nate's dog, a well trained old liver-colored pointer (good until you came to a fence, when he wanted a helping hand), and to meet me at the goose pond. I need not tell how, after starting toward school and making a little detour, I brought up at the house over the way, nor how my aunt, dear soul, always in sympathy with a boy's whims, loaned me my uncle's gun, a light double-barrel 16-gauge, a perfect beauty for size, shape and finish. My father used a 10, and monstrous heavy, but it was not altogether the weight of his gun that prevented me from asking the loan of it.

At the goose pond I tired of waiting for my cousin and started out on my afternoon's cruise without him. Do you remember the pastures that used to stretch over the ridges and hillsides along the coast, that furnished forth to scanty herds a bounteous growth of rocks, gray moss, sorrel and daisies, with a little grass here and there for dessert? My course lay over such a field; the story of its summer glories was told in dry daisy tops, feathery milk weed and black spikes of mullein: its later beauties had faded and fluffy tufts told how the golden rod had coined its product and put it in circulation. The generally gray tone of the sidehill was brightened by patches of crimson sumach, while the woods made a background as rich and varied as Persian upholstery.

Coming to a pair of bars (by the way, why in the world did they used to call it a pair of bars when there were a half dozen of them?), as I jumped to the ground on the further side *whir-r-r!* up rose and thundered a partridge with a sudden volume of sound that sent the blood tingling to my finger tips and brought to my tongue that peculiar taste—like what? a mild current of electricity? However, it was not an electric shock that sent my gun off; as quick as a flash I blazed away, acting on a principle so well formulated by a friend of later days—"If you don't shoot you're sure to miss;" but the bird moved grandly and swiftly away with all the glory of his feathers.

The rise had raised my spirits, and I pushed faster and further through the autumn glory, the "well pahster being my objective point. Out of the woods, I crossed a field of corn that had been topped, partly to save the fodder in its sweetness, partly to let the sun in upon the ripening ears. What would one of our farmer lords of the "American bottom" think of going at such a task in his hundred-acre corn jungle with a corn knife under the August sun. The stumps of the corn stood nearly as high as the shoulder, while the frayed blades and husks, blowing in the wind, streamed from stalks and ears like scalp-locks. A flock of quail flushed in the edge of the field drew the ineffectual fire of both barrels, and though I felt sure I had marked them down I tramped the stalks and bitterweed fields faithfully without getting sight of a feather. However, I didn't "bate one jot of heart or hope," but still kept on; and while I was tramping along a path through some saplings and barberry bushes, up rose a woodcock and started off on his erratic flight. Without taking special note whether he made that peculiar whistling sound with bill or wing feathers, I took a sudden automatic off-hand shot and—was not I surprised! That bird dropped, and after a little search I found him among the fresh fallen leaves. I don't think a better shot was ever made, nor did any sportsman ever bag a dozen of birds with a greater measure of joy than I felt in the possession of that first wing-shot bird. I turned it over, opened its bill, examined its tongue, stroked its coat and smelled of it, then put it in my pocket. Glory enough for one day, almost, yet with new hope and ambition I renewed my hunt. Down the wooded hill, up along the banks of the singing brook, through the thinning shade, and in the full afternoon sunshine I kept my way with unsuccessful vigilance and patience until the settling sun warned me to turn my face toward home.

The pleasure of that autumn afternoon was without a cloud until I neared the end of my journey, and began to be troubled with the problem of how I could get the full benefit of my success without raising uncomfortable questions; home was reached before I reached the solution. There is diplomacy in delay, sometimes, as well as delay in diplomacy, and after getting my uncle's gun disposed of, I hung up my bird in the woodhouse.

Supper time came on my father's arrival home. As I went in I passed his open room where he was in the midst of his ablutions. He called to me as I was passing: "Well, Nut, what's the word? How did you get on at school this afternoon?" I had been brought up to give him answer as straight as his question, "I didn't go, sir." "Not go to school! Why not? Where did you go?" He stopped his rubbing, held the towel half raised to his face which glowed with either friction or indignation, and looked as if he would look me through. "Went shooting, sir." "Did you get anything?" How my sinking heart bounded with relief. I made a clean breast of my dereliction, said nothing in extenuation, simply gave a direct historical narration of the experiences of the afternoon. To verify the story of my success I bounded out to the woodhouse after my bird.

"How vain are all things here below!"

I have my opinions on a vast variety of subjects to which I cling firmly but in silence; I have taken no part in the discussion of the question whether the woodcock whistles with his teeth or tail feathers; I have never attempted to adduce any proof that a setter dog can climb a tree, but if ever the scientists introduce a discussion as to whether or not a cat can climb a post in the woodhouse you may refer the case to me, and whether in vacation or term time I'll agree to stop the debate with a judicial statement of fact and precedent.

We'll draw a veil over the disappointment I felt at being able to rescue from the cat, after a vexatious chase, only enough of the bird for identification. Satisfied with the proof, my father limited his reprimand to a strict injunction to consult him whenever the symptoms of fall fever were aggravated; and if he could get away from his office work he would go with me to insure a proper treatment of my complaint. Well did we both keep the letter and spirit of the contract, and the many happy days I spent in his delightful companionship come back to me with a memory more and more precious as the years go by.

After all, what is the moral? I don't encourage boys to neglect their early duties and privileges for idle enjoyment or even for the worthy sports of field and stream; but oh, ye fathers, recall the days of your early years, and hand in hand with the boys share such pleasures as will harden the muscle, clear the brain, give brightness to the disposition and elasticity to the step; and with healthy recreation in clean companionship fence them in from vicious pleasures that ruin so many of the young bodies and brains.

NUTMEG.

Indiana Quail Outlook.

INDEPENDENCE, Ind., May 9.—The quail have wintered well, are through with house cleaning, and are down to business. It looks as if they were trying to raise two families this season. I am confident some are sitting now. I notice there are more hens than roosters this year, consequently they will be more successful nesting. The past two seasons there were two roosters to each hen; in several places three roosters to one hen. It is probable that we will have more quail this season than usual.—J. E. F.

TROUTING ON THE ELOKOMON.

A MAP of Washington will show you a heavy spur of the Coast Range projecting out to the east from the range, and sweeping, with a great curve, around the northeast corner of Wahkiakum county, one of the Columbia River counties of the State.

Somewhere in this spur springs a most remarkable trout stream, variously known to those of us familiar with its lower waters as the Elokomon, Lokoman or Lackamute. It empties into the Columbia about three miles below Cathlamet, the county seat of the aforementioned county, but its mouth is hidden from the view of voyageurs of the Columbia by a beautiful, well-wooded island, and there are many people perfectly familiar with the Columbia from the mouth of the Willamette to Astoria who never even heard of the lovely Elokomon. But it is there all the same, and its loveliness is not in the least diminished by reason of the mysterious, half mythical reputation it bears. It is a great place for both mountain and salmon trout. In fact it is a great place for almost anything in the shape of Northwestern fish and game. I have seen 20lb. salmon six or seven miles up the Elokomon in spawning time. Black bear, cougar, wildcat, elk and deer are plentiful. It is my candid belief that there are more bears to the square rod in the blokomon country than anywhere else in the United States. It is the home of the wonderful water ousel, and I believe it is the only place I ever saw where the forest birds sing all night. Of course, in the rainy season the Elokomon is a mighty river, but ordinarily during trouting season it is just the stream for good long casts and good heavy fish. Some of the best catches of my life have been made in its waters.

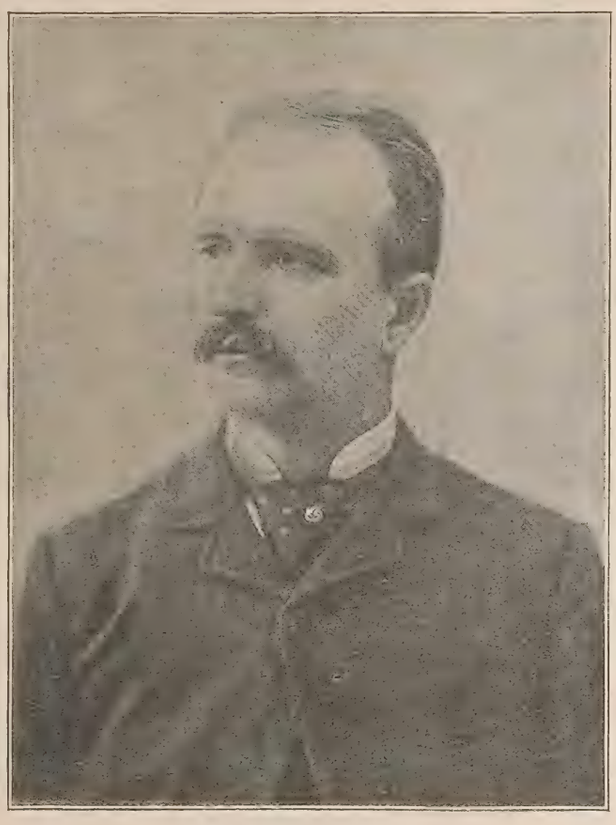
The valley is narrow, and the mountains on either side are clothed with a thick growth of giant firs, spruces, cedars and pines, which have never been mutilated by the hand of man or the scourging forest fire; and all in all it is a most enchanting place for the hunter, the angler and the lover of nature in general.

Warren's cannery, alias Cathlamet, the nearest landing place to the Elokomon, is about seven miles down the river from Portland; and so, when Harry Beal and I went aboard the night boat Harvest Queen at 8 o'clock P. M., we requested the steward to call us at Cathlamet. However, the request was unnecessary, for neither of us could sleep. So we sat and watched the spectral bluffs fade into phantom shadows, and counted the flickering stars of the salmon fishermen, as drifting with the tide, they swept the wide river with their slow bending nets. At 3 o'clock in the morning we were landed at Cathlamet. The little nest of fishermen's huts in the shadow of the bluff looked ghostly enough by the yellow light of the steamer's lanterns, and after she had cast loose and gone on her way we were in Egyptian darkness.

It was one of those proverbially dark nights when one "couldn't see his hand before him," and we had great difficulty in finding the trail that led up and over the mountain to the Elokomon. By this trail we were to strike the stream pretty well up from its mouth and about five miles from Cathlamet. A lantern would have been a great blessing, but we had not brought one, for several reasons. Too much other absolutely necessary luggage left no room for such luxuries, and besides we had entirely forgotten it. As usual old Mike was with us, and by following close behind him we managed to keep the trail pretty well most of the way. Now and then we would scratch a match or burn a fragment of paper to get our bearings and view the surroundings. There was one spot where, apparently, the sun had never looked in, and I assure you that it was a damp, dismal place. It was so dark that tar would have made a white streak on the walls. Hearing the faint pur of a tiny waterfall, and after assuring ourselves that we were not sure of anything except that we were wrapped in absolute blackness, we twisted up a bit of paper and burned it to find ourselves on the brink of a precipice, at the bottom of which another step would have landed us, some hundreds of feet below. Mike could keep the trail all right of course, but without a bell on him it was not an easy matter for us to follow him, and as we had no spare bells with us, we were forced to spend about half our time manufacturing paper torches. Once Mike brought both our feet and hair to a stand by bounding back against our legs with a growl. We hurriedly lit a match and peered into the night, expecting to see nothing less than the Prince of Darkness himself. All we could see was the end of an old log that protruded out of the thick sal-lal at the side of the trail, and we both giggled in a nervous sort of way at the idea of the dog getting scared at an old log. But Mike himself seemed earnest in his opinion of that particular spot, and as he sidled around it suspiciously, growling and with hair bristling, we also sidled around it with hair sort o' bristling. Somehow we couldn't help manifesting a certain degree of respect for the old dog's judgment, even though he was an "old fool" and a "low-bred cur" for getting scared at "only a log." We were so provoked at him for his cowardice that we even made him walk behind for a while, possibly as a punishment, possibly as a rear guard. It is true that we only got a flash-light impression of that old log, but the impression was a good one, and I will never forget just how it looked.

Our supply of newspapers gave out before the darkness did, and our progress over the mountain was slow indeed, so that by the time we reached the crest the eastern sky was tinted with the coming morn. The descent was more abrupt, and broad daylight found us boiling our coffee and jointing our rods on the bank of the stream. Such rapids, such pools of pure, unpolluted mountain spring water. The fish were of the finest, the songs of the birds the sweetest, and as the rosy morning brightened nature blushed at her own loveliness. What monster salmon trout in the deep, still pools; what lovely mountain trout in the sparkling rapids. Several times we took over 6lbs. at a cast; but these, of course, were salmon trout, a number of which weighed more than 3lbs. each. Now if anybody thinks that the salmon trout is not game let him hook a couple of three-pounders; yes, or even one. I am constrained to admit that they fight about as hard as either the mountain, rainbow or Dolly Varden. They do love salmon eggs, but the prevalent opinion that they can be successfully taken with nothing else is erroneous. As many can be taken with a whip made of royal-coachman, professor and ginger-hackle as anybody can catch with salmon roe; and then, the one is sport while the other smells too strong of the pot. For my part I never, under any circumstances, fish for any kind of trout with anything but the fly. I am convinced that where bait will be taken, so also will the fly if properly presented. This I say advisedly, but with particular reference to the fishing of this coast.

In this connection, although somewhat digressive, I will say further, that the assertion so often made and so generally accepted as true, that there is no fish in Alaskan waters that will take the fly, is not strictly true. This I also say advisedly, and with permission to use the names of reputable sportsmen if required that have caught trout in that country with the fly. But the Elokomon is far enough away from home without straying off to Alaska; so we will return to its luxurious solitudes. When we lunched at noon we figured out that we must be at least seven miles from Cathlamet, and as we had taken a large number of heavy salmon trout we concluded that we had better begin to figure back toward the landing, as, under the circumstances, we didn't care to miss the night boat. To do so would involve a wait of twenty-four hours, which was not a pleasant contemplation.



An incident occurred at about this time which was really so funny that I will have to tell it on Harry, even at the risk of losing his friendship. Harry is a good boy and is blessed with more than ordinary intelligence, but in this instance his judgment was sadly at fault and made an ass as well as a water-soaked wreck of him. As we munched away at our lunch, trying to talk and swallow simultaneously, as hungry anglers generally lunch on the mountain stream, we were startled by a loud flap behind us. Turning we saw two enormous Chinook salmon lying side by side, half out of water on a riffle, the water of which was so shallow that it was about all they could do to keep their gills under water. Here was an opportunity, as you see, to capture with our naked hands two handsome fish in their own element; an opportunity seldom met with and too good to be lost. So laying our rods on the bank and our sandwiches back in our ditty-bags we quietly surrounded the monsters, Harry above and myself below them. At a given signal we grappled with our unsuspecting victims (?). Tableau: Two simple fishermen staring at each other, hatless, not a dry thread on either, boots full of water, speechless with disgust, but each ready to jump the other for making such a fool of him. Moral: Fish for salmon with only the most approved tackle. But, of course, the joke was on Harry, for he ought to have had better sense.

On this trip we saw two black bears and met an old hunter who told us that during the past winter and spring he had killed five cougars and unnumbered elk, deer, wild-cat and bear. We saw plenty of elk and deer sign but none of the animals themselves. The old hunter informed us that back in the mountains about eighteen miles was a beautiful lake, and he thought the Elokomon found its source there; that about and adjacent to the lake was a lovely, open, grassy park of wide dimensions where an immense herd of elk use, and I am glad to say that Harry and I succeeded in arranging for the old hunter to meet us at Cathlamet about the first of August to pilot us back to that lake and that park. What a place for a two weeks outing it must be.

But the sun was sinking into the ocean and we had a long tramp ahead of us with wet feet and heavy loads; so we wrung the water out of our clothes, emptied the water out of our boots and packed up for the return trip. We had had a great day; were proud of our catch and happy in the thought that it would not be long until we would have a better knowledge of the upper stream and country. Loaded down with fish we trudged back over the mountain to Cathlamet, where we connected with the night boat at 9 o'clock P. M., and slept soundly until her whistle at 4 o'clock in the morning announced our arrival home from a day's (and two nights') fishing trip to the Elokomon.

S. H. GREENE.

PORTLAND, Oregon, May 3.

JUDGE S. H. GREENE.

After you have camped with a man a month or two you think that you know him real well; and some times you may fancy that you know him if less intimately, not the less truly, though his camp happens to have been pitched two thousand miles away, and he tells about it relating his experiences and revealing his personality to you in the columns of your favorite weekly journal. If fortune should ever bring you into his neighborhood it is quite likely that your inclination would be to look him up, to claim acquaintance and comradeship with him.

The other day our contributor "O. O. S.," who lives in Pennsylvania, found himself away on the other side of the continent, in Portland, Oregon, and it was the most natural thing in the world that he should make his way to the corner of First and Ash streets, where the directory told him the law office of S. H. Greene might be found. "Judge Greene, I believe," said Mr. Smith, extending his card. "How have you been since we were on the Molalla?" The Judge looked at the name on the card and at his visitor, but he did not appear to recollect him. "I was on the Molalla," he said, "but I don't recall that you were of the party." "Oh, no!" put in the man from Pennsylvania, "I was not there actually; wish I had been; I only did the next best thing, I read your papers in FOREST AND STREAM, and was with you in fancy; but I feel that I know both you and old Mike there, though of course you don't know me, and perhaps I should apologize." "I am delighted to meet you," said Judge Greene heartily; and the setter Mike rapped on the floor a canine indorsement of the welcome. That this meeting and others which followed were most pleasant has been amply tested by letters received at this office from both parties in interest. When "O. O. S." returned to his Eastern home he bore with him as mementoes of the Northwest a handsomely mounted specimen of the Mongolian pheasant, also a cougar skin of large proportions, concerning which we understand a fit and adequate yarn is now in process of manufacture.

Judge Greene, we are told by one who knows him well, comes honestly by his love of sport with rod and gun. The predilection is a family trait inherited from both sides of the house. His grandfather on the maternal side, A. B. Sturgis, hunted big game for more than sixty years, all the way from the forests of the Adirondacks to the Coast Range of the Pacific. Annually for many years Mr. Greene and his father would spend a month every autumn with covered wagon and camp outfit among the pretty lakes of northern Iowa. Those years he is wont to allude to as his prairie-chicken days, and it is suspected that the diminution of game in his native State of Iowa may have prompted him to go West. In 1879 he removed to Oregon, and took up his residence in Portland. Here, with the exception of two years, during which he was judge of one of the inferior courts, he has practiced his profession and is known throughout the State both as a successful lawyer and as an expert hunter and fisher. "I want no office of any kind," he once laughingly declared to a friend, "for if the weather should happen to be suggestive of ducks, or if the trout should be taking the fly, public interest might suffer if I were a public servant."

Judge Greene was born in Adel, Iowa, in 1850, and lived in his native city, of which for five successive years he was mayor, until 1879. The portrait is from a recent photograph.

He is president of the Oregon Fish and Game Protective Association, an organization which has a record of much substantial good work accomplished, and which gives promise of like usefulness in the future.

Mrs. Greene, it is interesting to know, is an adept with the rod and the gun, and often accompanies her husband on his extended excursions.

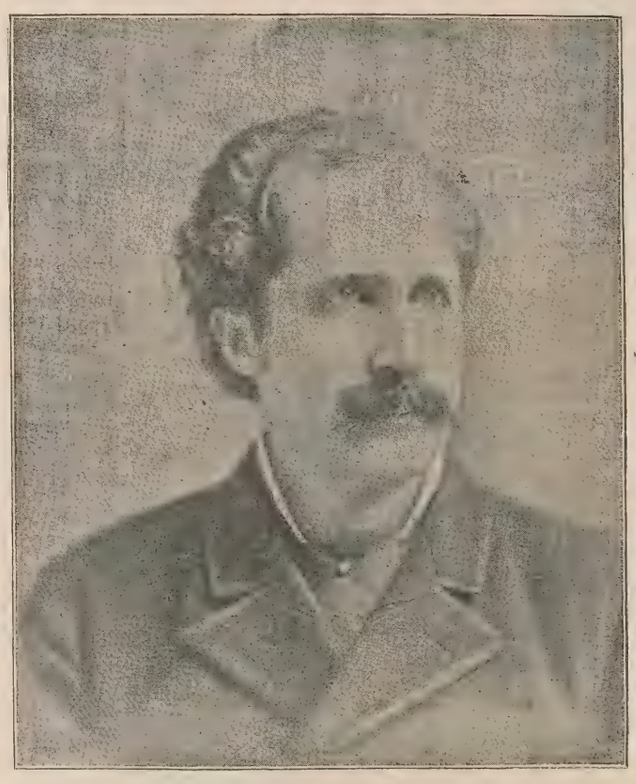
Those who have read all about "Teufel the Terrier," and we doubt if there are many dogmen who have not perused Mr. Yates Carrington's interesting little volume, will sincerely regret to hear of this author's death a couple of weeks since. Though only thirty-five years old at the time of his death, he was well known as a clever animal painter and especially of dogs; his fox-terrier Teufel, until his death in 1889, being an unfailing study and a tireless model.

Natural History.

THE MONGOLIAN PHEASANT.

THE neatly furnished rooms of the Willamette Rod and Gun Club at First and Stark streets, Portland, Oregon, were well filled on the evening of April 29, with a majority of the 117 members, on the occasion of the presentation to Judge O. N. Denny by the club of a beautiful group of Mongolian pheasants, handsomely mounted and arranged behind an oval glass, with an oil painting for a background, the whole richly framed. The group consists of a cock and a hen pheasant, with a brood of seven chicks, mounted to order by Capt. S. S. Douglass, and has been greatly admired. At request of the club, that venerable Oregon sportsman, Hon. J. W. Whalley, made the presentation. He spoke as follows:

Hon. O. N. Denny—The members of the Willamette Rod and Gun Club have commissioned me to perform this evening the pleasing task of personally testifying their grateful appreciation of your efforts to add to the amusement as well as the food supply of this and succeeding generations, and to present to you an appropriate and beautiful testimonial of their love and respect. It has been said that he who causes two blades of grass to grow where but one grew before, deserves well of his kind. Much more then is he entitled to praise and gratitude who causes fruitfulness to dwell where barrenness previously existed. What is true of the products of the earth is also true of the living things that feed on those products, and he is to be regarded as a public benefactor who furnishes new means for the proper gratification of mankind's necessities or wants.



When you were commissioned as consul to Tien Tsin, China, by the government of the United States, your fellow citizens well knew that the delicate and sometimes dangerous duties devolving on you would be discharged with fidelity and courage, and with an eye single to the honor and greatness of our common country, and saw you depart to assume your duties, pleased to find that your abilities had found recognition, but regretting to be deprived, even for a brief time, of your courteous and genial companionship. Little did they then think how much the event of your appointment was to increase the material wealth and attractiveness of this State. Perceiving the hardy nature of the ring-necked or Mongolian pheasant in your new abode, noting its excellence as an article of food, its remarkable fecundity and gamy habits and flight, observing also its habitat, and comparing mentally the climate of its home with that of Oregon, you arrived at the conclusion that this State was adapted to its propagation and acclimatization. Acting upon this

W. A. STOREY.
Vice-President Willamette Rod and Gun Club.

conclusion, at great personal pecuniary sacrifice, you sent out two different lots of these birds, causing the first lot to be turned out in the counties, I believe, of Linn and Benton, and placing the last lot, sent under the charge of the Multnomah Rod and Gun Club, by which association of sportsmen they were distributed to separate and appropriate points. Under legislative enactments of protection to these birds, they have, notwithstanding the very insufficient enforcement of the law, increased to such an extent as to justify the assertion that they have become permanent denizens of the valleys of Oregon, their fecundity, wary habits and present numbers rendering their extermination very improbable, if not impossible. If the value of the birds now in the State were computed at the same price as that of barnyard fowls, which they far excel in flavor, it would have to be estimated at tens of thousands of dollars. If their value be estimated on account of the increased pecuniary value which their presence gives to the farms on which they are found, or for the healthful and innocent amusement which their pursuit will, for coming ages, afford to the sportsmen, it is absolutely incalculable.

We are happy that the farmers in Linn and Benton counties are beginning to see the great advantage to their farms from having them well stocked with these birds and taking strong grounds against their slaughter by pot-

HON. O. N. DENNY.

hunters at improper seasons. We feel they will fully sympathize with us in our efforts to do honor to one who has conferred such lasting benefits on them, on us and on posterity. Permit me, then, dear Judge, on behalf of the Willamette Rod and Gun Club, to present to you these Mongolian pheasants, mounted in the best style of the taxidermist's art, to decorate your home, and, when you look at them, to remind you of the sentiments of gratitude and esteem which the donors will ever entertain for you as a public-spirited gentleman.

JUDGE DENNY'S REPLY.

In reply Judge Denny spoke as follows: It is difficult for me to find words with which to reply to the very complimentary language just uttered by Judge Whalley and other gentlemen, and to appropriately express the gratitude I feel for the royal way you have signified your appreciation of my efforts in adding to the game attractions of our young and prosperous commonwealth. To me the highest reward a private or public citizen can receive for his course is the approval of his acts by his fellow men. When Columbus discovered this great country of ours, which has become the veritable home of a broad, free and progressive civilization, and which is destined to work out upon its shores the highest degree of civil and religious liberty under the sun, it did not present or possess very many of the beauties and attractive features which to-day are the boast and pride of all Americans, as well as the admiration of the people of other lands, for these have been added since, either through the genius of our institutions or through private or public enterprise. Bearing this fact in mind, I determined, when I went to China in the service of our Government, to contribute at least something in the same direction should opportunity offer.

It was this thought which prompted me, while consul general at Shanghai, to send to this State the Pekin ducks and bantam fowls, and to send to the Langshan Hills on the River Yangtsze for the pure breed Langshan fowls, and to send also the lichu and loquot fruits, as well as the tallest, most graceful and attractive of all the grasses, the bamboo (now growing in your City Park, as well as in other beautiful spots in Portland, but not 80ft. high and 1ft. in diameter as I have seen it on the Island of Formosa), together with shrubs and plants too numerous to mention here, and last but not least, though not as tall as the Formosa bamboo, yet tall enough, the cause of your assembling here to-night, that game and handsome bird which challenges the admiration of every sportsman in Oregon—the ringnecked pheasant. During our absence neither Mrs. Denny nor myself ever forgot for a moment that we were Americans and citizens of the great State of Oregon, with a residence in one of the most picturesquely located and beautifully surrounded cities in the world—Portland, on the banks of the charming Willamette, the Arno of Oregon.

Under these circumstances, and the fact that the sports of field and stream have many attractions for me, it was but natural that I should remember my brother sportsmen at home, and although it is more than eleven years ago, it seems but yesterday when I resolved to carry this enterprise to practical results. It happened in this way: The Chinese farmers never shoot the birds or do anything which tends to frighten them from their fields, as they hold them friends, rather than enemies, doing far more good to their crops than harm. When they take them for the markets it is with nets and alive, but the fact that they were often poor and half starved induced me to purchase them by the dozens and feed them until they were fat and fit for the table. On one occasion I had in my inclosure a large number of extraordinarily handsome birds, and while admiring them one day I thought, what would I not give just to be able to turn the entire lot adrift in Oregon; then and there the resolve was made, and you gentlemen know the result.

While preparing the birds for shipment an English friend of mine said: "Where are you sending the pheasants?" I replied, "To Oregon." "To Oregon? Where is that?" "Oregon, sir, is my home, on the Pacific coast, where the influence of the warm currents which set in from Japan, renders the winter months as mild almost as a spring day, while the breezes from Alaska in the north keep the summer months delightfully cool and pleasant, and whose broad and fertile prairies and beautiful valleys, aided by the regularity of the seasons, never fail to reward the tiller of the soil for his labor. Truly a land of fruit and flowers, combining at the same time all those natural elements of wealth which form the basis of every prosperous community the world over, while upon its grazing lands the fattest herds comparatively unfed in winter, are always to be found, a land of the broadest possibilities for future manufactures and great enterprises, where the laborer's song of contentment is heard, happy in the thought that in the vast majority of cases he is the owner of the house that protects himself and family, where magnificent mountains and tablelands are covered with timber as fine as ever adorned a forest, liberally interspersed with choice game, while the mountain streams that fairly leap from their snow-clad sources are literally alive with those speckled beauties we love so well—a land where able, industrious and enterprising men, aided, encouraged and applauded by loyal and accomplished women are engaged in laying the foundations, broad and deep, of a great and prosperous State, and the snow-crowned peaks of Hood, Jefferson, Adams, St. Helens, Ranier and the Three Graces, or Sisters, stand, like eternal sentinels that they are, guarding the busy scenes below. There is Oregon." "Send the pheasants along," said he, "and I will follow them, for that is the land I have been looking for." Whether he has followed or not I cannot say, but I do know that the birds are here, and here to stay, I trust, as they are among the fittest.

There are, I believe thirteen varieties in China; in fact, that empire is termed the home of the pheasant. On the island of Formosa is found the Swinnoe; in the Ningpo

CAPT. W. J. RILEY.
President Willamette Rod and Gun Club.

district, the Elliot and Darwin, and in Tschitzuen, the Reebes and Amhurst. These five varieties have taken the names of the foreigners discovering them, or the first to procure specimens of them, while among other varieties found in China are the ring-neck, golden, silver, trágopan, hochu, etc. As you are aware, about six years ago I brought to this State ninety pheasants, which included the silver, golden, copper and green varieties, which were sent to Protection Island, in Washington, for the purpose of breeding and distribution in this State, as well as in other localities; but up to the present no practical results have been attained, although I am informed that they have increased quite rapidly and are now numerous on the island. Some six or seven of the varieties above referred to have been successfully introduced in Europe and are now quite plentiful, and there is no good reason,

it seems to me, why they could not be successfully transplanted here. Mr. Cooper, the British consul at Ningpo, told me that he received $400 for the first pair of Elliots, and that his total receipts for introducing the Elliot and Darwin pheasants in England amounted to $1,500. With concerted action we can not only protect the natural game in our forests and on our hills and prairies, but we can add valuable accessions from time to time. To do this, however, we must not only be vigilant, but in earnest, as the game vandal and exterminator is hidden behind many a tree and bush in Oregon. In accepting this artistic and magnificent testimonial, permit me, gentlemen, to assure you that the memories which will always cluster around it will make it a priceless gift to me.

At the close of Judge Denny's reply, Judge S. H. Greene was called upon to express the sentiments entertained by the club for their distinguished guest.

He first read the following telegram received from sportsmen of The Dalles: "While we are enjoying the birds may the State appreciate Judge Denny." He then addressed Judge Denny as follows:

"I have been directed by our organization, the Willamette Rod and Gun Club, to express to you our particular appreciation as a club of your great service to the sportsmen of the Northwest coast. The Mongolian pheasant is now a fixture with us, although rather an active fixture, and will soon, no doubt, be the acknowledged king of game birds throughout the entire country, from the Pacific to the Atlantic.

"Not long since I had the pleasure of transmitting to one of the leading sporting papers of the East the substance of an interview had with you regarding the capabilities of the Mongolian pheasant to withstand the rigors of Eastern winters. As indicative of the interest felt by Eastern sportsmen in the subject, permit me to say that the communication referred to called back a perfect cloud of inquiries from all over the Eastern States. That they are the gamiest of all birds no one questions. That they are a hardy bird, you, the best informed on the subject, seem not to doubt. Therefore, we say to the Mongolian pheasant, all hail! Therefore, we say to you, Judge Denny, accept our gratitude and this slight token of our appreciation of your service.

"We fully appreciate the fact that it is solely through your generosity and your self-sacrifice that we are now the possessors of this gorgeous blessing, the Mongolian pheasant, and while we may never be able to cancel the debt in full, so far as gratitude can repay you we wish you to credit us with its full measure.

"While the token just presented is but the natural flower of the seed sown by yourself, blooming to-night by the warmth of the gratitude of your sporting friends and plucked and preserved for you by the deft hand of the artist taxidermist, we wish you to feel that its roots are perennial, and extend throughout the length and breadth of the land, into the hearts of all true sportsmen."

Then turning to the club he added: "Gentlemen of the club, I feel that we owe a debt of gratitude to brothers W. A. Storey and W. J. Riley, for their untiring efforts, which have brought to us the pleasure of this occasion."

On motion of Mr. Storey, Judges Denny and Whalley were elected honorary members of the Willamette Rod and Gun Club, and both gentlemen accepted in fitting terms. The company then adjourned to an adjoining room where an elegant collation was served and disposed of amid the general jollity and good will which characterize all such gatherings of sportsmen, and it was not until the wee sma' hours anant the morn that the merry crowd dispersed. W. R. & G. C.

PORTLAND, Oregon, May 3.

"And what did he do when you called him a son of a gun?" "Oh, he just went off."—*Smith & Gray's.*

Game Bag and Gun.

"UNCLE GEORGE."

THIS was the name he was known by far and near. He was also classed as a great hunter. It was more than twenty years ago that he and I took a hunt of a week on the headwaters of the South Fork of the Conemaugh. We camped in a cabin, which was used as a sugar camp in the season, and many a merry hunting party has enjoyed the great wide chimney with its hickory fire. We killed a fine buck the first day and several turkeys during our hunt. The old man had a famous dog, which he said would hunt anything. His pedigree would not bear inspection, but he certainly proved himself to be all that his master said he was. He scattered the turkeys in every direction, and his owner was very indignant because I said I would prefer to be where the turkeys were before the dog came along. He did run the deer near enough to us to get a shot, but it was no doubt an accident. When the dog scattered the turkeys sufficiently, in the meantime keeping up a most unearthly clamor, he had to be caught. This was my part of the work and was an easy task. We then waited about an hour and endeavored to call them back. The dog had a peculiar name—"Wasser," and he was christened thus to keep robbers from charming him into muteness. No dog bearing the name of Water or Fire can be worked on, or, as the old hunters say, "have his mouth tied shut."

I wanted to hear some of the old hunter's tales, and on the last night of our stay in the mountain he gave me a short history of his life, and told me some of the exploits of Lewis, the robber, who made his home in the mountains, and whom he had known well in his young days. "Yes," he said, "I suppose I have spent half my life in this old mountain. The game is pretty well gone except turkeys. There are more turkeys now than there were in old times. There are still some bear and a few panther. The deer are scarce to what they used to be.

"When I was a young man the mountain was alive with wolves, they could have eaten up every deer in a week, but they hardly ever molested them. When they did take a notion to catch one it was a short job. Two or three wolves would start on the track and give tongue like hounds. The rest, stationed at different points, would cut across and head off the deer and turn him back, and in a few minutes I could hear them fighting over the feast. I have lain and listened to them gathering their forces for a hunt. They never bothered me.

"I never cared to go over the big crossing after night on account of panthers, for they watched there for deer and were liable to pounce on to anything.

"You asked why the deer we killed came back the second time after being shot at. Of course, he knew we were there; but his front leg being broken, he could not run down hill, and his only hope to outrun the dog was to keep on top of the ridge, which brought him back to us.

The reason I went to the top of the hill to call turkeys was because no one can call a turkeys down hill; and when you call and get an answer that is enough. They can locate the sound within a few feet and will always come if you keep still. A great many hunters wonder why an old gobbler will come to the brow of the hill, take a look, duck his head and go off like a racehorse. It is because he has heard the sound in the same place two or three times, and when he looks and does not see the turkey he knows there is something wrong.

There is only one crossing on the South Fork for several miles, the laurel is so thick that a dog can scarcely get through it, and in places it is a mile wide. The bear tree that I showed you was nearly as large as it is now when I was a boy. It is a water ash and many of the marks are grown over. The last mark and the highest of all was made last fall. I saw the marks a day or two after they were made and could see the big fellow's tracks in the soft mud, where he stood flat-footed, made his mark and went on over the stream. I think they do it to notify each other that they have gone to winter quarters. This is the only tree of the kind I know of. My daddy knew of one on the Quimokoning, but I never saw it.

"I used to come up here in the spring and boil sugar and trap. Had plenty of company then. The boys used to come up from Pittsburgh to catch trout. We would roll a big rock into the fire and heat it and bake the trout on it with a thin slice of bacon in each one.

"Sam Adams used to hunt with my father. He was killed by the Indians near Johstown. I knew his brother John, who was with him when he was killed. They were watching some cattle in a swampy place on the river, when they were surprised by the Indians. John was only ten years old, but knew all about the ways of the savages. When he saw his brother fall, he dodged into the brush like a quail and ran till he got into the dense laurel that skirts the stream. He was thirty miles from the settlement in Bedford county; and when night came on he resolved to take the woods for it and cross mountain. He knew the Indians would watch the road. He was bare-headed and bare-footed, and his feet were bleeding. The wolves followed him howling and getting more and more impudent. He dare not climb a tree for fear of being kept up till morning and being discovered by the red-skins. One wolf, much larger than the rest, came very near him, so near that when he shook his shaggy coat, wet with the dew, the boy felt it splash in his face. This one appeared to fight the rest off, and showed no disposition to do harm. It was not long till the rest of the pack dropped off and left John alone with the big wolf, and they journeyed on together till broad day. When they reached the brow of the mountain and John could see the smoke and clearings of the settlement they separated. The wolf trotted off along the ridge, stopped several times and looked back as though loath to leave his companion. John lived to be very old, but never harmed a wolf in all his life; and he firmly believed that his friend had been sent to him by some unseen power to guide him through the wilderness. He could never have found the crossing without the aid of the wolf, and would certainly have been eaten up but for his protection.

"There were very few Indians about here after that. The last one that ever was in these parts was killed by Jim Buck on Stony Creek. Jim was a hunter, and was starting out one morning with his gun in the direction of Rocky Hollow. He stopped in the alders that skirt the stream to look across, hoping to see a deer. Presently an Indian, tall and powerfully built and wearing the garb of a chief, came to the opposite shore. He looked up and down the creek, and not suspecting that any one was near, laid down his gun, waded into the middle of the stream, raised up a large flat stone and from beneath it took up a bar of lead, cut off a chunk with his tomahawk, let the lead fall and replaced the stone, and was about to turn and go back when Buck took aim and shot him through the heart. He robbed him of his lead, which was very precious then, pushed him into the current and let him float down. When Jim went into the hollow that day to hunt he heard strange sounds; and he soon gave it up and went to his cabin. His conscience bothered him and he told of the murder. No one has ever found the lead mine.

"It has been years since I have been in Rocky Hollow

From a photograph by E. W. Moore, Portland, Oregon.

GROUP OF MONGOLIAN PHEASANTS.—TESTIMONIAL TO HON. O. N. DENNY.

and I never care to go there again. The steep hillsides are clothed with pines and hemlocks so thickly set that beneath their branches the sun never shines. Great rocks piled one upon the other, with caverns between, afford harboring places for panthers, wolves and wildcats—wilder and more dreary than any part of the mountain proper. When the hounds raise a fox in the valley at Ferndale he will generally cross the creek to Hogback Hill, and after circling two or three times, if closely pressed, will lead across the bleak ridges to Rocky Hollow. As the hounds enter the dismal place one can hear their music reverberating in a hundred echoes; then all will be still, and soon the hounds will return in search of their master, puzzled and beat and not caring to hunt more that day. The sounds which issue from beneath those great rocks are too much for me. Some say it is the water making its way through the crevices. But it sounds to me more like the moaning of an imprisoned spirit anxious to escape from its thraldom."

MEJICANO.

THE SENATE AND THE PARK.

AS stated last week, Senator Warren's bill relating to the Yellowstone Park passed the Senate. It is entitled "A bill to establish the boundaries of the Yellowstone National Park and for other purposes," and its number is S. 2373. One of the other purposes referred to in the bill's title is the cutting down the forest preserve established to the south and east of the Park a year ago. We print some extracts from the debate which took place on this measure a week ago, regretting that we cannot give the whole discussion:

Senator Vest's Position.

Mr. President, so long as Idaho, Montana and Wyoming were Territories those of us who took some interest in the Yellowstone National Park felt an obligation to rest upon us to give considerable attention to the matter in view of the efforts that were being made to break it up; but those Territories are now States, and I confess frankly that I feel very much inclined to submit largely all questions in regard to the Park to the Senators representing the States immediately contiguous. My own constituents are not more interested in the matter than the people of any other State of the Union, locality always being considered.

I have fought persistently and consistently all attempts to disintegrate the Park and to mutilate it in the interest of speculators. I confess, with considerable humiliation, that I have been defeated, and I have found, what has been gradually forcing itself upon my convictions for the last twelve years during my service in the Senate—that a persistent and unscrupulous lobby are able to do almost what they please with the public domain.

That portion of the Park cut off upon the north is being cut off simply because the friends of the Park are unable to resist the aggressive action of a lobby in the city of Washington that for years have been endeavoring to force a railroad into the Park under a charter from Congress in order to sell it for a large sum to the Northern Pacific Railroad Company; that evidence has been placed before the committees of both Houses of Congress, but the fact remains that no legislation can be had for the Park until the demands of these people are conceded. It is not a comfortable or a pleasant reflection to a public man to make such an admission, but it is the truth.

I have been utterly opposed to cutting off that portion of the Park north of the Yellowstone River. It furnishes a rendezvous for the game, and while there are not many objects of great curiosity in that portion of the reservation, still it is in the nature of a mutilation to which I have never been willing to consent. I have been forced to it, however, by the circumstances to which I have alluded.

* * * * *

I do not believe that the concession we are now making will result in satisfying the people who have for years been endeavoring to secure this charter. I think it will be found that the same influences which have been so potent in the past will continue in the future, and that this bill will be defeated in the co-ordinate branch of Congress simply because it defeats the object of these people to get into the market a charter which gives them a right to advertise the fact that they are entering the Yellowstone National Park. The Columbian Exposition at Chicago it is anticipated will add largely to the travel of European tourists to this great reservation, and if these speculators can go into the market with an exclusive charter for a railroad into the Yellowstone Park, they may put their own terms as to the price of it.

If this bill should pass and all this part of the reservation be cut off north of the Yellowstone River, as a matter of course no monopoly could be created, and that is my sole reason for not now opposing this bill most strenuously. I am willing to cut off, much as I have been opposed to it heretofore, that portion of this territory north of the Yellowstone River in order that there may be no monopoly, but that any one company which sees proper may construct a railroad from Cinnabar to Cooke City, outside of the limits of the Park. That would defeat the objects of the lobby now in existence here.

For that reason, as I have said, I do not believe they will permit—and I use that language with its full significance—this bill to go through the House of Representatives. They have some sort of influence which heretofore has defeated every bill even for the police regulations of the Park, and the friends of the Park, who have had no other interest than that of American Senators and American citizens, have been humiliated into the position of standing by and seeing these parties dictate to the Congress of the United States what shall be done with this great reservation set aside for the enjoyment of the people and their children after them.

I submit, Mr. President, to this legislation because I cannot help myself, not because my judgment approves it.

* * * * *

When Samuel S. Cox, of New York, died, there was no friend who had so deep an interest in the Yellowstone Park in the House of Representatives to speak in its defense or take any action in its behalf. There are no votes in the Yellowstone Park for the Republican or the Democratic party or for the third party. The result is that outside of those of us who are æsthetic and sentimental, as we are told in regard to this reservation, there seem to be very few persons who care anything about it.

This lobby is exactly like a compact military organization working for one object alone. They are persistent, aggressive, sleepless, untiring, and they are determined to own a charter from the United States Congress for the only railroad that goes into this reservation. Then you will see flaring advertisements that they have a charter from the United States Government for the only railroad that runs into the Yellowstone National Park. As a matter of course, they will sell it; it has already been put in the market, and I produced that evidence before the committee of the House of Representatives, where I appeared personally in order to make it known. Notwithstanding that fact a bill was reported giving them the privilege, and it is now on the Calendar of the House.

* * * * *

I want the Senator from Massachusetts to understand that the only possible reason why I do not oppose this legislation very rigorously is because I save this point in it, at any rate, that no railroad enters the Park, and the next company that comes with another project, as it will come, to enter the Park at some other point, can not plead this as a precedent for going into the Park. In order to go into it under similar conditions they would have to cut off another slice of the Park, and I suppose those Senators who want to break up the Park ought to favor this legislation, because slice by slice and in detail they can finally pare it down to nothing.

Senator Sanders on the Railroad Lobby.

I hold in my hand, Mr. President, and I do not know but that, inasmuch as it has been mentioned here I might as well make it a part of my remarks—the articles of incorporation of that Montana and Mineral Railway Company, a company created two years ago last February, if I remember aright, in the State of Montana, to build a railroad, nine-tenths of which is in the State of Wyoming, a State which at that time, if my recollection does not fail me, had no law of any kind whatever authorizing the creation or exercise of a franchise of this kind within her limits.

Two citizens of Montana and five or six citizens from Washington, or that are ordinarily found here, filed a certificate of incorporation with the Secretary of State of the State of Montana, which, by the laws of the State of Montana, created them a corporation. That law provided that shey should open books for subscription to their capital stock; that law provided that when a subscription was made to the capital stock, 10 per cent. of it should be paid down; that law provided that they should build fifteen miles of their railroad every year or their charter would be forfeited. There never has been a meeting, I think, of that corporation; there never have been any books opened for subscription to its capital stock; there never has been a penny paid; there never has been a report made; there never has been a mile nor a rod of railroad built by it; and by the laws of the State of Montana its rights have long since ceased to be.

I am not going into any discussion as to what is necessary to have that forfeiture declared. I simply say that this corporation is not a *bona fide* corporation, and, so far as the citizens of the State of Montana are concerned whose names are here as corporators, they repudiate the matter, and say the entire thing so far as they are concerned is *functus officio*.

Senator Vest on "Practicality."

I will say in response to the Senator from Arkansas [Mr. Berry] when by his remarks here he intimated that some of us who had been the friends of this park were excluding agricultural lands from the markets for actual settlers, that I know and every other man who has been in that park knows, that there is not enough agricultural land in it, with the climatic conditions there existing, to induce any sort of settlement for agricultural pursuits.

I concede that in the spirit of this age it would be a great deal better to have in the Mammoth Cave a subterranean railroad, use the Falls of Niagara for manufacturing purposes, and turn the geyser of Old Faithful, which has an eruption every fifty-five minutes, into a Chinese laundry, that there would be some money in it; but I submit most respectfully that there are uses for the Yellowstone National Park besides those of the tourist. When the Senator from Arkansas says that this park is alone for the rich, I want to make this assertion upon my own personal knowledge and that of a good many Senators here who have visited the park, that there is not the same extent of travel anywhere, certainly, in this country—I have never been to Europe—so cheap as a trip to the Yellowstone Park.

Our people, it is estimated, are to-day spending $150,000,000 a year in going to Europe. If the Yellowstone were among the Italian or Swiss Alps, every American who went there would visit it, and he would go there especially for the purpose; but as it is an American production our people run away from it. The men who go there to a large extent are men of moderate means who can not afford to go to Europe, but who desire in the rushing roar of active business life a vacation in the summer, and a place where they can rest their tired nerves and their overworked brains. I assert here again, there is not a trip in this country as cheap as to buy a round-trip ticket to the Yellowstone National Park, not one.

But over and above all that, Mr. President, living upon the banks of the Missouri River, I have a direct material interest in the preservation of the timber upon the headwaters of that stream, the great tributary of the Mississippi River. Senators do not understand, perhaps, that for more than ten or eleven months in the year not a drop of rain falls in that region. The result is that the vegetation becomes so dry that a single spark will start a fire which will extend for hundreds of miles and devastate not only townships and counties but even States. Every one who has been there has been forced to travel, if he went through that country, on horseback (and he can go in no other way) for days over fallen timber, when twenty miles a day was considered a good journey. The destruction of this timber increases the flood, because it leaves the surface as bare as the top of this table, over which the water rushes in vast volume and great velocity down upon the lower lands. If the woods are protected, if the ferns and mosses are protected from fire, they absorb this water, and it does not have the ruinous effects which are now being witnessed upon the banks of the Mississippi, the Missouri and the Illinois rivers by the enormous volume of water which is pouring through them. Every consideration should induce us to protect this Park, as I have said here frequently.

Mr. Berry the "Practical" Man.

I do not believe that a company of United States soldiers should be kept around about that Park for the purpose of guarding those animals in order that the tourists of whom we hear may see the animals unmolested when they reach that particular point. I do not believe we have any right to take the people's property and use it for the benefit of a few wealthy individuals, when the great body of the people can get no benefit from it. If that land is suitable for homestead settlement and cultivation, then I would say open it up to the citizens of the United States with all the other public domain. If it is not suitable for that purpose, if it is suitable for park purposes or any other, then I would put it up and sell it to the highest bidder, to private individuals, to be used for such purposes, and I would turn that money into the Treasury of the United States to belong to the whole people.

Mr. Call is not Quite so Narrow.

Mr. President, I think that my friend, the Senator from Arkansas (Mr. Berry), carries the idea a little too far as to the extent that the poor people of this country who must always constitute the great majority of it, will not in the future be able to do anything but to cultivate the soil or engage in the severest labor; that they will not have the advantages of any exhibitions of art; that they will not have the privileges which belong to the rich, of places of amusement, but that they will be confined to the drudgery and hardships of life. That is not my idea of the American citizen. I think the railroad transportation of this country should be placed upon a basis where the great mass of the people may travel cheaply, and be enabled to enjoy the privileges of art and the exhibitions of this great natural wonder, and the animals that constitute the class of animal life which formerly inhabited this country.

That is the theory of a free government that appeals to my admiration and to my fancy. That is what I believe democracy to be. If all the pleasures of life are by public policy to be confined to those who by grasping avarice may become rich, then I want some other kind of government in which the mass of the people may have the privileges of the highest art and the greatest inventions and the best of everything that modern civilization can produce.

CHICAGO AND THE WEST.

[*From a Staff Correspondent.*]

CHICAGO, Ill., May 14.—The heavy floods which have so extraordinarily distinguished the past two weeks in this region, are only now beginning to show signs of abating. The rains continue at Chicago to some extent. This is a black spring for Western sportsmen. The upland marsh shooting at snipe and plover has been practically ruined by the wet weather, and fishing has been impossible and will be for some weeks to come in northern Illinois and Indiana.

The damage to sport has not consisted only in the temporary deprivation, but has been more serious in other regards. A season like this destroys untold thousands of game birds in the nest or egg. This is especially true in regard to prairie chickens, for which bird a wet spring is nearly as exterminating as a band of market shooters. Quail also must have suffered frightfully over a great section of the West. The woodducks, teal and occasional mallards which nest along the Kankakee and make the earliest of the fall shooting, can not have escaped the high waters. Woodcock are hatched before this time in this region, and the young birds must have perished in numbers. These are the worst blows at sport, for it takes years for the game to recover after such a visitation.

The injured district extends from Ohio and southern Michigan to western Nebraska. On May 8 snow fell to a depth of 16in. at Rushville, Neb. This most have been hard upon the sharptails in the sandhill country. On the south the flood affected Arkansas and Mississippi, and north as far as northern Wisconsin the trout streams have been flooded for several days, although not so seriously as in the lower country.

When I was in St. Louis a month or so ago I heard some talk among the shooters there about the safety of shooting snipe on the Illinois side of the river. It seemed that there had been or was to be a case involving the question whether or not snipe should be classed as "water fowl," a question not altogether new, I believe. It has always been understood among our shooters that snipe were not protected, and thousands of shooters have gone out after them under that supposition. And now comes Game Warden M. R. Bortree and puts forth an edict which publicly proclaims the snipe to be a waterfowl. He does this under legal advice. After making up his mind to this effect he announced in the first place that all dealers having snipe or plover in possession after May 9 would be prosecuted. After consultation with the leading dealers, however, he later agreed to extend the time to May 20 to give all time to dispose of such game already on hand. Of course these dates are merely compromise ones. If snipe and plover are waterfowl, it is illegal to shoot them after April 15 until Sept. 15.

The question of the waterfowlitiveness of snipe and plover is purely one of construction. We have not yet had the case in question cited, nor has the test been final. The wording of the statute is as follows: "It shall be unlawful to kill, hunt, destroy, snare, entrap, or to attempt to kill, hunt, destroy, snare, entrap, or otherwise destroy any wild goose, duck, brant *or other waterfowl* at any time between the fifteenth day of April and the fifteenth day of September of any year."

The sportsmen of Illinois will not be behind the game dealers in any protective work, whether or not that may involve the sacrifice of their snipe shooting.

E. HOUGH.

Rebounding Locks.

THAT a correspondent signing himself "Awahsoose" should make the assertion that "there is no safety in the rebounding lock," leads me to think he has not looked into the matter very far. A blow on the back of the hammer will not discharge the shell unless the lock gives way, which is no more likely than if it was another kind of lock at half cock. The hammer cannot get to the firing pin unless the trigger is pulled—while the trigger is pulled it can be pushed against the firing pin. It is doubtful that there is a safer device about the breech loader than the rebounding lock.—OBSERVER.

A HUNT WITH INDIANS.

I THINK that most Eastern sportsmen are under the impression that Indians are good hunters, or are better than frontiersmen, or men who have been in the mountains for a number of years. This is not the case. Indians are very poor marksmen, and as for tracking game that is wounded they are no better than the average mountaineer.

A few years ago an Indian came to my claim, and wanted I should go on a hunt with him and his friends. I told him I could not spare the time, but I would go for two or three days. So I packed up my traps while he went and drove up my horses, and we were soon on the road to the Indian camp, distant about ten miles. On the way to camp we saw a number of deer, but as we made so much noise driving our pack horses we did not get a shot. At camp there were fourteen Indians, and as I was acquainted with them they were very glad to see me, and from the way they laughed and talked I knew I was the subject of many jokes, but as I could not understand Indian I did not care.

Next morning very early camp was astir. Some went after horses, while some rubbed up their guns, of which there was a great variety in the camp, yet I think Winchesters had a small call over the others. I had the lightest gun of the lot, while an Indian by the name of Joseph had a 12lb. Sharps .45 120. This day we were to hunt on horseback, and when everything was in readiness I was told to go up a small branch, follow it to some thickets, and from thence to the divide between my creek and the one on which we were camped. When we were stretched out we presented a mile and a half of front. Some Indians up to my right ran two deer down near me but the brush was so thick I could not get a shot, but in a few minutes the Indians to my left opened fire on them. I counted seven shots. I kept on until I reached the divide, where I found ten Indians waiting, and in a few minutes the other four came up. A number had got shots that I had not heard, yet not one had killed anything.

After they had all taken a smoke, I was told to keep down about half a mile from the divide and we would meet near the spring on the big mountain. I had not gone far, when I heard some one shoot down to my left. I kept a good lookout, but I did not see anything. I kept on to our place of meeting, when I found I was the last one to put in an appearance. Here they took their regular smoke.

After finishing it I was told we would let two of the oldest men take the horses, and the rest of us would go on foot through a big fir thicket in a cañon, and would meet on the divide on the head of the creek on which we were camped, I was to keep around as near the height we were on as I could, while most of the Indians kept below me. You may talk about thickets, yet I dare say there are but few of your readers who have any idea what a thicket is.

This was about half a mile wide and a couple long, and the young pine, fir and tamarack stood nearly as thick as wheat.

There were but few places in it where you could see six feet ahead of you. These thickets are a famous resort for old sharp bucks. I had seen a number of fresh beds, and when about half way through I heard a deer jump up and start through the brush. I hallooed so that the Indians might run for a place where they could see as much open ground as might be in his vicinity. Pretty soon I heard a shot, then another, then another, and still they kept on. Finally they ceased.

I got through at last, and found about one-half of the Indians waiting. They wanted to know if I had shot. I told them no, I had not seen any, but I had heard one, sure. They told me my friend had killed a very big buck. He had taken his horse and had gone down after it. When he came up with his deer we separated, some went one way, some another; while quite a number of us went straight for camp, which we reached about 4 o'clock, tired and hungry. Our supper was soon ready. It consisted of frying-pan bread, baked squash, and boiled jerked venison and potatoes, and dried fruit stewed. When all had returned and got through with their suppers and gathered in a big tent, they counted up how many shots had been fired. There were 42 shots fired, and one deer was the result. I have no doubt that a good many were wounded. The women had prepared a lot of dry wood, so that they would be able to jerk all that should be killed that day, as it was intended to move camp next day over on to my creek.

Next morning we were up early, but the men did not go after horses. We were to hunt on foot, leaving the women and children to move camp. I fixed up my traps, so that they would not be any bother to them. I was shown a bald spot on the mountains and told we would meet there. I was perfectly familiar with the mountains here, or it would have been an utter impossibility to have gone to the place selected.

I had not gone far, when an Indian on my left got a shot and killed a deer. That seemed to start the shooting, for every few minutes some one would shoot. I reached the place among the first, and we had to wait nearly an hour before we got all our crew, and not then until we had done a good deal of whistling and some holloing. I was laughed at a good deal for not killing anything. "Well," I said, "I have not had a shot yet, and I am the only one who has not had a chance to try his skill."

When all was ready, we started again, and were told to meet on the summit. I hunted very carefully, and had just come out of a sarvis thicket on to a fir bench where the timber was open, when a big black-tailed doe jumped up and whistled. Her fawns lay still with their heads on the ground, hiding. I shot one through the head, and as they were about twenty feet apart, the other never moved and I shot it through the head. They were nice and fat, had shed their spots, and weighed 52lbs. each.

I dressed them, hung them up out of the way of the coyotes, and kept on to our place of meeting. Quite a number had got there ahead of me, and they were speculating on what I had shot at. They all seemed to think that it was I that had done the shooting, although a number of other shots had been fired. I told them I had killed two little ones. We made another drive down to where they had told the women to camp. When we got there we found the women had made camp and had dinner ready.

I took my horse and traps and went back to where my deer were, gave one to an old man, and then I struck out for my cabin, distant about seven miles, which I reached before dark, tired and hungry. I have never yet been hungry enough to relish Indian cooking. When I go out with them, I take bread enough to do a couple of days. This day there had been forty-seven shots fired and three deer killed. They generally take three or four boxes of cartridges, and but few ever kill as many as a dozen deer in the fall, when the deer are fat and nice. For any hunter can kill six poor deer to one fat one.

LEW WILMOT.

"PODGERS'S" COMMENTARIES.

THE opening editorial of last week's FOREST AND STREAM reads charmingly on the beauties of spring, and must have been written on one of the very few pleasant balmy days we have had (I can remember but one). I read it in a suit of winter clothes and an overcoat, and at the present writing lay down my pen every few moments to blow on my benumbed fingers. Perhaps by the time the next number appears the weather will have moderated so that your beautiful tribute to spring may be a better fit. It is to be hoped so, for this cold, raw temperature is discouraging, and a damper on all plans for excursions into the country to interview those lovely marsh marigolds and see those little squirrels frisk around. If the temperature is no improvement on what it is at this moment, Mr. Squirrel will do very little frisking, but be curled up in his hole, under the impression that there is some mistake somewhere, and that it is January instead of May, and that his almanac is a fraud.

Speaking of the country suggests the inquiry as to where we can find that elysium we are all pining for, where fishing and sailing can be had at moderate cost—some place where the tennis young man and his blazer, and the masculine young woman do not materialize, where boiled shirts are not *de rigeur*, a log camp or old-fashioned country hotel, and plain, cheap fare, either on the coast or in the wilds; and where black flies and mosquitoes do not make life a torment. Can not some reader of the FOREST AND STREAM tell me and perhaps others of such a paradise at $7 a week, where we can paddle our own canoe or sail the seductive catboat, on fresh or salt water? Who will earn our blessing by informing us?

That cut last week of the antlers of the extinct Irish deer suggests the wonder how such animals ever got through the forest. That may have been his business, but a practical view of the case is not thus easily satisfied. Again, what manner of man hunted him, or did he hunt the man? There were no Winchesters in those days and the young idea was too young to know how to shoot, and when the hunter did succeed in capturing one of these gigantic animals, what a relief to the community in which he lived that there was no room for a big lie about the size of them, the case being so thoroughly anticipated. It is to be hoped that the present fad of converting antlers into hat-racks did not exist in those days, for what room would there have been for the hunter in his presumably very primitive habitation? On the whole, we are glad that sized horns have not been handed down to this generation with many other overgrown specimens of the first attempt to stock the world with game. Being found a little too much of a good thing the scale was modified, but there has not been much modification in the big yarns we read; at the present day the game is smaller, but the stories maintain their size.

Mr. A. A. Lesueur's article on camping out contains many valuable hints and should be cut out and filed away in the pocket of every hunting coat for future reference. The undersigned having lived for three consecutive years under canvas can fully indorse the hints on the question of tents. The suggestion of extra flies is valuable. A good fly over your tent insures no leaks or dampness from driving rain on a single thickness, and if your extra flies are waterproofed they will protect your duffle, when spread over it, from possible damage.

One suggestion in addition to the outfit may not be out of place—the result of much discomfort from cooking at an open fire from the smoke in the eyes from whirling airs and winds, always a source of irritation and annoyance.

A great convenience is a mess chest carrying your dishes, cups, knives and forks, pepper, salt and many small necessities. Let this be a wicker basket to be light, covered with canvas to be waterproof and exclude dust, then have a sheet-iron box made without top in which to drop your basket, with handles, and on the bottom, holes, similar to the openings of a cook stove, with covers of sheet iron on a pivot or rivet whereby to turn them off or on; also a hole for a short joint of stovepipe, or two joints each a foot long. When you reach camp lift out your basket, turn your sheet-iron box bottom up, clap on your joints of pipe, and there you are, with as good a cook stove as a cast-iron $25 affair, on which you can cook as well, and the annoyance of smoke is entirely avoided. By having a square hole cut out low down in front for draft, you can have a rousing hot fire and boil your coffee in five minutes with what twigs and fuel you have at hand. The device also avoids all danger of setting the grass on fire. When you break camp, turn your stove over and drop your basket into it, and there you are again.

The iron protects your basket from wear and chafing in the wagon, and adds only the thickness of the iron to its bulk and but a few pounds to its weight. The iron should be of sufficient thickness to keep its shape and not be warped—a sixteenth will do probably. I have used this kind of an outfit and would not go into camp without such a great convenience.

I do not agree with "Awahsoose" as to his belief that the increased number of accidents from guns is caused by the (as he says) unsafe principle of rebounding locks. In my experience I have had three accidental discharges of my gun, fortunately resulting in no more serious injury than in one instance shooting off the toe of my hunting boot. In each case I was using a gun not supplied with the rebounding lock, but with the old-fashioned lock, carried at half cock. In nearly every case it will be found that a blow of the force requisite to set off the rebounding half-cock will set off the other. Try it and settle the question, using several guns for the experiment to get an average strength of spring.

The article on "A California Trout Stream," by "Marion" carries me back not "to old Virginia," but to California. I know the ground she describes well; have climbed those same "elevations" and caught many a big basket of trout from that same stream, (No, I am not going to tell a big fish story.) I seldom returned the same day, but usually camped, as to have to return the same day one loses the best fishing—evening and next morning, especially the evening, as it is a peculiarity of the fishing in many California trout streams that the fish will not bite until the sun is up, and the early-bird fishermen have no luck until the sun begins to throw its beams on the water. The habits of the California trout differ very much from those of our Eastern trout, the latter being very shy as is well known, and they will not rise in bright sunshine, nor after they have seen you, whereas the California trout is not so fastidious, and after seeing you and running away down the stream for a distance will think better of it, stop and take the fly. The real truth is, if I as a Californian do say it (no reference to the truthful or untruthfulness of Californians) the truth is that the California trout does not possess the gamy and high aristocratic characteristics of the Eastern variety, and the wonder is that he should be brought here to stock Eastern streams, for it is really the fact that he is the least bit of a mongrel, and it does not require half the skill and caution to catch him that it does to capture the genuine Eastern beauty. Perhaps that is the reason the Californian is imported to stock Eastern streams. It is making the punishment fit the crime, *i. e.*, the fish the the skill and capacity of the fisherman. (Who will pitch into me for that insinuation?) I am greatly indebted to "Marion" for her carrying me back to the dear old Sulphur stream; I rather think I would like to have been one of the party just to have known the charming writer, presuming the name does mean what it implies—a woman—and that those bright blue eyes she speaks of were her own.

No more space to spare, did you say, Mr. Editor? All right, I will subside.

PODGERS.

SPRING SHOOTING.

HAVING some years since passed the age allotted to mortals, I can but feel that the rod and gun must be laid aside for younger heads and more supple limbs. But my interest in camp life and outdoor recreations has not waned, and one of my sources of comfort during "shut-in" days is in recalling past experiences—some pleasant, and some not so pleasant—in forest camps and ducking boats and blinds, with good guides and genial companions. Alas! how few remain this side the stream, and every year their number is growing less.

In thus reviewing the past those experiences that were interwoven with the most toil, exposure and roughness generally, are the ones most deeply impressed on memory's tablet and oftenest spoken of. Where is the sportsman who has passed safely through deadly peril or laborious toil who was not ever after glad of the experience?

Still, there are many "red letter" days, when sky, air, water and woodland were in such perfect harmony with themselves and with our physical and mental condition, that to live was a luxury—all care and worry forgotten while thus floating on life's current.

But what inspired me to write at this time was that I might thus express the satisfaction I feel in the fact that the subject of "Spring Shooting" is being discussed, in fact, has come to the front; and that the practice will ere long be entirely prohibited by suitable laws, that can be understood and enforced. Anti-spring shooting has long been a hobby with me, and I am happy to be able to say that never but once have I indulged in the sport. That once was nineteen years ago, in April, and then I only killed three black ducks, and one of those, having fallen on the ice, was swooped on by an eagle and devoured within my sight, but out of reach of my gun.

In evidence of the growth of right sentiment among sportsmen, notice the frequent allusion to the wrong done by spring shooting in the FOREST AND STREAM, editorially and by correspondents, and other respectable papers, and then compare these utterances with the action of the Albany convention of sportsmen held several years since, at which the late John R. Wiltsie, of Newburgh, was the presiding officer. The object was to prepare alterations and changes in the game laws of the State and to present them to the Legislature for adoption.

At that convention, which proved to be largely in control of hotel keepers—notoriously so by one from Cooperstown—the writer offered a resolution, which was seconded, "that all spring shooting be prohibited, etc.," and advocated its adoption by the convention, to the best of his ability. No one else spoke in its favor; though many admitted that the principle was right, but were not prepared to vote for the resolution. The outspoken opponents were mostly from Long Island; their main argument being, "If we don't shoot in the spring others will, and we might as well have some of the fun as other States." The reply was, "Let the Empire State do right and other States will follow." So strong was the opposition that the president saw there was no chance of an affirmative vote, and asked me to withdraw it. I said, "No! let a vote be taken." The result was, that except my own and two other votes, the "noes" were unanimous.

Should a similar resolution be brought before a State convention of sportsmen at the present time, or in the near future, who does not believe the affirmative would have it by a large majority?

There is every argument—but greed—in favor of protecting mated game birds; and the sooner such protection is given, the better will it be for all—sportsmen, farmers, guides, hotel keepers, and even pot-hunters and market-shooters.

J. H. D.

POUGHKEEPSIE.

Natural Game Preserves of North America.

IT is well known by all who have given any attention to the hunting grounds of North America that the country traversed by the Northern Pacific Railroad is rich in game and fish. This company has for several years past given special attention to hunting and fishing in the country tributary to this line, and under the above title have recently issued a guide to the hunting and

fishing grounds that lie between the headwaters of the Mississippi and Great Lakes on the one hand and the Pacific Ocean on the other. The beautifully illustrated pamphlet which we have just received contains abstracts of the game laws of the various States through which the road passes, as well as the names and descriptions of localities where all sorts of game—from moose and bear down to the smaller game birds—can be had. Fishing localities are not neglected, and many points are named where we have taken the big trout and gamy grayling. Useful pages of the book are those devoted to suggestions as to ammunition, clothing, guides, pack animals, and so on, and still more important is a list of localities with names of men who are competent to guide tourists, and the prices which such men charge for their services. The pamphlet is for free distribution, and those desirous to see a copy of it should apply to the General Passenger Department of the Northern Pacific Railroad, St. Paul, Minnesota.

NEW YORK ASSOCIATION.

[*Special to Forest and Stream.*]

THE next annual convention of the New York State Association for the Protection of Fish and Game will be held in the city of Syracuse, beginning on Monday evening, June 13.

The various organizations throughout the State, which are members of the Association, are requested to send the usual number of delegates, and all clubs and associations which are in sympathy with the objects and purposes of the Association but not affiliated with it, are cordially invited to make application for membership at this meeting.

It is much to be desired that influential men everywhere who desire reformation in forestry and the game laws shall join local organizations and thereby become eligible to seats in the convention.

It is expected that the preliminary proceedings of this annual meeting will possess unusual interest. It is probable that the committee appointed pursuant to a resolution by the State Convention in this city last February will make a report at this time and propose some changes in the constitution of the Association for the purpose of broadening its scope and influence.

The local associations, which have the preparations for the convention in charge, will in due time make the usual announcement of programme, etc.

SYRACUSE, May 18. HORACE WHITE, President.

To the Sportsmen of New York:

The undersigned constitute a committee charged with the duty of submitting to the New York State Association for the Protection of Fish and Game at its next meeting, in June, amendments of the constitution and a plan of action looking to more efficient game and fish protective effort by the Association. We wish to communicate with all gun clubs and protective societies, whether now members of the Association or not; and with all individuals who may not belong to any club but may nevertheless be interested in the purposes of the Association. Communications may be addressed in care of FOREST AND STREAM.

F. J. AMSDEN,
D. H. BRUCE,
R. B. LAWRENCE,
C. B. REYNOLDS,
J. S. VAN CLEEF.

EXPERIENCE WITH CALIBERS.

THE diversity of opinions in regard to calibers of rifles for large game will always exist. Perhaps something might be done to assist the uninitiated (those having killed game know all about it) in selecting a rifle suitable for successfully and satisfactorily killing the larger of the American game. Actual records made with different calibers might determine which would give the best results.

Headquartered at Florence, Wis. (time covered six weeks) with a .50-95 hollow point magazine Winchester, I killed 118 deer; eight deer of every ten fell when they "got the lead;" average of whole number. One ball of six passed through deer, average of whole number of balls shot into deer. No deer shot in the body and lost.

On the rivers Brazos, Chamee, Manajo and Blanco, I scored for the same cartridge and gun (time covered four weeks) eighteen bear, not one of them touched by a second ball.

During the past four seasons I have killed with the .50-95 and .50-110, hollow points, magazine Winchester, 121 bear. Not one wounded bear lost from these guns. The .32 may kill for you, but not for me. ED. RICHMOND.

Ducks in Lake Erie Nets.

DUNKIRK, N. Y., May 10.—I noticed in a late edition of your paper that the lake fishermen are finding lots of dead ducks in their gill-nets. I was told to-day by a gun dealer, Mr. E. Wages, that he had seen as many as 2,000 brought in here at one time by the steamers fishing on Lake Erie. He says one of the fishermen told him yesterday that they ran through about ten miles solid of ducks of all kinds, and that lots of the females were so heavy with eggs they could hardly raise out of the water. The fishermen consider the ducks a great nuisance to them, for in their struggles to get out they draw the mesh of the nets so small that the fish can't get caught. It seems that the immense flocks keep well out in the lake away from shore and the gunners. What a pity so many days of fine shooting are taken away from the sportsman who so thoroughly enjoys it, by the ducks being killed by people who didn't want to catch them and would much prefer to have them keep away from their nets.—E. H. K.

NEW YORK GAME LAW.

The full text of the new law has been put into type by the Forest and Stream Publishing Co., and is now ready. Price, 25 cents per copy.

A special edition has been prepared for the use of clubs and associations, who may order in lots of 100 or more. These will be supplied at a nominal price. Write for terms, stating the number wanted.

Map of the United States.

A large, handsome map of the United States, mounted and suitable for office or home use, is issued by the Burlington Route. Copies will be mailed to any address on receipt of twelve cents in postage by P. S. EUSTIS, General Pass. Agent, C., B. & Q. R. R., Chicago, Ill.—*Adv.*

Playing Cards.

You can obtain a pack of best quality playing cards by sending fifteen cents in postage to P. S. EUSTIS, General Passenger Agent, C., B. & Q. R. R., Chicago, Ill.—*Adv.*

RARE chance now offered to secure 2,000 acres wild land through which runs four miles of finest trout stream in Pennsylvania. Good shooting in season. Stream can easily be protected. Easy access. Address N. B. BUBB, Williamsport, Pa.—*Adv.*

NAMES AND PORTRAITS OF BIRDS, by Gurdon Trumbull. A book particularly interesting to gunners, for by its use they can identify without question all the American game birds which they may kill. Cloth, 220 pages, price $2.50. For sale by FOREST AND STREAM.

THE four full-page pictures, Young Mountain Sheep, American Elk, Group of Elk, and FOREST AND STREAM'S Grizzly, from the "*Forest and Stream Animal Series*," handsomely printed on heavy paper suitable for framing. The set of four (in tube) will be sent for ten cents (stamps will do)—*Adv.*

Sea and River Fishing.

THE FULL TEXTS of the game fish laws of all the States, and Canada, are given in the *Book of the Game Laws.*

Trout and Bass Fishing.

WE have secured, for the private information of the readers of FOREST AND STREAM, knowledge of a number of streams and lakes easily accessible from this city, where we believe that good fishing for trout and black bass may be had. The information we shall be glad to furnish without charge to any reader of FOREST AND STREAM who will apply for it, either personally or by letter.

JAMAICA BAY SUNDAY FISHING.

Editor Forest and Stream:

In your issue of May 12 you called attention to the conflict between Section 172 of the new fish law, which contains the following provision: "Fish shall not be fished for, caught or killed by any device except angling, *which shall be lawful on any day of the year* between the first day of April and the first day of December in the waters of Jamaica Bay or the inlet thereof." And Section 276, which provides that "nothing in this chapter shall be construed to amend or repeal any provision of the criminal or Penal Code."

The section of the Penal Code which bears upon this question is No. 265 and contains the following clause: "All shooting, hunting, fishing, playing, horse-racing, gaming or other public sports, exercises or shows upon the first day of the week, and all noise disturbing the peace of the day are prohibited."

The question which arises is this: Does the law just passed make angling on Sunday in Jamaica Bay lawful?

A reference to two or three decisions of the Court of Appeals will aid us in answering this question.

The Penal Code was enacted in 1882, and it defined generally the crime of bribery and fixes the punishment therefor; and in the same year the New York Consolidation Act was passed, and it also prescribed a different punishment for the crime of bribery committed by a municipal officer.

The Consolidation Act also provided that the Penal Code was to have the same effect as if it had been passed after that act; that is, it in terms subordinated the Consolidation Act to the Penal Code.

Subsequently Henry J. Jaehne was tried for bribery under the Penal Code, and his counsel claimed that he should have been tried under the Consolidation Act, which fixes a shorter term of imprisonment.

The Court of Appeals, in its opinion, held, in reference to the provision, that the Penal Code was to have the same effect as if passed after the Consolidation Act, as follows:

> This provision, although somewhat anomalous, does not, as we can perceive, transcend the legislative power. It subordinates the Consolidation Act to the Penal Code wherever the two statutes are in conflict, and moreover, what is material to notice, the provision affords the plainest implication that in the sense of the Legislature there were, or might be, penal provisions in the Consolidation Act in conflict with the Penal Code. For the purpose of construction the Legislature has declared in what order of time the two statutes shall be deemed to have been enacted, and there being no question of legislative power, it is the plain duty of courts to construe the two statutes in accordance with this direction. 103 N. Y. 182 (189).

This, at first glance, would seem to answer the question, but it does not, although it has an important bearing upon it.

It does decide that the Legislature has power to say that in case of a conflict between a new act and the Penal Code, the provisions of the new act shall be subordinate to the Penal Code.

And it also decides that under the provisions of the Consolidation Act the mode of procedure and punishment prescribed for the crime of bribery were subordinate to the Penal Code on account of the special provision in the Consolidation Act, and the above is all that this case has decided; but it has an important bearing upon the construction to be given to Section 276 of the new fish law.

This law undertakes to prescribe that certain acts are misdemeanors, and specifies the mode of procedure and fixes the penalties or punishments attached to these offenses, and the effect of Section 276 under the principle settled in the above case is simply to subordinate the provisions of the new fish law so far as they relate to the mode of procedure and punishment to the Penal Code.

The real question in this case is whether the Legislature intended to authorize fishing on Sunday in Jamaica Bay, and if so that intention must prevail, notwithstanding the provisions of Section 276.

A case involving the same apparent conflict has just been decided by the Court of Appeals, by which the well settled principles of the construction of statutes have been reaffirmed. In Hoey vs. Gilroy 129 N. Y. 132 the following question was before the court:

The Consolidation Act of the State of New York provides that the common council *shall have no power* to authorize the placing or continuing of any obstruction upon any street or sidewalk, and afterward the same act provides that the common council *shall have the power* to regulate the use of streets and sidewalks for signs, sign posts, awning-posts, etc.

Under this specific power the common council had authorized the continuance of an awning which the court below as well as the Court of Appeals held was, according to the general rules of law, an encroachment upon the street.

In sustaining the power of the common council the court gave the following opinion:

> Effect must be given to this statute according to the intention of the Legislature. It will not do to say that because the Legislature in general words declared that the common council "shall have no power to authorize the placing or continuing of any encroachment or obstruction upon any street or sidewalk," and in the same statute specifically authorized them to regulate awnings, the prohibition and the specific power are so contradictory and inconsistent that one or the other must be rejected. Courts in construing statutes aim to reconcile apparent contradictions and to give effect, if possible, to every part of the enactment.
>
> It cannot be doubted that the power to regulate awnings carried with it the power to authorize their erection and maintenance upon compliance with the rules adopted upon that subject. It is just as clear that the Legislature intended to authorize the common council to permit the construction of awnings as it is that it intended to prohibit them from permitting encroachments upon or obstructions in the streets. An awning was an obstruction that was intended to be excepted from the general prohibitive words, or perhaps it would be better to say that the Legislature did not intend that the general words should cover that particular case. When a statute contains two distinct provisions, one being specific with precise directions to do a particular thing or permit it to be done, and the other general, prohibiting certain acts which, in their general sense include the particular thing authorized by the direction, the general prohibitive clause does not control the specific authority. When a general intention is expressed and also a particular intention incompatible with the general intention, the particular intention is to be considered in the nature of an exception. (Churchill vs. Crease, 5 Bing. 178: People ex rel. v. McClave, 99 N. Y. 83, 89.)

Perhaps the principle recognized and settled in the above case cannot be more tersely stated than by quoting from the opinion of the Court of Appeals in Riggs vs. Palmer, pp. 506, in which the Court says:

> It is a familiar canon of construction that a thing which is within the intention of the makers of a statute is as much within the statute as if it were within the letter; and a thing which is within the letter of the statute is not within the statute, unless it be within the intention of the makers.

By applying the principle settled in the case of Hoey vs. Gilroy we arrive at the following construction:

Section 276 expresses the *general intention* of the Legislature that the game and fish law must be subordinate to the Penal Code, and Section 172 expresses the *particular intention* of the Legislature that *its* provisions are to be considered in the nature of an exception.

POUGHKEEPSIE, May 16. J. S. VAN CLEEF.

EVOLUTION OF THE RUBBER BOOT.

Editor Forest and Stream:

Perhaps nothing has caused the old angler, who has always rejoiced in the firm and steady foothold which his old hob-nails always have given, more quiet enjoyment than that derived from seeing the novice who has freely expressed his disdain for "hob-nails" and his contempt for the old fogy who persists in using them, make his first attempt at wading a stream in rubber boots, especially when the stones were so covered with slime or a clay ooze that they almost defied the grip of the hob-nail itself. I do not refer to the rubber legging of to-day, but its ancestor, the rubber boot. What that boot was can perhaps best be described by relating an incident or two.

In 1860 Dr. K. was one of our party of four which visited the Beaverkill for a week's sport with the fly, when we made our home at that most delightful retreat, Jas. Murdock's. The Doctor, who during his whole trip the preceding year had grumbled about "the deuced wetness of the water," had several times informed us that we were at liberty to make fools of ourselves if we wanted to by using hob-nailed shoes, but that he had provided himself with a pair of rubber waders just put upon the market at the very modest price of $10.

On the first day our trip was down stream, and we were all to meet for lunch at the well known pool below Voorhees's dam. When the time to start arrived the Doctor appeared arrayed in the most stupendous pair of boots ever beheld. They were a sort of Siamese Twins; the feet were thick and heavy, the legs were immense, and they were joined at the crotch and extended up 6in. or more in front and behind, and were held up by straps over the shoulders; the *tout ensemble* was that of a rubber meal bag with legs and feet, and the upper part of a man sticking out of the top.

The morning tramp in the water soon polished the soles of the boots, and the Doctor reeled through the water like a drunken man in his efforts to preserve his equilibrium. He reached the pool in our lunching place a little before us, and was fishing in the water up to his hips when suddenly he uttered a loud cry for help.

The treacherous boot had got in its fine work: there sat the Doctor on the bottom of the stream up to his arm pits in the water, holding his rod with his right hand and hugging his creel with his left arm. The tops of his boots had expanded to the size of an umbrella while he was bouncing over the stones and riding down stream as fast as the swift current could take him. We rushed to the rescue, raised him up, led him ashore and laid him down on his back upon the bank.

He admitted that he was already converted to the doctrine of the hob-nail, but we felt that he could only be admitted to the fraternity of anglers through "baptism by immersion," and so while one of us held him down the other two lifted up his feet until at least half a barrel of water had been poured over his breast and face. When he had expressed due contrition for wearing the boots and the proper spirit of forgiveness for what we had done, and had given a promise not to wear such boots another day, we released him.

With becoming generosity we never referred to the rubber boots again, but just as we were leaving for home

Mr. Murdock called out, "Doctor, you have left your boots." "I know it," he replied, "and if you can find any fool who wants to use them let him have them, but never reveal to him the name of the fool who bought them."

Those boots might properly be called the grandfather of the present legging.

I did not meet anybody after that who had rubber boot on the brain until in 1864. In that year Col. V. was the United States Quartermaster of the Eastern Department, and a large contract was about to be given out for certain hardware for the army. Mr. J. and Mr. M. were competitors for this contract and agreed to pool the contract if either was successful. For the purpose of getting on good terms with the Colonel they proposed a trip to the Rondout for a few days' sport in trout fishing. None of the party had ever caught a trout and they relied upon Mr. C , of New York, to provide an outfit; and again the rubber boot was an essential feature, but this time a boot which reached only about half way from the knee to the hip.

I was enjoying my usual spring trip when the whole party arrived about two o'clock one morning in June at David B. Smith's, where I was staying. It consisted of Colonel V., who rejoiced in a weight of 320lbs.; Mr. M., who weighed about 240lbs.; and Mr. J., who was the light-weight of the party. Supposing that they were going far beyond the bounds of civilization, they had brought with them an extra conveyance containing two barrels and several boxes filled with bread, hams, tongues and other articles of a solid or fluid nature, and all for a three days' trip!

As a business adventure it was a marked success, but as a fishing trip a dismal failure. The Colonel never left his room, largely for the reason that the tonics which were furnished to strengthen him were bestowed too frequently and with too lavish a hand. Immediately upon their arrival Mr. M was detailed to administer to the wants of the Colonel, and Mr. J. was detailed for the purpose of supplying the table with fish.

As he started out on the first morning he very freely expressed his contempt for those who were too penurious to expend the meagre sum of $5 for a pair of rubber boots. We both went up the stream, and I gave him the best ground, going further up the stream myself. Toward evening I had filled my 18-pound creel and was on my way home, when I overtook Mr. J., who was limping and had one of his boots in his hand. As I joined him I casually inquired as to his success, and he curtly replied, "Two trout and a blister on my heel as big as a copper cent," coupled with an anathema on the boots.

As we sat enjoying our cigars after our trout supper, Mr. J. asked us when we expected to go out the next morning, and when we replied about 8 or 9 o'clock, he informed us with an air of superiority that if we knew anything about trout fishing we would go out before sunrise; and he proposed to demonstrate the correctness of his remark by going out the next morning at the break of day.

Early on the next morning he sallied forth, attired in his best broadcloth suit and again arrayed in his rubber boots, to fish a deep pool just below a dam situated a few rods above the house.

The water had flowed over the whole length of the dam during the previous night upon an apron 10 or 12ft. wide, composed of hemlock slabs laid with the round side up. It was dangerous footing even for hob-nails. The man in charge of the sawmill just below had started the wheel while it was yet dark and drawn the water down so that the slabs were bare.

Out upon this apron Mr. J. crept and began to cast his fly, but the wily trout would not be enticed. In his eagerness to get a rise he crept further and further out upon the apron, when suddenly he uttered an agonizing shriek, which brought every one in the house out of bed and to the windows.

If the slabs had been human they could not have done finer work. In an instant the rubber boots had flown out in front of our hero, and down he came on the end of a light slab, which acting like a spring board, sent him up about a foot, ended him half over, and sent him head first into the pool beneath, which was 10ft. deep.

The miller rushed to the rescue with a log hook and fished him out.

After breakfast he announced that his trout fishing was done, and he kindly offered to lend his boots to his friend for a day's sport while he stayed home and dried out, and acting as nurse to the Colonel; but Mr. M. wisely suggested that he deemed it safer for the whole party to fish thereafter from a boat, and proposed trying a pond for pike on their way home.

We had not forgotten the two rebukes Mr. J. had given us, and so—just for our information and not in the spirit of retaliation at all—could not refrain from asking him if he had seen any trout leap out of the water before he leaped into it, and he—but his words were too unholy for repetition.

As the party started for home that morning some one cautioned Mr. J. not to forget to take his rubber boots, but the kind reminder brought forth imprecations so loud and deep that even the sun hid its face behind a cloud for shame.

Nearly thirty years have passed since then, and out of the rubber boot during these years the light and comfortable stocking or legging has been evolved, a child of the third generation. V. C.

POUGHKEEPSIE, N. Y.

Small-Mouthed Red-Eyed Gray Bass.

SAGINAW, Mich., May 12 —I have a letter to-day from my friend in St. Paul, inclosing one from C. J. C. Bedman, of Alexandria, Minn. I believe Lake Ida is the lake he has reference to. He has offered $5 for a 5 pound gray bass and hopes to have one soon to send to you. The weather is very cold and the ice is just out of the lake, so I imagine we are on the right track, and one of these days will be able to locate this at present but little known fish, the small-mouthed red-eyed gray bass.—W. B. MERSHON.

Catskill Mountain Trout.

HUNTER, May 6.—I got up at 4:30 A. M. Monday, and went with H. B. to Shanty Hollow and fished half way down to the old bridge. We got half a dozen apiece, and had them for our breakfast. Everybody fished for two days.—SCOTT.

BOSTON FISHING PARTIES.

BOSTON, May 14.—The trout fishing season is in full force, and yet there are no reports of good catches from the Maine lakes up to the present writing. I have arrangements with several good fishermen for immediate news of the landing of big trout or of even fair success. But up to the present time these sources of information are silent. This is nothing more than was to have been expected, however; nothing more than what is the fate of every season. Boston sportsmen get excited, even before the ice is out of the trout lakes, and they rush away as soon as the lakes are clear; but the big trout are taken later. Some of the early fishermen were hoping for landlocked salmon from Rangeley Lake proper, but that lake played the slow game this year and did not clear of ice till the other lakes of the Androscoggin chain had been clear five days; the real dates of the ice going out being on the 5th for Mooselucmaguntic and Richardson, while Rangeley did not clear till the 10th. Moosehead cleared on the 6th, though this lake is usually a couple of days or more ahead of the Rangeleys. The later leaving of the ice has doubtless prevented the landlocked salmon from coming to the lure in Rangeley Lake, for there are several good fishermen there who would be very likely to take them were it possible. Neither are there any reports of big brook trout taken yet. But there are numerous complaints of the very low water in the best trout lakes. Moosehead Lake is very low. A letter from the lumber trade says that the lake is so low that the logs have not yet been brought across. Many of the spring fishermen to that lake are aware of the meaning of this, for they have many times witnessed the moving of the great rafts of logs.

But in spite of the low water the parties continue to fit out for Moosehead. The Wright party will go this week—it was to leave on Tuesday. It is made up of a good representation of the celebrated Commodore Club, which owns the elegant club house at Moose Lake, in Hartland, Me. The names are John G. Wright, of the wool trade; E. A. Adams, of the Red Star Line of steamers; W. V. Kellen, well known in the legal profession as a reporter of decisions; G. W. Hastings, of Lambert Bros., in the glass trade; F. S. Sherburne, also in the glass trade; C. H. Souther, president of the New England Dredging Co; and H. M. Stephenson, a well known architect, and better known for the Boston buildings he has designed. Mr. Stephenson's name comes last on the list, but it is by no means the least among the fishermen who know him. He has several times been with the Harry Moore party to Moosehead and other fishing resorts. For this trip he has drawn a very happy sketch of the Wright party, en route for the trout waters of Moosehead. Mr. Wright appears in the lead with fish and rod over shoulder—an excellent character sketch, and I wish I could reproduce it here. He is followed by his train of rod-bearers, marching straight to conquest. But this party does not make a long stay at Moosehead. There are other attractions in Maine. They are to get back to the Commodore Club about Friday, where they are to be met by a party of fifteen or twenty of their fellow club members.

Another happy party of long-time friends at the Rangeley Lakes will leave Boston about the 26th. They are senior fishermen generally, and men of standing in the Hub, standing which they have well earned. Col. Horace T. Rockwell may be termed the leader of the party, of the printing firm of Rockwell & Churchell. Col. Rockwell has visited the Rangeleys almost every season for many years. Mr. Henry Priest, of Priest, Page & Co., is also a member of this party, and he is a senior fisherman at the same lakes. Col. E. B. Haskell and Mr. C. H. Andrews, both senior proprietors of the Boston *Herald*, are in the party, and they go to their own camp, Alerton Lodge, on the Mooselucmaguntic. These men have well earned an extended fishing trip to as good fishing as the country affords, for to their energy in former years the founding of the present very prosperous existence of the Boston *Herald* is due. Mr. Edward U. Curtis will also be one of this party. He was formerly city clerk of the Hub, I believe, but he is at present better known as a chosen delegate to the Republican National Convention at Minneapolis in June. With Col. Rockwell he will start for the lakes some days earlier than the rest of the party, for the reason that he must be in the Flour City in season to help make a candidate for President. Mr. John A. Lowell has for many years been a member of this same fishing party, and hopes to be with his fellows this year, though circumstances may prevent.

May 16.—A special this morning from Mr. H. A. Prescott, of the Mooselucmaguntic Hause, at Haines Landing, Me., says that Mr. J. L. Harberger, of Boston, has just taken two trout, the smallest weighing 4lbs. and the largest 6½lbs. This is Mr. Harberger's first trip to the Rangeley Lakes and he will be greatly pleased. The same special also says that Mr. and Mrs. N. N. Thayer, of Boston, caught 8 good trout on Friday, some of them large ones. These people are always fortunate. Mr. Thayer has visited Mooselucmaguntic many times.

There is to be a very noted party at the New Oxford Club camp, at B Pond, in the course of a few days. B Pond is up in the mountains some distance from the old Oxford Club camp, which was situated near the Pond-in-the-River some distance below the Middle Dam, Richardson Lake. The new camp was built last winter by Mr. Bayard Thayer, the proprietor of Birch Lodge, at the head of Richardson Lake. His Excellency, Governor Russell, with the others of the Thayer party at Birch Lodge last year, went to B Pond fishing, and so pleased were they with the surroundings that Mr. Thayer decided to build a camp there. The party that is to start for that camp this week is composed of Gov. Wm. E. Russell, Col. John Thayer, Mr. Bayard Thayer, Hon. John Simpkins, Mr. J. Otis Wetherbee, Col. Francis Peabody, and probably Mr. Herbert Leeds and Edwin H. Abbott.

Mr. Irwin Davis, of Boston, has started on a fishing trip to the west branch of the Penobscot, in Maine. He has a favorite fishing ground there. Mr. Henry Dennison, of the Dennison Tag Co., and Mr. Frank Kennedy, of cracker baking fame, with quite a party, are about starting for the home of the Dobsis Club on a fishing trip for landlocked salmon.

It is the fate of all parties to dwindle down to a few at about the time of starting, and the L. Dana Chapman party is no exception to the rule. They start for Blemis Camps, Mooselucmaguntic Lake, on Saturday, but the party will consist of only Mr. and Mrs. Chapman and Mr. and Mrs. L. C. Dizer. After all, four of the right sort make about the best party in the world. The Wadsworth party, formerly the Eugene Clapp party, has also dwindled to Mr. Wadsworth and Mr. Haskins. They go the last of this week to Haines Landing. Mr. Paine, who was to go with them, with quite a party of friends, got tired of waiting and is already at the fishing grounds.

SPECIAL.

TARPON OF THE BRAZOS.

THE inspiring sight of an 80lb. "Silver King," lying in the office of the Hotel Velasco to-day, prompts me to let brother sportsmen throughout this broad land know of our existence, and the quantity and variety of sport to be had at our very doorsteps. The surest way to verify my wish is, of course, to resort to the interesting pages of FOREST AND STREAM.

The tarpon was caught yesterday in a net by two fishermen in Oyster Creek, fully five miles from the place where that stream empties into the Gulf of Mexico. They report having had considerable work in landing him, but his struggles for freedom only succeeded in enmeshing him beyond hope of escape, and he was hauled ashore, and is now in the hands of our local taxidermist being prepared for exhibition.

Although the old inhabitants here report that the "Silver King" has not, in the past, put in an appearance here before June, this is the second capture this month. The first one was secured in a novel and rather extraordinary manner. A party was fishing off the wharf with a hand line, and was both surprised and alarmed at getting a tremendous bite, and seeing his line madly tearing up and down the waters of the Brazos. While he was holding on with might and main, the steamer Justine came along and, strange to say, her propeller caught the tarpon a whack on the head that finished him, and he was drawn to *terra firma* lifeless.

Next month the real sport will commence, as it is then that the fish will arrive by the hundred, and our local talent will again try their luck, although in the past not a single one has been landed through the medium of a rod and line, notwithstanding "bites" by the score. This state of affairs can be accounted for by the fact that the proper tackle has not been used, and the experience of the past may produce better results this season. Our anglers here cannot understand how it is that people fish for an entire day in Florida without hooking one, while the darkies along the jetties here, after catfish, have time and time again been jerked into the water by a tarpon catching their hand lines.

To give an idea of the topography of this place I will state the Brazos River empties into the Gulf of Mexico through a channel 560ft. wide. At either side are jetties of rock extending into the Gulf a distance of 5,400ft., and it is between those jetties that the tarpon congregate in such numbers, presumably coming into the river to feed. Readers can readily understand that in a contracted distance, limited to 560ft. in width, the chances of hooking a fish are much greater than in the open Gulf, especially as the mouth of the river is a regular thoroughfare for the passage of fish in and out. As this port has only just been opened up, the absence of steamers in the past, and the consequesnt quiet of the waters, has no doubt been a means of causing large fish to seek this inlet, and anglers who may be in quest of a fruitful spot in which to try their potential skill, can rest assured that at no other place South or West will their efforts meet with as much success.

Besides the tarpon the waters here are thronged with fine redfish or channel bass, many specimens weighing 30 to 40lbs. having been caught already.

Leaving the salt-water part of the business, we will now adjourn to the lakes, of which there are six within a radius of five miles. The black bass fishing in all those lakes is the finest imaginable, and as we now have a club here, consisting of the most prominent citizens; with the lakes posted and taken care of, this sport will last for nearly all time to come. The writer cast a fly over one of the lakes recently for two hours and with a result of 15 bass ranging from 1½ to 4lbs. each. The fly used was a grizzly-king, and I have at all times found it a killer here. The question may arise how it happens that such a sporting Arcadia should be absolutely unknown to the outside world, but it is only within the last ninety days that a railroad has entered this section, only then being assured that a deep water harbor had been obtained at the mouth of the Brazos.

Should any reader be desirous of learning more of this favored region, and will communicate with the writer by letter, it will be a pleasure to give all necessary particulars. Later on I hope to be able to give you an account of my campaign against the "King of the Deep," and trust to conquer his Majesty in a "fair field and no favor."

VELASCO, Texas, May 8. M. P. M.

Virginia Beach Fishing.

MR. THOS. J. MURREY has just returned to Washington from Virginia Beach, where he had gone to chum for bluefish. Unfortunately there were no accommodations for anglers in the way of boats and guides, it being too early in the season. Not too early for the fish, as bluefish and black-spotted salt-water trout were there in great abundance, besides other choice game species, but for the fishermen, who were not ready. The nets are reaping a righ harvest and the railroad facilities are inadequate to carry away the fish so captured. Tons and tons of fish are allowed to remain in the trap nets until they can be transported. Mr. Murrey says about fifty varieties of fishes were observed by him, and that early as the season is it was the greatest sight he has ever witnessed. Virginia Beach, he thinks, is one of the finest spots on the Atlantic coast for fishing, and if anglers will but put their minds to it, suitable arrangements can be made by which these fine fishing grounds will be easy to reach. Of course railroad and steamboat facilities via Norfolk are ample now. Good guides are badly needed. Striped bass had just commenced running May 14.

Cortland County Trout.

GENEVA, N. Y.—Charles S. Brown, a veteran fisherman of Geneva, on May 2 caught in Preble Brook, Cortland county, 35 fine trout, 20 of which weighed 22½lbs., 15 weighed 7lbs., the 35 weighed 29½lbs. The three largest as follows: 1lb. 12oz., 1lb. 11½oz., 1lb. 9oz. We think this a good record catch.—S.

THE CANADIAN TROUT SEASON.

QUEBEC, May 13.—With the disappearance of the ice from the surface of the lakes the fishing season is now fairly open. The ice left Lake St. John and Lake Edward early this week and Lake St. Joseph and most of the smaller lakes in this district more than a week ago. At no season of the year are the trout taken more freely in these waters than within the first fifteen or twenty days after the disappearance of the ice. Mr. Winfield, of this city, succeeded as early as Tuesday last in making a fine catch in Lake St. Joseph, taking some two dozen of handsome red trout. U. S. Consul Ryder, who has lately returned from Lake St. John with two American friends, who had business with the Hudson's Bay Company's agent there, brought with him some 40lbs. of speckled trout which he took on Monday and Tuesday last in the outlet of Lake Kiskisink or Cedar Lake, where the stream is crossed by the Quebec & Lake St. John R. R. Lake Kiskisink is rather more than three-fourths of the way from Quebec to Lake St. John. On its border stands the club house of the Metabetchouan Fishing Club, of which the Consul is a member. He has telegraphed the fact that the season is now well open here, to the officers of the club in Springfield and elsewhere, and several of the members are daily expected here on their way to their territory. The railway people and others who know the country endeavored to deter Mr. Ryder from fishing so early, believing that he had no chance at all of taking anything for another week to come. They are naturally much surprised at his good luck. Several of the Consul's catch are over a pound in weight, and some weigh two pounds each.

I have not yet heard of any ouananiche being taken in Lake St. John, but the season may open now any day.

E. T. D. CHAMBERS.

NORTHERN MINNESOTA NOTES.

DETROIT CITY, Minn., May 12.—We can join in the general chorus of a backward spring. "The most so ever known," or at least for a long, long time. Two weeks at a stretch of rain, chill and cold to one day of sunshine. No bass fishing yet. I went to McNeil's, on Lake Sally, May 2; usually there are several bass fishers there at the opening of the season, but this year my friend and I were all that were there. We tried faithfully for four hours, but not a bass "did riz" or show any sign whatever. McNeil has made a great improvement in his house—Fair Haven—having added fifteen new bedrooms, a ladies' parlor, office and large dining room; these are all finished in natural wood, and will add to the popularity of McNeil's as a resort. What especially took my fancy was the 160ft. of broad generous verandah put around the lower story on the lake side of the house. I have not heard of any catch of bass yet, in fact the season seems to be about a month late.

Stephens and I took a run out Ashland way, in northern Wisconsin, day before yesterday. The streams are all very high and patches of snow still in the woods. Some trout are being caught in the Brulé, a few in Pike Creek and Iron River; but the fishing is nothing like it usually is at this season of the year. Stephens and I went to our favorite creek near Ino, but we found the creek a mighty stream, swollen out of all resemblance to the creek we are so fond of. Not a trout could we persuade to rise, and I did not get sight of one, but Stephens saw two trying to get up the rapids at one place. Duluth Harbor is full of ice for miles out. The Booth Packing Co. have not started their boat, the Dixon, on its regular trip yet, but say they will the 14th.

We are hoping for fair weather soon, a subsidence of water and some grand good fishing. MYRON COOLEY.

CHICAGO AND THE WEST.

[*From a Staff Correspondent.*]

CHICAGO, Ill., May 13.—In the matter of the "moon-eye," or fresh-water shad, which receives mention in last week's paper at request of Mr. C. S. Burton, of this city, something further transpires by favor Mr. J. P. Roberts, one of the proprietors of "Roberts' Place," at Neenah, on Lake Winnebago, where these fish are caught most generally.

"In 1865," said Mr. Roberts, "Gen. Cass put 250,000 shad fry in the Little Butte des Morts, a small lake a half mile below the dam. Before that time, the natives tell me, these moon-eyes had never been seen. They all think these fish are really shad. The resemblance is very striking. The fish we take during the brief season in which they are rising usually weighs about 1½lbs. You need a small fly to catch them. An artificial fly tied as large as a sand fly would not hook them. They are very quick risers, and they fight very well. If you hook one in the lower jaw you are almost certain to lose it. The best of the season lasts about ten days, though last year we caught them in the river for a term of six weeks. They are usually gone by the end of June. This year the season is late, and there may be a few left at the time of the W. C. A. meet in early July, though none are ever seen in the Oshkosh end of the lake."

Mr. Burton, by the way, was out trout fishing last week, on the streams near Rio, Wis. He got 33 trout, few over a half pound. There are three streams at this point, which is just below Portage City. The market fishers of that region told Mr. Burton that they caught their largest fish at night. This makes him regret that he did not try night fishing for those big trout he saw in the Brulé last summer, which would take no known lure by day.

Mr. Chas. Norris, of the Big Four road, was also out after trout last week, and got 40 on the fly, although he found Wautoma Creek very high. A Mr. Spaulding, of Wautoma, got 43 trout that weighed 26lbs. Mr. Norris will be among the trout further north within a couple of weeks. The drive of logs should go out early this spring.

Mr. H. M. Bacon, an attorney of this city, inquires for some trout water for an early trip, but I have advised him to wait a week or two, as sport now is doubtful.

An interesting question as to right to take fish with a seine under consent of owner of the land on which the seined water lies, has been taken up and finally decided in the Illinois highest court. It is reported as follows:

"SPRINGFIELD, Ill., May 11.—The supreme court to-day handed down an opinion in the case of The People ex rel. vs. Bridges, which is of considerable interest, involving a construction of the law for the protection of fish. Jacob Miller is the owner of a quarter of a section of land in Sangamon county on which is situated a body of water known as Sand Prairie Lake. It is in the bottom of the north fork of the Sangamon River and at the furthest point is only a few yards removed from that stream. When the river is high the water from the stream finds its way into the lake through a depression or slough and the connection of the two bodies lasts for a period of several days or weeks. In July, 1890, James M. Bridges, with the consent of the owner of the lake, engaged in seining for fish in that body of water. For this he was arrested on complaint of a fish warden, tried in the Sangamon circuit court, and fined. This judgment the appellate court subsequently reversed and the case went to the supreme court, the defendent taking the ground that the statute did not and could not apply to the lake or pond in controversy, inasmuch as it was private property. The supreme court reverses the judgment of the appellate court, holding that the statute is broad enough to include the pond or lake in question; that bodies of water of that character are within the legislative intent and that the statute is constitutional and valid."

The only safe thing to do is not to use a seine at all. In due course that relic of barbarous days will be abolished formally by statute in this State, for every water without exception.

Mr. James St. John Greenough, president of the Whiteside Co. Fish Club, writes as follows: "By the paper I see that the State Fish League has been organized. We have a fishing club here for the purpose of stopping the seining in Rock River. We have had the hearty co-operation of Dr. Bartlett and have done good work, but I think that by further organization of the clubs more and better work can be done. We would like to join the League if possible, and any information will be gladly received."

That is the kind of talk to hear, Mr. Greenough has exactly the right idea. He and his club, and all others, will be very gladly welcomed into the League. As to purposes, methods and the formalities of membership, the most direct way to cover the ground is to send Mr. Greenough a copy of FOREST AND STREAM'S report of the Springfield meeting, and this has been done.

E. HOUGH.

COAL MINES AND FISH.

Editor Forest and Stream:

Thomas S. Hargest, Esq., has submitted to the Attorney General the following communications from the State Fishery Commissioners with a request for his official opinion upon the legal means available to prevent the incidental destruction of food fish in the streams of the State by coal operators, manufacturers and others:

Whereas, The fish wardens, after personal investigation and observation, have made reports to this board covering the following facts:

First—That the coal operators whose mines are located along or near the banks of the Shamokin, Mahanoy and Wiconisco creeks have accumulated large banks of culm deposited with reference to the creeks, so that with every heavy rainfall large quantities thereof are carried into the streams.

Second—That these large deposits of culm are now being washed by modern devices for the purpose of separating the slate and dirt from the small coals and preparing the latter for market, and by these operations the dirt, slate and waste water, impregnated with sulphur, is carried into the streams—in some instances by artificial means, in others by the natural conformation of the surface of the ground. These operations have resulted directly in destroying or banishing all fish from these streams and obliterating their spawning beds.

Fourth—That these streams all flow into the Susquehanna River, the water of which is being rapidly polluted, and the fish therein are being killed and driven out: therefore,

Resolved, That these facts be submitted to the Attorney General with the request that he advise this Board (a) whether any, and if any, what measures can be taken by this board to require the coal operators to restrict or confine their operations so as to avoid the pollution of the streams mentioned and the consequent destruction of food fish; (b) whether any power or authority has been conferred upon the Board of Fishery Commissioners to take action in the premises, and if so (c) what proceeding, if any, is the board authorized to institute or cause to be taken in order to prevent the wholesale destruction of food and game fish which is threatened by the poisoning of the waters of the streams mentioned.

The communication is signed by Henry C. Ford, H. C. Demuth, W. L. Powell and S. B. Stillwell, members of the commission.

Early Sea Bass.

IMMENSE schools of large sea bass were found on the fishing banks by the New York fishing steamers last week, and on Tuesday more than 4,000 were taken with hook and line. The deck of one boat was nearly covered with these fine fish. The run has made its appearance unusually early, much to the delight of the salt-water anglers. The sea bass is not a first-class game fish, but it is very showy and has excellent table qualities. It feeds near the bottom, and bites readily at clam or menhaden bait.

Blind Brook Trout.

NEW YORK.—Some twelve to fifteen years ago, through the kindness of Joseph Park, Esq., of Messrs. Park & Tilford, the late J. D. Minuse, of Rye, and myself, placed in the stream known as Blind Brook, in Westchester county, N. Y., 18,000 trout. I should like to hear if any of the readers of FOREST AND STREAM have ever fished these waters for trout and with what result. I have been on the Western plains since 1880 and have had no chance to cast a fly since.—HENRY OSBORN.

Black Bass in the Potomac.

SPAWNING BLACK BASS are now being caught in large numbers in the Potomac at Weverton and many other places. We regret to learn that some members of a very influential rod and gun club of Washington are taking the bass and aiding their guests to do the same injurious fishing.

JOHN LYLE KING.

IT is past 11 o'clock to-night, and immersed in the pages of FOREST AND STREAM I read with sudden heart-throb that John Lyle King is dead. Not that I knew him personally, but, years ago, a comrade of the Kingfisher Club sent me a copy of his book, "Trouting on the Brulé." Then I knew him as all anglers know each other, by his storied interpretations of the language of the woods and waters which revives recollection afresh and enables them to live over the delightful hours of the summer vacation. There is sorrow—sympathetic and tender—welling up in the heart that so genuine a sportsman, so graphic a writer, and so ardent a lover of nature has crossed the river and camped in the shadows of the beyond. A grand student of the wilderness, his lines of wayfaring have filled many leisure hours with pleasant thoughts, and to me there is a sense of personal loss in his death.

FRANKFORT, Kentucky. OLD SAM.

EARLY CLOSING ON SATURDAY.—Most of the wholesale and retail firms in Chicago have decided to close their stores on Saturday at 1:00 P. M., commencing May 1st, in order to give their clerks a much needed rest. In connection with this service the Wisconsin Central Lines beg to announce that commencing May 1st excursion tickets will be placed on sale to Lake Villa, Fox Lake, Antioch and Mukwonago. Trains leave the Grand Central Passenger Station at 8 A. M., 3 P. M., 4:25 P. M., 5:47 P. M. and 10:45 P. M. Returning trains arrive at Chicago at 7:15 A. M., 9:45 A. M., 9:50 A. M., 1:55 P. M. and 7:45 P. M. Ticket office, 205 Clark street, Chicago, Ill.—*Adv.*

AN OPPORTUNITY FOR TROUT FISHERMEN.—On May 28 and 30 the New York, Ontario & Western Railway will sell excursion tickets at the one-way fare from New York to all stations in Orange, Ulster, Sullivan and Delaware counties. This affords an opportunity to spend a holiday on the trout streams, and select, if desired, a summer boarding place in a region famous for its trout streams, and noted for its absolute healthfulness. Tickets are good returnable May 31, and are on sale at 323 Broadway, and ferry ticket offices. Send 6 cents in stamps for copy of N. Y., O. & W. Summer Homes. It gives all the trout streams, and a full list of all hotels, boarding and farm houses.—*Adv.*

Fishculture.

American Fisheries Society.

THE twenty-first annual meeting of the American Fisheries Society will be held on Wednesday and Thursday, May 25 and 26. The first meeting will be held at 10 o'clock at the Holland House, Thirtieth street and Fifth avenue, New York city, May 25.

The Kennel.

SAN FRANCISCO DOG SHOW.

[*Special Report.*]

SAN FRANCISCO, Cal., May 7.—The annual dog show of the California Kennel Club terminated to-night. Financially the show was a success, but in some ways it was a miserable failure. The total number of entries was 237, 123 less than last year. Non-sporting classes have improved in quality and quantity, but the pointers and fox-terriers show a very great falling off, the former 33 against 50 last year, the latter 12 against 32. This falling off being a poor compliment to the judge in the eyes of those who are not intimately acquainted with the facts of the case, I think it my duty to explain matters. The small number of entries is due entirely to dissension and the unpopularity of the California Kennel Club. Mr. J. B. Martin, our fox-terrier king in this section, recently received too many insults to swallow without retaliation, and drew out of the club; in consequence his friends refused to exhibit their dogs. The pointer and setter men would not enter their dogs either this year nor last because of the presence of one man in the club. This man was manager this year, as well as superintendent, executive committee and about everything else. In consequence, a town that should show at least 500 dogs, entered but 237. I have said above that the California Kennel Club was unpopular; strictly speaking that is not the case. The club contains many men that are not active members and a few that are active members that no man could raise any objection to. The objections are raised to one man and that man runs the club. As a result, almost the entire kennel contingency in this section have repudiated the California and have taken up the old Pacific Club with such a rush that its older members are paralyzed with astonishment. Some 64 new members will sign the roll and pay their initiation fee on or before Thursday evening, May 12.

Mr. Thos. Higgs, the superintendent in name only, was always on hand, attending to his work in his quiet way to the satisfaction of all. The show was kept very neatly; plenty of disinfectants were used, and, as far as things lay in Mr. Higgs's power, everything ran as smooth as oil.

Mr. A. B. Truman made himself generally obnoxious from beginning to end, resulting in the reorganization of the Pacific Club.

The attendance was light the first day, but very fair after that time.

Mr. James Mortimer was pronounced by all, even the defeated ones, to be the most popular judge that ever reached this coast. The Pacific Kennel Club entertained him while in town, and I fancy he returned to the East well satisfied with the "glorious climate of California."

MASTIFFS.—Ingleside Crown Prince, the winner, is unquestionably one of the best dogs in America; he has filled out and otherwise improved since last year; he has a splendid skull, good broad, deep, short muzzle; has too much wrinkle and is excessively throaty, is also a trifle light in mask and color of ears, but makes up for all other defects by being about as good as mastiffs ever get behind the shoulders. Lion, second, has a short muzzle of good width, but is peaked in skull and is bloodhoundy in expression, throaty, too rough in coat and poor condition, otherwise good. Duke, third, is short in skull, light in eye, ears large and carried out from the head, good body and bone, feet too long, and is not in the same class with the winner. Toby, hc., is a ginger-faced one, plain in head and without much quality. Lion E., c., is a poor specimen. The bitch class was a very poor lot. Vernist secured third; she is long in head and ears, houndy in expression and light in bone. Nellie, c., is very light and small and out of condition from nursing a litter of puppies.

GREAT DANES.—This class did not average as good in quality as last year, though there were fewer poor specimens. Hector, first, is a fine upstanding dog, much the tallest in the show, showing more quality than the balance; he has a good head, splendid neck and shoulders and is very fair in body and limbs. Jumbo, second, has a very good head and nice length of neck, good shoulders and in body and bone he beats the winner, but he loses to the latter in character and has a coat that is much too rough. Cæsar II., third, is good in body, back and loin, but is not square enough in muzzle, light in bone, feet too long and carries a crooked tail. Hector, vhc., is short and thick in head and lacking in stop, excellent bone, good body. Cæsar, hc., is a little coarse in head and too heavily built all through; a good mover. Leda, first in bitches, is plain in head, ears not trimmed, though too fat, is fair in body, back, loin and

bone. Nora, first, and Bell, second, are very promising puppies though much the youngest in the class, Nora has the best skull and her ears are the best trimmed, they are full of quality. Carlos, third, is of the same litter as Bell, but is fairer in color, she is untrimmed and short in head, but is an excellent pup showing considerable quality. Prince, vhc., and Bismark, hc., are much better matured but lacking in quality.

ST. BERNARDS.—This class has improved greatly since last year. California Alton, the winner, is without doubt the best St. Bernard that ever reached this coast. He has frequently been called a small edition of Sir Bedivere and he has much the same character. He is a little short in neck and back, and would be still better if a darker shade of orange in color. He is beautifully marked and shaded, possesses a good skull, ears well carried, a broad muzzle of good depth, magnificent bone, good coat and carries his tail well. Gillott, second, has not near the quality of the winner. He is smaller as well; his skull is well proportioned but there is not enough of it; he lacks blaze and in place of shadings has a black-brindle head; has fair bone in front but is lacking in bone behind; coat good, hind feet turn out, doubtless the effect of too much dew claw. He is not the equal of Grand Chancellor, third, and Chancellor would have beaten him had he been in condition. The latter has more character in head and is of better height and length, but lacks color and is very thin in flesh and light in bone; Marc Antony, vhc., lacks shadings and is woolly in coat, but has a good skull, nice ears, excellent muzzle, good bone and well-proportioned body; Rover, hc., is a small dog, very plain in head and a c. card would have been ample. There certainly is a greater division between him and Marc Antony than one letter. Lady Gladys, first in bitches, has very fair skull and muzzle, ears well placed and of good size, but lacks blaze and shadings, has one poor haw; her body, bone, legs and feet are excellent. She should make an excellent brood bitch. Victoria, second, is a dark brindle, nicely marked, but is inferior to the winner in skull and shown so fat that she is all out of shape. Puppies, St. Elmo, first, is a very promising puppy, with excellent bone, nice markings and shadings and a promising head. In smooths, Loris, third, is a bitch of some quality, but deficient in muzzle, light in bone and small. She has good coat and color.

NEWFOUNDLANDS.—Nero, first in dogs, has the best head and coat in the class, but there is not a real good Newfoundland in the whole lot. Comparatively speaking he was rightly placed. Prince, second, is a nine-month-old pup, with considerable character, good bone and a flat coat. Jack, third, has too much of a St. Bernard type of head. Moses, vhc., is too thick under the eyes and curly in coat.

GREYHOUNDS.—In dogs, Examiner, first, has a good head but is a bit short in neck, shoulders good, loin well arched, ribs good, front legs straight, but stifles weak but fairly well bent; he was shown in superb condition. Dounard, second, is only a sapling; he has good head and eyes, good length of neck, good shoulders, nice depth of ribs, good stifles, well let down in hocks and good feet. John W., third, is a trifle light in loin, otherwise he is good. Bitches saw Lady Emma first, a useful hound, with excellent head and neck, and good in body, back, loin, legs and feet. She is not in show condition, being with litter. Lady Olga, second, is short in head and neck, and small. Bessie, third, was shown with litter; she is fair in head and neck, ears not well carried and not in condition; she is a very fair hound and her litter by Play Boy promises well. Lady Cleveland, vhc., we overlooked. Ambita, vhc., is as beautiful a little hound as I ever saw; she was in the pink of show condition, but evidently not a worker, a very pretty catchy hound, well let down behind, with nice length of neck and good depth of body, but soft and toyish. In dog puppies Badge, third, got all he deserved. In bitch puppies Minnie, first, is a fair puppy, but weak in pasterns.

DEERHOUNDS.—This class was not as full of quality as the Los Angeles class. In dogs Scott, the winner, has a good head, neck and coat, is fairly well bent in stifles and well let down in hocks. He is much the best mover. Nero, second, is very short in head, good in coat, body and limbs, but lacking in character. Stag, third, was much the largest and I thought at the judging that he was a very fair hound. His owner removed him soon after the judging. In bitches Swift was first; he is short in head. Queen, second, is not as good as the winner in head or hocks.

FOXHOUNDS.—In dogs Paddy, first, has good quality, and is well formed all round. Carlo, second, is another type, longer in body, with excellent head and ears. Duke, third, is a trifle bloodhoundy-like in expression, otherwise good. Ike, vhc., is thick in skull. Prince, hc., is flat in ear and not well sprung in ribs. In bitches Julie, first, is a very typical hound. Princess, second, is thick in skull and short in ear, otherwise good. In puppies the winner, Slob, Jr., has excellent head, ears of good length and well hung, good bone and feet, but is a trifle light in body and loin. Will doubtless fill out with age.

POINTERS.—In challenge dogs Duke of Vernon, first, was shown in good condition; his grand head and neck and superb quality towered above his competitors for specials and won the special for best pointer in the show quite handily. Sally Brass II., first in challenge bitches, was, like her kennel companion, alone in the class; she is superb in legs and feet, but much too fat, her skull, neck and shoulders are excellent, but her muzzle is pinched and lacking in depth. In dogs 55lbs. and over, Wade Hampton, first, is too deep in muzzle, a bit thick in skull, but excellent in body and limb. Pat P., second, is too full over the eyes and poor in pasterns, but good in muzzle, body and back. Sir Fourth, third, is shallow in back ribs, but has a fair skull, good depth of muzzle, but ears are too large. Jack Robinson, vhc., is coarse in head, with ears folded. Clover, hc., is too thick in skull and pointed in muzzle. Bitches over 50lbs. had Vera, first; she won first last year, has grown a trifle cheeky, but has an elegant muzzle, is well ribbed and has good legs and feet. Queen Croxteth, second, is a bit thick in skull and lacks quality, otherwise all right. Gypsey Queen, third, has excellent skull and muzzle, but is not deep enough in stop and was shown too fat, she also moved poorly in the ring. True M., vhc., has lost a piece of her tail, is cheeky and weak in pasterns.

In challenge pointers, under 50lbs., Patti Croxteth had a walk over, as usual; she was shown in good condition, but little changed since last year; she is a little thick in skull and heavy in shoulders. Dogs under 55lbs. saw Kent of Bloomo first; he has a very fair head, is excellent in body and loin, but poor in shoulders and too high on the leg; he is a fair dog but will never make a clinker. Rap, second, is a little too thick in skull, too throaty, good in body, back loin and bone. Fire, third, is fair in muzzle, but has a poor expression and ears are not carried well; lacks spring of ribs and is short in back ribs. Croxteth T. is too short-legged for his length and size, has a very fair head but is splan-footed. In bitches under 50lbs. Meg Merrilies, first, was alone in the class; she is not quite square in muzzle, but the same is clean cut, skull good, ears a bit long, eye very expressive, very nice body, legs and feet. In dog puppies, Duke, Jr., first, is a bit thick in skull, but excels in muzzle, body and front legs. Grand Duke, second, is also a very promising puppy; a trifle poor in pasterns, and a little light in muzzle. Dick, third, has a very promising head, but is too young for the class. Tick, vhc., is a trifle plain in head, crooked in front and flat in back. All of the pups in this class are by Duke of Vernon. In bitch puppies, Midget, first, has a very good skull and muzzle, is good in body, back and loin, but is light in eye, throaty and weak in pasterns. Dede, second, we like full as well, she has more style and quality than the winner, and has not her faults. Betsy B., third, another daughter of Duke of Vernon, of the same litter as Dede, is not quite as good as Dede in head.

ENGLISH SETTERS.—This class does not compare in quality at all with your Eastern shows. In dogs, Sam K. Gladstone, first, is a Cincinnatus type of dog, extremely racy in build but head a little too narrow to suit my idea of a setter. In fact if this type is the correct one then Lee R, second, and Bob Gates, Jr., third, should have had about c. Sam K. Gladstone is the winner of our last Derby, and, barring type, he is a remarkably sound dog. Lee R., second, the winner of the Derby last year, is much smaller and not as racy; he beats Bob Gates in skull, but Bob beats him in muzzle; he is excellent in spring of ribs, body, loin, legs and feet and is a splendid mover; his ears are set on too high. Bob Gates, Jr., third, I like full as well on the bench as Lee R.; he is a good all around dog in the pink of condition barring his coat being a trifle short. In bitches, Lady Trippo, the field trial winner, won easily. She is the best in head and the best mover in the class, excellent in body, loin, legs and feet and shown in fine condition. Beasy, second, has an excellent skull but is flat over the eyes and deficient in stop; she is not a good mover, apparently being in whelp; she is excellent in body and legs. Flora, third, is deficient in stop, not right below the eyes, and a little shallow in body. Dog puppies.—Earl of Essex, first, has a good skull but is not quite square enough in muzzle; he is weak in pasterns and light in second thighs. Duke of Laurel, second, is a bit pinched in muzzle, otherwise good. Dan Ardo, third, has a good skull but is also pinched in muzzle. Bitch puppies.—Belle P., first, has a good skull and muzzle of fair depth.

GORDON SETTERS.—Ben Nevis, first, is a very fair dog, but would not be in it with the Eastern winners; Pluto, second, is not as good in head as the winner and is curly in coat. Bitches, Fanny, first, is a fair bitch, but not the equal of the winner in dogs; second was withheld and Lady Merren, third, is very poor. The only puppy, Black Frank, Jr., will never make a good one.

IRISH SETTERS.—Mike T., the challenge winner in dogs, has had it all to himself for years, hence his present exalted position, but he would not win vhc. in New York. Lady Elcho T., the winner in the corresponding bitch class, is a very typical-headed bitch of considerable quality all through and would make a good showing anywhere. The open classes were a rather poor lot; Memo P., first in dogs, is thick in skull and too long in back, color and coat, legs and feet good. The others are really not worth describing. They are all Irish setters and possess some character, but bad types of heads describes the lot. In bitches, Lightning, the winner, is nearer the proper type; she is very fair in head; Lady Juno, second, is a good mover with a fair head; Dora, third, is too short in head but is built for business. In puppies, Blarney, first, has a good skull and an unusually good muzzle, nice coat and color. Ruby M., first in bitch puppies, is a fair little bitch.

COCKER SPANIELS.—This class was very much better than last year, Bronta, first, has good skull, though too prominent just above the eyes, muzzle very good, good eye and ear, coat a trifle off, excellent body, loin, legs and feet, good bone and lots of character. Snipe, second, has the same fault as Bronta in skull, and is a trifle long in head, ears good, muzzle a bit pinched, coat flat and of good texture, excellent in legs, feet and character. Duke, third, has good skull, ears too high on head, muzzle, coat, bone and feet good, but is out at elbows and straight in stifles. Nip K., vhc., is good in muzzle and fair in skull, ears set on too high and are too short, otherwise good. In bitches, Brontilla, first, has a good skull, muzzle a trifle light, good coat and character, she is too long in body and light in bone. Bettie, second, has good skull, but is a bit light in muzzle, ears well hung and of good length, but a trifle heavy in leather, coat too short, a cobby little cocker of the proper type, but rather too small. Maud E., third, has the best head in the class, ears fine in leather and well hung, good body and bone, a nice mover, but proportionately a little too high on the leg, and was in very poor condition of coat. Belle Dot E., vhc., is rather toyish in head, coat short and too harsh, feet and legs good. Julie, vhc., is too broad in skull and badly pinched in muzzle, too long in coat. Dog puppies, Blackbird E., first, has a good skull, muzzle pinched at nostrils, eyes, ears, coat and character good.

FIELD SPANIELS.—Sport, first, is a small field spaniel, long and low, and very near the proper type of head, excellent flat coat, good body, bone, legs and feet. King Bee, second, is a big cocker; as a cocker he is a very typical specimen, or would be if he were under weight; coat should be flatter, body, bone, legs and feet good, but he is not a field spaniel.

IRISH WATER SPANIELS.—Two puppies were shown in the puppy class; they are both very promising; the dog Gafney won. He is better in bone and straighter on his legs, but the bitch Biddy is better in head and coat. Both are quite typical.

RETRIEVERS.—Three entries, none of them first class retrievers. Dude, first, was properly placed, being nearest the type of a curly coated retriever.

CHESAPEAKE BAY DOGS.—Trout, the winner in dogs is a little too short, but has a splendid coat, good bone and fair head. Bess, first in bitches, I like better, she has a darker eye, better head and more character, she is not nearly as good in bone as Trout and is a darker color which I think is not desirable. Pearl, second, is better in bone, has good coat and loses to Bess in head and density of coat.

COLLIES.—The open dog class was a very poor lot. Roslyn, Jr., third, is very high on his legs, has no coat and is poor in expression with wretchedly carried ears. The other entries, Don, hc., and Glen, c., are doubtless working collies, but not show dogs. In puppies, Gaff, given hc., is prick-eared and without coat or character.

DACHSHUNDS.—In dogs, Jabberer, first, has good length of head, good crook, and is the best in length of body. Tickel, second, is the toy type, a six-month puppy, very long and low, good in head, body and legs. Frindi, third, is thick in skull and not as good in front as those placed over him. Bitches.—Brunhilde, first, is of good length and splendid front. Dachs, second, is another of the toy type, good length of head but weak in jaw. Beauty, third, is of good length, but short in head. Waldine, vhc., is too thick in skull but fairly good in crook.

BEAGLES.—Flute II., the only entry, was very properly given a blue ribbon; he is a bit crooked in front but a typical beagle.

BULLDOGS.—Boxer, first, has a very fair head, but might be better in layback; his ears have been cut and he is weak in pasterns.

BULL-TERRIERS.—The dogs, five in number, were unnoticed. Spotless Prince and Rowdy absent. Six or seven of the bitches and puppies were also turned out of the ring. Twilight, the only real bull-terrier in the show, won first in open class, first in puppy class and special, she is a clean-headed bitch, good in body and limbs, excepting one stifle, which has been injured, ears untrimmed, she shows lots of character and was shown in fine condition.

FOX-TERRIERS.—In dogs, Le Logos, first, has a good type of head, but might be better in lower jaw, he is also rather light in bone and high on leg; Bounce, second, is too thick in skull and too heavy in shoulders; Spot, third, is plain in head and lacks substance. Bitches, Nellie, first, was rightly placed. She is a bit thick in skull, otherwise very good; Hillside Gaudy, second, I like fully as well in head, but she is light in substance, straight in front, with good feet and coat; Chippie, third, is thick in skull, ears poorly carried and is wide in front; Gypsey, hc., is a weed. Puppies, Dauntless Suzette, first, is a very promising puppy, with excellent head, straight in front, nice feet, good character, good coat, a little too soft, but of good length and thickness; Jip, third, is thick in skull, with a short, pinched muzzle.

BLACK AND TAN TERRIERS.—Frank, the only entry, secured third. He is apple-headed and lacking in character.

TOY TERRIERS.—Rose, entered as black and tan, had this class made for her, and won first.

SKYE TERRIERS.—Three entries. Sally, first, is a very fair, drop-eared Skye. The others are more Yorkshire than Skye.

YORKSHIRE TERRIERS.—Mash, first, is well known as an excellent specimen.

TOY SPANIELS.—Ted, a supposed King Charles, with but very little tan and much too long in muzzle, secured third.

JAPANESE SPANIELS.—Nellie, first is a good one.

IRISH TERRIERS.—Biddy Egan, first, entered in the miscellaneous class, is a fair specimen, not red enough in color, soft in coat.

POODLES.—One white one, so fat as to be all out of shape, won first in white class. Carlo, a very good black, won in the corresponding black class. PACIFIC.

PRIZE LIST—Concluded.

(Previous awards were published May 12).

ENGLISH SETTERS.—*Dogs:* 1st, W. G. Kerchoff's Sam K. Gladstone; 2d, M. D. Waller's Leer R; 3d, G. Crocker's Bob Gates, Jr. Very high com., F. Delean's Shot. *Bitches:* 1st, T. Higgs's Lady Trippo; 2d, D. Kerrigan's Bessy; 3d, L. Schneider's Flora.—PUPPIES—*Dogs:* 1st, T. Higgs's Earl of Essex; 2d, D. Harvey's Duke of Laurel; 3d, E. R. Craig's Dan Ardo. Very high com., R. K. Gardiner's Al K. *Bitches:* 1st, J. W. Bourdett's Belle B. Other competitors were thrown out as being inferior.

GORDON SETTERS.—*Dogs:* 1st, R. B. Woodward's Ben Nervis; 2d, R. Hamo's Pluto. *Bitches:* 1st, R. Liddle's Fanny; 2d, G. L. Roland's Lady Merren.—PUPPIES—*Dogs:* 1st, Mrs. M. M. Roland's Black Frank, Jr.

IRISH SETTERS.—CHALLENGE—*Dogs:* 1st, A. B. Truman's Mike T. *Bitches:* 1st, A. B. Truman's Lady Elcho T.—OPEN—*Dogs:* 1st, P. McPartland; 2d, D. F. Cummins's Emmett; 3d, W. Larsen's Ben Harrison. Very high com., J. Killalee's Sport. High com., J. F. Hinrich's Ponto. *Bitches:* 1st, A. B. Truman's Lightning; 2d, H. Black's Lady Juno; 3d, J. Yoell's Dora. High com., H. F. Mann's Pansy.—PUPPIES—*Dogs:* 1st, H. P. Bowie's Blarney; 2d, W. F. Gunn's Tim. *Bitches:* 1st, H. F. Mann's Ruby M.; 2d, Miss Howard's Kate Kearney; 3d, J. Toussant's Maggie.

COCKER SPANIELS.—*Dogs* (owing to several entries having been received late the cockers were placed in two classes): 1st, G. Crocker's Sport; equal 2d, F. R. Webster's King B. and A. M. Thomson's Snipe; 3d, S. Vernon's Duke. Very high com., Nip K. *Bitches:* 1st, Enterprise Cocker Kennels' Brontilla; 2d, Betty; 3d, A. C. Davenport's Maud E. Very high com., A. C. Davenport's Belle Dot E., Mrs. B. F. Napthaly's Julie. Com., Joe Acton's Nellie, J. B. McVay's Mollie Mac. Cockers too late for classification: Equal 1st, A. C. Davenport's Bronta and Blackbird E. (The class of cockers exhibited was far the best of any yet seen on exhibition in the city.)

IRISH WATER SPANIELS.—*Puppies:* 1st and 2d, F. Farnsworth's Gafney and Biddy Tean.

RETRIEVERS.—*Dogs:* 1st, F. C. Klein's Dude; 2d, W. Robins's Dash; 3d, E. T. Harvey's Sport.

CHESAPEAKE BAY DOGS.—*Dogs:* 1st, Thos. Higg's Trout. *Bitches:* 1st, Thos. Higg's Bess; 2d, F. Farnsworth's Pearl.

COLLIES.—*Dogs:* 3d, A. J. Albee's Roslyn, Jr. High com., Mrs. J. A. Moreland's Don. Com., J. L. Davidson's Glen. *Bitches:* 1st and 2d, withheld; 3d, A. J. Albee's Laughing Girl. *Puppies:* High com., A. J. Albee's Gaff.

DACHSHUNDS.—*Dogs:* 1st, E. D. Beylard's Jabberer; 2d, H. E. Miller's Tickle; 3d, E. Wagner's Findi. *Bitches:* 1st, E. D. Beylard's Brunhilde; 2d, F. C. Klein's Dachs; 3d, Mrs. F. Powers's Beauty.

BEAGLES.—*Bitches:* 1st, E. P. Howard's Flute II.

BULLDOGS.—1st, Dalton's Boxer.

BULL-TERRIERS.—*Dogs:* Prizes withheld. *Bitches:* 1st, W. H. Collins's Twilight. *Puppies:* 1st, W. H. Collins's Twilight.

FOX-TERRIERS.—SMOOTH—*Dogs:* 1st, Le Logas; 2d, Bounce; 3d, Miss Emilie Hager's Spot; *Bitches:* 1st, Mrs. Robert Liddle's Nellie; 2d, Hillside Gaudy; 3d, T. J. Dorgan's Chippie. *Puppies:* 1st, Mrs. W. H. McFee's Dauntless Suzette; 3d, Jip.

BLACK AND TAN TERRIERS.—*Dogs:* 3d, Mrs. A. B. Truman's Frank.

SKYE TERRIERS.—1st, Capt. Wm. Taylor's Sally.

TOY TERRIERS.—1st, S. L. Tach's Rosie.

YORKSHIRE TERRIERS.—1st, F. W. Sierp's Mash.

TOY SPANIELS.—1st and 2d withheld; 3d, Mrs. Laura A. Sierp's Ted.

JAPANESE SPANIELS.—1st, Sam Heller's Nellie.

PUGS.—*Dogs:* 1st, Mrs. Britton's Punch; 2d, Mrs. H. L. Millen's Ben Butler. *Bitches:* 1st, G. H. Hardy's Mint; 2d, Mrs. H. L. Millen's Toodles; 3d, G. H. Hardy's Leland. High com., Napoleon Kennels' Pearline. *Puppies:* 1st, Mrs. Britton's Punch; 2d, Mrs. E. J. Ferguson's Ko Ko; 3d, G. H. Hardy's Anna Rooney II.

ITALIAN GREYHOUNDS.—1st, Napoleon Kennels' Fanny; no second.

POODLES.—WHITE—1st, Phil Lewis's Tom.—BLACK—*Dogs:* 1st, A. Carpentier's Carlo.

SPITZ.—1st, Dr. Pillwax's Quick; 2d, Jamison's Dick.

MISCELLANEOUS.—OVER 25LBS.—1st, E. L. Eyre's Biddy Egan, an Irish terrier; other prizes withheld.

SPECIALS.

Best dog of either sex owned by a lady, Mrs. George Eggleson. Best kennel of fox-terriers, Dauntless Fox-terrier Kennels. Best kennel of pointers, A. B. Truman. Largest kennel of dogs, Napoleon Kennels. Best and largest kennel in the show, A. B. Truman. Best dog with field trial winning record, A. B. Truman's pointer Patti Croxteth. Best mastiff in the show, Gavin McNabb's Ingleside Prince. Best collie, O. J. Albee's Rosalind, Jr. Best dachshund, E. D. Beylard's Brinhilda. Best beagle, F. P. Howard's Flute II. Best bulldog, Napoleon Kennels' Boxer. Best bull-terrier bitch, W. H. Collins's Twilight. Best pug, Gale H. Gardy's Mint. Best Italian greyhound, Napoleon Kennels' Fanny. Best Irish setter dog, A. B. Truman's challenge Mike T. Best Irish setter puppy, H. F. Mann's Ruby M. Best field spaniel, George Crocker's Sport. Best cocker spaniel, A. C. Davenport's Bronta. Best Irish water spaniel, Fred Farnsworth's Gafney. Best heavy-weight pointer dog, Henry Huber's Duke of Vernon. Best heavy-weight pointer bitch, Henry Huber's Sally Brass II. Best pointer bred by A. B. Truman, R. N. Dow's Queen Croxteth T. Best light-weight pointer bitch, A. B. Truman's Patti Croxteth T. Best pointer puppy, H. R. Brown's Duke, Jr. Best Irish red setter sired by Mike T., A. B. Truman's Lightning. Best fox-terrier, Dauntless Kennels' Le Logas. Best English setter puppy, John W. Bourdette's Belle B. Best great Dane, Dr. F. P. Muffe's Hector. Best St. Bernard puppy sired by Judge, Mrs. J. J. Cousin's Monarch. Best Newfoundland, R. B. Monk's Nero. Best greyhound, C. S. Wieland's Examiner. Best deerhound, Mrs. G. Eagleson's Scott. Best foxhound dog, F. W. Saunderson's Paddy First. Best Yorkshire terrier, F. W. Sterp's Mash. Best Irish terrier, E. L. Eyre's Biddy Egan. Best white poodle, P. Lewis's Tom. Best Irish setter, H. P. Bowie's Blarney. Best Skye terrier, Captain W. Taylor's Sallie. Best spitz, Dr. Pillwax's Quick. Best St. Bernard in show, F. H. Allen's California Alton. Best hound of any sex owned by a lady, Mrs. W. H. Staniel's Slob Jr. Best brace of foxhounds, J. N. Bourdette's Ike and Princess. Best brace of dogs owned by a lady, Mrs. Brittan's Pugsy and Punch. Best Irish setter, dog or bitch, Lady Elcho T. Best collie in show, O. J. Albee's Gaff. Best kennel won sporting dogs, Napoleon Kennels. Best kennel sporting dogs, A. B. Truman. Best brace Irish setters, A. B. Truman's Mike T and Elcho T. Best brace English setters, T. Hegg's Lady Trippo and Earl of Essex. Best kennel of cockers, A. C. Davenport's. Best kennel of greyhounds, C. S. Willard's. Best kennel of pugs, Gale H. Hardy. The number of specials given was probably the largest ever donated at a bench show and covers seven and a half pages of the catalogue, therefore we simply publish those where there was any competition, the others following the regular awards and nearly every breed was well looked after in this respect.

A special meeting of the National Beagle Club, to act on the proposed amendments, will be held June 4 at 266 Washington street, Boston, Mass., at 7 P. M.

POINTS AND FLUSHES.

CHICAGO, May 14.—The Kansas City Kennel Club is energetically completing the preparatory arrangements of its bench show. At a meeting held recently at Kansas City, a committee was appointed to consult with the officers of the Fair Association in respect to holding the bench show in connection with the fair this fall. The club believes that the show, held in such manner, will do more to develop a general interest in good dogs and promote their welfare than it would if held independently, since the thousands of people who attend the fair would also attend the bench show. The club decided to secure membership in the A. K. C.

* * *

I notice that that eminently sound writer and skillful sportsman, Capt. C. E. McMurdo, in a letter on retrieving in another journal last week, mentions the fact that retrieving will injure a dog's manner of searching for live birds, inasmuch as pointers and setters should not trail them. He says: "All they ought to know about footscent is to detect a hot trail, otherwise they would make inexcusable flushes." This, coming from so experienced and well known a sportsman as Capt. McMurdo, is worthy of careful consideration. In connection with retrieving, he also states that "much has been written for and against it, but the most important question with regard to it has not (so far as I remember) been discussed." If he will look in FOREST AND STREAM of April 28, he will find the matter fully discussed on the same lines which he presents.

The only reason why it is desirable to have both finding and retrieving done by one dog is one solely of expediency. A retriever is indispensable in field shooting. Many sportsmen own but one dog, hence the necessity that that one should retrieve. In New England and other sections where birds are scarce, it would not be worth while to have a special retriever, since the small number of birds killed each day would give little occasion for his services. But because it is expedient and useful to have the dog both to find and retrieve, it does not follow necessarily that he would not perform better as either a finder or retriever if he did but one branch or the other of field work. Of course, a sportsman who has hunted year after year over a dog which has found and retrieved, is by experience and habit convinced that such is the most perfect manner of field work, he unconsciously setting up his partial experience of whatever grade it may be, as a standard of all experience.

It may be mentioned, however, that some dogs will find and retrieve to perfection in a proper manner without any injury to either their finding or retrieving qualities, but such dogs are extremely rare and do not affect the objections against retrieving.

* * *

In regard to many subjects interesting to sportsmen, it is to be regretted that many readers take the superficial view that all arguments or discussions are more or less of a quarrel or unpleasant contention; at least such is the inference from the tone of letters which appear from time to time. This I presume is due in a great measure to the bitter personalities and diatribes which appear in some journals betimes, although it is a source of congratulation that FOREST AND STREAM is always free from such. Such, however, should not be confounded with fair argument and discussion of interesting and instructive subjects. I believe that fair criticism and argument are always in order if there is any desire to be progressive. On the other hand, the writings which serve no other purpose than to gratify personal spite or to give vent to a malevolent disposition, retard progress and growth.

* * *

It is strange that very few new field trial clubs profit by the experience of older ones. A new club commonly starts off with a determination to run its trials on such theories as the members have of actual field shooting. It does not seem to occur to them that their experience is insufficient to enable them to decide understandingly or that the ideas of the older clubs would be worth investigation and a trial. Every club which started out on the idea of running a field trial as in an ordinary day's shooting, made great changes in its rules after the first trial. Nearly every club of any note has adopted the rules of the Eastern Field Trials Club or a slight modification of them.

The Western Michigan Kennel Club, in the announcement that the club would endeavor to hold a field trial this fall, state that "retrieving will be required and all dogs hunted as in an ordinary day's hunting." It would be most interesting to see this attempt to run a field trial as in "an ordinary day's shooting." It has been often attempted, but has never yet been done. It cannot be done, yet the same old fallacy lives on, and is perpetuated by every new association. In practice it is soon discarded, but the rule stands a dead-letter in the rules of nearly every association. It is misleading and harmful. Spectators at a field trial do not realize that the manner of an ordinary day's shooting cannot be observed, but they do know that such manner is required under the rules; hence they notice what appears to be constant violations of the methods applied in an ordinary day's shooting. These furnish sufficient grounds for unpleasant comment. This venerable fallacy should be eliminated, and allowed to take its place with the mess of rubbish which in the past marks the course of field trial progress.

In respect to progress, few realize the great advance between the old five-point system, where the number of points determined a dog's worth and where trickery was at a premium and the comprehensive theory of field trials of the present, where dishonesty in handling is rarely attempted and is always discouraged.

* * *

Now that the Mascoutah Kennel Club has decided not to hold a bench show next year, the bench show in connection with the World's Fair will have a clear field. Considering the importance of the event, the preparatory arrangements are being conducted very noiselessly and calmly. It can hardly have an international character unless skillfully and energetically pushed. There is, however, time yet to accomplish a great deal.

* * *

For a concise and farcical exposition of true field trial principles and matters pertaining to them, the article by "Tarquin" in FOREST AND STREAM of last week, entitled "Field Trials and Field Trial Judges," is unapproachable in cleanness, soundness and finish. It is worthy of the most careful perusal of all who are interested in field trials and the truth as to their present status. The masterly manner in which he analyzes and reduces glittering generalities and tests the results by facts are admirable.

* * *

May 16.—The prosecution last week of the "fox hunters" for giving an imitation fox hunt under the delusion that it was real, and incidentally murdering a tame fox, was a failure, which is much to be regretted. The following clipping from the Chicago *Tribune* will explain how it was done, and it is difficult to imagine anything more farcical or ridiculous:

"The officers of the Illinois Humane Society detailed to prosecute the participators in the tame fox hunt at Fairland are much disturbed over the methods of legal procedure in Douglas county. The action against the fox hunters was called before Justice Lamb at Tuscola Thursday. Witnesses testified before a jury that a tame fox had been chased by the defendants and their hounds and had been caught and torn to pieces by the latter. Attorney A. W. Thomas, of Chicago, cited a Massachusetts decision sustaining the position of the Humane Society, which, while not denying the right of men to hunt and kill wild foxes, held that a tame fox, cared for in captivity by man from the time it was only a few days old, is a domestic animal.

"C. W. Wolverton, of Tuscola, attorney for the defendants, then addressed the jury. He troubled himself but little about replying to arguments of the Chicago lawyer, but the fact that a Massachusetts decision had been cited severely wounded his local pride.

" 'Gentlemen of the jury,' he said, 'we are residents of the State of Illinois in the glorious West—wild and woolly, if you will—where each man is an independent American citizen. What is Massachusetts? An alien Commonwealth. It is Massachusetts. Why, gentlemen of the jury, on Boston Common to-day witches are burned at the stake, and if a man is found outside of a church Sunday he is placed in a lockup. What has Massachusetts to do with us? We are American citizens and we want to chase foxes and we chase foxes.'

"After hearing which the twelve good men and true of Tuscola rendered a verdict for the defendants. The Humane Society had hoped to make this a test case under the State laws, which provide that any person guilty of 'torturing any animal' shall be subject to a fine of not more than $200. The Massachusetts decision was directly in point, and although the justice before whom the action was brought was manifestly impartial, the jury, which was composed largely of friends of the defendants, rendered a favorable decision on the questions of law impossible."

B. WATERS.

FLAPS FROM THE BEAVER'S TAIL.

TORONTO, Can.—The greyhounds belonging to the late Dr. Gordon, V.S., Ottawa, were raffled last week, over 500 tickets being sold. Justinian went to Mr. J. W. Wurtle, who is a member of the bench show committee; Jetsam to Mr. John Abbott, and Stylish Girl to Mr. C. Roger. The two former won firsts and special at the late Ottawa show under "Honest John."

I hear that several new classes have been added to the Ottawa list, the building, too, is to be remodeled. The new members of the committee are Mr. F. Robson and Mr. F. H. Cunningham.

Mr. Geddes has added another black and tan to his string, a six months old bitch puppy, by Kaiser out of Desdemona.

Further particulars about the Rideau Kennels' new fox-terrier informs me that he is Merle Guy (renamed Rideau Rivet), by Dolly Dandy (Vesuvius—Lally Mayfair) out of Bodkin III. (Rivet III.—Clarke's Racer). Weight 16½lbs.

The Cooktown Kennels, Ottawa, have sold their best stud cocker Tim Obo to a breeder on your side for a price well up in three figures. He is by Bob Obo out of Clio.

Kingston has lost another of her breeders, Mr. J. D. G. Shaw, who has moved to Toronto.

Dr. Griffin, Hamilton, has lost his bull-terrier bitch Edgewood Belle from intestinal rupture while being bred to Gully the Great. He has replaced her, as I "flapped" last week, by a young bitch of Frank Dole's, Edgewood Robin, in whelp to the same dog.

Rugby Norah, the Irish terrier bitch purchased by Mr. Murdoch and partners, Hamilton, has been bred to Ben IV. and is now on her way across the pond.

The poisoners have been getting in their fine work in Toronto and Hamilton. The kennel club in the latter place purpose taking the matter up and will prosecute any cases brought to its notice.

Mr. A. D. Stewart has disposed of his brace of bulldogs, one, The Dude, going to Manitoba, the other, Flash in the Pan (Crib—Sister to Lion), going to a fancier in Nova Scotia.

The directors of the Montreal Exposition are anxious to hold another bench show next fall, but as the date would of necessity clash with that of London they are in a quandary. If London will forego its dates they will hold a show. The management has been offered to Dr. Wesley Mills, who organized the show under such difficulties last year. He will, however, advise them not to hold a show if London retains the dates chosen. He insists, also, that adequate accommodation for the dogs be provided; indeed, he has advised the directors to erect a large and suitable building for show purposes, and it is hoped they may see fit to comply with this request.

Several of the committee of the Toronto Kennel Club are inquiring why their names were not mentiondd as being most industrious when they did twice the work of some named in your report. Mr. Shirley Stewart was indefatigable and several of the others worked very hard.

In the same report if you read Forest Lou for Forest Sire in setters, and Agate for Spot in cockers, you will strike it nearer. H. B. DONOVAN.

BLACK AND TANS.

BUFFALO, N. Y.—*Editor Forest and Stream:* Replying to Dr. Foote's letter in your issue of May 12, I wish to say that as a "novice" in the black and tan terrier fancy, I am greatly obliged to the Doctor for giving me the benefit of his "wide" and varied experience. I am always glad to get information, and the Doctor's letter contains a great deal that I have never seen before. It is true that show reports are not always reliable, but as the Doctor admits that Madge was "wide in front" at Toronto 1890, he acknowledges the correctness of the report quoted. Well, the Doctor answered my question anyway. Madge "did greatly reduce in width" between the time of New York and Pittsburgh shows. I have had enough experience as a breeder to know that a bitch changes her appearance for the better five or six weeks after weaning puppies, but must confess to ignorance of the fact that one would "greatly reduce in width" of front in three weeks. My letter was not written for the purpose of running down Broomfield Madge. I did not say I thought her worse or better than Louie. What I wanted to know was, why Louie won at New York with "consummate ease" and within three weeks under the same judge, Madge won as the Doctor says "with considerable to spare." The Doctor says Mr. Raper is able to see something in a dog besides front. What was it, that he saw in Madge that beat Louie? He also says a "straight front is not natural or desirable in a black and tan." Here is an item of news for the Black and Tan Terrier Club of England. When they hear this they will probably change the standard. The Doctor should take one of the stud cards issued by Rochelle Kennels and turn to the last page and read the following from "Points of the Black and Tan Terrier as set forth by the Black and Tan Terrier Club of England."

"*Chest.*—Narrow between the legs, deep in the brisket."

"*Legs.*—Perfectly straight and well under the body, strong, and of proportionate length."

I think this would imply that a straight and narrow front is desirable in a black and tan, the genial Doctor to the contrary notwithstanding. A. W. SMITH.

THE BEAGLE STANDARD.

Editor Forest and Stream:

In the discussion of the proposed change of the standard height of the English beagle, you may add my name to the list of those who most emphatically oppose such a measure.

The National Beagle Club can feel proud of its record so far, but should it tamper with the standard that has done the breed so much good since its adoption, I predict that the harmony which now evidently prevails in its ranks will be marred.

There is no necessity for enumerating reasons for the opposition to such a change. No logical reasons have been given—and never will—why such a change should be made.

My acquaintance and experience with the beagle fraternity at large is of considerable scope, and as I let them file by me mentally I fail to see but two (Mr. Phœbus one of them), who would favor such a change.

Should the N. B. C. have any intentions of attempting such a change—but I give that body credit in believing that such a possibility does not exist—then let us have their best reason for so doing, and I am confident that our little favorites will find defenders of their cause in plenty.

As for myself, the standard to which I endeavor to breed will never exceed fifteen inches, rather less if any change must be made, and that for basket beagles not over twelve inches. They do the work I require of them to my entire satisfaction, and any additional size would only impair the quality of the work.

Just as every other breeder, I have bred some oversized specimens and some as good as any man has produced. They have, with the other extreme, been classed as weeds. Let every breeder seek to breed to fit the standard and not endeavor to have the standard changed to fit his breeding.

If larger dogs are desired and required for work which does not suit our favorites, then let harriers and foxhounds perform it. That's what they are for.

As to a change of the point scale of the standard, a few minor changes may be of benefit, but I would just as vigorously oppose a reduction of the points given to head qualities in the present standard. There is where you find the character and quality of every breed and most particularly so in the little beagle.

The wonder of it all to me is that a letter of one man, with no logic whatever advanced, should bring about a discussion.

A. C. KRUEGER.

WRIGHTSVILLE, York Co., Pa.

Editor Forest and Stream:

I am glad to see that most of the beagle men, writing in FOREST AND STREAM, disapprove of raising the standard from 15in. to 16in. But am exceedingly pleased to see the 12in. measurement raised to 13in. This will do away with, what seems to me, rather a ridiculous idea that some beagle men have fallen into, also a few beagle judges, that a beagle 14½in. or 14¾in., or even up to the standard of 15in., has not (other points being equal) as good a right to first honors as a beagle from 12½in. to 13in. Will some of the beagle men who hold that a beagle 14½in. to 15in. is too big kindly give their reason in FOREST AND STREAM for so thinking. The gentleman judging beagles at Toronto last September paid no attention to whether a beagle was 12½in. or 13½in., provided the dog was not over the standard in his class, but gave the ribbon to the best dog. In the class from 12in. to 15in., why is not the beagle nearest to 15in. as good a dog as the nearest to 12in? Why is he not a better dog? Take him into the field, and in nine cases out of ten he will be found the superior of his smaller brother. Enter a horse 13½ hands high at a horse show in the 15 hands and under class and see where he will be. Now, the 15in. and under class will bring the larger dogs together, and the under 13in. class all the smaller dogs ditto. The 12in. class always appeared to me to be a wrong height to have chosen, as the beagles mostly entered for this class went invariably a trifle over the 12in. AMATEUR.

COOKSTOWN, Canada.

MY KINGDOM FOR A PEDIGREE.

Editor Forest and Stream:

In your last number Mr. R. L. Ogden ("Podgers") requests me to inform him if I have Mike's pedigree. Regretfully I must answer no. I have wished many times that it was possible for me to trace his lineage to the aristocratic family of blue bloods from which he must have sprung. The blood is there, but from whence it came I know not. He is a waif, or as dogmen might say, "a pick up."

It is the old story: A favor to a stranger, stranger no money, but plenty of gratitude and a pup; everything agreeable, no questions asked, stranger goes away and the poor orphaned pup is left to grow up to dog's estate, ignorant of the blood and traditions of his royal family, and bereft of that most prized of all the adjuncts of royalty, pride of pedigree. But Mike may console himself with Seneca's reflection: "He who boasts of his descent, praises the deeds of another." Or he may, like Cæsar assert, "My family begins with me."

But I am forced to say that if Mike's lineage were traceable at all it would undoubtedly lead to the Emerald Isle, as his name would indicate; and that, while he is evidently not pure bred, he is mostly Irish with a taint, like the boy's puppy, of "jist dog."

After carefully reading Mr. Ogden's remark about the introduction by him of blooded dogs into this country, I am satisfied, from my acquaintance with the northwest Pacific coast, that we have numerous descendants of his dogs among us; and all the sportsmen of this country will join with me in an expression of gratitude to him for his service, for it is a noble breed. S. H. GREENE.

PORTLAND, Oregon, May 6.

CANADIAN KENNEL CLUB DIPLOMAS.

Editor Forest and Stream:

It will, I think, interest you to know that the Canadian Kennel Club has decided, with a view of encouraging Canadian breeders to give annually in future, at one show during the fall circuit, special diplomas for, first, the best kennel of not less than four dogs or bitches; second, the best brace of dogs or bitches; third, the best dog; fourth, the best bitch. These diplomas, which will be offered for all recognized breeds, can only be competed for by Canadian members of the Canadian Kennel Club, and will without doubt be eagerly sought after. The possession of the diplomas will be in itself a high honor, and the advertisement received by the lucky winners will well recompense them for any trouble taken to win the distinction.

The classification of the diplomas is thoroughly good, for it will be readily seen that the winner of the kennel prize showing four dogs, may easily be beaten in the competition for the best brace, while both may lose to others in the competitions for single dogs or bitches.

The diplomas referred to will not in any way affect the customary diplomas and special prizes offered by the various bench show committees. The Canadian Kennel Club is only seeking now to encourage her own members, and stimulate Canadian breeders. She never did a better thing or took a wiser step, and in her present effort she deserves, and will, I feel sure, receive the hearty support of all true dog lovers.

A. D. STEWART.

HAMILTON, Ontario.

DOG CHAT.

IN the National Field Trials, which took place near Shrewsbury, England, commencing April 26, there was a great scarcity of game, and with only an entry of eleven in the first stake, it took all day to run it off. In the Pointer Puppy Stake, Mr. Mawson's Blanch of Bromfield won first, Messrs. Droy's Master of Meirelbeke, second, and Mr. Lowe's Sir Thomas and Mr. Heywood-Lonsdale's Dice equal third. In setter puppies the result was, Colonel Cote's Dash first, Capt. Miller's Airnie second, and Mr. Wace's Ben thirds. For the Acton Reynald Stakes, for aged pointers and setters, fresh ground was tried at Moreton Corbet, and fortunately game was a little more plentiful. We cannot find space for more than the bare results. Dr. Wood's setter Fred was declared the winner of the setter prize, and was also the absolute winner of the stake. Mr. Elias Bishop's Seno Don Pedro being the winning pointer, with Mr. Heywood-Lonsdale's Crab getting reserve for second best of either breed. The other awards are not yet given in the English papers. The first day's meet of the Pointer Club Field Trials was held at Llanypwl, Wales, and in the Pointer Puppy Stake R. G. Mawson's Blanch of Bromfield won first, A. P. Heywood-Lonsdale's Mura second, W. Arkwright's Tapp third, and F. C. Lowe's Sir Thomas of Kippen fourth. Judges were Messrs. R. L. Purcell-Llewellyn and C. H. Beck.

Messrs. Spratt have shipped for Mr. Lowrie, of Newcastle-on-Tyne, a bull-terrier for Mr. Dever, of Peoria, Ill.

The "railroad dog" affords unlimited scope nowadays for the newspaper writer. These dogs seem to crop up periodically, just like that fearful plant in South America we are told of that feeds on human beings, dogs, etc., the story about which has been going the rounds for the past ten years and not long since found its way into kennel papers on both sides of the water, the *pièce de résistance* in this instance of course being a dog.

Mr. Geo. Raper, the English judge who was with us so recently, does not have much time for rest. He writes a friend over here: "I am going to Amsterdam (Holland) show next week. After that I shall be busy here, but at the end of May I go to Berlin, Germany, to judge fox-terriers, pointers, setters, spaniels and some other English breeds."

Mr. Harry Twyford, who was so well and favorably known as the manager of the Oriole Kennels of fox-terriers, has decided to use the kennels that housed Mr. Logan's dogs, for a boarding kennel. Mr. Twyford has the secret of keeping dogs in good shape and he should soon be able to show a full house.

From all accounts Col. Rupperts recent purchases will do the kennel some good. The name of one is Lady Ainia, by Watch out of Countess of Grafenried, by Ch. Angelo. She is well marked and stands about 20in. at the shoulder, with good bone and is very active. She is not in very good shape just now, as she weaned a litter before sailing and was seasick coming over. She was whelped March 11, 1890, and was bred by Mr. Harvey, of Lincolnshire. The others, Countess Madge, a litter sister to Marvel, by Ch. Pouf out of Mossy, stands 30in. at shoulder and is exceptionally well built, and Mr. Booth writes us that "next to Princess Florence the most massively built bitch he ever saw," with a capital head but lacks markings. She was whelped Feb. 10, 1889. Though Donnybrook Fan, that Col. Ruppert had an eye on, has a capital head, his legs are not at all as they should be; that gentleman was perhaps wise in leaving him on the other side.

Mr. A. W. Purbeck has been very ill but is now on a fair way to recovery, and perhaps the knowledge that his favorite greyhound Bestwood Daisy, that won so many prizes during the spring circuit, whelped nine pups by his unfortunate dog Ornatus, may hasten his convalescence. Ornatus, with whose serious accident we acquainted our readers some time since, though coming into a strong condition, will never appear again on the bench or run another race, though as a sire he no doubt will be able to prove his worth. Seventeen entries from the Anglo-American tribe will journey under George's care to Lewiston show this week.

Mr. W. L. Washington, of Pittsburgh, Pa., of Irish setter and recent wolf coursing fame, traveled over the Rockies and was a visitor at the San Francisco dog show. The *Pacific Field Sports* issued a very neat supplement containing half toned pictures of several of the prize winners at the San Francisco show.

The reason a dog can look so knowing is because he can't say anything to spoil the effect.—*Springfield (Ohio) Farmer.*

From all reports kennel club affairs in San Francisco are not as rosy as they might be. The Pacific Kennel Club has been overshadowed for some years by the California Kennel Club, but there seems to be widespread dissatisfaction with the way things are run in that club and a number of members have resigned and gone over to the "enemy." Sixty-four new members will join the Pacific Kennel Club; seventeen of this sixty-four joined on Friday last; among them were such men as Mr. Fred Webster, president of the Country Club; J. M. Kilgariff, secretary of the Pacific Coast Field Trials Club, and, as our correspondent writes, "a number of other wealthy men who will just make things hum."

Mr. Hobbie, who has forsaken his old love and is devoting his attention to its more handsome (?) cousin the bulldog, will be sorry to hear that his old winner, the bull-terrier Spotless Prince, died in California last week. His death was caused by a beating he received at the hands of a man who was exercising him.

The following gentlemen, Messrs. J. M. Tracy, of Hempstead, L. I.; N. Wallace, of Farmington, Conn., and W. S. Bell, of Pittsburgh, Pa., have consented to judge the various stakes to be run in the Central Field Trial Club's trials at Lexington next fall.

In our business columns this week will be found particulars of the Central Field Trial Derby. As usual, it is divided, and the Pointer and Setter Stakes have each $400, $250 and $150 as prizes, with $100 additional to the absolute winner. Entries close June 1 with Mr. C. H. Odell, 44 Wall street, New York city. A forfeit of $10 accompanies the nomination, $10 is payable Aug. 15, and then $10 to fill. Other stakes will be announced later.

A little girl, in order to prove that it is wrong to cut off the tails of horses and dogs, quoted the Scriptural injunction, "What God hath joined together let no man put asunder."—*Housekeeper's Weekly.*

Mr. George La Rue, secretary of the Pointer Club, writes: "My duties as general manager of the Crocker-Wheeler Electric Company, of New York, necessitate my being "on the wing" nearly all of the season, and the demands upon my time are so heavy that I have deemed it advisable to resign the offices of secretary-treasurer of the Pointer Club of America. All books, papers and cash have been delivered to Hon. John S. Wise, the able vice-president, who will attend to club correspondence, etc., pending the election of my successor."

Mr. Mortimer arrived in New York from the West on Sunday night and came straight on to Lewiston. He left San Francisco last Friday week, but was delayed by washouts.

Every one has heard of the celebrated calf case that cost so many thousands of dollars before it was settled, and a recent suit in which a dog was the principal bone of contention has cost far more money to contestants than the merits of the case demanded. The case was dismissed last month, and the court assessed one-half of the costs against each litigant. The costs in the case, outside of the attorney's fees, amounted to $500. The dog was worth $1.50.

The following "exemplar" appeared in the *Herald* last Sunday: "An exceptionally bushy exemplar of young full-bred English setter, very valuable, for sale, cheap, etc."

Mr. Washington A. Coster will judge at the Philadelphia field trials.

The Canadians seem to have made a great commotion over a very small matter in the case of Mr. Mercer's disqualification. In the first place it was ill advised on "Mount Royal's" part to write to the *Canadian Kennel Gazette* a letter which simply prejudged the case. There was no fraud committed by Mr. Mercer, and after his ample apologies and taking all the circumstances of the case into consideration, though we do not defend his action, a reprimand or censure such as the Spaniel Club indulged in, or at the very outside a short period of suspension should have satisfied justice in the case.

The Menthon Kennels' St. Bernard Lord Bute died of pneumonia last Friday.

We note among our new kennel advertisements this week, the following offers for sale: Terriers, W. Reilly; Pointers, Riverside Kennels, M. T. Mason; King Don Pointer Kennels, W. Hyland, W. H. Moller; Great Danes, F. S. Anderson; Setters, Poston and Burdell, M. T. Mason; Beagles, A. C. Krueger. The Wyoming Kennels offer their St. Bernards at stud at half fee. The Tubby Hook Kennels offer champion Carney at stud.

LEWISTON DOG SHOW.

LEWISTON, Me., Tuesday, 4 P. M.—This show opened this morning and judging the 142 dogs present commenced at 11 A. M. There is quality galore here: Glenrose Kennels' and O. W. Brooking's beagles, Jarvis's pointers, Blossom's Gordons, Oak Grove Kennels' Irish setters, White Oak Kennels' greyhounds, Kilmarnock Kennels' collies, Toon and Symonds's assortment of terriers, Mrs. Ballentine's pugs, and last but not least, Wyoming Kennels with Sir Bedivere and his companions. The show is held in the skating rink and is light, airy and well adapted for a show. Benching is in the old style but very neatly arranged. The secretary, treasurer and president of the club are all busy, and though the attendance is not very good, it is expected to improve in the evenings. Mr. Mortimer is judging and is looking bronzed and healthy from his recent travels on the Pacific coast. Among those present are Messrs. E. B. Sears, N. Q. Pope, Geo. Jarvis, Joe Lewis, George Thomas, James Green, F. H. Clarke, W. L. Rutter, etc. The awards are as follows:

MASTIFFS.—*Dogs:* 1st, E. E. Brown's Frank; 2d, S. R. B. Pingree's Fritz. *Bitches:* 1st, G. W. Glazier's Madge Minting; 2d, F. R. Conant's Galatea; 3d, E. Rowe's Pansy.

ST. BERNARDS.—ROUGH-COATED—CHALLENGE—*Dogs:* 1st, E. B. Sears' Sir Bedivere.—OPEN—*Dogs:* 1st, E. B. Sears's Wyoming Hesper; 2d, W. H. Miles's Rudolph; 3d, T. F. Donohue's Prince. *Bitches:* 1st, E. B. Sears's Lady Adelaide. *Puppies:* 1st and 2d, J. F. Parker's Roswal and Tabatha.

BLOODHOUNDS —CHALLENGE.—1st, G. W. Glazier's Jack the Ripper.—OPEN—*Dogs:* 1st, G. W. Glazier's Belhus. *Bitches:* 1st, G. W. Glazier's Delfin.

DEERHOUNDS.—*Dogs:* 1st, A. W. Purbeck's Tasso.

GREYHOUNDS.—*Dogs:* 1st, A. W. Purbeck's Pious Pembroke; 2d Abel Lezotte's Mick; 3d, H. C. Day's Ruby. *Bitches:* 1st, A. W. Purbeck's Lady Clare; 2d and 3d, Manataug Kennels' Marguerite and Lady Lavilie.

POINTERS.—CHALLENGE—1st, Geo. Jarvis's Lad of Kent.—OPEN.—55LBS. AND OVER—*Dogs:* 1st, Charles D. Roberts's Duke of Dexter; 2d, Toon & Simonds's Devon Ranger; 3d, E. T. Wilson's Don Graphic.—50LBS. AND OVER—*Bitches:* 1st, George Jarvis's Lass of Kent.—UNDER 50LBS.—*Bitches:* 1st, Wm. C. Root's Bloom of Kent; 2d, C. W. Curtis's Donyo; 3d, J. B. Littlefield's Bonita. Very high com., S. A. Nichols's Mollie.

ENGLISH SETTERS.—*Dogs:* 1st and 2d, withheld; 3d, F. C. Fowler's San Pablo. *Bitches:* 1st, J. W. Lawson's Blue Nell. Very high com., F. C. Fowler's Topsy F. High com., T. R. Catland's Cleo. Com., D. F. Long's Saddie. *Puppies:* 1st, F. C. Fowler's San Pablo; 2d, F. L. Crosby's High Low Game.

IRISH SETTERS.—CHALLENGE—*Dogs:* 1st and reserve, F. C. Fowler's Duke Elcho and Seminole. *Bitches:* 1st and reserve, F. C. Fowler's Norna and Edna H.—OPEN—*Dogs:* 1st and 3d, F. C. Fowler's Kildare Glenmore and Exile; 2d, W. J. McCarthy's Kildare Elcho. *Bitches:* 1st, 2d and very high com., F. C. Fowler's Onota Bell, Bonnibel and Alice Kent; 3d, N. McIntosh's Maid of Barstol.

GORDON SETTERS.—CHALLENGE—1st, James B. Blossom's Heather Bell.—OPEN—*Dogs:* 1st, James B. Blossom's Heather York; 2d, Chas. H. Leonard's Dash L. *Bitches:* 1st, James B. Blossom's Flomont.

FIELD SPANIELS.—1st, F. H. Topham's Rex T.

COCKER SPANIELS.—NOT OVER 28LBS.—1st, Dole & Thomas's Woodstock Dora.

BEAGLES.—13IN. AND OVER.—*Dogs:* 1st, National Beagle Kennels' Diamond Forest; 2d, O. W. Brooking's Tomboy. *Bitches:* 1st, O. W. Brooking's Forest Queen; 2d, R. W. Pope's Lady Flute; 3d, Glenrose Beagle Kennels' Parthenia.—UNDER 13IN.—1st, Glenrose Beagle Kennels' Butterfly.

FOXHOUNDS.—*Dogs:* 1st, L. A. Edward's Boxer; 2d, Dr. H. T. Thurber's Beecher; 3d, Mower & Strout's Fred. *Bitches:* 1st, Dr. H. T. Thurber's Femur; 2d, Mower & Strout's Jipsey. *Puppies:* 1st and 2d, Dr. H. T. Thurber's Femur and Beecher.

COLLIES.—CHALLENGE—*Bitches:* 1st, Manataug Kennels' Roslyn Mischief.—OPEN—*Dogs:* 1st, Kilmarnock Collie Kennels' Reknown; 2d, withheld. Com., G. St. L. Abbott's Trap. *Bitches:* Kilmarnock Collie Kennels' Mother Shipton. *Puppies:* 3d, Manataug Kennels' Lady Martha.

POODLES.—1st, R. Carter's Black Jack.

BULLDOGS —*Dogs:* 1st, J. Coles's Carisbrook. *Bitches:* 1st, W. F. Rutter's Bessie.

BULL-TERRIERS. —30LBS. AND OVER.—*Dogs:* 1st, Toon & Symond's Comet; other prizes withheld.

LEWISTON, May 17.—[*Special to Forest and Stream.*]

BOSTON TERRIERS.—Prizes withheld.

FOX-TERRIERS.—*Dogs:* 1st, Symonds's Ebor Spendthrift; 2d, Wilton Kennels' Warren Tripper. *Bitches:* 1st, Symonds's Venus; 2d, Wilton Kennels' Warren Sparkl-.

IRISH TERRIERS.—*Dogs:* 1st, T. Wise's Shaun Rhue; 2d, Symonds's Valley Boxer. *Bitches:* 1st, T. Wise's Colleen Rhue; 2d, Symonds's Salem Witch.

BLACK AND TAN TERRIERS.—CHALLENGE—1st, G. Thomas's Matchless.—OPEN—*Dogs:* 1st, Symonds's Prince Raglan. *Bitches:* 1st, Symonds's Rosette.

SKYE TERRIERS.—Prizes withheld.

YORKSHIRE TERRIERS.—*Dogs:* Prizes withheld. *Bitches:* 1st, Symonds's Venus.

SCOTCH TERRIERS.—1st, Symonds's Scotch Hot.

PUGS.—CHALLENGE—1st, Mrs. Ballentine's Curtis.—OPEN—*Dogs:* 1st, Mrs. Ballentine's Robin Hood; 2d, G. E. McGowan's Smut. *Bitches:* 1st, L. F. Dearne's Fancy.

MISCELLANEOUS.—HEAVY WEIGHT—1st, Symonds's Sheffield Lad.—LIGHT WEIGHT—1st, Geo. Thomas's Boston Model; 2d, E. W. Farr's Pink.

SPECIAL PRIZES.

Best St. Bernard, Sir Bedivere. Best pointer, Lad of Kent. Best English setter, Lawson's Blue Nell. Best kennel Irish setters, Oak Grove Kennels. Mr. Pope's greyhounds were shown not for competition.

H. W. LACY.

KENNEL NOTES.

Kennel Notes are inserted without charge; and blanks (furnished free) will be sent to any address.

NAMES CLAIMED.

☞ **Prepared Blanks sent free on application.**

Patsy Bolivar. By Eberhart Pug Kennels, Cincinnati, O., for silver fawn pug dog, whelped Dec. 4, 1890, by Eberhart's Cashier (champion Kash—Lady Thora) out of Flossy II. (champion Bradford Ruby—Daisy).

BRED.

☞ **Prepared Blanks sent free on application.**

Sister—Eberhart's Cashier. Mrs. Knight's (Cincinnati, O.) pug bitch sister to Eberhart Pug Kennels' Eberhart's Cashier (champion Kash—Lady Thora), May 8.

Dot Smirle—Tip Obo. Corktown Cocker Kennels' (Ottawa, Ont.) cocker spaniel bitch Dot Smirle (Bob Obo—Tough) to their Tip Obo (Bob Obo—Cleo), April 30.

Kate Dalrymple—Leicester. John Finlayson's (Brooklyn, N. Y.) smooth St. Bernard bitch Kate Dalrymple (Bill Tyler—Kate Twyford) to Dan Foster's Leicester (Keeper— ——), April 15.

Queen of Hearts—Blue Blade. A. C. Shallenberger's (Alma, Neb.) English setter bitch Queen of Hearts (Sportsman—Sweetheart) to his Blue Blade (Toledo Blade—Nell S.), May 3.

Becky Sharp—Beaumont. C. E. Mather's Gordon setter bitch champion Becky Sharp to Jas. B. Blossom's champion Beaumont, April 15.

Oonah—Kelso. Jas. B. Blossom's Irish setter bitch Oonah to his Kelso (champion Glencho—Sweetheart), April 17.

WHELPS.

☞ **Prepared Blanks sent free on application.**

Tough. Corktown Cocker Kennels' (Ottawa, Ont.) cocker spaniel bitch Tough (Wildair—Belle), April 20, seven (five dogs), by their Tip Obo (Bob Obo—Cleo)

Œnone. Corktown Cocker Kennels' (Ottawa, Ont.) cocker spaniel bitch Œnone (Obo, Jr.—Tough), April 20, seven (three dogs), by their Tip Obo (Bob Obo—Cleo).

Maud Val Jean. A. C. Shallenberger's (Alma, Neb.) English setter bitch Maud Val Jean (Jean Val Jean—Sheena Van), April 12, six (four dogs), by J. M. Avent's Roderigo (Count Noble—Twin Maud).

Nannie Gates. A. C. Shallenberger's (Alma, Neb.) English setter bitch Nannie Gates (Bob Gates—Lilly B.), April 28, ten (four dogs), by Blue Ridge Kennels' champion Gath's Mark (Gath—Gem).

SALES.

☞ **Prepared Blanks sent free on application.**

Corktown Count. Black cocker spaniel dog, whelped Dec. 12, 1891, by Tim Obo out of Dot Smirle, by Corktown Cocker Kennels, Ottawa, Ont., to A. W. Hunter, North Adams, Mass.

Tim Obo. Black cocker spaniel dog, whelped June 30 1890, by Bob Obo out of Cleo, by Corktown Cocker Kennels, Ottawa, Ont., to D. Grantley for D. Galbraith, Erie, Pa.

ANSWERS TO CORRESPONDENTS.

C. E. C., Elizabeth, W. Va.—We do not keep foxhounds; consult our advertising columns.

N. S. E., Middlesborough, Ky.—Give two grains of santonine three times a day for two days, afterwards give a dose of castor oil. The hiccoughs arise probably from stomachic derangement, feed on soft food and give exercise.

H. R., Saginaw, Mich.—Please prescribe for my four-year-old setter dog which is troubled as follows: After a day's hunt he coughs the next morning and continues it for two or three days, and then the cough disappears. For the past two months his left eye discharges more or less. He eats well and appears to be perfectly healthy. Ans. Rub the throat with camphorated oil two or three times a day, and see that he is kept out of draughts. Drop morning and night a solution of one part nitrate of silver to thirty of water in the eye till the running stops.

C. E. C., Pullman, Ill.—1. Is the mastiff dog McCormick, owned by E. M. Paulson, Mayville, N. D., registered in the A.K.R., and if so, what is his number? 2 If not registered is he eligible to registration in the A.K.C.S.B.? 3. Would his set get from a registered bitch (registered in the A.K.C.S.B.) be eligible to registration? Ans. 1. No. 2. Not unless he can show a pedigree of three generations back or is from registered parents. 3. Not unless he himself was registered or eligible for registry.

SETTER, Chatham, N. S.—I have a setter dog about 11 months old, that frequently passes bloody matter with his stools. He has been quite thin, but is coming up quite fast although the trouble does not decrease any. He seems to feel perfectly well and shows no signs of sickness, although I think he is easily tired. Kindly inform me what is the cause of the trouble. Ans. Piles probably; feed relaxing food, oatmeal and milk, boiled liver, plenty of vegetables, etc. Sulphur as a laxative is also advised, given in the food. Give only gentle exercise till all signs of blood disappear.

NIMROD, Milwaukee, Wis.—1. Can you give the name of a book treating about beagles and their training, one which treats exhaustively on the subject? 2. How are dog shows run and what rules prevail? 3. Where can we get the rules prevailing at dog shows? 4. Can you give us some information as to the best beagles, names and owners. 5. Are the Associated Fanciers a reliable firm? You will greatly oblige us by answering these questions. Ans. 1. Vero Shaw's "Book of the Dog" and also "The American Book of the Dog." The former treats the subject very exhaustively. 2. A bench show committee is first formed, whose duty it is or should be to apply to the American Kennel Club for admission, claiming dates for the show, inclosing $10 with the application, which in your case could not be acted up n by the club till the next quarterly meeting in September. The bench show committee arranges the premium list, which can easily be done by referring to a premium list published by some other club. A date for closing entries is then settled upon. A superintendent who has had experience with bench shows should be engaged and a competent judge or judges secured, whose names should, if possible, be published in the premium list. A suitable building should be secured, and for a moderate sum per day Spratts Patent will bench and feed the dogs, or this can be done by the club itself. These are the principal points to be arranged beforehand, the rest the superintendent will attend to, added as he ought to be in every possible manner by the bench show committee till the show is over and the last dog has been shipped home. These are the main essentials, though a perusal of the premium list of the Westminster Kennel Club will give you more points than our limited space will allow us to do. 3. From A. P. Vredenburgh, 44 Broadway, New York. 4. Consult our advertising columns. 5. No.

Mr. Norris, of Iceboro, while working near the river, last winter, heard the baying of a hound in the camp-meeting woods, and supposed that a fox-hunting party was abroad. A minute later the fox appeared; he crossed the railroad track and ran on to the ice at the top of his speed, heading directly for the hole in the ice. Mr. Norris thought he would run into the hole and be drowned. But such a finale was not down on reynard's programme. On arriving at the hole in the ice he turned back, and, doubling his track till he reached the railroad, and turning down that, which runs at right angles with his own track, he ran several rods, then sat down to wait and watch. He had but a few moments to wait before the hound appeared in hot pursuit of the scent. The dog, with his nose to the snow, kept on across the railroad track on to the ice, and straight for the hole where reynard had turned back. As is well known, hounds trust to their keen scent rather than to their sight, and when the dog arrived at the end of the trail his momentum was too great to stop short of the hole in the ice, and with a farewell yelp he disappeared into the swift current of the Kennebec, never to re-appear. Whether reynard smiled as he trotted leisurely off is not known, but can be imagined.—*Augusta (Me.) Journal.*

Yachting.

THE BALANCING OF MARINE ENGINES AND THE VIBRATION OF VESSELS.

THE recent issues of *Engineering* have been most interesting from the very full reports which they contain of the annual meeting of the Institution of Naval Architects, which was held early in April. Of several very valuable papers, the most important were by Messrs. Yarrow and Thorneycroft, both famous as builders of fast torpedo boats, the former on the subject of balancing of engines and vibrations of hulls; the latter on steadying vessels at sea by means of a movable weight and controlling mechanism. The former paper we reprint entire from *Engineering*, as it cannot fail to interest all who are connected with screw vessels, whether for trade or pleasure. In addition to the accompanying diagrams, the

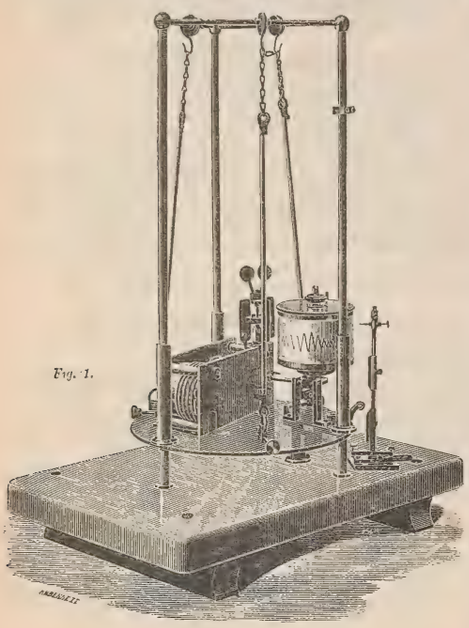


Fig. 1.

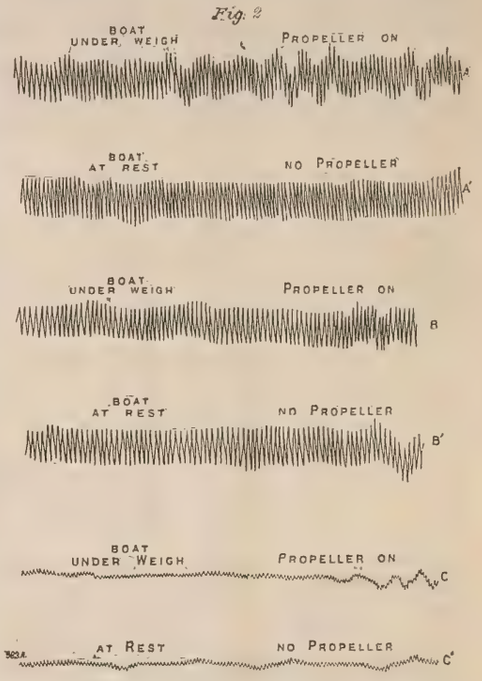
lecture was illustrated by photographs on a large screen, showing the effect of the vibrations on the water about the vessel.

Mr. Yarrow said:

All who are acquainted with the working of steamers provided with large power and of high speed, such as torpedo boats, torpedo-boat catchers, and very fast passenger steamers, will be familiar with the fact that they are subject to considerable vibration under some conditions, especially since the adoption of steel for shipbuilding and high piston speed. To overcome it is daily becoming a matter of increasing importance, as higher and higher speeds are being continually demanded. It is to a study of the laws which govern this vibration and to the possibility of avoiding it that I invite your attention this evening.

I will first describe some experiments which we have carried out during the last few years, with a view to throw light upon this subject. At the outset we felt the want of some means of accurately indicating and recording the extent and character of vibrations, and therefore devised an instrument for the purpose. This instrument I have here this evening for your inspection. It has been in use for the last six years, and is, I believe, reliable. It consists, as will be seen, of a heavily weighted drum suspended by elastic connections. This drum is provided with suitable clockwork to cause it to revolve, and is regulated to make one revolution per minute. Attached to an upright fixed to the stand of the machine is a pencil, which presses lightly against the drum, round which a sheet of paper is wrapped, in the same manner as in an ordinary indicator. It will be readily understood that if the base of this instrument be placed upon a platform, or the deck of a vessel subject to vertical vibration, this movement will be transmitted to the whole apparatus, excepting that portion which is suspended by the elastic connection, and this being heavily weighted will not follow the vibratory motion of the stand. Now if we place our instrument on the stern or any part of a steamer which is vibrating and start the drum revolving, the pencil being pressed against the paper makes a line, indicating the relative vertical positions of the pencil and the paper, or in other words, makes a diagram which records the character and extent of the movement of that part of the ship upon which the instrument stands. This instrument we call a "vibrometer," and it has mainly been devised by my friend Mr. Nesbitt.

I believe the cause of vibration in screw vessels when running in smooth water with their propellers well immersed, to be mainly due to the forces produced by the unbalanced moving parts of the machinery, such as the pistons, piston-rods, valves, gear, &c., excepting when it is the result of bad workmanship or bad state of repair. For example, as clearly pointed out by Mr. Barnaby in his treatise on marine propellers, vibration may be set up by a screw, the centre of gravity of which is out of the centre line of the shaft, or it may be due to want of uniformity in the position, area, or shape of the blades; these causes being avoidable by proper care, I do not propose to deal with them. I would, however, take this opportunity to observe that sufficient attention is not always paid to these points.



From our experiments we have overwhelming proof that the vibration in a torpedo boat is precisely the same in extent and character when the screw is on and the vessel driven by it through the water, as it is when the boat is stationary and the engines simply revolving without doing work, the propeller being removed. To prove that this statement is correct I would beg your reference to Fig. 2, upon which are shown enlarged vibrometer diagrams, which have been obtained from torpedo boats when running and when stationary. These diagrams represent a fair average of over a hundred results. It will be seen that diagrams A and A^1 are practically alike; also diagrams B and B^1, and diagrams C and C^1, A, B, and C having been obtained when the boat was under weigh with propeller on, and A^1, B^1, and C^1, when the vessel was stationary, being without propeller. The engines were making exactly the same number of revolutions in each corresponding pair of diagrams. Not only do these diagrams prove that the screw had nothing to do with the vibration, and that it was owing to the working of the machinery, but it will be seen how greatly our investigation is facilitated by these facts, because experiments can be carried out with a boat at rest, and we know that the same results as regards vibration will be found under ordinary working conditions.

It is a well-known fact that engines will impart their vibration to a boat at certain speeds much more readily than at other speeds, and it often happens that at full speed a boat may be practically steady, while at a slower speed the vibration is excessive. This is dependent upon the extent to which the movements of the reciprocating parts of the engine correspond with the period of vibration of the hull, which may be considered in this investigation as an elastic body. This is illustrated by the well-known fact that when soldiers are crossing a suspension bridge it is often found necessary to avoid their marching in step. Some years since we had a boat in which severe vibration occurred at 200, 400, 600, and 800 revolutions per minute, but there was none at the intermediate speeds of 300, 500, and 700. The diagrams in Fig. 3 show very clearly how the vibration varies at different speeds and the variation that takes place in the extent of the vibration when passing from one speed to another.

In a vessel, such as a fast Atlantic liner, which is intended to run continuously at a nearly uniform speed (unless special means be taken to balance the machinery), it is of the utmost importance to carefully avoid the number of revolutions of the engines per minute, synchronizing with the normal vibration of the hull. This cannot be carried out in the case of warships and others which are intended to run at varying speeds; for if the speed of the engines be proportioned so as not to set up vibration at full speed they will probably do so at intermediate or cruising speeds, and if they set up no vibration at cruising speeds they will probably vibrate at full speed. I believe it would be by no means a difficult matter to determine in the original design, with fair accuracy, what speed of engine would be suitable to avoid vibration being set up in any given design of hull. We frequently hear of propellers being changed in order to reduce vibration, and in many cases the change is made with advantage, but it often happens that the improvement is not directly due to the altered shape of the propeller, but indirectly to the change causing an alteration in the number of revolutions of the engine, and thereby preventing their synchronizing with the natural vibrations of the ship. We hear of hulls being strengthened or built stronger than would otherwise be necessary with a view to reduce vibration. Doubtless this is done with more or less success, due, possibly, not so much to the greater strength of hull, but rather to the period of vibration being modified by this stiffening so as to avoid its harmonizing with the movements of the machinery. Building vessels of greater strength than would otherwise be necessary, with the object of avoiding vibration, cannot be considered a scientific method of dealing with the difficulty, if it can be proved that vibration can be avoided by other means and without extra weight; because extra weight of material added to the ship tends to handicap its speed. The true cause of vibration being due to the machinery, I think it will be admitted that the correct mode of dealing with it is to so design the engines that they may be steady within themselves and free from tendency to cause the hull to vibrate. As a further proof that the vibration is due to the machinery, I may mention that two years ago I made a passage to the United States in one of the very fast twin-screw steamers. I selected a berth in the central portion of the vessel, thinking it a good position for comfort, but the vibration was found to be so excessive that after five days it was scarcely bearable to those passengers whose berths, like my own, were situated at the points of greatest vibration. The vibration was found to vary periodically. When the two low-pressure pistons were descending at the same time it was excessive; but when one low-pressure piston was ascending and the other descending it was entirely neutralized. So distinct was the vibration in my cabin that it was quite easy to count the number of revolutions of the port and starboard engines, and we rigged up a temporary vibrometer on our cabin side, which gave us diagrams, indicating clearly the movements we were subject to. I believe all who have studied the subject of vibration in steamers will agree with me that many vessels which vibrate considerably are in consequence credited with weakness, while in reality they are of ample strength, the fault resting entirely with the engines and not with the hull. Not only is this vibration a source of discomfort to the passengers, but it clearly adds considerably to the wear and tear of the vessel.

Let us consider exactly why an engine produces vibration. In an ordinary inverted engine the steam presses on the cylinder cover and on the piston, and from the piston the stress is transmitted to the bedplate. Now, during the first half of the down stroke the upward pressure on the cylinder cover is greater than the downward pressure on the bedplate to the extent of what is needed to set the reciprocating parts in motion, and this excess of upward over downward pressure lifts the engine bed and that portion of the hull to which it is attached. By a like train of reasoning it can be shown that during the latter half of the down stroke and the first half of the up stroke the tendency is to lower the engine bed; also that during the second half of the up stroke the tendency is to raise the engine bed. To sum this up in a few words, during the upper half of the revolution the engine tends to lift the vessel and during the lower half to depress it. The main principle which governs the whole matter may be summed up. As no internal force can move the center of gravity of a body it follows that any momentum generated by steam pressure in the moving parts such as the piston, etc. must be attended by an exactly equal momentum in the rest of the ship in the opposite direction.

Fig. 2

We will now pass on to consider how to design engines so that they may be perfectly free from vibration. For this purpose please refer to Fig. 4, representing a single cylinder inverted engine, which for the sake of simplicity we will assume has no valve gear. The revolving parts, such as the crank, crank-pin, and a portion of the connecting rod can be balanced by means of rotary weights in the usual way, and we then have only the vertical unbalanced parts, such as the piston, piston rod, etc., left to deal with. Now if we have two eccentrics set opposite to the crank, at equal distances from it and of equal stroke to it, and these impart an up-and-down motion to weights which we will call "bob weights," each of which is half as heavy as the parts to be balanced, that piece of mechanism will revolve free from vibration, excepting that which is due to the angle of the connecting rods. If we wish to place these weights at unequal distances from the crank (see Fig. 5), they must be proportioned to vary in weight inversely as their distances from the crank, that is, if one weight be twice as far from the center of the crank as the other it will have to be half the weight of the other, the sum of the weights in this case being the same irrespective of their position. If we desire to reduce the stroke of these weights so as to obtain a convenient length of stroke (see Fig. 6), we shall then have to increase their weight inversely as the stroke, that is, if we quarter the stroke the weights will have to be quadrupled, and so forth. It will thus be seen to be a simple matter to proportion the bob weights, their stroke and their position to suit what may best work in with any design of engine.

To sum up in a few words what must be done to avoid the effect of the momentum generated by the working parts being felt by the hull, an equal momentum in an opposite direction should be produced.

If instead of using bob weights rotary weights of equal amount had been employed, having their centers of gravity in the same position as the centers of the eccentrics which give motion to the bob

Fig. 3

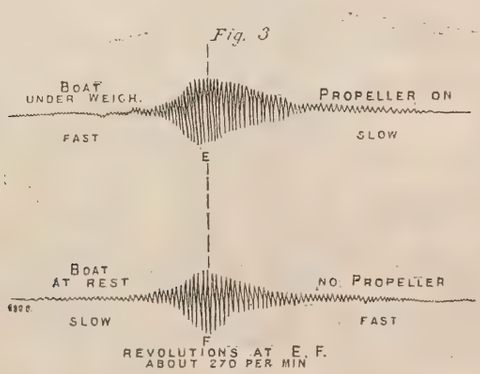


Fig. 4.

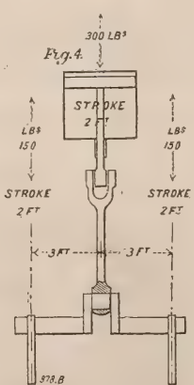

Fig. 5.

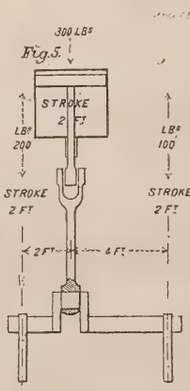

Fig. 6.

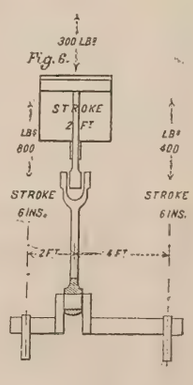

Fig. 7.

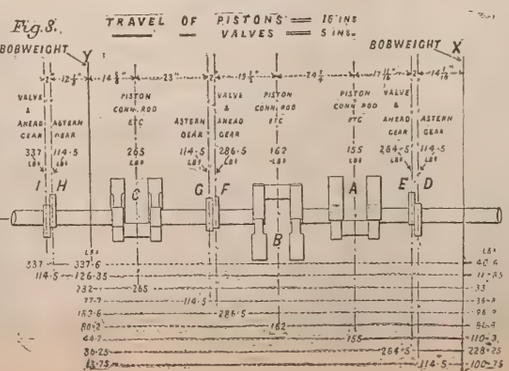
Fig. 8. TRAVEL OF PISTONS = 15 INS VALVES = 5 INS.



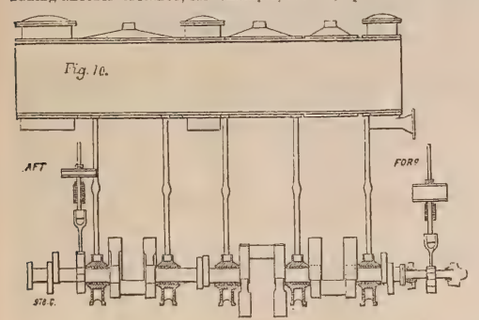


Fig. 9

weights, the engine would still be balanced vertically but would be unbalanced horizontally.

I would now direct your attention to Figs. 7 to 9, showing the calculation as applied to triple expansion vertical engines. The most suitable positions are first determined for fixing the two eccentrics which give motion to the bob weights, in this case the one lettered X being at the forward end of the engines and the other lettered Y being between the low pressure crank and its valve eccentrics. Each unbalanced moving part in the engine is then dealt with separately, as before described, and the position and amount of the weights necessary to balance is ascertained, the stroke of the balance weights being taken, for the purpose of calculation, as equal to the stroke of the part they balance in each case. For instance, take the middle pressure piston, piston-rod, etc., lettered B, the unbalanced reciprocating parts of which weigh 1621bs., the balance required at X is found to be 81.8lbs. and at Y 80.2lbs., the stroke of each being 16in. Taking another instance, for example, the high-pressure valve and

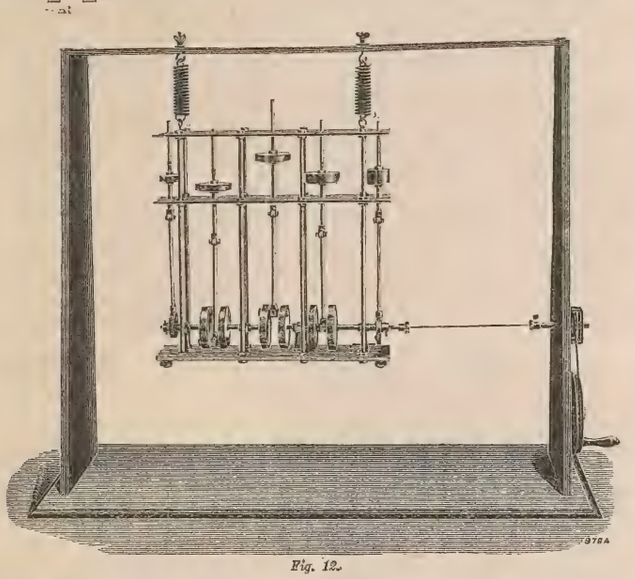

Fig. 12.

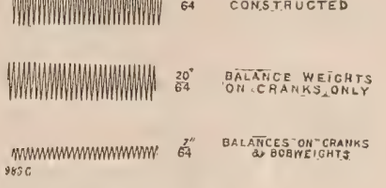
its go-ahead gear, lettered E, weighing 264.5lbs., and at Y 36.25lbs., the stroke of each being 5in. After dealing in a similar manner with all the reciprocating parts, if we were to construct two uniform discs with each of the weights thus found pinned on in its proper relative position, and place them respectively at X and Y, the engine would be balanced vertically. All the weights at X might be replaced by one large weight equal to the sum of them, and having the same position of center of gravity, in a like manner the weights at Y may be dealt with. These are shown by the large black spots on the diagrams. These again might be substituted by larger or smaller weights, as convenient, situated nearer to or further from the center of the shaft, the amount of weight being in the inverse ratio to the distance from the center. It will be seen that in the present case the total weight of all the balances equalled 740 25lbs. at X, and 1178.15lbs. at Y, and the distance of their center of gravity from center to shaft was 1.04in., and .28in. respectively; these would be equivalent to a rotary weight of 413lbs. at X, with its center of gravity 17/8in. from the center of the shaft, and a rotary weight of 134lbs at Y, with its center of gravity 2¼in. from the center of the shaft, these two weights would balance the engine vertically, but would set up side vibration. To avoid the latter and retain only the vertical effect, the use of bob weights equal to the rotary weights, and having the same vertical motion, and in the same relative position on the shaft, are substituted. This method was adopted in the engines we shall refer to later on.



The correctness of this mode of calculation is confirmed by experience in practical working. The exact amount, position, and stroke of the bob weights can be accurately calculated in the original design, and if they be made accordingly no vibration will take place at any speed. The calculations are simple, but care must be taken that they are based on accurate data. To estimate the weights of the reciprocating parts from drawings is not sufficient, they should be ascertained by actually weighing the finished articles.

Triple expansion engines with three cranks, although partially balanced when at rest, are very far from balanced when at work, owing to the distance between the various reciprocating parts, which consequently set up a rocking motion which is the principal one to be overcome, and in such engines this rocking motion we have to deal with in addition to the vertical motion of the center of gravity, this vertical motion being due to the difference in weight of the working parts of the three engines. The positions of the bob weights should be chosen so as to minimize their weight. What weight may be necessary to avoid vertical vibration of the center of gravity is constant, but what may be required to avoid rocking motion is diminished by an increased distance apart of the weights. In double cylinder engines with cranks at right angles it is a more pronounced galloping motion, *i. e.*, a motion of a complex kind, being a compound of vertical motions of their center of gravity and a rocking motion. In a single cylinder engine the vibration of the engine is practically up and down. But with whatever type of motion we have to deal the same principle of balancing holds good. All forces causing vertical vibration can be neutralized by the use of bob weights, arranged to set up equal forces acting in an opposite direction. Some years ago we thought the vibration in triple-expansion engines was due to the difference in weight of the pistons, and with a view to balance them, and, as we supposed, avoid vibration, we made each piston of the same weight in a first-class torpedo boat; thus we prevented any vertical movements of the center of gravity of the engines, yet we found no improvement. This clearly indicates that the rocking vibrations are of more importance than the vertical vibrations in triple-expansion engines.

There is one feature about the vibration of vessels which deserves attention, viz., that it varies in intensity at different points in the length of the hull; there are places where it is excessive and places, termed nodes, where it does not exist.

I will now refer you to Fig. 10, representing some engines indicating about 1100 horse-power, for a first-class torpedo boat, 130ft. in length by 13ft. 6in. beam, having a speed of from 22 to 23 knots, carrying a load of 20 tons. There is nothing special about the engines, excepting the two eccentrics fixed on the shaft at each end, working vertical bob weights. To the cranks were fitted weights sufficient to balance them, the crankpins, and partially the connecting rods. How far each connecting rod was balanced by rotary weights was determined by its weight and the lateral movement of its center of gravity; what remained unbalanced was balanced by the bob weights worked by the eccentrics, their stroke and weight being calculated as already explained when describing Figs. 7 to 9. Experiments were made with this boat in the Thames and also in the West India Dock. We tried her under three conditions, (1) without any balance whatever, as engines are usually constructed, (2) with balance weights on the cranks only, and (3) with balance weights on cranks and bob weights. The amount of vertical vibration at the stern, as obtained in the river, is given in Fig 8, together with enlarged vitrometer diagrams, from which it will be seen that the results corresponding to the three conditions show a vibration of $^{27}/_{64}$in. as usually made, $^{20}/_{64}$in. with balance weights on cranks, and $^{7}/_{64}$in. with balances on cranks and bob weights. I have not the slightest doubt, from more recent experience, that this small vibration that remained could still further be reduced, and in fact practically avoided altogether by taking greater care in accurately ascertaining the weight of all moving parts. The foregoing trials were all made at 248 revolutions per minute, which corresponded in this boat to the speed producing maximum vibration, that is to say when the movement of the engine synchronized to the greatest extent with that of the boat. I believe that the vibration of the largest Atlantic liner can in this way be practically overcome by the expenditure of a few hundred pounds, if carried out in the original design.

Fig. 11.

Bob weights proportioned and arranged, as already described, may be reduced in amount if wished, being substituted by a rotary balance weight equal to such reduction; this, however, must not be carried out to an extent to produce sensible side vibration.

Thinking it would be of interest to the meeting, and in confirmation of the statements put before you, I propose to throw on the screen a series of instantaneous photographs taken while our experiments were being carried on. In all cases the revolutions were 248 per minute, and it is the ripples on the water produced by the vibration of the boat to which I would direct your attention.

Photograph No. 1 shows the effect at the bow without any balance weights as usual. Photograph No. 2 shows the effect with bob weights and balance weights on cranks as described. Photographs Nos. 3 and 4 show the effect at the stern under a similar set of conditions, viz., without any balance weights, and with balance weights and bob weights respectively. Photograph No. 5 gives a broadside view without balance weights, from which not only can the disturbance of the water in the immediate vicinity of the boat be seen due to its vibration, but the points where the vibration is the greatest and the position of the nodes, where there is no vibration. Photograph No. 6 shows the boat under exactly the same conditions with balance and bob weights, in which the disturbance of the water is so small as not to be noticeable in the photograph. To show how easily a boat of this description may be set vibrating when the number of impulses correspond to its natural period of vibration, I beg reference to photograph No. 7, showing the vibrations produced by simply one man springing on the stern. To further illustrate the system and prove its correctness, I have here a model corresponding to a triple-expansion engine, the weights of the pistons have been similarly proportioned to one another as in our torpedo boat engines. It will be seen that the shaft is made to revolve by a flexible wire so as to avoid the result being vitiated by the node adopted for causing it to revolve. This model engine is suspended on springs in order to be quite free to move vertically. You will notice when we set it going that unmistakable vibration is at once set up; the rotary weights, such as crank, crank pin and lower end of connecting rods are all carefully balanced by balanced discs, and consequently this vibration is due to the vertical moving parts. We will now connect the bob weights, on each side, the amount, stroke and position of which have been arrived at by a similar calculation to that already described. The effect of these bob weights in completely avoiding the vibrations will be clearly seen.

In conclusion I would desire to thank those members of my staff who have been occupied with me in carrying out these experiments, Mr. Cronin, Mr. Nesbit and Mr. Marriner, for the able way in which they have assisted me in the investigation I have had the honor of laying before you this evening, which I hope you will consider of interest.

LAUNCH OF THE CORSAIR.

CONSIDERABLE interest was manifested at the yard of Summers & Payne, Belvidere, Southampton, on April 26, when the 40-rating racing cutter, built for Admiral the Hon. Victor Montagu, of Wherwell Priory, Hants, was launched. She is from a design by Mr. Arthur E. Payne, and was named the Corsair on leaving the ways by the youngest daughter of the owner. The yacht has the now fashionable Roman nose stem, which is introduced into the Decima, Siola and other racing boats of which Mr. Payne is the designer, and outside is painted white, with a gold stripe. The mast is placed well forward; she will have a large mainsail, and she is a very beamy boat. Her fittings below are chiefly in white, with polished cedar, and her accommodation includes a good saloon, two sleeping berths in the steerage, and a ladies' cabin aft, making up four beds altogether. There a captain's cabin and forecastle, and all below is very light. The fittings on deck are chiefly of cedar, and she has one of Cantelo's patent capstans. The Corsair's canvas will be supplied by Ratsey & Lapthorn, and as previously announced in the *Field*, she will be sailed by Sycamore, who in previous seasons has had charge of The Babe, 2½-rater. There was a large number to witness the launch, including the owner and his wife (Lady Agneta Montagu) and family, also a strong muster of the yachting skippers of the port, who were all pleased with the trim of the Corsair, and also her appearance; while there was a great deal of criticism with regard to her increased beam as compared with some other 40-raters, and various opinions were expressed with reference thereto. The yacht was launched with her mast stepped and her topmast half hoisted, her racing color—red, with black star—surmounting the latter. The Corsair was taken alongside the new and spacious jetty which has just been completed at the yard to finish her outfit.—*London Field.*

OCTOBER.

1. Corinthian, Atlantic City.
15. Buffalo, Closing Cruise.

A MOVEMENT is on foot in the Corinthian Navy to abandon the length and sail area rule for a measurement of waterline length alone. One of the members favoring the change is Mr. Clapham, who recently appeared in our columns as a defender of the length rule, afterward expressing his belief in a radically different rule, the old "cubic contents," and finally admitting that he was satisfied with the existing length and sail area rule. It is to be hoped that the other experts of the Corinthian Navy are better posted as to what they really think and want.

While we believe in the Seawanhaka rule as applicable to all sizes and classes, it is quite possible that practical difficulties have arisen in its use for a mixed fleet of all rigs and sizes of sailing boats and small yachts. Before abandoning it on this account, it is well to consider that the first requisite in any rule is a uniformity among all clubs; and further, that whatever its faults, it is a much fairer rule than any of its predecessors, such as mean length, waterline length length and beam or cubic contents.

One uniform rule for all yacht clubs is at this time an imperative necessity, a yacht built one year for racing in the Corinthian Y. C., of Marblehead may next season be sold to Newport, New York or Philadelphia, the Boston and New York boats of the last five years being scattered over the lakes as well as all parts of the coast. If each club and each locality has its own rules, as was once the case, this sale of yachts to new ports must largely cease and the value of ex-racers will decrease in proportion. It would be better on the whole that all clubs should use one poor rule rather than that half a dozen better rules should be in simultaneous use.

The principle of the length and sail area rule has been thoroughly tested by all the larger yacht clubs of this country and Great Britain, and the rule has been accepted as superior to any other yet proposed. This being the case, such further improvement as is desirable should be in the direction of the details and the practical application of the rule to the various sizes of yachts and sailing boats. As for the length rule in any of its forms, not only the leaders but the great body of yachtsmen have progressed too far, and are

too intelligent and well informed to go back to anything so primitive and so radically false as the theory that the possibilities for speed are in any way measured by length alone.

The "mean length" rule of the New York Yacht Racing Association, $\frac{\text{Length on Deck} + \text{Length on Waterline}}{2}$ has a strong indorsement in the course of an article on "Coast and Inland Yachting," by F. W. Pangborn, in the May *Century*. After quoting the formula in full, as above, Mr. Pangborn makes a rather unfortunate allusion to the merits of a rule "with no plus in it." The writer credits the rule with a far greater popularity than it really enjoys, in fact the only important yachting body now sailing under a length rule in this country or Canada is the New York Y. R. A., including the individual clubs comprising the association. The length rule is still used by a few clubs in the West, in which the boats are all of one type, but the great majority of the clubs of the Atlantic coast and the Great Lakes sail under the Seawanhaka rule. We can recall no instance of a club changing from length and sail area to a length rule, and the Corinthian Navy, if it makes the proposed change, will be the first and probably the last to do so.

PRESIDENT ELBRIDGE T. GERRY, of the Society for the Prevention of Cruelty to Children, last week put a summary stop to the children's chorus whose nursery rhymes have for over a year been the most popular feature of the comic opera "Wang." Commodore Elbridge T. Gerry, of the New York Y. C., has not yet found any convenient means of stopping the chorus of complaint that has been heard for so long over the new deed of gift, within as well as without the club.

Just at present the New York Y. C. and its commodore are in much the same predicament as the man with "the elephant on his hands," whom the agile Mr. Hopper sings of in the same opera. The good name of the club has been impaired by the attempt of certain of its members to get something which they thought they wanted, but which, once having, they do not want and cannot get rid of.

THE exhaustive article on the vibration of hulls, by Mr. Yarrow, which we publish this week, is a most original and valuable contribution to the literature of steam yachting. The practical demonstrations and elaborate experiments are likely to overthrow some accepted theories, but they seem to be backed up by facts which cannot be controverted. It will surprise many old steam yachtsmen to learn that the amount of vibration is practically independent of the screw.

THE annual race of the Cooper's Point Y. C. from Camden, around Reedy Island, on the Delaware River, is probably the longest race sailed by small craft. The distance is 110 miles on a wide river with rough water at times. The boats are all of 16ft. extreme length, open centerboard catboats carrying three men. The race is sailed early in the season, when bad weather is the rule, one race having been sailed in a snowstorm. The race of Saturday was the sixth that has been sailed.

YACHT NEWS NOTES.

On May 10 a complimentary dinner to Com. C. H. Colt, of the Larchmont Y. C. was given at Sherry's, a number of yachtsmen being present.

The annual dinner of the New York Y. C. was held at Delmonico's on May 12, Com. Gerry presiding.

On May 14 the new steam launch Seawanhaka was launched by Seabury & Co. at Nyack. She is 44ft. long, 8ft. 3 in in beam, and 3ft. draft, with a Seabury engine and boiler. She will be used to carry members between Oyster Bay and the club station.

On May 13 the steam yacht Cora, J. A. Morris, was damaged to the extent of $300 by fire at Tebo's wharf, South Brooklyn.

The new owner of the yacht Minerva is Willard P. Ward, who will use her about Newport and Narragansett Pier.

Frank P. Bates, well known to all New York yachtsmen who have sailed about Gowanus and the Bay Ridge shore, died at his home in Brooklyn on May 12. Mr. Bates, who was an authority in the old days of sand-bag racing, was a dealer in small yachts of all kinds, as well as the proprietor of various yachting hostelries about the Brooklyn shore.

The programme for the annual regatta of the Atlantic Y. C. on June 14, is as follows: Classes: Schooners—Class 1, all over 90ft l.w.l., class 2, all over 70ft. and not over 90ft; class 3, all of 7 ft. and under. Sloops, cutters and yawls—Class 1, all over 70ft. l.w.l.; class 2, all over 61ft. and not over 70ft.; class 3, all over 53ft. and not over 61ft.; class 4, all over 46ft. and not over 53ft.; class 5, all over 40ft. and not over 46ft; class 6, all over 35ft. and not over 40ft; class 7, all over 30ft and not over 35ft.; class 8, all over 25ft. and not over 30ft.; class 9, all of 25ft. and under; class 10, all open sloops; class 11; all cat-rigged yachts. Any yacht which shall have been launched prior to May 1, 1888, exceeding the higher limit in any class by not over the fraction of a foot, shall be included in that class. The start will be made at 11 o'clock, and the starting and finishing line for all classes will be between buoy No. 11 and a stakeboat anchored to the southward and eastward thereof. The preparatory signal from the judge's boat will be a whistle and the lowering of the club burgee for all yachts to approach the line. The starting signal for all yachts over 53ft. l.w.l., will be given 5m. after the preparatory signal, and will be a whistle and a white ball hoisted to the flagstaff, and 5m. later, for all other yachts to start, a whistle and a second white ball will be hoisted on the flagstaff. Five minutes will be allowed the yachts in each class to cross the line after the respective starting signals, and any yacht which does not pass the starting-line within that period will be timed from the expiration of that time. The prizes to be sailed for are, for schooners, from $70 to $40, and for sloops, cutters and yawls, from $70 to $25. Entries must be in writing and filed with the chairman of the regatta committee, Henry B. Howell, No. 109 Wall street, not later than 11 o'clock A. M., Saturday, June 11.

The special sweepstakes for schooners, given by the New York Y. C., will be sailed on September 8, or if postponed, on the following day. It will be open to schooners of the 90ft. class, entrance $250, half forfeit, all entries closing by June 9, 10 A. M., at the club house. The sweepstakes will go to the winner if two yachts start, the second boat saving its entrance money in the event of three starters. The club will add $500, cup or money, for the winner if two or more start, and $150, cup or money, for the second if three or more start. The course will be triangular, ten miles a leg, and will be outside of Sandy Hook. The time limit will be seven hours.

The sale of Sayonara, Mr. Bayard Thayer's 46-footer, is reported.

Reed Bros., of Fall River, are finishing a yacht for Mr. Oliver Adams, of Larchmont, which will be a combination of a Cape catboat with the overhanging ends of Gloriana.

The Mobile Y. C. opened the season on May 1 with a good fleet in commission, and much interest among the members. At the annual meeting on May 5 the following officers were elected: Com., G. M. Van Liew; Vice-Com., W. B. Curran; Sec'ty and Treas., J. K. Vincent. The racing begins with a handicap race from the club house to South End station, followed by a dinner at the station.

At the sixth annual meeting of the Miramichi Y. C., held on May 12, the following officers were chosen: Com., J. C. Miller; Vice-Com., J. L. Stewart; Rear Com., John McKane; Sec. and Treas., J. R. Lawlor; Meas., Thos. Crimmen. Com. Miller has a new yacht on the stocks, 36ft. over all; lead keel. Calypso has had her keel deepened, is enlarged and mainsail improved. Kitbride has changed hands and now flies Rear Commodore McKane's pennant. Kittoch's topsails are being overhauled for the purpose of making them set better. The prospects are good for sport.

The Fall River Y. C. will sail its its third annual regatta on May 30, with prizes for six classes.

The South Boston Y. C. will sail an open regatta on May 30. All entries to be made not later than May 28 to G. F. Clark, 43 Milk street, Boston.

On May 14 there was launched at Pryor's Yard, South Boston, the steam yacht Sea Bird, 95ft. over all, 15ft. beam, and 6ft. draft, owned by L. J. Bird, of Boston.

The latest arrival is the Herreshoff centerboard for Messrs. Brown, Dunne and Hunt. She came by rail, was taken from the car and launched at Harrison Square and should be rigged and sailing to-day. Mr. Brown, who will have her tiller in the races, is away on his wedding tour, but Messrs. Dunne and Hunt with Barclay Tilton will sail they can in her, for they realize that she will take plenty of handling in order to win. The Reaper, H. P. Benson's fin from the Herreshoffs, was tried under sail a week ago at Bristol and found wanting in ability to carry her big sail spread. She was fast until heeled to her gunwale, but then instead of heeling further to the puffs she would lift out her windward side and slow up. The cause was too little lead. Sixteen hundred pounds was the amount originally calculated as sufficient, but now it will be made a plump 2,000, and this amount is expected to keep the boat where she belongs. She floats sufficiently light to carry the added weight and still be within the class limits. Mr. Benson liked the working of his boat very much, however, and thinks with the added ballast he will have just what he needs for afternoon sailing at Marblehead, as well as for racing. Having tried his boat against nothing but the Kersey 25-rater, which really has a smaller sail plan than the Reaper, Mr. Benson has no means of knowing whether or not he has a winner, but from her general performance he has great confidence in the final result. But racing and not talking about his boat is his inclination, and he will have her in Marblehead as soon as possible. She carries about 750 square feet of canvas and will therefore take a big allowance from the centerboards which carry close to a thousand. She will measure only a little over 23ft, sailing length, where they will measure 27 or more, a big bargain in her favor if she is at all fast. The same is true of the Bigelow fin, Vanessa. This boat is a twin to the Reaper, and was given the same amount of lead, but now she, too, will have a full ton.—*Boston Globe.*

The new Herreshoff 21-footers have a novel withe at the masthead, it is fitted to revolve around the mast, thus avoiding the twisting strain of the halyards on the mast.

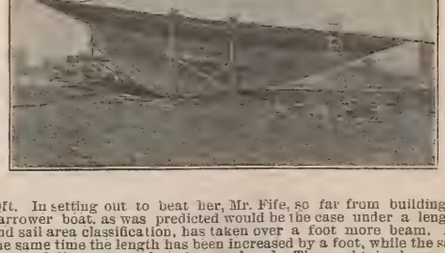
The new Watson centerboard cutter, Queen Mab, was launched on May 4, at Partick, Scotland. She is about 59ft. l.w.l., 16ft beam and 11ft. draft without board. With board down she will draw about 15ft. The board is of yellow metal, 3½ tons.

Cruising.—Carlotta, schr., George Matthews, is now on a cruise about Chesapeake Bay ..Golden Rod, steam yacht, Archibald Watt, sailed from Bermuda for New York on May 10 and arrived on May 13....Edith, steam yacht, E. T. Gilleland, was at Beaufort, N. C., from New York, on May 9 .. Aztec, steam yacht, has returned to New York after a winter in Southern waters . Sanibel, steam yacht, Rutherford Stuyvesant, returned to New York from Florida last week.

Changes of Ownership.—Cygnet, steam yacht, has been sold by Dr. Church to Jacob Cram ..Thetis, sloop, has been chartered for the season by Paul V. Stevenson to Chas. S. Denison, of Boston.

The Knickerbocker Y. C. is getting well along with its new quarters at College Point, L. I. The club house and café have each had a story put under them for storage room for spars and yawls, and a board-roofed veranda built on three sides. The site is very eligible, commanding a view of the East River from Flushing Bay and Riker's Island to Ferry Point. A 5-mile course can be laid out within view of the piazza. The anchorage is large and good, varying from 3ft. to any depth required. The dock, 250ft. long, with L of 50ft. sheathed, will be completed within a month, and a substantial marine railway for yachts up to 50ft. will be in place before hauling-out time next fall. The initiation fee of $20 has been suspended until the membership list reaches 150, and it is rapidly filling up. The grounds are very accessible—by boat from Ninety-ninth street, East River, every hour, and an electric car connecting with Long Island R R. runs within a minute's walk of the front gate. The club went into commission on May 14, and its opening day, with regatta, occurs on May 30.

Seawanhaka Cor. Y. C., under date of May 12, has issued General Orders No. 1: "The vessels of the fleet will rendezvous in Seawanhaka Harbor, Oyster Bay, on Friday, May 27, in order that they may be present and assist on the occasion of the opening of the new club house, which will take place on the following day, Saturday, May 28. On the morning of Saturday, on signal, a meeting will be held on the flagship to decide upon the part the fleet will take in the events of the day. It is hoped that a large fleet will be present. By order of the commodore, J. Frederic Tams, Fleet Captain."



The Corinthian Navy has opened the following stations: City Island, G. W. Byles' yard; Glen Cove, Hempstead Harbor Club; Cold Spring Harbor, Captain Bingham's landing; Mamaroneck, W. S. Saulsbury's landing; Greenwich, Selleck House float; Riverside, G. G. Tyson's float. Additional stations will be opened early in June at Northport, Black Rock, New Haven and New London. On May 26, a meeting will be held at the Hotel Marlborough. The club has under consideration a proposal to abandon the Seawanhaka rule, now in use, for a waterline length rule.

The Cape Cod Yacht Agency has lately made the following sales: Phitus, 22ft. cat, to W. T. Milton, of Boston; Nixie, 21ft. cat, to Clayton Rockhill, of New York; Myrtle, 28ft. cat, to Messrs. Ayers and Sanger, of New York; Spendthrift, 26ft. cat, to George T. Tate, of Boston. Of new boats the agency has sold a 30ft. 8in. cat with stateroom to Theo. C. Zerega, of New York; a 21ft. 6in. cat to C. P. Williams, of New York; a 28ft. cat to Mr. Braman, of Cohasset, Mass., and a 22ft. cat to a member of the Douglaston Y. C. A sharpie has been sold to Warwick Potter, of Cambridge, for use at Bar Harbor.

The spring regatta of the Larchmont Y. C. will be sailed on June 4, the start being made at 11:30 A. M. Prizes will be offered in all the regular classes, with a special handicap for 3 starters in the 46ft.-class in addition to the regular prize.

ZELMA.

ON May 7 the new Fife cutter built at Toronto for Messrs. Norman B. Dick, Stephen Haas and Widmer Hawke, was launched from the shed where she was built by Henry Stanton, of Pictou. Zelma, as she will be called, was designed and partly built by Mr. Will Fife, Jr., the entire frame being got out and erected at the Fairlie yard, after which it was knocked down and shipped to Toronto. There it was re-erected over the lead keel, and the planking, decking and other work completed. Zelma is intended for the 40ft. sailing length class of the Lake Y. R. A., the measurement being by Seawanhaka rule. The leading boat in the class is the Fife cutter Yama, built in 1890, by Wintringham, at Bay Ridge, N. Y., for Mr. Allan Ames, of Oswego. Yama has swept the Lake for two seasons, going last year into the 46ft. sailing length class, as she had no competitors in the

40ft. In setting out to beat her, Mr. Fife, so far from building a narrower boat, as was predicted would be the case under a length and sail area classification, has taken over a foot more beam. At the same time the length has been increased by a foot, while the sail area and displacement have been reduced. The yacht is, however, by no means a machine, but a roomy and comfortable cruising craft, much like Minerva in general features. Her approximate dimensions are:

Length over all	55ft. 6in.
Load water line	37ft. 0in.
Beam, extreme	10ft. 7in.
Draft	8ft. 5in.
Lower mast, deck to hounds	31ft. 0in.
Topmast	26ft. 0in.
Boom	41ft. 0in.
Gaff	27ft. 0in.
Base line for measurement	70ft. 0in.

On deck and below there is rather more room than in Yama, but the arrangement is the same, forecastle, toilet room, main and after cabins. The keel was recast from the old Watson 10 tonner, Verve, No. 1, owned for some years by Mr. Dick, and broken up last fall. The ironwork was sent out by Mr. Fife, and the sails were made by Lapthorne & Ratsey. Mr. Stanton is building at the same place a centerboard cutter of 30ft. sailing length, whose frame was also sent out by Mr. Fife. She will be owned by Messrs. F. M. Gray and J. Carl Reed, of Toronto.

COOPER'S POINT CORINTHIAN Y. C.

REEDY ISLAND RACE.

A WORSE day for pleasure craft than May 14 would be hard to imagine; alternate squalls and calms, a variable easterly wind with its chilly proclivities, and rain pretty much all the time made the uninterested public wonder what those 'tarnal fools over on the point were trying to do. Surely no sensible man would hustle out his light sails and stand in the rain hour after hour on a day like this just for fun? It takes more than weather to scare off the sailor boys of the Delaware, however, and about all the entries showed up in time for the start, four of them, including the winning cat, the Knosey, never having been tried before, and one, the Humphreys, did not get her sails bent on until three minutes after the last gun fired, but she started just the same. Just think of it, you yachtsmen of the East, a sailing race of 110 miles down into the rough water of the lower Delaware and back, in open 16ft. boats, right in the face of a squally southeaster. Don't it make you tired?

The club's rules call for the somewhat obsolete waterline length measurement, on which a time allowance of 25m. per foot is made for the course, no restrictions on sails.

The preparatory gun was fired at 3:50 P. M., and 5 minutes later the sloops were sent on their journey, the second gun acting as a preparatory signal for the smaller boats. The following sloops started: Elfreda (Dr. Tuttle), sailed by Capt. Bagley; Hilda, sailed by her owner, Mr. G. W. Holloway; Nance (Mr. Gideon), sailed by Mr. Vandeusen; Comfort, owned and sailed by Com. Lutes, C.P.Y.C., with the veteran Capt. Wilkins on board as advisory committee; Marjorie, Ida, Emilie K. and A. B. C. also started. Nance was first over the line, handicapped 55s., Hilda 15s. later, and the others trailing close behind. The open boats got off pretty well together, all being handicapped some two or three minutes. Numerous changes of weather were encountered, the wind being so high at times that all hands had to lay to and hold on to the weather rails, and again for four hours all were utterly becalmed. The sloops Marjorie, Emilie K. and Elfreda ran aground and had to give up; Lindeborn and Humphreys did not complete the course and were disqualified. Hilda was the first boat to reach Reedy Island at midnight and found that the storm or river pirates had removed the stakeboat to some place in out of the wet; at any rate it was not visible. While she was hunting for the stakeboat the Kinsey arrived, and immediately after A. B. C., and the little Nance, smallest of the fleet in the cabin class, close behind. All were drenched through and through, and dry spots in or out of cabin were scarce as hen's teeth.

On Sunday the rainy monotony was varied by a scorching sun, appropriating large sections of cuticle from the exposed yachtsmen, and about 8 o'clock the wind sprang out from the south, carrying the whole fleet home before the wind with every rag set. The cats were allowed to carry jibs and spinnakers and they made good use of them on the run home. The finish was timed:

Hilda (cabin)	2 18 15	Clark (open)	3 40 00
Kinsey (open)	2 19 00	Ida (cabin)	4 40 00
A B C (open sloop)	2 31 00	Burton (open)	5 00 00
Nance (cabin)	2 56 00	Comfort (cabin)	5 45 00

Cabin boats are subject to measurement, but Hilda and A B C each allow for about 2ft. of extra length to Nance, so that the latter wins prize for the cabin boats. In the open boats there is no difference in size, so that Kinsey wins not only the first prize for open boats but also the prize for fastest time over the course, 22h. 19m., the actual time, as the Kinsey was handicapped nearly 4 minutes, and allowing for 4 hours lost by calm, is something pretty good for a 15-footer—110 miles in 18¼ hours. The weather was so thick that it was hard at times to even see the big range lights. The A B C, an old boat, did some remarkably good sailing. JIB HANK.

ROCHESTER C. C.

THE Rochester C. C. has arranged the following programme for the season:

Annual spring regatta, June 25; unlimited sailing, no limit to ballast or rig; trophy race, three miles; sailing standing; one-quarter mile and return. The crew must stand during this race. Any crew sitting at any time during this race must return to the starting line and recross it. Any canoe capsizing may be righted and continue the race without returning to starting line; sailing maneuvering, one half mile and return; paddling, single, single blade, one-half mile straightaway; tandem paddling race; grand parade of the war canoe, Huff, accompanied by the club fleet.

Second trophy races, July 9.

Third trophy races, July 23.

Fourth trophy races, August 27.

Annual fall regatta, September 8.—Trophy race, unlimited sailing, three miles, no limit to ballast or rig, sailing standing, one-fourth mile and return; sailing maneuvering, one-half mile and return; trophy paddling race, single, single blade, one-half mile straightaway; tandem race, paddling, single blades, one-half mile and return; hand paddling race.

All sailing races must be started to windward and finish at the regular home buoy irrespective of distance. All sailing races of this club shall be governed by the American Canoe Association rules.

The following special rules will govern the races of this club:

1. No unlimited sailing race shall be called unless there be at least three starters.

2. No trophy paddling race shall be called unless there be at least three starters.

3. If the above races do not fill they shall stand postponed for one week, when they shall be called irrespective of the number of starters.

4. The unlimited sailing and single paddling races shall be the trophy races of this club; points to count.

5. The first race of the spring and fall regattas shall be called at 2 P. M. sharp.

6. The order in which the races shall be called is left entirely to the judgment of the starters.

7. If, for any reason, neither starter is able to attend any race, the members present shall appoint a starter for that day only; such appointee need not be a member of the club.

The management of the races will be in the hands of the following officers: Clerk of course, H. D. McVean; judge, F. F. Andrews; starters, C. A. Bruff, R. T. French; timekeepers, C. H. Moody, C. Williams.

CRUISERS AT THE A. C. A. CAMP.

Editor Forest and Stream:

The regatta committee propose to offer the cruisers at the A. C. A. Camp at Lake Champlain this year, a new feature which they beg to announce in preliminary form.

A meeting will be called at the camp, where members interested can join in final arrangements. This meeting will probably be called on Saturday, August 6, if enough members are in camp then to justify it. If not, it will be a day or two later. The committee will submit to the meeting a proposition to take two or three days' cruise, camping out one or two nights, making the runs from camp to camp short enough to prevent scattering, and taking the time of such canoes as choose to enter in a speed competition. Other canoes may join the cruise without any restrictions whatever. But a prize will be given to the best and second best records.

A complete individual cruising outfit will, of course, be carried and used.

Either sailing and paddling permitted, possibly under certain restrictions, such as perhaps one forbidding paddling entirely some afternoon or morning when a fair wind prevails.

It is proposed to cruise up the east side of the lake, through or over the sandbar bridge, because this part of the lake is comparatively unknown to us, and because it affords more sheltered water.

Convenient stopping places can be found 12 or 14 miles apart so that the whole fleet would rendezvous at midday and evening. But all these details can be acted upon at a preliminary meeting, and decided by the majority.

Mr. Gibson's launch will accompany the cruise to assist in keeping it together, and in any other way necessary, and to take the times of such canoes as are competing for the prizes.

If seven members will start, this may be made a very pleasant event. There might be many more, but it will hardly be worth while to arrange the affair for fewer.

The announcement is made at this early day to invite discussion and preparation.

Cruisers are requested to bring with them canoe or other small tents and sufficient equipment

Particular attention is invited to the fact that it rests with the cruisers themselves to say whether or not this cruise shall be made.

ROBERT SHAW OLIVER,
FORD JONES,
H. LANSING QUICK,
E. H. BARNEY,
R. W. GIBSON, Chairman,
Regatta Committee.

MIQUONONUS C. C.

THE first annual regatta of the Miquononus C. C. will be held on Monday, May 30, off the club house, foot of North Second street, Camden, N. J., with the programme including the following events: Paddling class 4, ½ mile straightaway. Tandem paddling, ½ mile straightaway Unlimited sailing, 3 miles, twice around triangle, finishing off club house buoy. Paddling upset, 220yds. Upset at signal, right canoe and cross finish line under sail. War canoe paddling, ½ mile straightaway. All races will finish on line between club house slip and buoy flag, and will be governed by the racing rules of the A. C. A. Entries close Saturday, May 21, with the secretary of the regatta committee. An entrance fee of fifty cents per man for each race, except the war canoe race, must accompany the entry. No entrance fee for war canoe race. The right to reject any entry is reserved by the committee. A handsome prize will be given the winner of each race If four or more entries are received for any race a second prize will be given. In the war canoe race a prize will be given to each member of the winning crew, and a banner to the club.

The first race will be called promptly at 2 o'clock P. M.

Signals.—Paddling races will be started by the word "Go."

Sailing Races.—The first gun will be fired 5m. before the start; second gun 1m. before the start; start at third gun. In the upset races the upset signal will be one gun. Numbers will be furnished each contestant, which must be carried on both sides of mainsail in sailing races, and be worn by paddlers. The club house will be open to visiting canoeists from a distance after 12 o'clock noon, Saturday, May 28.

The members of other clubs are cordially invited to be present at the regatta.

J. A. BARTEN,
BYRON E. FORTINER, } Regatta Committee.
M. D. WILT, Sec'y,
1417 North Fifteenth Street, Phila.

RED DRAGON C. C.

THE Red Dragon C. C. have removed from its quarters at Bridesburg to the "Morris Homestead," at Wissinoming. It was the intention to secure a piece of ground and erect a new club, owing to our cramped position at Bridesburg, but through the liberality of Mr. Morris we were induced to lease the "Homestead" with surrounding grounds, comprising several acres. Our house contains 17 rooms, giving us very spacious quarters; which will be fitted up comfortably. The grounds are well shaded, and wisteria and clinging vines add beauty to our house. From the piazza we have a beautiful view of the Delaware River. Our prominent position gives us a most desirable place for viewing races. This sequestered portion of the river is a paradise for the canoeist, being free from the troublesome ferry and tug boats so numerous lower down upon the Delaware. At present we are actively engaged in making necessary changes upon our house; we hope, however, soon to have everything in readiness at an early date for a house warming, of which you will hear more later.

Should any of our brother canoeists chance to be storm stayed in our vicinity they will always find the latch string hanging without the door. F. O. G.

CANOE NEWS NOTES.

The Brown University C. C. will hold an invitation race for war canoes on the Seekonk River, at Providence, R. I., on May 30. The course will be one mile straightaway, the crews limited to one man for every two feet or fraction thereof of the canoe's length. Mr. S. Willard Bridgeman, Brown University, Providence, is secretary of the regatta committee.

The annual regatta of the Orange C. C. will be held at Arlington, N. J., on the Passaic River, on Sept. 10.

The meet of the Northern Division will this year be held at Mr. Thompson's park, Geneva, Lake Conchicung, Ontario, Can.

The new Taunton (Mass.) B. C., has now a membership of 100, the officers being: Pres., S. B. Presburg, M.D.; Vice-Pres., W. J. Clemson; Sec'y., Albert Fuller; Com., Col. Fred Mason; Vice-Com., W. T. Donnelly; Purser, F. M. Atwood. The club will be incorporated with a capital of $1,000. The new house will be 75×27ft., two stories high.

The new Year Book of the Western Canoe Association is the neatest and most tastefully made that has yet been issued. The cover has a very cleaver nautical design, with a chart of Lake Winnebago on the back. The book contains some excellent pictures, including portraits of officers and ex-officers.

A C. A. Membership.—Eastern Division: Elmer A. Onthank, Boston, Mass.

Rifle Range and Gallery.

The Coming Army Rifle.

THE board on magazine arms, appointed on test the magazine guns submitted for adoption for use in the United States Army, will begin their final tests this week. No guns will be received for trial after May 31. The board at present is composed of Lieut.-Col. Robert H. Hall, Sixth Infantry; Lieut.-Col. J. P. Farley, Ordnance Department; Major H. B. Freeman, Six-enth Infantry; Capt. S. E. Blount, Ordnance Department, and Capt. George S. Anderson, Sixth Cavalry.

The board during the past year have tested the guns officially adopted by England, Austria, Portugal, Japan, Switzerland, Germany, Belgium and Roumania and the new guns shortly to be adopted by Russia and Italy, and are hopeful of obtaining some American arm that is superior to them all.

The new American gun will take a bullet of a caliber of $^{3}_{10}$ of an inch, weighing 230 grains, a charge of thirty-six grains of smokeless powder, will attain a velocity of 2,000ft. and have a range of two miles.

Among the guns to be tested next week at Springfield are two by S. M. Durst, a native of California: two by Alphonse Mauser, nephew of the inventor of the Mauser rifle; two by the Lee Arms Company, two by Capt. Krag, director of the Royal Norwegian Factory of Arms at Konsberg, Norway; two each by T. M. Wilson, of Springfield, Mass., and Capt. A. H. Russell, of the United States Army.

The tests are expected to be finished and the board's report ready by March 31, 1893.

"FOREST AND STREAM" TOURNAMENT

FOR NEW JERSEY RIFLE CLUBS.

The shooting programme arranged for the "Allgemeine Schuetzen Fest," at Wissel's Cypress Hills Park, Cypress Hills, Long Island, from July 31 to Aug. 7, inclusive, follows. There will be shooting on eight distinct targets: First, king; second, festival; third, prize; fourth, medal; fifth, man; sixth, point; seventh, team, and 8th, judges. The shooting will take place at three distances, viz.: 200yds., 154ft. and 150ft. Of shooting booths there will be ten on the long range and seven on the shorter ranges, making seventeen booths in all. The targets, sizes of bullseyes, distances, cost of shooting, prizes to be contested for, and distances are below:

King Target—Twenty-five ¾in. rings, 12in. black, distance 200yds.; open only to members of organizations included in the bund; tickets $3; no re-entries; prizes, $50 gold medal and $100 in cash and other prizes.

Festival Target—Eighteen ⅜in. rings, 12in. black, distance 150ft.; open to all comers; tickets, 3 shots, $1; re-entries unlimited. Gold and silver medals will be distributed on this target.

Prize Target—Twenty-five ¾in. rings, 12in. black, distance 200yds.; open to all; tickets $1 to members of organizations included in bund, all others $3 for first tickets. Prizes amount to $500 in cash, divided into fifty prizes.

Man Target—Distance 200yds., open to all, to all outside marksmen the first ticket will cost $3, all others $1. Fifty prizes, ranging from $50 to $1, amounting in all to $500, will be offered on this target.

Point Target—Three 4in. rings, 12in. black, 200yds., open to all; tickets, 10 shots, $1. Seventy-five per cent. of what money is taken in on the target will be distributed.

Medal Target.—Eighteen ¾in. rings, 3in. black, distance 154ft., open to all, tickets 75 cents, 75 gold medals in worth ranging from $25 to $3 to be contested for.

Team Target.—Twenty-five ¾in. rings, 12in. black, distance 200yds., open to teams of 5 men of any rifle club, Schuetzen Verein, company or battalion; entries to close July 1. One man can but shoot with one team, entrance fee $10. First prize, $50 cup; second, $40 cup; ranging to the ninth and tenth prizes with cups valued at $10. Five shots a man.

Judges' Target.—Eighteen ⅜in. rings, 3in. black, distance 154ft., 3 shots. Prizes ranging in value of $25 to $5 will be given on this target.

In the bowling department prizes ranging from $50 downward will be presented to the better bowlers. Ladies and team bowling for prizes will also be a feature. The prizes offered by the festival committee on the several targets are: King, $150; festival, $100; prize, $500; man, $500; point, per centage; medal, $450; team $220; and medals, $50; total $1,970. For the bowlers the amount foots up $828 in cash prizes. Thus, taken with the rent of the park, targets, warners, secretaries, etc., will bring the expense up to about $15,000. Now I say right here that they have gone to do some pretty tall hustling to take in $15,000. It is the opinion of many gentlemen prominent in Schuetzen affairs that the "fest" shouldn't have taken place before '93. Candidly, it is my opinion that the affair will be a flat failure. A peculiar feature of the programme issued is that it possesses no names of any committee of arrangements or shooting committee. If the Bund takes in the fifteen thousand "thalers," which alone is just the outlay, they are good ones. JAY H. KAY.

Massachusetts Rifle Association.

BOSTON, May 14.—The regular weekly shoot of the Massachusetts Rifle Association was held at its range to-day under very unfavorable shooting conditions, there being a strong 6 o'clock fishtail wind. This association will hold a three days' spring meeting on June 16, 17 and 18, with a rare prize list for all kinds of rifle and pistol shooting. Following are the scores made today, distance 200yds., Standard American target, all being re-entry matches:

Silver and Gold Pistol Medal.

Won on 10 scores, 89 or better, by S. Paine 91 92 92 91 93 91 90 89 96 89

Silver Military Medal.

Won on 10 scores, 42 or better, by A'mst'ng 42 43 44 42 44 42 42 43 45 42

Seal Medal Off-Hand Match.

Pistol Medal Match, 50yds.

S Paine	92	S C Sydney	91

Special Pistol Match, 50yds.

E E Partridge	92	E Parsons	90

N. Y. Militia Shooting.

THE General Inspector of Rifle Practice has issued rules and regulations for rifle practice at the ranges, in which it is set forth that commanding officers of companies will see that enlisted men of their commands receive the necessary preliminary instruction in rifle practice at the armories before they are sent to the ranges. In the matter of classification, it is announced that all who do not appear on a range for practice will constitute the third class. All who are present for practice will constitute the second class. Practice in this class will be at 100yds. standing, on a No. 3 target. A score of 15 or upward at this distance will qualify.

The first class will consist of those who have qualified in the second class. The practice in this class will be at 200yds, kneeling or sitting, and at 300yds. prone, on a No. 3 target. Those failing to make 15 at 200yds. will not shoot at 300yds. A score of 30 or upward in the first class, made on the same day, will constitute a marksman, and entitle the maker to the State decoration. A score of 42 or upward, made on the same day by a marksman, at 500 and 600yds. prone, on a No. 3 target, constitutes a sharpshooter, and entitles him to a silver bar. Marksmen who fail to make 20 at 500 ds. will not shoot at 600yds.

Firing in ranks will be as follows: Fire by squad, section, platoon or company, at 100yds, standing, two rounds; at 200yds. kneeling, four rounds; at 300yds. kneeling, four rounds. The percentage made of the possible aggregate score in this practice, namely, firing in ranks, added to the percentage present and practicing of the aggregate strength of the organization, less commissioned officers, staff sergeants and musicians, on the day of practice, and the sum thereof divided by two, determines the figure of merit for the year.

Chicago Rifle Championship.

THE Chicago championship rifle contest takes place at Geo. McCune's shooting gallery, 146 S. Halsted street, commencing July 11, at 8 o'clock P. M. and continues until all contestants have finished their scores, but closing each evening at 12 o'clock. The shoot will be for the championship badge, a beautiful and expensive diamond medal costing $100, and won by C. A. Hankle last year. A second and third prize will be donated by the Garden City Rifle team as follows: The second to be a Smith & Wesson high grade revolver of latest design. Third prize to be $7 in money. Conditions, 150 shots, 22-cal. rifle, open sights, free offhand, Massachusetts paper target, ½in. center, count Creedmoor rules, 6 shots on each target, two targets to be as a score, time limited to 12m. to each two targets. All contestants must enter on or before the day that the shoot commences, as none will be admitted thereafter. There is to be but one referee and in case a dispute arises as to any of his decisions he is empowered to call on any two men (not contestant) who will decide with the referee according to the rules, and their decision shall be final. For particulars address to or call on Geo McCune, 146 So. Halsted street, Chicago.

Creedmoor Dates.

THE following dates for rifle practice at Creedmoor by the troops of the New York City and Brooklyn brigades of National Guard have been assigned by Brig. Gen. Benjamin M. Whitlock, General Inspector of Rifle Practice:

Troop A and First Brigade Signal Corps, May 28.
Seventh Regiment, June 13, 14, 15, 16 and 17.
Eighth Regiment, June 20 and 21.
Ninth Regiment, June 1, 2 and 3.
Twelfth Regiment, July 18, 19 and 20.
Thirteenth Regiment, June 7, 9 and 10.
Fourteenth Regiment, June 21 and 22.
Twenty-second Regiment, June 6 and 8.
Twenty-third Regiment, June 22, 23, 24 and 25.
Thirty-second Regiment, June 29 and 30.
Forty-seventh Regiment, June 27 and 28.
Sixty-ninth Regiment, July 14 and 15.
Seventy-first Regiment, July 6, 7 and 8.
Seventeenth Separate Company, July 1.

Cincinnati Rifle Association.

THE regular shoot of the Cincinnati Rifle Association was held on its range to-day. The shooting conditions were very unfavorable owing to a bad 12 o'clock fish-tail wind. The shooting was at 200yds. off-hand at the standard target:

Gindele	85	82	78	Hanck	60	62 59
Louis	68	71	65	Weinheimer	75	74 73
*Brumbach	62	56		Drube	77	80 70
Payne	81	75	75	Topf	58	51 52
Simon	71	74	73	Speth	68	71 65
Stegner	65	64	60	Laisar	51	51 48
Zelger	70	74	64	*Military.		

Some Lischke Scores.

JERSEY CITY, May 14.—The following scores were made by some of the members of the A. Lischke Rifle Club at their range, 110ft., 25-ring target, on May 6. Medals were won: First class, A. Lischke, captain; second class, Reicherz; third class, F. Steidel.

Lischke	25	25	25	24	24	24	22	22	21	30—224	
Reicherz	24	24	24	23	23	23	23	23	22	21—230	
Steidel	25	24	24	24	23	23	19	19	19	16—215	
Schulte	24	24	24	23	22	22	19	19	19	17—212	
Dyroff	23	23	23	22	22	22	22	17	16	16—206	
Strater	24	23	23	22	22	20	19	19	18	16—204	

OTTO SCHULTE, Shooting Master.

Empire Rifle Club.

NEW YORK, May 1.—The following scores were made by members of the Empire Rifle Club at their weekly shoot at their headquarters, No. 12 St. Mark's place, distance 100ft., 25-ring target:

B Zehn	234	W Rosenbaum	227 C Zettler 216
J Grimm	231	W Miller	223 H Feizer 210
A Rosenstraus	229	W Meisenholder	219 G Hillmeyer ret

Heidenreich Rifle Club.

NEW YORK, May 10.—The weekly scores shot at our range, 324 West Fifty-third street, distance 100ft., were as follows:

J Kaufman	240	W A Hicks	231	F Goodman	222
W Dalton	239	L Enders	231	W Miller	213
V Horn	236	J Hippold	224	G Reinholdt	213
J Aigeldinger	236				

Garden City Rifle Team.

THE Garden City Rifle Team met for their weekly contest Tuesday evening, May 10, 1892, at George McCune's shooting gallery, 146 South Halsted street, Chicago. Conditions, 25yds., 25 shots each, open sights, free off-hand position, Massachusetts paper targets, possible 500 points:

C A Hankle	278	T Ford	262	John Polities	248
W J Gibbs	272	H S Burley	258		
Geo McCune	263	A McBean	250		

C A Hankle broke the club record for 1892 by the above score. He also won the sweepstake shoot after regular club shoot by a score of 111 out of a possible 120 points.

Beideman Rifle Club.

BEIDEMAN, N. J., May 9.—The official scores of the week ending May 6 of the Beideman Rifle Club, outside range, with strong wind blowing, 25yds., ¾in. 25-ring target, possible 250, strictly off-hand, with the following results:

H Drahem	242	J L Woods	234	W Gilbert	225
H J Yergey	235	E D Gardner	225	O Garrity	192

WALT GILBERT, Sec'y.

Heidenreich Rifle Club.

NEW YORK, May 16.—The weekly score at our range, 425 W. Fifty-third street, distance 100ft., was as follows: Aigeldinger 236, Horn 232, Hicks 231, Muller 230, Hppold 228, May 216, Goodman 216, Kemholdt 215, Le Claire 214, Kaufmann 216.

Ready for a Scrimmage.

SERGEANT F. L. STEWART, of the Sixty-ninth Regiment, the champion shot of the National Guard of this State, has organized an Irish-American rifle team of twelve members. He will issue a challenge to any rifle team in the world to shoot at 200, 500 and 600yds., off-hand and prone. The team will be exclusively composed of Irish-Americans. At their preparatory practices the members of the team have done some remarkable shooting.

Revolver Shooting in England.

THE new 20yds. revolver target for Bisley has just been issued. As the old target (3in. bullseye and 2in. center to bull) is now obsolete it may be interesting to know that all the records on it were made by Americans. The 12 shot stationary target record was a highest possible made by the late Chevalier Ira Paine, in pool shooting at Wimbledon in 1889, the records for disappearing target, sliding target and rapid firing, are all three held by Walter Winans at this target, with scores of 41, 40 and 39 respectively, made at Bisley and Wimbledon, he having made the highest possible of 42 in both, the first in practicing last year.

As this target will not now be used in English competitions Mr. Winans had a try at the new 2in. bullseye on April 20 before several witnesses; a front wind blew the smoke in his face and made him have to abandon the rapid-firing competition, but at the disappearing target he made 39 with the target revolver and 38 with the military.

At the sliding he made 35 with the target revolver. These are the best on record scores to date on this target. The highest possible is 42. The revolvers used were Smith & Wesson.

Trap Shooting.

All ties divided unless otherwise reported.

FIXTURES.

If you want your shoot to be announced here send in notice like the following:

May 16-19.—Capital Gun Club annual tournament, at Washington, D. C. Arthur S. Mattingly, Sec'y.
May 17-19.—Grand tournament at Indianapolis. For programme, etc., address Chas. Polster, 149 Indiana avenue, Indianapolis.
May 17-20.—Annual tournament of Kansas City State Sportsmen's Association, at Council Grove. G. W. Cleek, Sec'y.
May 19.—Essex Gun Club, Marion, N. J.
May 19.—Falcon Gun Club monthly shoot, at Dexter Park.
May 19-20.—Big Four tournament, Burlington, Iowa.
May 20.—Jeanette Gun Club, at Dexter Park.
May 20 —Parkway Gun Club, Dexter Park, Long Island.
May 20.—Atlantic Rod & Gun Club, at West End, Coney Island.
May 23-25.—Altoona, Pa., first annual tournament, at Wapsononock Shooting Park. For programme address W. G. Clark.
May 24-26.—Iowa State Association tournament, at Des Moines, Iowa.
May 24-26.—Knoxville Gun Club, annual tournament, at Knoxville, Tenn.
May 24-27.—Windsor Keystone Gun Club tournament, at Windsor, Ontario, Canada.
May 25.—Glenmore Rod and Gun Club, Dexter Park, L. I.
May 26.—Emerald Gun Club, at Dexter Park.
May 26-27.—Harrisburg Shooting Association, third annual spring tournament, at Harrisburg, Pa.
May 26-27.—Carmen Gun Club tournament, Carmen, Ill.
May 27.—Linden Grove Gun Club monthly shoot, at Dexter Park, Long Island.
May 30.—Canajoharie Gun Club, king bird tournament, at Canajoharie, N. Y.
May 30.—White Plains Gun Club tournament, White Plains, N.Y.
May 30.—Op n shoot and team match for Connecticut Keystone Trophy, under the auspices of the Bridgeport Gun Club, at Bridgeport, Conn.
May 30.—Maplewood Gun Club tournament, Maplewood, N. J.

A Week Ahead.

THE FOREST AND STREAM cannot report trap tournaments a week ahead of their occurrence, but can and does report important Western events, like the Grinnell, Ia., tournament and the Kansas City tournament a week ahead of any other paper.

That's the kind of a trap journal this is.

If you want the earliest, fullest, correctest, completest and best illustrated report of such meetings, ask your newsdealer for the FOREST AND STREAM.

Just as likely as not you'll find in it, set out in FOREST AND STREAM'S famous graphic trap score type, the full details of a match like that of Messrs. Budd and Grimm at Grinnell, for a report of which you might vainly hunt until you were blind, in the columns of our esteemed contemporaries who are bringing up the rear of the procession.

DRIVERS AND TWISTERS.

GREAT times there will be at Knoxville, Tenn., next week when the cracks of the East, the West, the North and the South will come together in friendly rivalry before the traps. Cleveland expert traps, North's electric pull, bluerock targets, big prizes and a jolly lot of home shooters as well as visitors will be the combination. Charles Ross, not the lost Charley of newspaper notoriety, but the auburn-haired blonde who hustles shooting affairs in and about Knoxville, promises a rousing reception to the visitors and likewise promises that they will not be allowed to suffer from the "blues" during their stay. On Sunday at 5 P. M. a half-dozen or more of shooters from New York and New Jersey will board the Shenandoah Valley Express of the Norfolk & Western R. R. at the Pennsylvania depot, and after speeding along past Philadelphia, Harrisburg, Hagerstown, Luray, Shenandoah, Grottoes, Basic, Buena Vista, Natural Bridge, Roanoke, Radford, Pulaski, and Bristol, will end their ride at Knoxville at 6 P. M. on Monday. They will leave for home again on Thursday evening, arriving at New York the following night. Some of them while in Knoxville will stop at the Hotel Hattie, some will go to the Vendome and others to the new Schubert.

* * *

Wm. G. Clark, proprietor of the Wopsononock Shooting Park, at Altoona, Pa., anticipates a big time at his tournament to be held next Monday, Tuesday and Wednesday. There are eight events on the programme each day, each event to be at 18 bluerock targets, with a uniform entry of $1.50 in each event As Paul North's system of handicapping (with a slight modification) is to be used there can be no 'playing off" in the small events in order to get a chance to shoot as an amateur in larger events. Shooting will begin at 9 A. M. each day. When 15 entries or less there will be 3 moneys; over 15 entries, 4 moneys. Target money will be deducted from the entries.

* * *

G. G. Zeth, who has made such a pronounced success with the "Trap and Trigger" department of the Altoona *Gazette*, is one of the best known field and trap shots in Pennsylvania, as well as a writer who wields a facile pen and has an abundant knowledge of general sporting matters. The *Gazette* is still a young journal, but has won a decided foothold in the hearts of the people.

* * *

Williamsport, Pa., is quite a town for cyclers, and F. C. Steuber, of the Williamsport Rifle and Gun Club, who is also an enthusiastic L. A. W. man, says there are at least 375 riders in the town. Several other well-known shooters of the town are excellent riders.

* * *

Young Alf. Hofmeister, a member of the Pittsburgh Gun Club, who is with Brown & Co., the leading sporting goods dealers in the city, has acquired an enviable reputation by his expertness in loading cartridges. Nearly all the club members use shells of Als's loading, and they swear by his methods.

* * *

After the team match at the New Jersey League match at Rutherford on Saturday, delegates from the various clubs held a meeting to decide upon the place for the June shoot. By unanimous consent "Wanda" (Mrs. M. W. Lindsley) drew for the choice, which was in favor of the South Side Gun Club of Newark. This club has ample facilities for a big shoot, and its grounds are easy of access, being on the line of the Pennsylvania Railroad, less than five minutes walk from the Emmett street station. The club will make an effort to break the League record, so far as number of entries and of targets thrown are concerned.

* * *

While in Williamsport, Pa., last week, Nelson A. Hughes, Milton F. Lindsley and the writer visited Charles H. Eldon, the well-known naturalist, taxidermist, natural history student, field shot and writer, and were very pleasantly entertained by that talented gentleman, who exhibited some beautiful specimens of the taxidermist's art. Deer and elk heads, all sorts of winged creatures, snakes, toads, and a thousand and one other subjects were shown, undergoing various processes, the party being shown the entire *modus operandi* through which the work is obliged to go before the subjects are ready to grace the place for which their owners intend them. FOREST AND STREAM readers will doubtless remember an article anent "the drumming of the woodpecker," which appeared in these columns some months ago over the signature of Mr. Eldon. The identical woodpecker from the antics of which Mr. Eldon deducted his conclusions was shown on this visit. One of Mr. Eldon's masterpieces, a photograph of which was kindly furnished the writer by that gentleman, represents a fallen tree, in the hollow root of which a rabbit has a burrow. The stump of the tree, the clump of bushes alongside, and the surrounding grounds is covered with a fleecy mantle representing snow. It is night and bunny is about to enter his burrow, after a perhaps fruitless foraging trip. He is about to consider himself safely at home, his nose just at the entrance to his burrow, when quick as a flash swoops down a deadly foe in the form of a big horned owl, which loses no time, but just as its right talon touches the top of the dead limb over bunny's back its left is thrust down savagely and the cruel claws bury themselves in the haunch of the shrinking animal. The outstretched wings, the ruffled feathers, the fiery glare in the big eyes, and the wide-open bill, combined with the agonized look in the eyes of poor, helpless bunny, are so terribly realistic that one can almost imagine he hears the despairing sequal of the rabbit as it realizes that it cannot escape. "Only Just Caught," is the suggestive title of this fine piece of work.

All communications for publication must be addressed to the Forest and Stream Publishing Company, and not to any individual. Several reports have been delayed because this rule has not been observed.

* * *

Owing to the extreme scarcity of live pigeons the fifty live bird match scheduled to take place on Col. Heritage's grounds at Marion, N. J., to-morrow, has been postponed. The entry list will remain open, however, and all who care to enter may send their names, along with a $10 forfeit, to C. H. Townsend, trap editor of FOREST AND STREAM, 318 Broadway, N. Y. The receipt of each entry will be acknowledged and when twelve entries have been received a date will be announced for the sweep. This course is adopted in order that when the match does come off there will be enough birds to accommodate all who wish to shoot.

C. H. TOWNSEND.

The Ohio Trap-Shooters' League.

THE annual tournament was held in Columbus, May 10, 11 and 12. The elements the first day, says the *Ohio State Journal*, which was made the official organ, conspired against the trap-shooters, but in spite of the drizzling rain and threatening storm every shooter within the confines of Columbus was headed toward Sherman Park long before 9 o'clock. When the programme began there were an unusually large number present and the first event had even 50 entries. Once the shooting began it was kept up incessantly, and the guns were banging without intermission until about 9 o'clock, when a pouring rain compelled everybody to seek shelter. The crowd was large and good natured, and everybody was there to shoot. No one hesitated, but secured their tickets and entered everything that it was possible for them to get into. The average number of entries, including two extra events, were over 40. One race was hardly over before another was begun, and tickets were always bought for two or three events ahead. There was a great crowd of hustlers pushing things and keeping the shooters agoing. Dr. G. M. Waters, president of the State League, took off his coat early in the day, and until after the last target had been shot he kept on the jump, working as only he can in the interest of the tournament. The scores in the ten events of the first day were as follows:

No. 1, 10 singles, $1. No. 2, 15 singles, $1.50. No. 3, 15 singles, $2. No. 4, 15 singles, $2. No. 5, 20 singles, $2.50. No. 6, same. No. 7, 15 singles, $1.50. No. 8, same. No. 10, 15 singles, $1. No. 11, 15 singles, $2. Scores:

The event of the day was the special event for members of the league only, for the valuable silver cup offered by the *Ohio State Journal*. There were 25 entries in the event, 30 targets, rapid firing, unknown angles:

First, $30. North; second, $12, Osborn and Sanford; third, $9, Edwards, Upson, Spross; fourth, $9, Dick Smith, Pumphrey, Young, McDonald.

The trap-shooters held a protracted meeting at the Neil House last night. The officers elected were: President, Dr. George M. Waters of Columbus; Vice-President, W. S. Latham of Monroeville; Secretary and Treasurer, Ed. Taylor of Cincinnati. The next annual meeting will be held at Columbus under the auspices of the Sherman Gun Club, beginning the second Tuesday in May.

The targets adopted were the bluerock and the United States clay-pigeons. Each company donates half the targets. A vote of thanks was tendered the *State Journal* and all other donors for their trophies. The *State Journal* and the *Sporting Review* were made the official organs. A legislative committee of ten was appointed to look after game laws.

Second Day.

The second day was even more successful than the first. Everything moved along smoothly and there was no cause for complaint. The Sherman boys, almost to a man, neglected their own pleasure and devoted their time to hustling to keep things moving, so that the visitors would not have the slightest cause for criticism. The day throughout was gloomy and generally unfavorable for trap-shooting, but that only had the effect of increasing the amount done, the number of targets thrown being 6,915, an increase over the number thrown Tuesday of 310. The shoot was conducted so well and the matches shot out so quickly that the general opinion was that there was less shooting done than on Tuesday.

The battle for the elaborate silver trophy donated by Mr. J. H. Robbins, editor of the *Sporting Review*, was fought with a vim and earnestness seldom witnessed. Fourteen teams, representing the flower of the shooting fraternity of the banner trap-shooting State of the Union, entered the arena brimful of pluck and determination. It was a veritable contest of the giants, and despite the inclemency of the weather some remarkable scores were made. Dayton carried off the valuable prize after one of the hottest fights known to the shooting world. W. E. Limberg, better known to the shooting world as "Wicks," was accorded the responsible position of referee. T. W. Latham and C. H. Vank officiated as judges. E. B. Appleman, of Columbus, occupied the scorer's box for the occasion.

Third Day.

The tournament which closed yesterday was in every respect in point of weather the most successful ever held in the history of the league. Since the organization of the league in 1887, composed then of ten clubs, the membership has steadily increased, and now carries on its membership rolls twenty-seven clubs in good standing. The efforts of the Sherman Rod and Gun Club of this city to have a successful meet has met a substantial and well merited reward as the result. Ohio is now in the front rank of States in the matter of interest in trap-shooting tournaments, and judging from the conversation of those who have attended and participated in the meet just closed, and from the favorable comment of the sporting journals and fraternity at large, stands well in the lead. It has certainly been a pleasure not only to the members of the local club, but to the citizens in general who have been brought in contact with the members of the league, and it is not often that so large a number of contestants in any sport can meet, compete and part in so friendly a manner as the members of the league. It is a matter of sincere regret that they could not have been favored with more pleasant weather, but for the entire three days of the meet the sun has persistently remained behind the clouds, and if ever any sporting event was held in cold, rainy and disagreeable weather, it is the one just closed.

The tournament next year, while arranged for May, will take place later in the month, and thereby hope to have better weather. The interest of the shooters in the meet was at white heat from the very first, and it never for one moment flagged to the end. While there were but five regular events set down for yesterday's programme, there was a constant demand for "extra" events, and the programme shot yesterday was eleven events, with a large number of entries in each. The interest centered in the contest for the L. C. Smith $500 cup and the championship of Ohio, and the result, as given in detail below, fully verified the predictions made that the score would be both good and close.

It was thought that the challenge contest between the Buckeye Gun Club of Dayton and the Grassy Point Club of Toledo as the result of yesterday's victory by the former club in winning the *Sporting Review* cup would be shot yesterday but it was, by the advice of the secretary of the League, decided by the challenged club to take advantage of the rules governing all contests for this trophy and postpone the contest until the full limit of the thirty days allowed.

The L. C. Smith cup was presented to the League by the manufacturers of the L. C. Smith gun, at the first annual meeting held in Galion in 1888. The first race was shot at Galion during this meet at 30 single bluerock targets. Mr. R. O. Heikes won the cup with a score of 29. The cup was contested for at a full meeting of the League held at Dayton in October, 1888. The contest was changed to 50 single targets, and resulted in a tie between R. O. Heikes and Geo. Hart; score, 48 each. The tie was shot at 50 targets and the result was another tie on 47. In the second tie at 50 birds each broke 49. By mutual agreement the final tie was shot at Dayton, Dec. 25, 1888, at 100 targets each, and won by Mr. Heikes with a score of 93 to Mr. Hart's 90. At the annual meeting at Cleveland in May, 1889, Arthur Paul and Paul North tied on 47. In the tie shoot at 25 targets, Mr. Paul broke 24 and won the cup; Mr. North broke 18. George Osborn won the cup at Toledo in May, 1890, with the score of 47. George Osborn again won the cup at Findlay in May, 1891, with the score of 48.

The conditions governing the shoot to-day were 50 targets, unknown trap, known angle, entrance $5. The score follows:

Osborn .....1111111111111111111011011011011011111111111111—41

The cup was won by Sanford; first money to winner of cup last year, Osborn $44; second, Upson $33; third, North and Spross $11 each; fourth, McDonald and Rushmore $5.50 each.

Following are summarized scores of second and third days:

Second Day.—No. 1, 10 singles, $1; No. 2, 15 singles, $1.50; No. 3, 15 singles, $2; No. 4, same; No. 5, 20 singles, $2.50; No. 6, same; No. 7, 15 singles, $1.50; No. 8, same. *Third Day.*—No. 1, 15 singles, $2; No. 2, 15 singles, $1.50; Nos. 3 to 10, same; No. 11, 6 pairs, $2:

The Sunflower State Championship.

AT Paola, Kan., on Thursday, May 12, W. T. Irwin, of Coffeyville, Kan., familiarly known in trap-shooting circles as "Tramp," and Abe Elwell, of Ossawatomie, Kan., shot a 100-bird race for $250 a side and the championship of the Sunflower State, which resulted in a victory for Irwin by a score of 88 to 86.

Elwell a month ago defeated the man from the "Cherokee country" by a score of 41 to 38 out of 50 birds. Irwin played in hard luck in that race, 10 of the 12 birds scored against him falling dead out of bounds.

The race was witnessed by a couple of hundred "dead game sports" despite the threatening weather. A heavy rain storm prevented the opening of hostilities until 3:30 P. M., and occasional showers fell during the progress of the contest. A strong east wind was blowing across the traps during the race and a large majority of the birds sailed swiftly off "down the wind" in a right-quartering direction, and as the sky was cloudy the scores made were good ones. Elwell was quicker to "get on" his birds than Irwin, but the old "Tramp" made some great "kills" on fast birds that won for him merited applause. He was outlucked by Elwell in the drawing of the birds by probably 20 per cent.

L. P. Perry, of Paolo, was selected as referee, E. W. Mitchell acted as judge for Elwell and E. W. House for Irwin, and James Whitfield was appointed official scorer.

Irwin started off with a 7lb. 8oz. Greener, but after the fourth bird changed to a Parker weighing 7lbs. 10oz. His loads were 3¼drs. of Schultze powder and 1⅛oz. of No. 7 shot. Elwell used a 9lb. L. C. Smith gun, and his loads at first were 3¼drs. of Schultze and 1¼oz. of No. 7½ shot, but later he changed to black powder shells.

Elwell was first at the score and made a clever kill of a fast right-quartering driver, and Irwin grassed an easy left-quartering incomer. Elwell missed his second bird, a straightaway flyer, and Irwin followed suit, an easy incomer falling dead out of bounds. He also lost his third bird, a left-quartering incomer, which also closed its wings just outside the distance flags. He missed his fourth bird, a right-quartering driver, clean. This left the Coffeyville sport two birds in the rear and bets of two to one were freely offered against his winning.

Elwell missed his twelfth bird clean. It was a hot right-quartering twister and he shot behind him with both barrels. Irwin again lost, however, a strong, straightaway bird going out of bounds, although hit hard. Elwell then struck a streak of hard luck and lost his fourteenth and sixteenth chances, the former a fast right-quartering straightaway, being carried out by the wind. This tied the score, but Irwin lost his eighteenth, twenty-third and twenty-fourth birds, and at the close of the first twenty-five rounds was three birds behind.

The Osawatomie shot missed his twenty-seventh, a strong flying left-quartering bird, with both loads, and Irwin lost his thirty-fourth dead out of bounds, the breeze helping him to clear the west flags. The o'd man then settled down and grassed thirteen straight, Elwell missing his fortieth and forty-second, both hard right-quartering tailers. Irwin missed his forty-eighth, a rather slow flying right-quartering incomer, and Elwell shot under a straightaway bird with both barrels, making the score one in his favor at the close of the fiftieth round.

Elwell's fifty-third bird was another twister that fell inside the flags, but walked out before he could be retrieved, and the score was once more a tie. He also lost his sixty-fourth, which was also a hot one in the same direction, and for the first time "Tramp" was in the lead, and held it until the seventy-third round, when he shot behind a speedy right-quartering driver, after making a run of twenty-four straight, which was the best of the match.

The score remained a tie until the eightieth round, when Elwell lost an easy incomer that fell stone dead behind the back boundary. Irwin lost his eighty-fourth, a fast right-quartering driver, which also fell outside the flags, and it was "hoss and hoss" again. Irwin then lost his eighty-sixth, a right-quartering bird, by not leading it sufficiently, and the audience, whose sympathy was with Elwell, gave vent to its feelings with a cheer of exultation. It was short-lived, however, as Elwell, who also lost his eighty-fifth bird, which fell dead just behind the puller, missed his eighty-sixth and eighty-ninth, comparatively easy birds, entirely. The gray-whiskered veteran grassed the rest of his string clean and won the race by two birds.

It was the most exciting race ever shot in Kansas, and was anybody's victory up to the last ten birds. Toward the tail end of the match the birds were not as lively as before. It was a 100-bird race under the American Shooting Association rules, with a modification as to the loads of shot, and was for $250 and the price of the birds, the loser thus being short on the day $300. This was the largest stake ever shot for in Kansas, and was a notable victory for Irwin, who was practically alone and friendless in the enemy's camp.

Elwell has challenged Irwin for another race under the same conditions, which will probably be shot in Kansas City about a month hence. The score, as given for printing in the FOREST AND STREAM'S famous trap-score type, is as follows:

Trap score type—Copyright, 1892, by Forest and Stream Publishing Co.

G.

Chicago and Western Traps.

CHICAGO, Ill., May 14.—Last week I felt like apologizing for getting down to Kansas City Saturday morning, after the shoot was over. A week late is pretty late for a paper which is published 1,000 miles further east than its esteemed contemporary, and which must therefore, counting both ways, add at least three days to that week before it can lay down its story upon the threshold of said esteemed contemporary and thus give the latter a chance to get a story for itself. Under these circumstances a scoop seemed rather hard to get. Yet owing to the generous and considerate conduct of the said e. c., in not making any effort to get the Kansas City shoot reported in the week following the tournament, and also to the energy and hustle of FOREST AND STREAM it seems that a scoop for FOREST AND STREAM was after all not only possible, but actual. FOREST AND STREAM has the Missouri State tournament report one week ahead of all rivals. Say, fellers, this is dead easy. For Chicago, Kansas City, all Missouri points, the great West, the Southwest, the Northwest, and the East in its entirety also, I can't see any use in buying any paper but FOREST AND STREAM.

Not unless one wants his news a week or more older than FOREST AND STREAM gives it.

News is nothing which does not improve with age. E. c's please note this; it is useful.

One thousand miles (1,000) is no handicap when a paper has its hands out of its eyes.

Let nobody ever raise the mistaken cry that "FOREST AND STREAM is an Eastern paper." It is an American paper. It is located about two weeks closer to Kansas City than its good-natured contemporary, which is geographically and journalistically over 2,500 miles nearer, and which comes out a day earlier in the week. FOREST AND STREAM is published further West than any shooting paper in America. It is also published further East.

Newspaper work in a field shared with courteous and obliging contemporaries who insist on giving the news a couple of weeks later is what may be called a perennial snap.

It is dead easy.

Mr. J. E. Pumphrey, of Columbus, O., writes me to-day in regard to the Ohio State tournament just concluded at that city, the scores of which have gone on direct:

"Our tournament was a grand success in every way except weather. The days were dark and cold, making targets difficult to see.

"Like a chump, I tried the experiment of using a new (Greener) gun that I had just purchased. It was quite straight or high at comb, and hurt my cheek so that I flinched and lost control of myself the second day as my cheek became more tender. I should have staid with my old gun until after the meeting. I did well the first day.

"Had over fifty entries in some events. Threw 20,000 targets in three days."

Mr. G. W. Rexroat, of Virginia, Ill., writes the following pleasant little account of his last race with Capt. Bogardus under the 10yds. circle rule mentioned earlier:

"Capt. Bogardus and myself had another race at Lincoln, Ill., April 30, conditions same as in our Virginia shoot of two weeks ago. The weather was fine, but the wind blew a perfect gale, and the birds being all good strong flyers and going down wind, they went with such speed that bird after bird, hard hit, would be carried out of bounds. Nearly all were left-quarterers. It is saying enough in regard to the birds to state that Bogardus and myself each missed 6 birds in succession. Our scores are sorry-looking affairs, but here they are—Bogardus 32, Rexroat 29. Both had a number of dead out of bounds, and I had one killed inside the 10yds. circle around traps. Don't laugh; you ought to have been there and seen them go."

The Northwestern Indiana Shooting Association held a pleasant little target tournament at Crown Point, Ind., Thursday and Friday of this week. Crown Point has always been exceptionally strong in inanimate shooting.

The Iowa State programme, nicely illustrated with portraits of prominent members of the association, is now broadcast. May 24-26 will be busy days in Des Moines.

From far away Canada comes the Keystone Gun Club's programme, Windsor, dates of May 24-26. Usually there are several shooters from this Western region who go across the line in search of a little of Queen Victoria's tournament money, but I do not know of any going to this shoot from Chicago.

Preparations go on for the great tournament of the Illinois State Association. Now, there will be a shoot for you. Nobody knows how big it will be this year, for last year it ran ahead of all reasonable expectations.

E. HOUGH.

Trap in the Sunflower State.

HUTCHINSON, Kansas, May 3.—Trap shooting is becoming very popular in the West, and our State tournament will be the largest ever held west of Kansas City. What is the matter with Fulford in his recent match with J. A. R. Jim Elliott? I guess our Western atmosphere here does not agree with him. I had the pleasure of attending one of the nicest little tournaments that I have been to this year, at Chase, last week, Chase is a nice little town of 500 or 600 population, in Rice county. They have a large gun club of good shots. The shoot was managed by W. R. Fisher, the club secretary, and reflects great credit on both him and the boys especially, for the way the visitors were entertained. SHADY.

(The following are the scores of the Chase tournament, as kindly sent in by our correspondent.)

No. 1, special, 10 single bluerocks, 50 cents entrance, 2 moneys:

McCulley	6	Hicks	8
Eldred	8	Bowman	9
Fisher	10		
Watson	7

Maple Bay Shots.

SYRACUSE, N. Y., May 16.—The local paper reports the match at Maple Bay last Thursday as the "regular handicap medical contest." The only medical flavor is the ability of defeated shooters to "take their medicine" with grace and grins. There is a sharp neck-and-neck race between Messrs. Mowry and Halloway, each has won four times, and on the 20th they will shoot to win and lose. Each man shot at 50 kingbirds, thrown from 10 traps at unknown angles. Halloway won Class A medal, having a handicap of one bird over Mowry. Ginty won Class B medal. The score follows:

Class A.

Halloway	0011111111111111111111111111101111111101111101110111—44

A BOOK ABOUT INDIANS.—The FOREST AND STREAM will mail free on application a descriptive circular of Mr. Grinnell's book, "Pawnee Hero Stories and Folk-tales," giving a table of contents and specimen illustrations from the volume.—*Adv.*

The Williamsport Tournament.

To one who is fond of romantic and diversified scenery, the Pennsylvania Railroad with its numerous routes, offers unusual attractions, but on none of the routes controlled by this great corporation can the tourist find any more truly beautiful views than are seen along the route traversed by the Philadelphia & Erie Division from Harrisburg to Williamsport. As far as Watsontown the route leads along the east bank of the picturesque Susquehanna River, which follows a winding course through the Alleghany Mountains, presenting a fast moving panorama of views which are worth the study of an artist. At Watsontown the road crosses a bridge and from there to Williamsport takes a northwesterly course along the lower shore of the river. At Sunbury are seen the first of the great lumber "booms" which extend to the upper courses of the river, and which in the "driving" season are the means of controlling many millions of rafted logs.

On May 9 the FOREST AND STREAM representative took a moonlight trip over this route, leaving Harrisburg at 12:30 A. M., and considers himself well repaid for the heroic efforts which he made in order to ward off the attacks of the God Morpheus, who was determined to be master of the situation. It was a delightful ride, but I am fain to say that I am not partial to being obliged to change trains at midnight, ride until 3:25 A. M. and then have to look up a sleeping place, no matter how convenient the latter may be to the depot.

The object of the ride was to attend the fourth annual shooting tournament of the Williamsport Rifle and Gun Club, the organization which engineered so successfully the Pennsylvania State shoot in 1891. The shoot was held at Athletic Park, on the outskirts of the city proper, the park being owned in fee simple by the club, which is an incorporated body and a very prosperous one. The grounds are finely laid out and equipped, being provided with a base ball diamond, 200 yard rifle range, trap-shooting ranges and a foot-racing track. All the athletic events of the Williamporters occur here. The grand stand has a seating capacity of 1,000, and on the lower floor is a commodious sitting room, members' lockers and other conveniences. John H. Millspaugh is President and Frank Warfield Vice-President, while Nelson A. Hughes performs the dual duties of Secretary and Treasurer.

The majority of the shooters from out of town held forth at the New City Hotel, owned by Walter Shooter, one of the most popular members of the club. Mr. Shooter exerted himself to make the visitors feel at home and judging from the commendations showered upon him he was successful in his efforts. Among those who registered at this cozy house were: C. E. H. Brelsford and Jas H. Warden of the Harrisburg Shooting Association; Milton F. Lindsley of the American Wood Powder Company of Hoboken, N. J.; W. G. Clark, proprietor of the Wopsonnock shooting grounds, Altoona, Pa.; G G Zeth, who has made such a great succes of the 'Trap and Trigger" department of the Altoona *Gazette* and who shoots an effective pace as well; H. C. Bennett, representing the American Brewing Company of Rochester, N. Y.; Wm. R. Hobart, the shooting man of Von Lengerke & Detmold, New York; W. Fred Quimby of New York; Frank Mason of Brooklyn, N. Y, and the writer. E. D. Miller of Springfield, N. J., representing the Standard Keystone Company and Joseph Thurman of the Rainbow Knitting Mills, Germantown, Pa., stopped at the Penn Hotel.

It was ten A. M. on Tuesday, when the sport began at the traps, and the attendance, while fair was not what was anticipated. Mr. Hughes assured the writer that he had received positive promises to attend from at least fifty shooters and was unable to understand why the number of entries did not at any time exceed eighteen. Among those present, in addition to the ones above mentioned were: John W. Fulford of the Harrisburg Shooting Association; W. T. Spicer the portly and good-natured expert from Danville, Pa.; George Davis and Robert Duncan of Morris Run, Pa.; E. L. Housel of Watsontown, Pa.; J. M. Mercer and J. C. Hagennach of Bloomsburg, Pa.; S. C. Steuber of Milton, Pa.; J. M. Runk, F. P. Abercrombie, H. A. Hughes, J. H. Millspaugh and J. D. Kelly of the local club.

The events were all shot from two sets of five traps each, under the rapid-firing system, Keystone targets being thrown from the expert bluerock traps by aid of Paul North's electric pull. The shooting was lively during the day, over 2,800 targets being thrown. The weather was delightfully warm, and until the middle of the afternoon the wind was not troublesome. After that hour the breeze freshened and the shooting was more difficult. At noon the party partook of an excellent dinner provided by James B. Condon, of Condon & Kanter, the leading caterers of the town. The table showed about everything that could be dished up in the way of cold meats, salads and trimmings, and the meals were thoroughly enjoyed by the hungry shooters. No intoxicating beverages were sold on the premises, but there was an abundant supply of delicious cream and soft drinks. Despite the light attendance the day was a very pleasant one, the local shooters doing all in their power to cater to the pleasure of the visitors. The shooting as a whole was good, John W. Fulford leading the van by scoring 94 2-10 per cent. in the regular events. E. D. Miller was second with an even 90 per cent.; W. R. Hobart third with 87 8-10. C. E. Brelsford broke 84 2-10 per cent.; J. H. Millspaugh 78 5 10; J M. Wordon 76 4-10; W. G. Clark 76 4-10, and N. A. Hughes 73 5 10. A percentage of the entrance fees were awarded to the shooters who in all of the regular events should break nearest to 100, 90, 80 and 70 per cent, respectively, the winners in order being Fulford, Hobart and Millspaugh, there being no winner in the 60 per cent, class. Below are the scores of the shoot in detail:

The Second Day.

Wednesday opened with a raw wind and a threatening look in the sky, but along toward 10 o'clock the clouds cleared away and the weather conditions remained fairly good until the finish. During the morning the writer accompanied M. F. Lindsley and Frank Mason on a long drive over and around the lofty summit of Vallemont Hill, from the apex of which could be seen the clear waters of the Susquehanna stretching away for miles on either side. To the northwest were seen the piers of the great "Williamsport boom," the most extensive in the world, the line of the piers extending in one continuous line for seven miles. Last year 250,000,000 of feet of lumber were rafted into Williamsport, this being the smallest quantity ever recorded. There are a large number of "gang mills" in the town, the output of which exceeds 100,000ft. of lumber each per day.

Standing on the brow of the hill one is obliged to look straight down to get a glimpse of the town, which nestles in a basin at the very foot of the peak. These birdseye views are very pleasing to the eye, and this one in particular was well worth reproduction, but our camera, like the "Dutchman's anchor," was at home. Leaving the hill, the ride extended down past the picturesque cemetery on the slope of the hill, then through broad and well-kept streets, past cosy churches, commodious hotels, well-appointed stores and stately residences to the "saw mill" region, where an inspection was made of the "gang" system of sawing timber. From here we drove across the upper bridge spanning the Susquehanna, taking a look at a gang of men manipulating portions of rafts meanwhile, and entered South Williamsport, thence along the Southern shore road, across another bridge, again across the town and reached the park in time to see some of the concluding events of the forenoon.

Meanwhile the boys had been banging away at the saucers, although the attendance was much lighter than on the previous day, the limit of entries being about a baker's dozen. Nevertheless the day was pleasantly spent. Quite an enjoyable hour was spent around the festive board at noon, the party seeming to feel more like lunching and chatting than shooting. It was along toward 5 o'clock when the fun was closed. The leading average during the day was $84^{2}/_{10}$, made by Wm. R. Hobart; C. E. H. Brelsford was second with $83^{5}/_{10}$. Other averages were J. W. Fulford and E. D. Miller $79^{2}/_{10}$ each, J. M. Worden $73^{5}/_{10}$, and J. H. Millspaugh $72^{8}/_{10}$. Hobart took the 80 per cent. premium, Miller and Fulford divi ding the 70 per cent. premium. There were no winners in the 90 or 60 per cent. classes. In the evening several of the shooters started for home, presumably because the light attendance discouraged them.

During the day Chas. E. H. Brelsford, of the Harrisburg Shooting Association, persuaded the party to give a test to his favorite "jack rabbit" system of dividing purses, which he claims to be the most equitable ever devised. The system in brief is this: The entry fee in an event is made 10 cents per target, targets being extra. Say the event is at ten birds with ten men in, the pot is $10. Each shooter is credited with 10 cents for each target he breaks, but from his $1 entry is deducted 20 cents for each target he fails to break. Hence if a shooter breaks 5 he is entitled to nothing. We will say that in this event A scores 10, B 9, C 7, D 9, E 7, F 6, G 5, H 5, I 9 and K 6. In this case the jack pot would be divided as follows:

	Breaks.	Loses.	Credit.	Debit.	Amount received.
A	10	0	$1.00	$ 00	$1.00
B	9	1	90	20	80
C	7	3	70	60	40
D	9	1	90	20	80
E	7	3	70	60	40
F	6	4	60	80	20
G	5	5	50	1.00	00
H	5	5	50	1.00	00
I	9	1	90	20	80
K	6	4	60	80	20
			$8.80	$5.40	$4 60

It will be seen that the amount credited for breaks is $8.30 but that $5.40 (out of the $10 pot) is deducted for lost targets, leaving $4.60 to be paid to the shooters on "jack rabbit" division. Now another provision is made for the disposal of the balance of the pot ($5 40) accruing from the misses. In the sweep above mention this would be divided, 50, 30 and 20 per cent., and given to the first second and third winners on the regular totals the same as in an ordinary sweep. Thus A would receive 50 per cent., or $2.70 in addition to his $1 received from the jack rabbit division; B, D and I, each of whom breaks nine, get each 45 cents, and C and E, who tie for third place on seven breaks each, get 54 cents each. The total amounts paid to the men would be $3.70 to A, $1.34 each to B, D and I, 94 cents each to C and E and 20 cents each to F and K. On the regular three money division under ordinary rules A would have received $5, B D and I would have received $1 each, C and E $1 each and the others nothing. While the heavy shooters are still given a chance to win a fair share of money under this system it still gives the poorer shots a little show to get back a portion of their entrance money. Below are shown the scores of the second day's events:

The Third Day

Found about as many in attendance as on the previous day, the clouds being heavy and threatening, the wind cold and raw and shooting difficult. The full programme was shot through and a number of "jack rabbit" sweeps were also run off. The party seemed to be well pleased with the working of this system. After the programme had been exhausted the members of the party amused themselves by shooting a 'flush" match, in which each man shot at 10 targets, starting from a mark 20ft. behind the traps, then advancing toward the screen and firing whenever a target was thrown, without knowing from which trap the target was to emerge. There were eight entries, and so skillful was the work (of the trap puller) that a grand total of 77 targets were broken. Of these Spicer broke 7, Jones and Martland 4 each, Steuber, Hughes and Rohrbach 3 each, Millspaugh 2 and Lindsley 1. This wound up the tournament, which, despite the poor attendance, was a very pleasurable affair, and reflected creditably upon the club and its able managers. The members of the club were untiring in their efforts to foster to the comfort and pleasure of the visiting shooters, and made nightly calls at their hotels, where many pleasing courtesies were extended. The club was deserving of better encouragement than it received from the shooters at large, and it is hoped that when next a tournament is held at Williamsport it will be able to draw larger entries than during the three days above noted.

Rochester vs. Syracuse.

THE full score of the match of May 5 at Rochester came too late for publication last week. We give it here. The weather was not at all propitious, a drizzling rain setting in early in the afternoon and lasting to the close of the match. This was the second meeting of the clubs. At the first in Syracuse, April 12, the Onondagas won by 15 birds. Thursday the tables were turned and Rochester won with 20 birds to the good. After the match a dinner was given the Syracuse sportsmen, W. J. Maun acting as toastmaster, and the evening was spent in songs and speeches. The third match of the series will be shot in the near future. Score of May 5:

Rochester Team, Capt. E. D. Hicks.

The Boiling Springs are Winners.

SUNSHINE or stormy weather, 'tis all one to the enthusiastic members of the New Jersey Trap-Shooters' League, who never allow the elements to interfere with their favorite pastime. Saturday was far from pleasant. Nearly all day the rain kept coming down in a drizzling, tantalizing manner; the wind blew in a tricky fashion, and the light was bad. Early in the morning the members of the Boiling Springs Fish and Gun Club gathered at their handsome little club house in Rutherford, N. J., opened up doors and windows, adjusted screens, traps and gun racks, sat down in the cosy parlor and began to calculate how many of the Jersey Club members would be intrepid enough to risk elementary changes and come up to take part in the fourth monthly championship contest. Paul Jeanneret was sure the ten teams would be on hand; Peck, Huck, Klees, Krebs, Hollister and others were willing to be convinced, but concluded to await developments before venturing to wager on the probable number of entries. Meanwhile a few stragglers—a sort of vanguard—made up of odd members of various teams, put in an appearance and began to practice on the fast-flying United States and bluerock targets. Along toward 10 o'clock the clouds had lightened somewhat and the crowd had reached quite a respectable proportion. At this point the hopes of the local shooters began to rise, for they had made elaborate preparations for both a big shoot and a big feed, and did not like to be disappointed in either direction. Nor were they. In parties of pairs, trios and half dozens the shooters began to arrive from different parts of the State, until it was ascertained at last that nine full teams of five men each were on the scene, and that there was a fair prospect for the tenth team having a full quota by the time the team race started.

Meanwhile shooting was going on at a lively rate and everybody was in a joyful mood despite the fact that the clouds had once more become thick and heavy and the rain was again falling and the light was terribly deceptive. The grounds of the Boiling Springs Club face toward the open meadow, and whenever the air is damp a heavy mist is sure to arise, this making a foreground that is far from good. I have seen a good many days' shooting on these grounds, and have often been there in stormy weather, but never have I seen the light so troublesome as on Saturday. At one moment the mist or fog would seem to extend from the grass to the clouds, almost shutting out a view of anything beyond, then it would lift for a few moments and seem to be shifting from side to side, first thick and heavy, then thinning and spreading out for an instant, and then forming another thick mantle, this being very aggravating to the shooters.

The club, as I have said, had made most careful and elaborate preparations for the affair. They had fitted up two sets of five expert traps each, the traps being sprung by means of Paul North's famous electric pull, each set of traps being independent of the other, and each being provided with a 6ft. high screen.

The writer who, with Wm. R. Hobart, did the preliminary work in organizing this League, suggested at the outset that the only proper way to have successful monthly gatherings was to use two sets of five traps each, instead of using one set of ten traps, as was proposed. Mr. Hobart was heartily in accord with this view, but was not able to convince any of the clubs under whose auspices the previous contests have been held that the innovation would pay. The result was that while the team contest was going on the mass of the shooters were obliged to be spectators. As soon as it was known, however, that the Boiling Springs Club was to engineer the May shoot, Mr. Hobart and the writer had an interview with one of the managers of the club, and in a very few moments convinced him of the great advantage to be derived from using two sets of five traps each instead of one set of ten. The result was that the innovation was introduced, and in consequence over 8,000 targets were thrown, and this on a day when the shooting began an hour later and closed an hour earlier than usual. All the time that the teams were using one set of traps the other set was kept going for sweepstakes.

Janitor Miller and his wife and son prepared and served an excellent dinner, comprising a toothsome chowder, delicious Boston baked beans, fragrant coffee, sweet milk and wholesome bread and butter, to which full justice was done. An abundance of good cigars and soft drinks were also obtainable. The members of the club sacrificed their own convenience in the effort to cater to the comfort and pleasure of the visitors and received many expressions of gratitude from the latter.

The team contest was a warm one, there being nine teams in the field. The Brunswick Gun Club was short-handed and did not compete. Al. Heritage, of Jersey City, was referee, while Frank Mason acted as official scorer. The Independent Gun Club, of Plainfield, whose team won the three former contests, put in a scrub team this time and pulled out in the ruck. The Boiling Springs team put on a big spurt and pulled out first best, with the Woodsides, of Newark, a good second and the South Sides, of Newark, third. Major R. Heber Breintnall, the soldier expert of the South Side team, rolled up the only clean score of the day. The conditions were 5 men per team, 25 targets per man, A. S. A. rules to govern, five-trap rapid-firing system. Below are the full scores in detail of

The sweepstake shooting was very spirited, and in one of the sweeps there were 55 entries, while several others had from 20 to 40 entries. The detailed scores of these are found below in the condensed form by which FOREST AND STREAM gives two columns of news in the same amount of space that its contemporaries give in one column. The 10-target events had an entry fee of $1, 15-target events $1.50, and 20-target events $2. There were 3 moneys in each event:

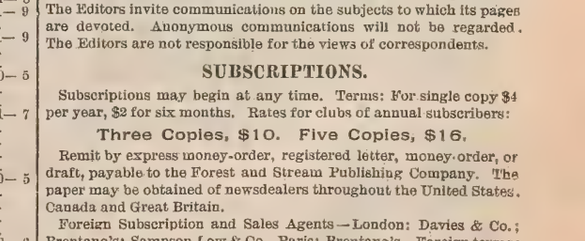
Whyte	1122212—7	Corning	1122210—6

Carr 0, Nellis 0. Tie postponed.

Bridgeport, Conn.

ON May 30 the Bridgeport Gun Club will hold an all-day shoot, and arrangements have been made to throw 10,000 Keystones if the attendance warrants it. A large crowd is expected, as the team race for the State championship is set for that day, and an attractive series of sweepstakes is on the card. Everybody is welcome, nobody is barred. The grounds are well situated and the club proposes to provide a pleasant day's outing and plenty of shooting for all who attend. Refreshments will be provided on the grounds, and loaded shells may be obtained. Connecticut has a good reputation for target shooting meetings, and this will be in no way deficient. Take your gun and go and stack up against the Nutmeg shooters. W. JENNINGS, Sec'y.



Answers to Correspondents.

☞ **No Notice Taken of Anonymous Correspondents.**

F. C., Newport, R. I.—The *Bee Keepers' Magazine*, Barrytown, N. Y., may be what you want.

READER, Williamsport, Pa.—Where can I get catfish fry for stocking a pond? Ans. Channel catfish. E. B. Douglass, Bavarian Fisheries, Edinburg, Indiana; speckled catfish, M. J. Ellis, Norwood, Mass.; and G. L. Haverfield, Cadiz, Ohio. The last charges $7 per hundred.

C. L. S., Dorchester.—What is the fish called togue? What kind of tackle and bait are most commonly employed in his capture. I understand the lakes in eastern Maine contain some fine specimens of this fish, and that good sport is promised the fortunate fisherman. Ans. 1. Togue is one of the many names of the lake trout. Tuladi, salmon trout, lunge and Mackinaw trout are other names applied to the same fish. T gue is current among the Maine lumbermen. 2. Any short, stout bait rod, with a reel holding 50 to 100yds. of linen or silk line, will be effective. Young togue rise freely to trout flies in swift water, and in May and June the adults can often be taken near the surface with flies or spinning tackle. Usually, however, the fish are caught in deep water by trolling or still fish. The best trolling bait is a good-sized minnow or a small sucker. In still-fishing the bait should be kept several feet from the bottom. Strong tackle is needed for the large fish.

CORRESPONDENCE.

THE FOREST AND STREAM is the recognized medium of entertainment, instruction and information between American sportsmen. The Editors invite communications on the subjects to which its pages are devoted. Anonymous communications will not be regarded. The Editors are not responsible for the views of correspondents.

SUBSCRIPTIONS.

Subscriptions may begin at any time. Terms: For single copy $4 per year, $2 for six months. Rates for clubs of annual subscribers:

Three Copies, $10. Five Copies, $16.

Remit by express money-order, registered letter, money-order, or draft, payable to the Forest and Stream Publishing Company. The paper may be obtained of newsdealers throughout the United States, Canada and Great Britain.

Foreign Subscription and Sales Agents—London: Davies & Co.; Brentano's; Sampson Low & Co. Paris: Brentano's. Foreign terms: $5 per year, $2.50 for six months.

ADVERTISEMENTS.

Inside pages, 30 cents per nonpareil line. Special rates for three, six and twelve months. Seven words to the line, twelve lines to one inch. Advertisements should be sent in by Saturday previous to issue in which they are to be inserted. Transient advertisements must invariably be accompanied by the money, or they will not be inserted. Reading notices $1.00 per line. Only advertisements of an approved character inserted.

Address all communications:

CHARLES HALLOCK.

CONTENTS: Distribution of the Salmon. Life History of the Salmon. Technology of Salmon Fishing. Salmon Fishing in the Abstract. Luxury of Salmon Waters. Itinerary of the Salmon Rivers.

A book to read *now*; and to be put in one's pocket for reading again in camp.
Cloth, 126 pages. Price $1.00.
FOREST AND STREAM PUBLISHING CO.,
318 Broadway, New York.

SOME anglers labor under the false impression that large dealers and manufacturers charge more for their goods than the keepers of small shops. A glance at our new Illustrated Catalogue and Price List for 1892, which we will mail on receipt of 6 cents to cover postage, will show how much they are mistaken.

ABBEY & IMBRIE,
Manufacturers of All Grades of Fishing Tackle,
18 Vesey Street, New York.

Notice to Fishermen! Cut Prices for 1892!

I am with you again with lower prices for Fishing Tackle. I find by experience that putting down prices and not decreasing the quality, it increases my business every year.

SOMETHING FOR NOTHING

Beware of those who offer you a dollar for ninety cents; you are sure to get the worst of it in the long run.

Our rule is to trade even. We have no goods to sell at cost, or below; no goods on which we do not make a fair profit; no cut prices, few bargains; no second-hand or shop-worn articles. Can we secure any of your business on the good, old-fashioned, value-received plan. Our goods and ways are dependable. Your money is never beyond recall. Will you look into it? If our prices are low enough, we ought to have some of your trade.

W. D. CHAPMAN & SON,

121 State Street, Rochester, N. Y.

HAVE YOU SEEN THE

"KOSMIC?"

This question we are asking the anglers of America, and have received many answers. Here is one of them:

I send you herewith a Photograph of trout (McCloud species) taken by me in Prosser Creek, at the head of the Serrie Lake Ice Company's pond, last September. They were taken in the night, between 9 and 10 o'clock, with the red spinner dressed on size 8 Sproat hook, and only one fly in the cast. The trout weighed, when taken from the water, 6¼, 6¾, 5 and 2 lbs. The rod used was a 5oz. Kosmic, made by A. G. Spalding & Bros., New York. The 6¾ pound trout was hooked foul, the hook fastening at the base of the caudal fin, and the fish had the full power of all his fins, and gave me quite a tussle, which lasted over thirty minutes, but I finally brought him to the landing net, tail foremost.

GEORGE L. BRADFORD, Boca, Cal.

Call at either of our Stores—New York, Chicago or Philadelphia—and examine

THE KOSMIC ROD

A. G. SPALDING & BROS.

FINE FISHING TACKLE.

Wherein lies the economy in purchasing Hooks to gut of *inferior grade* and English tied Flies *because* they are low in price, when for a slight advance you can buy the 'C. & S." best grade of Hooks to gut and the "C. & S." Flies. These articles are most carefully made and guaranteed. Our Illustrated Catalogue will give full information. Send for it. Enclose 8 cents and we will include one of our fancy pocket books.

QUINCY, Ill., Jan. 19, 1892.

Hon. John S. Cochennour, Olney, Ill.:

DEAR SIR—After two years' use of your "Little Daisy Minnow Trap" I find that it does its work well and satisfactorily. It is a source of great gratification to me to have fresh, lively minnows when I want them, and these your trap furnishes me. I can cheerfully recommend it to anglers as a valuable addition to their outfit.

Yours respectfully,
S. P. BARTLETT,
Sec'y Ill. State Fish Com.

GRAND TRUNK RAILWAY.

When planning your annual tour remember that this company controls over 4100 miles of railway equipped in the most approved modern style, passing through a magnificent country noted for its unsurpassed facilities for sport.

A FEW OF THE PRINCIPAL RESORTS.

ANDROSCOGGIN LAKES (via Bryant's Pond or Bethel).—Excellent trout fishing and game, large and small, of every description.

THE WHITE MOUNTAINS (via Gorham, N. H.)—For trout and varieties of game.

THE SALMON RESORTS of Quebec, New Brunswick and Nova Scotia (reached via Quebec).

LAKE ST. JOHN REGION (via Quebec)—For ouananiche, trout, caribou, bear, moose, beaver, otter, etc.

THE RIVER ST. LAWRENCE (in the neighborhood of the line for 400 miles).—For muscalonge, pike, bass, whitefish, pickerel, perch.

THE THOUSAND ISLANDS (via Gananoque or Kingston)—For pickerel, black bass, muscalonge, pike.

MUSKOKA LAKES.—The best place on the continent for fishing, shooting and camping. All varieties of fish and game.

PARRY SOUND AND GEORGIAN BAY (reached via Penetang, Midland, Collingwood, etc) for black bass, pickerel, deer, partridge, bear, otter, etc.

LAKES ONTARIO, ERIE, HURON AND MICHIGAN (via stations at all principal ports).

LAKE SUPERIOR (via Collingwood, Wiarton, Sarnia in connection with steamship lines).

The charges for hotels, guides and camping at many of the fishing waters named above are extremely low. Full particulars of same are published in a pamphlet descriptive of the "Fishing and Hunting Resorts of the Grand Trunk Railway," which will be forwarded free on application to the company's principal agents, or to the General Passenger Agent at Montreal.

ROD AND GUN AND CAMERA.

As A recognition of the important place of amateur photography in its relation to sports of the field and prairie and mountain and forest and stream, the FOREST AND STREAM offers a series of prizes for meritorious work with the camera. The conditions under which these prizes will be given are in brief as here set forth:

There will be ten prizes, as follows: First $25. Second $20 Third $15. Fourth $10. Six of $5 each.

The competition will be open to amateurs only.

The subjects must relate to FOREST AND STREAM'S field—game and fish (alive or dead), shooting and fishing, the camp, campers and camp life, sportsman travel by land or water.

There is no restriction as to the time when the pictures may have been or may be made—whether in 1892 or in previous years. Pictures will be received up to Dec. 31, of this year.

All work must be original; that is to say, it must not have been submitted in any other competition, nor have been published.

There are no restrictions as to make or style of camera, nor as to size of plate.

A competitor need not be a subscriber of FOREST AND STREAM.

All photographs will be submitteed to a committee, shortly to be announced. In making their awards the judges will be instructed to take into consideration the technical merits of the work as a photograph, its artistic qualities; and other things being equal, the unique and difficult nature of the subject.

Photographs must be marked only with initials or a pseudonym for identification. With each photograph should be given name of sender, title of view, locality, date, and name of camera.

The photographs shall be the property of the FOREST AND STREAM. This applies only to the particular prints sent us.

From time to time we shall reproduce by the half-tone process samples of the work submitted, and should the interest in FOREST AND STREAM'S Amateur Photography Collection prove to be what is anticipated, we may ask for an expression of opinion by a vote of all our readers after the manner of the successful and famous "Camp-Fire Flickering Vote." Such popular vote will be quite distinct from the award by the committee.

FISHERIES AT THE WORLD'S FAIR.

AT a meeting of the State Board of World's Fair Commissioners in San Francisco on April 26 Commissioners Phelan, Daggett and McMurray were present. A memorandum, which may be of vital importance to the successful display of California's fishery resources, was placed upon the minutes of the executive session; it is as follows:

The object of the fish exhibit is to show the edible or food fish of the California coast and inland waters. Cheap food makes residence in a country desirable. President Jordan, of the Leland Stanford University, has expert knowledge and agrees to make the collection with the assistance of Professor Gilbert and his students, without any salaries being paid any one, and simply the expenses of preservation jars, transportation and manual labor being defrayed by the Commission.

The preparation of the California fish exhibit up to the time of the above meeting had been in charge of Alfred V. La Motte, and doubtless one of the causes of the change of direction was the publication of his wild statistics in the *California World's Fair Magazine* for March, 1892, wherein we are informed that 909,673 tons of fish were sold in San Francisco markets, or more than eighty times the quantity credited to the entire State in the official returns for 1888.

That the fishes of California will be exhaustively collected by President Jordan goes without saying, and we believe that with his experience in the same region during the canvas for the census of 1880 the statistical division of the work, which is most directly related to the public welfare, will receive the attention which its importance demands.

At the meeting of the New York Fish Commissioners last Tuesday a communication was read from Senator Donald McNaughton, of the Board of General Managers of the Exhibit of New York at the World's Fair, pointing out the desirability of a special fishery exhibit at Chicago, which should show not only the wealth of New York in food fishes, but the processes af fishculture and its progress in this State. It will be remembered that a like request was received from the Fair Commissioners some months ago. Commissioners Huntington and Bowman have been appointed a committee to consider the plan, and as Governor Flower is known to be well disposed toward the scheme, there is every reason for confidence that the display may be made. The showing will be one to illustrate the progress of fishculture not only in New York but in large measure that of the world.

NEW JERSEY FROZEN GAME.

CONSTANT violations of the game laws are reported to occur in New Jersey in connection with the great cold storage houses which have been established there within the past few years. Similar abuses were at one time common in this city, but the business here was broken up.

At the time when Mr. Charles E. Whitehead was counsel for the New York Society for the Protection of Fish and Game, laws were passed in this State which authorized game protectors, on obtaining search warrants, to break open these storage warehouses and look for frozen game at seasons when its possession was illegal. Under the earnest leadership of Mr. Whitehead a number of storage warehouse proprietors were convicted of having game in possession at unlawful times, and were fined sums so considerable that the open sale of illegal frozen game was given up. Soon after this, a number of these warehouse proprietors gave up business in New York city, but re-established their cold storage houses across the river in Jersey City, where they are still in operation.

One of the most profitable forms which this business takes is the supplying of ocean steamships with game. It is stated the warehouse people box up the frozen game and deliver it to the ships on the North German Lloyd line and also of the Hamburg-American Packet Company, supplying them with quantities large enough not only for their outward but also for their return voyage. They are reported also to make a practice of supplying such game to ocean steamships which sail from piers in this city, and as they deliver their wares in closed boxes it is not easy to put an end to the traffic. It can readily be understood that the amount of game disposed of in this way is enormous in the course of a year.

The laws of New Jersey with regard to fish and game are in some respects peculiar, but their apparent intent is to forbid the possession of game after ten days beyond the expiration of the open season, and we have no doubt that if an earnest effort were made by the authorities of that State and those interested in game protection a stop could be put to this traffic. Remonstrances with the steamship companies can accomplish little. These corporations say that they must have game to supply to their passengers, and very truly allege that this is the cheapest way that they can get it.

It is believed that the game markets of this city, after having been glutted throughout the open season, send over to New Jersey whatever game they have left on hand at the close of the open season, and either sell it to the warehouses or have it sold for them.

Of course it is an open secret that the game laws in this city are violated throughout the winter. Prairie chickens, ruffed grouse and other birds are sold under the name of ptarmigan, though frequently there is not a ptarmigan in market during the whole winter, while "antelope" regularly appears on the restaurant bills of fare to represent what is really venison.

While we may congratulate ourselves on the fact that the interest felt in game protection is greater now than it was a few years ago, it is still discouraging to notice the frequency with which the game laws are disregarded.

SPITTING SNAKES.

IN Volume XIV. of the Proceedings of the United States National Museum, pages 589 694, Professor E. D. Cope publishes a paper entitled "A Critical Review of the Characters and Variations of the Snakes of North America." In this paper it is attempted to define with precision the species of North American snakes, together with their varieties, and in preparing it advantage has been taken of the large collection of snakes in the United States National Museum, as well as those in other collections. The paper is entirely technical, yet some statements are made with regard to the habits of certain species, and to one of these statements we wish to call attention.

In his remarks on the genus *Crotalus*, Professor Cope speaks of the biting habits of the rattlesnake, using the following language: "Species of this genus are of rather sluggish movements and are not quick to bite unless trodden on. They throw their body into a coil and sound the rattle, giving a sigmoid flexure of the anterior part of the body on which the head is poised. They open their mouths ready for action. At this time drops of the poisonous saliva fall from the fangs and by a violent expulsion of air from the lungs are thrown on their enemy." This statement will appear to many readers as it does to us, very extraordinary, and is quite opposed to the idea which commonly prevails with regard to the "spitting" of snakes by which is meant the ejection of the venom where the teeth are not brought in play. It is commonly believed that the contraction of the muscles about the poison sack causes the fluid to be thrown out through the canal in the poison fang, and it is quite certain that the "spitting," where it takes place, usually accompanies an effort to bite. Further information on this subject is greatly to be desired, and we should be glad to know on what observations Professor Cope's statements are based.

It is well known that with certain species of snakes this act of "spitting" is not very uncommon. The najas of South Africa are especially famed for this act and it is a common belief that these snakes endeavor to throw their venom into the eye of the person toward whom it is directed. These common beliefs, however, do not go for much in science unless they are confirmed by the observations of trained students. The old story of the hoop snake once received general credence. It used to be thought that the porcupine darted his quills at his enemies, and so with many old beliefs.

Rattlesnakes are not now as common as they used to be twenty years ago, yet among our readers there must be many who are familiar with snakes of this class, and it is to be hoped that some of them may be in a position to contribute some evidence on the point in question.

SNAP SHOTS.

IT APPEARS that there are some people in California who think that it would be a wise and sensible thing to introduce a new species of vermin into this country. They are plagued with gophers, and they propose to bring in the mongoose to war on the gopher. Sufficient is known of this species to warrant the conviction that its introduction into America would be criminally foolish. The mongoose preys on rats and mice and snakes and lizards, and insects, but it devours also such birds as it can capture, and feeds greedily on the eggs of quail and other ground-nesting birds. Such habits are in themselves sufficient to prove the case against the creature; but added to them is the uncertainty as to what will be the increase of any wild species in new surroundings. Until the story of the rabbits and foxes in Australia, mongoose in Jamaica, and English sparrows in America shall have been forgotten, common sense will forbid the hazardous experiment of adding the mongoose to the vermin supply of the Pacific Coast.

We shall have a full report of the meeting of the American Fisheries Society held in this city May 25-26. The attendance and manifested interest are notable and speak with much promise for the Society and for the important field of its activity. With this year the Society has attained its majority, and gives every evidence of vigor and strength.

The discovery which Mr. William Johnson reports from Woodland, Kansas, of the fossil remains of a prehistoric deer 15ft. high, points the moral that the ambitious Kansas deer slayer of to-day is living a few æons too late; and is thus missing a splendid opportunity for "tall talk."

The Sportsman Tourist.

BY THE COLORADO.

"WEARY days on the hot, dusty desert and more weary nights when the winds from northern canyons filled our beds with sand and chilled us to the marrow"—such the monotonous and melancholy record of the scribe. But now that was a thing of the past. Thousands of feet below us was the river, glinting, wherever the slanting sunlight streamed between the canyon walls, like a golden Pactolus. And why is it not a Pactolus?

On its farther side, where the unscaled Navajo Peak raises in air its snowy crest as many thousand feet above the mesa as the river lies beneath, the jealous redmen guard the mines that they possessed long before the Spanish Conquistador set foot upon this enchanted land. Among the western canyons at our back, somewhere among the cliff dwellings and the ever inaccessible caches of a long-departed people, the Moqui (in their distant home they still preserve the story) buried almost exhaustless treasure, and on those sand-bars that, like golden tongues, cleave the rushing torrent, the bleaching bones of many a fortune-hunter tell strange tales of riches found only to be eternally lost. Even the breeze sings but the one refrain: "Gold, gold, gold."

Wonderful river! I have cast the fly in those far off aspen-shaded valleys of the north, where the Green and the Grand have their birth. I have sweltered and sickened in the pestilential atmosphere of that low, dreary, fever-breeding land where the mighty flood casts its tawny freight into the Californian gulf. From a score of vantage points I have watched its varying moods and fancies, for its caprices are endless, and now, as I look upon it in the flood tide of its glory, I can only exclaim: "Wonderful, wonderful river!"

We were not prospectors. Do not infer from this that if we had found the golden image, or stuck a pick into a lode of native silver, or even had seen auriferous specks in some dry canyon bed we would deliberately have closed our eyes to the wealth within our grasp and then gone back to civilization to report our discovery. Oh, no! But archæology, geology, botany and zoology had greater attractions for us than all the prospective treasure in the valley, and we much preferred manipulating the camera to handling the batea. However, ruined Moqui houses and the vegetable pharmacopœia of this *ultima thule* will not interest the readers of FOREST AND STREAM, so a short dissertation upon the game of this region is the only memento of the expedition that properly belongs in these columns.

We carried a rifle and a 12-gauge gun. The rifle was not discharged upon the trip, and the gun was used only to secure such specimens of the avifauna as we wished to preserve. Likewise a gallon of alcohol became merely a temporary dwelling place for lizards and similar creatures, the collection of which made our guides consider us a party of "cranks." Turning from the river in a westerly direction, we climbed slowly up Navajo Valley to its head, and then a two hours struggle to the level of the mesa, brought us to the ruins of an ancient city, where most of our work was to be done. Our camp was, so we judge, just across the Arizona line. Eastward, in sinuous folds, was the Glen Canyon of the Colorado; far to the southeast the mountains of New Mexico cut the sky; almost within touch on the south the Buckskin range raised its head, and westward peak, on peak stretched away to the headwaters of the Rio Virgin. Only on the north the great, gray, grassless, treeless, rolling Escalante desert lay far below our level and extended almost to the feet of the sentinel Henry mountains.

Our camp was pitched on the edge of a little crystal lake, where mallards, redheads, blue winged teal, helldivers and mudhens swam throughout the livelong day. They seemed entirely unaccustomed to the presence of man and exhibited little fear. This was true of all the birds we saw. It was the nesting season. Finches and warblers would almost let us stroke them as they sat upon their eggs, and the more gaily colored males would sing as cheerily to us as they had been wont to carol to the rocks and trees. I believe that we were too high in air and in too cold a climate for the *Crotalus*, the pest of the rocky desert; so the feathered songsters had but enemies of their own kind with which to contend, the sharp-shin and two varieties of the red-tailed hawk. In the upper blue the noble bird of freedom described majestic circles, and in a spirit of wanton mimicry the turkey buzzard made lesser concentric spirals at a respectful distance from his liege lord. We saw neither grouse nor sage fowl, but we were in the domain of the Arizona quail. The only bird on the mesa, that is a lover of civilization, was the ubiquitous *Ægialitis*. What business it had about that upland lake will always be a mystery.

The narrow lagoon extended for perhaps a quarter of a mile from our camp. After drinking the sulphur, magnesia and saline waters of the desert a drink of this *aqua pura* was more than a luxury. I believe that the larger quadrupeds have a special liking for this pool. To its farther edge the deer came every morning to drink and in the mud the mountain sheep left deep tracks. We did not see any of the big-horns at the water, but we observed several small bands among the rocky cliffs to the south. Owing to its inaccessible position the mesa is a natural game preserve and the mountain lion is the only destroyer that the *Ovidæ* and *Cervidæ* dread. I must modify that last statement, for occasionally the Navajoes hunt here, though they properly belong east of the river. The Utes are too superstitious to hunt on this bench. It will be a matter for regret if the stockmen that now winter on the desert succeed in making a trail up to the grassy plateau and use it for a spring and autumn range. The total extinction of the game will then be but a matter of a short time.

I noticed in the ancient writing on the rocks, the work either of the Moqui or of the earlier Navajoes, many pictures both of the mountain goat and of the bison; from which I infer that each of these animals at one time had a habitat here.

Piscatorially this region is not much to brag of. Most of the streams have such a fall into the Colorado that it is impossible for fish to ascend them. The Escalante however has nothing but rapids in its course. It is a muddy stream and no trout can be caught in it; but its tributaries, Birch, Pine and Boulder creeks are clear, cold brooks, and in them small mountain *Salvelinus* is to be found. I suppose that when these fish descend to the main river (if they do), they close their eyes, compress their gills and dart through the intervening sixty miles of mud with the rapidity of a cannon ball. I am told that there are plenty of large trout or salmon in the Colorado at this point, but it is a Sabbath day's journey, straight up and down, to the water, and I have no reel that will carry sufficient line for such a cast. Hence I cannot speak definitely upon the subject. After the ruins are explored I will send FOREST AND STREAM as complete a list as I can compile of the game fauna of this wonderful region. SHOSHONE.

GLEN CANYON, Arizona, May 2.

"PODGERS'S" COMMENTARIES.

THE last issue of FOREST AND STREAM contained, as usual, many good things of interest to its readers. The article by Judge Greene on his fishing trip to the Elokomon made one feel like taking a Northern Pacific train at once and never draw rein until striking that stream. We feel like suing the Judge for damages for thus exciting our fishing instincts at long range. Distance is nothing, however, to a dyed-in-the-wool fisherman. Do not the Englishmen travel to Norway for salmon and feel amply compensated with a catch of three or four, and not always even that small number? Speaking of salmon, I would like to have the Judge meet me next October on the banks of the Navara River in California, and let me show him salmon fishing to make him weep with joy. I will guarantee that his arms shall ache at night with the strain on his muscles from the lively work a dozen from 12 to 20-pounders will give.

I agree with the Judge as to salmon taking the fly in the waters of the Pacific coast. I was told they would not myself, before I had fished in the Navara, and moreover, that no salmon could be taken with a hook with *any* kind of bait, and I claim to be the individual who first proved the falsity of the statement and the first to take a salmon on the hook on the coast. I took five the first day I fished in the river above mentioned.

A friend who had a sawmill at the mouth of the river pooh-poohed the idea of my being able to catch a salmon out of that stream with a fly or in any other way, except by hauling a seine, and volunteered to eat raw the first fish I caught; and standing on the bank jeered me when I made a couple of casts unsuccessfully; but when I struck a 12-pounder at the third cast, and landed him under his nose, he swore he never would have believed his own father if he had been told that yarn if he had not seen it with his own eyes. When I called on him to commence business on the raw fish, as per promise, he shirked, but offered as a compromise a bottle of Cliquot when we had Mr. Salmon on the dinner table, boiled. Many is the one I have caught there since with fly, and yet people in San Francisco so near by still persist in saying Pacific Coast salmon will not take the fly. They might truly say, perhaps, won't take *their* flies. I don't wish to insinuate that there are fishermen and fishermen who think they can fish—but never mind, we will leave it to the salmon to say.

By the way, speaking of salmon reminds one of dogs. Don't see the connection? I don't say there is any, but I see that Judge Greene disclaims any knowledge of Mike's pedigree, and is constrained to acknowledge that Mike came to him unheralded and without credentials, so I am no wiser as to whether he is of my old stock; but, as the Judge suspects from his name that he must be of Irish blood, it is to be presumed that Mike is not a Gordon after all, but a red Irish. If I mistake not, there are no Gordons from Ireland, unless taken there from England, the Gordon being originally, solely and entirely English. But as we can't prove that Mike belongs to the Gordon 400, we will give him the benefit of the doubt and say that he must have descended from one of the numerous Irish kings. I hope some day to make his acquaintance, and shall be proud of the opportunity.

I agree with what Mr. Law Wilmot says about Indians as marksmen. "The noble red" has been invested with a great many virtues in books, going back to the Cooper novels, but there are none of that sort left now, and the last of the Mohicans must have been really the last one that could shoot. No doubt there are, or were, plenty of them that could put a bullet through a man from ambush at short range, but when it comes to a moving object or animal, they are like the oyster of the church fair soup—"not in it." I have seen them on the frontier in days gone by shooting against our soldiers at target (and on several occasions at the soldiers themselves), and when I say Uncle Sam's orphans could beat them, you can imagine what manner of shots they were. The "noble red" is a fraud anyway. He may have his "pints" (of whisky?), but they are not of the bright and shining order, and his natural antipathy to water is "agin" him, and the tearful appeal to use Pear's soap moves not his soul. He shoots badly and he smells badly, and except possibly in war times as a scout, or perhaps under the present experiment of making a horse soldier of him, he may pan out a useful article; but you can't get any bet out of me on it.

They are going for the Yellowstone National Park again, I see, and all the protests of the organs of the sportsmen and the public at large availeth not. Senator Vest deserves the thanks of the sportsmen for his earnest efforts to preserve the Park from the vandals; but, as he says, the power of the lobby prevails against all attempts at honest legislation, and they can say, in the words of the late lamented Tweed, "What are you going to do about it?"

The question of fishing on Sundays or what the Penal Code intended on that question seems to be a puzzling one. The law evidently was aimed at noisy, boisterous and peace-disturbing sports. A horse race and games may be considered noisy and objectionable of a Sunday, but what noise or disturbance can be charged against a fisherman? He may give a shout when he has a bite, after sitting in the utmost quietude for hours awaiting it, in the old accepted belief that you must not talk when fishing, for the fish are supposed to have their ears open to hear a man boasting what a big one he is going to catch, and putting their tails to their noses to say, "will you?" and swim away.

A fisherman is proverbially the quietest of men, and no one ever hears of his being boisterous or a peace disturber, and how he can be excluded from his Sunday amusement on any plea that it comes under the list of noisy amusements is one of the wonders of legislative enactments and wisdom. But pending the solution of the muddle as to whether the law does or does not apply to Sunday fishing, I see the rods and their owners scattering off into the city suburbs and Long Island Sunday mornings about as usual, probably going down to the sea shore to get a boat and go out on the water where they cannot be disturbed and think the subject over. Whether the law was or was not intended in the Pickwickian sense evidently is a question which we will leave to wiser heads while we procure a little bait over night and slip off Sunday morning down to Canarsie or Fire Island and leave the legal lights to fight it out on the Kilkenny cat principle. PODGERS.

THE RANCHITO HUNT.

Editor Forest and Stream:

Delaware county, Pa., is one of the loveliest sections of hill and dale, fine farms, and forests of chestnut and maple in the State, and its proximity to Philadelphia has given many gentlemen the privilege of fox hunting to perfection. As a consequence, there are four excellent fox-hunting clubs within a circle of ten miles, of which Media is the center, and the packs of hounds which belong to them are called hunts, with fanciful or local names to designate them. These are the Radnor Hunt, kept at the village of Radnor; the Lima Hunt, at Lima village; the Rose Tree Hunt, at Rose Tree Tavern; and the Ranchito Hunt, at Media.

The Rose Tree and Radnor riders include some of the best citizens of Philadelphia, many of whom reside during the summer in elegant villas in the vicinity of the kennels, and the Lima and Ranchito membership is made up of a few city men and the villagers and farmers who live in the country districts. The farmers are as ardent fox hunters as the city men, and their participation in the sport lets down the bars and opens their fine fields to the reckless and wild horsemen. When the horn sounds and the many cadenced voices of the hounds send sweet music up the ravine or through the chestnut groves, and horsemen in many-colored coats are seen upon the road or riding in a troop across the hills, it is more than human blood can stand to labor for profit, and the threshing is deserted, the forge fire is left without fuel, the store is left to the boy, and everybody saddles his best hunter and joins the hunt for the day.

The Radnor is rather exclusive and particular in its membership and methods, but the other three are open to honest men of all positions in life who have good horses and know how to ride them. As a consequence, a fox hunt by these fellows is a wild, reckless race of daredevils, who are only intent on being in at the death, and who would outhunt and outride the most famous hunters of Old England. It has been the courteous custom of the hunters to invite city friends, who ride ambling cobs upon the smooth roads of Fairmount Park, to participate in their outings, and many a thoughtless, incautious man has accepted with pleasure and gone home in flannels and bandages. The writer was ambitious to show his horsemanship with the Rose Tree Hunt on New Year's, when he accepted a pressing invitation to get the brush, with the result of being twice unsaddled, once thrown upon his back in the snow, and spending several days in strict seclusion with legs and back resting upon pillows to pay for thirty miles' riding. But by strategy and cross riding he was among the first at the death, and should have had the brush as the greenhorn of the day.

So far in the contest about Delaware county, American hounds have beaten the imported English hounds out of sight, which leaves hunters to believe that hunting in our irregular country is more difficult than in England.

The Ranchito Hunt has some of the cleanest, finest bred, stoutest and keenest hounds in the United States. Mr. W. E. Rowland and Mr. Samuel Pinkerton, of Media, have given much time and care to their breeding and development, and the Ranchito members all superbly mounted, have all they can possibly do to ride to them and get in at the death. Foxes are farmer's enemies, and as they are much hunted in Delaware county, there has been a natural selection and survival of the fittest and fleetest of the wily family, so that the foxes to which the hounds in that section give tongue are as tricky and able as the historical one, *Reineke der Fuchs* in German literature.

The Ranchito meet arranged a hunt, held Dec. 19, 1891, which is said to have been one of the most enjoyable, successful and severe of any for years. By successful, it is not intended to imply that a number of foxes were killed and brushes taken, that is of minor importance. It is the action of the hounds, the horses and the men, the character of the weather, the beauty and extent of the country traversed, that makes a hunt successful.

Sam Pinkerton, the master of the hounds, was instructed to meet the hunters at 7:30 A. M., at Castle Rock, a beautiful declivity, filled with enormous boulders, stupendous rocks cliffs, and piles and natural walls, where the foxes loved to dwell. The horses had been early fed and watered, and the riders mounted at 6:30 A. M., and hied away to the meet where Sam Pinkerton held nineteen as fine hounds as ever scented a fox, together by his cheerful cry, and Messrs. Hawkins, Crosby, Eddy, Kelly, Wm. Pinkerton, W. E. Rowland and others soon arrived. The horses were as eager for the ride as their owners, and danced, cavorted and stepped around briskly. A short parley was held, the hounds unleashed, and away sped the well-groomed hunters around historic Castle Rock, through the dense thickets of Shimer and Howard, then down to the brink and through the cold waters of Crum Creek, stirrup deep, up to the bank with steaming flanks, erect heads and flashing eyes, on to Brook's Woods, where the hounds were cast and old reliable Skip gave out a note that thrilled through the riders' anatomies like an electric shock and opened a day of glorious sport. The pack of thoroughbred hounds hastened after their leader and all gave tongue in different tunes of music most thrilling and delicious to the ear.

It would have gladdened the heart of a Britisher and appalled a riding master to have seen Sam Pinkerton upon his noble Mercedes, lead the hunt across fields, over ditches, above stone walls and stiff rail fences, followed by John Hawkins on his thoroughbred racer Billy Bond, Wm. Pinkton upon the faultless Rusher; Rowland, astride of his exquisite Outlaw; Eddy, on Chief; Crosby, with Milkmaid, and Kelly and all the others, racing to the music that rose and fell as the beautiful hounds sped through a valley, climbed a hill or dashed down a chestnut slope. What a day for a fox hunt! The air was cool and crisp; it seemed as if the individual molecules of the atmosphere each caught a scintilla of fire from the sun and flashed and sparkled like a shower of cut diamonds; the broad bold sunlight warmed up the valleys, penetrated the copses, and baffled by the denser woods, cast tender shades of gray and brown upon the withering and fallen leaves that carpeted the dim aisles of Pan; silvery cumuli clouds chased each other across the empyrean blue of the heavens like spirit hunters; the ground was firm and crunched beneath the nimble feet of the flying steeds with a pleasant sound; the wind had retired to its caves, but the rushing of the horses fanned the warm riders with grateful zephyrs, and all nature seemed to welcome these hardy sportsmen to her domain.

After two hours' hard riding close upon the trail, and often in the midst of the hounds over the Darby Creek hills, the fox was seen to emerge from the woods, with the hounds not 20yds. behind him; then Crosby, Eddy, Wm. Pinkerton

and Rowland, to make a shorter course, rushed their horses over a ditch, cleared a high fence by splendid jumping and landed knee deep in a quagmire, with Crosby thrown finely but unhurt, and the others with demoralized seats and figures. The fox took advantage of this divertisement, and took to earth with the leading hound snapping after his brush and Wm. Pinkerton almost on top of him. The hunters gathered around the opening, the entire pack panted, sniffed and rested upon the smoother knolls, the riders wiped their moist brows, relaxed their muscles and discussed the points of the hunt, the hunters and the hounds, and indulged in refreshments and self-gratulation. They were unwilling to lose the day and the sport, and took a cross country ride for Sill's Woods in Easttown, where Wm. Pinkertown relieved his brother in charge of the hounds, and casting off into the forest a fine dog fox was soon started by the pack in full view of the party, and the tune and cry, the merry music, the steady patter of the hoofs and the crash of broken bushes and obstructing limbs began again, and the hunt was on gloriously.

The hounds Myrtle, Stranger, Brave and Queen led the pack in a furious race not 50yds. in the rear of the quarry, and the hunters were fast after them, when rain fell for a few minutes, then ceased, leaving the ground in fine condition for scent to carry the trail. During the first hour the fox, who was evidently as wise as they make them, made short circles over the hills of Willistown, bringing himself and the bunched and closely pursuing hounds several times into full view of the riders. He doubled upon his tracks, made sharp turns, tried to change off with a fresh and more fortunate fellow, and essayed all the tricks of a well-bred reynard to escape his indefatigable enemies; but it was no use, they stuck to the trail and steadily gained upon him. Then he decided to try strange ground, and left his familiar haunts in Willistown hills for Kithcart's Rocks, then to Paoli Monument grounds, through Calvert's copses, toward Bryn Mawr, down Darby Creek and across it into Radnor through the well-tilled beautiful farms belonging to members of the Radnor Hunt, on and across Darby Creek again, by jumping upon a log 5ft. from the ground, where the hounds gathered confused and baffled, and were at fault for the first time. The riders gathered to help them, and circling around and across, soon found the trail and followed the hounds at a rattling pace through the Newtown Barrens and into Hobb's Hollow, where the fox turned and ran toward Crum Creek, crossed the West Chester Road, between Castle Rock and Kirk's, and through Brook's Woods back to the starting point at Sill's Woods. The fox was running very fast, the hounds had settled well upon his trail, and as they came into full view of the riders, Kelly upon his fiery bay was riding ahead expecting every jump to see the fox caught and killed, when he ran at a thorn hedge. The excited and flying animal, somewhat dazed by the sudden obstacle, instead of jumping ran through the hedge and tore his rider off, but fortunately he escaped with torn clothes and cuticle. Sam Pinkerton dashed past, and in the excitement went over a bridge with its every alternate board removed, upon a dead run. Hawkins cleared a four rail fence magnificently, but his horse landed in a ditch and threw his rider into the water, from which he sputtered and floundered upon dry land with no injury beyond the ducking. The other riders had a clear field and came up in good shape and had a hearty laugh at the mishaps of their companions.

But where was the fox all this time? It seemed impossible for him to escape, but the cunning fellow had plunged into a dense thicket with the hounds close behind. It was getting dark, the fox was tired and it was expected he would be soon brought to earth, but not so was it ordered. His mate heard the hounds, posted herself upon a hill overlooking the scene, watched her chance, ran in before the hounds when they were near, led the pack from the old trail upon her fresher one, and putting fresh legs and wind against the tired legs and hanging tongues of the dogs, started up a fresh hunt for which the hunters had neither time nor stomachs. It was now too dark to ride without danger, the hounds were called off and only two found missing; the horses were very tired and so were their riders, after being in the saddle about twelve hours and riding more than forty miles. It was ten miles to town, therefore it was decided to carry their appetites to the bountiful repasts awaiting the members at home. Two and three abreast the hunters rode easily home, exchanging stories of wild hunts, hairbreadth escapes, and captures of brushes by the dozen, and all agreed on separating that this, the Ranchito hunt, was the best in the country, and that day's hunting simply perfect. DR. W. H. WINSLOW.

PITTSBURGH, Pa.

Mr. Yochem and several ladies were in the woods adjacent to the city, gathering wild flowers, when of the ladies became frightened at a small snake. Mr. Yochem procured a club and struck the reptile, and was surprised to hear the blow accompanied by a metallic sound, and the snake appeared to pay no attention to the club with which he was belabored. Finally a well-directed blow crushed its head. It was then discovered that two-thirds of the snake's length was incased in a section of gas-pipe one inch in diameter. The snake was 2ft. 10in. in length and had evidently crawled into the pipe when it was quite small and failed to extricate itself.—*Pittsburgh Dispatch.*

Map of the United States.

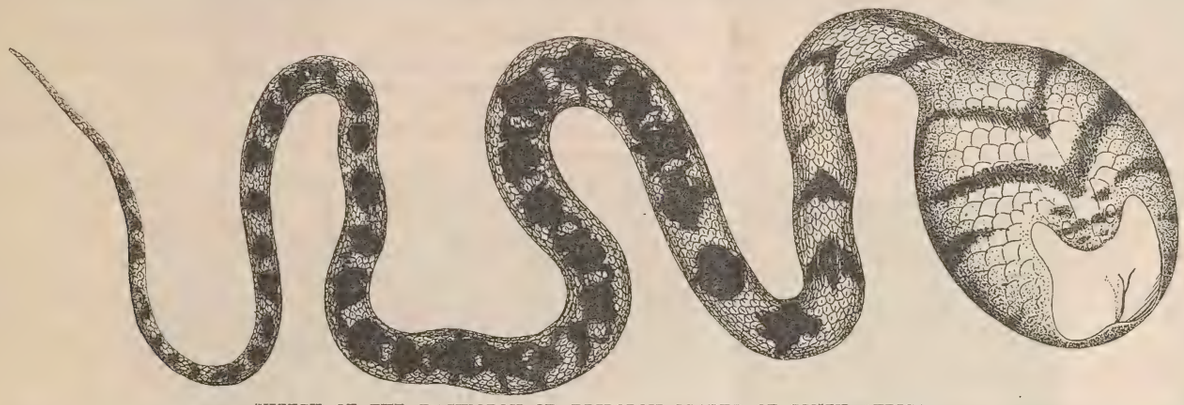
A large, handsome map of the United States, mounted and suitable for office or home use, is issued by the Burlington Route. Copies will be mailed to any address on receipt of twelve cents in postage by P. S. EUSTIS, General Pass. Agent, C., B. & Q. R. R., Chicago, Ill.—*Adv.*

Natural History.

SOUTH AFRICAN REPTILES AT HOME.

III.—SOME OF THE SNAKES.

REGARDING the *Ophidia*, also, one is surprised to find some of our pet theories entirely overthrown. It would be well could all those who undertake to write natural history first live all over the world, so to speak, in order that they might study each creature of their special hobby on its native soil. Then they might know what is true and what is false in the many bygone writers who are so freely quoted. But, alas! most of our scientific biologists who know best about comparative anatomy, teeth, claws, appendages, external and internal development—all of which they can learn from dead specimens, have least time and opportunity for out-of-doors studies, and so errors are copied from book to book; contributors to encyclopedias and natural histories repeat them, and text books adopt them again and again. How few, comparatively, of the innumerable authors of "natural history" have been able to combine their own observations of nature with their scientific knowledge.



For a number of years Dr. Andrew Smith's "Zoology of South Africa" stood alone, and as yet there is no work to replace it though it dates as far back as 1840. Only by very slow degrees is zoölogical science advancing in the colony, and this mainly through the South Africa Philosophical Society, with its distinguished Secretary, Roland Trimen, Esq., F. R. S., F. L. S., etc. etc., and two or three Natural History Societies, each of which can boast three or four enthusiastic students and observers of nature among their members. It is to some of these that I am indebted for the facts which after this preamble I will proceed to describe.

I think I have already in these columns referred to the *Deirodon* or neck-toothed tree snake of South Africa. If not, it is fully described in my work on snakes and under different headings. Its peculiarity lies in the fact of its having no teeth, or only a few inconspicuous teeth, but some remarkable projections or processes instead, on the first few joints of the spine. These penetrate into the throat and are tipped with enamel (dentine) and answer all the requirements of the little tree snake, whose food is exclusively birds' eggs, and the enameled processes crush the shells. Owen has described the snake, both in his "Odontography" and in his "Anatomy of the Vertebrates," quoting Dr. Andrew Smith, and believing, as the present writer and others have done, that the snake lived exclusively in trees. "Its business," says the learned Owen, "is to restrain the undue increase of small birds by devouring their eggs," and he proceeds to describe the gular teeth in technical language. The snake was first named *Anodon* (toothless) by Smith, and afterward *Oligodon* (few teeth), and was placed in the family *Oligontidæ*, which includes other few-toothed snakes whose food is soft, though not exclusively eggs. Examined by various naturalists it has been subsequently named *Rachiodon* (spine-toothed), *Coluber scaber* because it has rough, carinated scales, and for the same reason *Dasypeltis inornatus* by Wagler, and finally *Deirodon scaber* (neck-toothed) by Owen, to denote the position of those peculiar teeth which crush the shell when the contents cannot escape from the mouth. The egg-eating tree snake is the English name by which the *Deirodon* has been generally known, but strange to tell when I come to inquire about it, hoping to see it alive, my scientific friends here, including the Rev. G. R. Fisk, Mr. Leslie, F. Z. S., and others, express surprise to hear me speak of it as a "tree snake," and declare it is a robber of hen's nests also. In confirmation of this Mr. Trimen, the curator of the South African museum, and himself an accomplished zoölogist, shows me a bottled specimen of this very snake which died (or was killed) with a hen's egg in its mouth. Mr. Trimen kindly took the egg from the glass jar to enable me the better to examine it, and he also has permitted me to make a drawing of it, which I herewith present to the reader. It is from careful measurement, and on comparing the half swallowed egg with another hen's egg I find that it is of average size, showing that the snake did not even hesitate, or wait to seek a smaller egg.

Mr. Trimen was not certain that the snake had been killed or how it died. I shall endeavor to obtain further information about this. The snake was seen with the egg in its mouth, head erect and gliding away to escape when disturbed. Mr. Fisk, of Cape Town, has seen the snake on the Flats, where a number of birds build their nests on the ground. The "Flats" are a long strip of alluvial land skirting the mountains along the Cape Peninsula, or rather behind the many villages which skirt the mountains and lie between them and the shore; the Cape Peninsula being the point of land extending southward from Cape Town to the Cape of Good Hope, its most southern point, about forty miles distant. It is a very small point of land but is extremely rich in its fauna and flora. Mr. Fisk tells me there are at least fourteen different kinds of snakes on that restricted area and among them some of the deadliest vipers. This by the way.

To return to the egg eater. Mr. Fisk has watched its mode of proceeding and informs me that it ejects the shells of a hen's egg which has been crushed in a singular and, as one might suppose, a very methodical manner, one longitudinal half being pressed into the concave other half, so that when ejected the two halves lie closely packed together, the inner and convex half cracked all over and looking finely reticulated, the outer or concave half being comparatively entire. In its general aspect the *Deirodon* resembles a viper and in its manners it simulates a viper, striking at the aggressor with its head, as if it could bite. This trick Mr. Fisk believes to be protective, as it strikes at the birds in the same way, evidently to alarm and drive them away so that it may get at the nests. When Mr. Fisk put out his hand it dashed at it in the same fashion, but perhaps its vision is as defective as its teeth, for it strikes this way and that, failing to hit the hand until after many attempts and then with closed mouth. On the whole, this *Deirodon* which we have always thought so harmless and interesting is an aggressive and combative little snake, and not at all what we have supposed it to be.

But before leaving it one must endeavor to ascertain two things. First, at what season does it descend to the ground? Is it when the small birds have ceased to lay eggs, and the hybernating season not being near it has to obtain such other food as it may? Or, with the increasing population of the last fifty years and the havoc made upon small birds in South Africa as elsewhere, has it been driven to attempt an inconviently large egg in lieu of its natural food, and in the struggle for existence learned to manage and overcome the attendant difficulty? This becomes an interesting question which one must endeavor to solve.

SKETCH OF THE *RACHIODON* OR *DEIRODON SCABER* OF SOUTH AFRICA.

Caught with a hen's egg in its mouth which is stretched to its utmost tension. Drawn by A. H. Baldwin, from a sketch by Catherine C. Hopley. From the preserved specimen in the South African Museum, Cape Town. Exact size. The little snake must have exserted its tongue before grasping the egg, as the sheath must have been too much compressed to permit of the escape of the tongue with the egg as now seen. Usual length of the snake about 2ft.

I have been inviting information on the cow-milking and the progeny-swallowing snakes; but with no very conclusive results, though both habits are widely credited by the ignorant here. Another myth, long since extant, is that certain snakes spit venom into the eye of the intruder. This subject has been already discussed; and my arguments were intended to show that when a venomous snake, with a fully charged gland, strikes with the intention of biting and fails, the escaping venom often flies to a distance of several feet, and that accidentally, but not intentionally, it may enter a person's eye, with painful if not always fatal results. I find here that some of the *najas* either succeed in a remarkable way in causing their ejected venom to go into a person's eye, or they intentionally aim at the eye and often with too grave a result.

The other day Dr. Schonland, curator of the museum at Grahamstown, was showing me one of the *najas*, commonly known as ringhals, and he cautioned me "Do not go too close to the cage, it may spit at your eye." He then assured me that this is their common habit, and described how not long since he was exhibiting this snake to Dr. Greathead, of this town (Grahamstown), who was standing a little in the rear. He provoked the snake and it did—with erected head—spit out a gland full of venom, which flew past Dr. Schonland, just touching his cheek, but the greater portion entering Dr. Greathead's eye. "As for me, I had only to wipe it off," he added, "but the Doctor was in great pain, though he immediately returned to his house and applied washes to his eye, it gave him pain for several days." It still might be accidental that the venom entered the eye; but those who have observed this snake think not. We do not assume that vicious snakes know that the eye is a sensitive organ with a particularly delicate membrane over it, but it may be that the brightness or the expression of a human eye invokes their displeasure. Dr. Schonland related other incidents which he considered conclusive, and the idea certainly prevails here.

Space will not permit me now to enumerate further ophidian eccentricities. CATHERINE C. HOPLEY.

Something like two years ago the American Telegraph Company erected a line of unusually large and fine-looking poles between this place and New Haven. A large number of the poles were of Southern cedar, and these were, perhaps, the best looking ones in the lot. The inspectors, however, in making their trips over the route, have found that these poles seem to weaken very quickly, and an investigation discloses the reason. The poles, it seems, are the homes of numerous insects and the woodpeckers were quick to discover the fact, and in their pecking for the insects have literally honeycombed many of the poles, rendering it necessary for them to be replaced with new ones. In one short stretch of the line through what is known as Coe lane, three of the poles were fairly destroyed by the predatory birds.—*Ansonia (Conn.) Sentinel.*

THE MONGOOSE.

THE introduction of this animal into California is now being advocated by many of the farmers on account of its reputation as a vermin destroyer.

Before it may prove too late I would ask the readers of FOREST AND STREAM to give in these columns their opinion of such a proceeding and its probable consequences.

My personal knowledge of the creature is *nil*, and if any reader of the FOREST AND STREAM is acquainted with its habits and history, especially in any country where it has been introduced, it would be a great boon to the public to write them up. Let us have no more such mistakes as was made in the introduction of the pestilent house sparrow into America, or the rabbit into Australia. We must try and ascertain if possible whether this creature may not prove a pest, too, instead of a friend of man.

The mungoos, or mongoose, is a native of India, and is there tolerated as a friend of man on account of its habits as a serpent killer. It is carnivorous, and lives on snakes and reptiles, small animals, birds and eggs. It is especially destructive to poisonous snakes, which abound in India, and attacks and kills them on sight.

So much we can all read in the works on natural history; and the picture of the little creature attacking and killing a dangerous serpent is very attractive. But this is not all. In the first place, we have no dangerously poisonous snakes in California, and if this favorite food is wanting, what will be preferred next? It is claimed that they will destroy the spermophiles, or ground squirrels, and the gophers, that are so destructive to our crops. Yes! But will they stop there?

What about our quail and all other ground-nesting birds? What of our domestic fowls, and their eggs? Will they prefer a rat to a chicken, or a gopher to a quail, or a squirrel to a nest of eggs? That's what we want to know.

Can we be sure that change of country and environment will not work some change in the habits of the mongoose, and that the creature that is a blessing to man in its natural habitat may become so prolific and destructive under the changed conditions of its new home as to prove itself a curse to the country?

The only snake that is at all plentiful in California is the harmless gopher snake (*Pityophis cutenifer*). It lives almost entirely on field mice, gophers and the young of the spermophile. Will it advantage our farmers to import an animal to destroy this useful snake?

I have seen some accounts of the ravages among game committed by the imported mongoose in Jamaica. See the papers now being contributed to the columns of the *Auk* by Scott, on the birds of Jamaica, West Indies, and note how he speaks of the destruction of quail and other game. In the April number of the *Auk*, page 121, he says: "From this it is apparent that coincident with the introduction of a few individuals [nine in all were imported into the island] of the mongoose began the disappearance of the quail, and that now, in a period of less than twenty years from the date of the introduction of a few individuals of the mongoose, the quail, formerly very abundant, are practically exterminated from the island, and no longer can be considered as a part of the bird fauna of the region."

A little further on is the following: "The once abundant quail has become so rare that by many it is regarded as extinct. * * * That the evil is directly traceable to the mongoose there can be but little doubt, as prior to its introduction quail were common, even in the immediate vicinity of Kingston." It seems that at some time prior to the beginning of this century guinea fowl had been introduced into Jamaica and, up to the introduction of the mongoose, had become so plentiful as to be a pest (another example of interfering with nature), by reason of its depredations in the provision grounds. I will quote from the same page regarding its fate: "Like the quail, this bird has decreased in numbers sadly, and apparently from the same cause. Again, on page 123, in speaking of the white-bellied pigeon, he says: "It is undoubtedly one of the native birds that have suffered seriously from the persecutions of the mongoose." On page 125, speaking of the turkey-buzzard, he says: "Said to have decreased greatly in numbers in the past few years, being preyed upon, like all other ground and low-tree builders, by the mongoose."

Now, this is all that I know about the mongoose, and it is not much to his credit. Who knows more? Let every one that does come forward and tell us. If it is a creature that will benefit the agriculturist without injuring others, let us know it; giving facts and figures, if possible.

I believe for myself, and I presume to say on the part of the majority of my readers, that the facts should be overwhelmingly in favor of the mongoose before we should allow his introduction into our country. It is never safe to disturb the balance of nature by man's interference. The result is generally either futile or disastrous.

I want something to lay before the people of California that will be authority upon the subject, and trust to the columns of FOREST AND STREAM to furnish it.

AREFAR.

AUBURN, California.

A Curiously Placed Bird's Nest.

ROCHESTER, N. Y.—On Wednesday, April 6, while a friend and myself were out for an ornithological tramp in the suburbs, it began to grow steadily colder and to look much like snow, so we started for home. Having walked some distance, we stopped to rest in one of the gullies through which a stream flows into a creek near by, and here an old, abandoned, oval-shaped wasp's nest attracted my attention. As it was a particularly large one, I went up to and cut it down, intending to carry it home. I did not then observe it closely, but after going on for half a mile I looked at it and noticed that one side was partly torn away, and the insides pulled out and replaced with hay and such substances as go to make up an ordinary bird's nest. Sitting down I examined it more closely and found a small hole in one side. Putting my hand in it I found, from its shape and lining, that it was probably a nest of the common English sparrow. This conclusion was confirmed by the fact that on the same tree from which I had obtained the wasp's nest I had seen a pair of English sparrows, which had, no doubt, been putting the finishing touches on their summer home. This was such a strange site for a bird to choose for its nest, that it seems to me worth recording among the many instances of peculiarities of bird life.—ROB. B. PATTISON.

Philadelphia Zoological Society.

THE twentieth annual report of the Philadelphia Zoological Society has just made its appearance. The total membership is now 2,039. During the last year there were 286,419 visitors to the garden, an increase of 74,535 over the previous year. The heaviest months were from May to October inclusive, when the attendance averaged 36,500 per month. The total receipts for admissions amounted to $37,783.21. Sunday has always shown the largest attendance, the average receipts for that day for the year being $283.75. Last year it was determined to establish a cheap day on Saturdays and holidays, except July 4, and this system has proved satisfactory, the increased attendance making up the difference in the price of admission. During the year the accessions to the collections were as follows: Mammals 191, birds 229, reptiles 496, batrachians 38, a total of 954 new specimens. A number of species were exhibited for the first time during the year. Among the animals bred in the Garden were 4 prairie wolves, 3 American buffalo, 1 camel, 2 elk, 2 Virginia deer, 2 hog deer and 1 nylghaie. Arrangements have been made for displaying to advantage a number of species of pheasants, which will add to the attractions of the Garden. Mr. Arthur Erwin Brown continues to care efficiently for the collections of the Society.

Game Bag and Gun.

NEW YORK GAME LAW.

The full text of the new law has been put into type by the Forest and Stream Publishing Co., and is now ready. Price, 25 cents per copy.

A special edition has been prepared for the use of clubs and associations, who may order in lots of 100 or more. These will be supplied at a nominal price. Write for terms, stating the number wanted.

THE OLD-TIME GUNS.

"PODGERS'S" governor was a man of the right stamp. To change the flint-locks of a genuine old "double Joe" might suit the tastes of him who should prefer to see Sir Roger de Coverly arrayed in a derby hat and tennis shoes. I would as soon think of using an Andrea Ferrara or a Damascus cimeter as a cheeseknife, or of advocating the transformation of the Coliseum into a modern brewery.

It is odd, though, that the flint-lock should have held its own for something like two hundred years, while there were many chemists, as I believe, who were familiar with some of the fulminates. That there was no certainty of an explosion at all comparable to that felt by the user of even a cheap percussion gun is quite certain. I remember that the more or less "celebrated Col. Thornton," who published, I think about 1802, an account of a sort of "progress," which he made into Scotland, during which forty carts were employed to convey his duffle, speaks of changing his flint five times in one day, and without satisfactory results; and he had probably the best flints obtainable.

I once saw a fine French four-barreled flint gun changed (and spoiled) by being percussioned. There were two hammers and four pans, and the barrels revolved on drawing back the guard, not automatically, however. Back in the centuries many experiments were made to produce a satisfactory revolver. Prince Rupert tried it among the rest. They came so near the Gatling and other standard revolving weapons, that, as a friend once remarked, "It seems as if all those old fellows needed to have the most of our modern improvements in guns was to have somebody give 'em a percussion cap."

KELPIE.

NEW YORK GAME PROTECTORS.

AT a meeting of the Fish Commission, May 24, a schedule of game protector districts designated by counties were adopted and protectors was appointed as follows:

1. Richmond, Kings, Queens and Suffolk Counties.—Protector, Robert Brown, Jr., Port Richmond, Staten Island.

2. Orange, Rockland, Westchester and New York Counties.—Protector, Dr. Willett Kidd, Newburgh.

3. Rensselaer, Dutchess, Columbia and Putnam Counties.—Protector, Matthew Kennedy, Hudson.

4. Hamilton and all of Essex lying south of a line drawn from the southeast corner of Franklin County, east to Port Henry on Lake Champlain.—Protector, Isaac Kenwell, Indian Lake.

5. Franklin, Clinton and all of Essex lying north of the line drawn from the southeast corner of Franklin County, east to Port Henry on Lake Champlain.—Protector, not appointed.

6. St. Lawrence, except the town of Hammond.—Protector, John Hunkins, Hermon.

7. Lewis and all of Herkimer lying north of the towns of Russia and Ohio, and all of Oswego north of a line drawn from Pulaski to the northwest corner of Oneida County.—Protector, George Meyer, Lowville.

8. Fulton, Montgomery, Schenectady, and all of Herkimer lying south of the north line of the towns of Russia and Ohio.—Protector, Thomas Bradley, Rockwood.

9. Delaware, Sullivan, Broome and Tioga Counties.—Protector, S. F. Snyder, Davenport.

10. Onondaga, Madison, Courtland and Oswego from Pulaski to northwest corner of Oneida County.—Protector, Harrison Hawn, Cicero.

11. Jefferson and the town of Hammond in St. Lawrence County.—Protector, Joseph Northrup, Alexandria Bay.

12. Cayuga, Seneca, Wayne and Tompkins Counties.—Protector, Henry C. Carr, Union Springs.

13. Yates, Schuyler and Ontario Counties.—Protector, John Sheridan, Penn Yan.

14. Monroe, Genesee and Livingston Counties.—Protector, G. M. Schwartz, Rochester.

15. Niagara, Erie and Chautauqua Counties.—Protector, Charles Ripson, Youngstown.

16. Ulster, Greene, Albany and Schoharie Counties.—Protector, James McMillan, ——.

17. Warren, Washington and Saratoga Counties.—Protector, C. H. Barber, Greenwich.

18. Otsego, Chenango and Oneida Counties.—Protector, Ephraim Burnside, Cooperstown.

19. Chemung, Steuben, Cattaraugus and Allegany Counties.—Protector, Cameron Cotton, Bath.

Chief Game and Fish Protector, J. Warren Pond, Malone.

A BARK CAMP.

IN response to a request for a description of a bark camp we cannot reply more aptly than by quoting from Mr. Samuels's "With Fly-Rod and Camera:"

"A description of a bark camp and the method of its construction will, perhaps, not be uninteresting here. June is the best month for building such a camp, and Indian hunters and fishermen who design passing a part of the season on the lakes contrive to peel their bark and build their camp in this month. In peeling a large tree the operator stands on a log or other object sufficiently high to raise her from the ground a foot or two, and with a sharp ax cuts the bark through to the wood, as high as he can reach; he then makes a similar incision around the tree near the ground, and then cuts or splits the bark down from one girdle to the other. Pushing in the blade of the ax down inside the perpendicular cut he proceeds to pry up the bark for its whole length. In a short time it is separated from the tree for half of its whole circumference, when, if the trunk is large, it is cut off and the other half is peeled away in another piece. These strips are laid on the ground, if a level rock is not near, and pressed out flat, the pieces being laid across each other in alternate layers. In a few days they are dry enough to retain their flat form, when they are ready to be used in construction of the camp.

"This is begun by driving into the earth, at a distance of about 8ft. apart, four stout stakes, forked at their ends (if small trees are not found growing sufficiently neat together to answer for corner posts). Two of these latter are about 5ft. in height, the others about 7, which gives the proper inclination or pitch to the roof. On the tops of these posts are laid stout poles, which are kept in place by withes, and with the addition of two or three posts driven into the ground between the corner ones, the frame is ready for the bark. The strips are first laid on the back and two sides of the shanty, and are kept smooth and in proper position by poles laid across them and withed down to the frame. The front, facing the southeast, is almost always left open, and if it is ever covered it is only temporarily, when driving storms beat into the camp and make it uncomfortable. The pieces of bark are laid on the roof shingle-wise, lapping over each other, the rough side out; these are kept in place by withed poles, and the camp is finished.

"For a fire place a few thin, flat stones, built box-shape, make a capital oven, and with a rousing fire burning above it a capital roast may be made. Ordinarilly, however, in cooking, a large fire is made, and when a heap of glowing coals is formed the frying pan or skillet is called into requisition."

NEW YORK ASSOCIATION.

To the Sportsmen of the State of New York:

THE next annual convention of the New York State Association for the Protection of Fish and Game, will be held in the city of Syracuse, beginning on Monday evening, June 13, at which time the first legislative session will be held. All organizations which are members of the Association are invited to send the usual number of delegates. All associations throughout the State which are in sympathy with the objects and purposes of the Association, are cordially invited to make application for membership at the first session. And it is earnestly hoped that influential men everywhere who are interested in the Association's work will affiliate themselves with local organizations and thus make themselves eligible to seats in the convention New interest has been awakened throughout the State in the subject of forest, fish and game preservation and the ending of ruthless devastation, and it is hoped that the attendance upon this convention will be both large and representative.

It is probable that some new plans for broadening the scope and usefulness of the Association will be considered. A report is expected from the committee appointed pursuant to a resolution adopted by the State Convention held in this city last February, consisting of J. S. Amsden of Rochester, D. H. Bruce of Syracuse, Robert B. Lawrence of New York, Chas. B. Reynolds, editor of FOREST AND STREAM, and J. S. Van Cleef of Poughkeepsie.

It is presumed that the purpose of the committee will be to bring into unison of action and concentrate the influence of all the forces of the State which are opposed to the devastation so much complained of. It is believed that the Association will gladly welcome such a proposition and give its best efforts to the furtherance of it.

The shooting grounds will be at Maple Bay, on the western boarders of Onondaga Lake, accessible both by railroad and steamboat. The local clubs which have the preparations for the meeting in charge, will in due time make the usual announcements.

HORACE WHITE, President.

SYRACUSE, May 23.

Bite and Fright.

WASHINGTON, D. C.—Snake bite and dog bite are both made extremely painful, and at times very dangerous, through fright. Several years ago I was collecting snakes in the vicinity of the Chain Bridge, and had caught a black snake which measured about 2ft. in length. It was a very vicious reptile and required careful handling. I was bitten several times by it, but thought nothing of it. A clerk from one of the departments saw me handle the snake and thought that he would like to show his nerve for the entertainment of some friends who were with him. He took the snake, and being rather careless soon received a pretty severe bite in the hand. The young man lost his nerve, dropped the snake and seemed ready to swoon away. I found it impossible to pacify him, and he had to be taken to a hospital for treatment. The hand was swollen to enormous proportions, and it was about six months before that man was cured of his fright and the bite. The same snake had bit me before and after biting the stranger without any effect save what comes from an ordinary bite.—HENRY HORAN.

THE CORBIN GAME PARK.

IN the issue of March 12, 1891, we published a very interesting account of Mr. Austin Corbin's game park in New Hampshire, telling how Mr. Corbin was led into the enterprise, and also giving an account of how the first animals used in stocking the park were secured. FOREST AND STREAM has obtained the following information of the present state of affairs in the park, chiefly in relation to the breeding of the animals in their new environment—it can hardly be called captivity, when the animals are at liberty to wander at their own sweet will over 28,000 acres of woodland, hill and valley.

In this respect of breeding the park has proved a great success. All the animals seem to take kindly to their new surroundings, and already their numbers are being materially increased by births. Of the twenty-two buffalo which were put in about a year ago, eight of the cows are now in calf, and two young have been added to the herd. The elk, which bred to a limited extent on Mr. Corbin's Long Island estate, have found their mountainous New Hampshire home more to their liking, and have already increased fifty per cent. Next to the elk the most accurate count has been kept of the moose, who, unlike their gregarious brethren, go in pairs during the rutting season. It was at first feared that these unusually retiring animals would not breed in the park, but it has been ascertained that six of the cows are now with calf. There are upward of sixty moose in the park, and they make a much wider range in traveling than the elk, which keep pretty well to one locality where there is considerable brush and small growth, and no doubt abundant feed.

The agent who was instrumental in securing for Mr. Corbin the first denizens of the park, has the head of a particularly fine moose in his possession. The unmounted head weighed 300lbs., and the horns, which show eleven points, have a span of about 5ft. This head was bought of an Indian in Mattawa, and is said to be the last green head taken out of Ontario previous to the passing of the law forbidding the killing of moose.

To come back to figures, the wild boars, imported from Germany September a year ago, have been seen a number of times lately. They have evidently gained by natural increase, and must be quick travelers, as three or four herds have been reported in different localities at nearly the same time by the game keepers. The old animals have grown considerably, and are wonderfully fleet of foot, for, unlike their cousin, the domestic hog, they do not fatten. As far as can be ascertained, all the other animals, including the several varieties of deer, have multiplied considerably, and their change of habitat and the fact that the big fence occasionally checks their extended wanderings, does not seem to cast any blight on the even tenor of their lives.

Included in the park are two ponds of twenty and thirty acres respectively, and probably one hundred miles of streams. The ponds were cleaned out last year and many eels and other varieties of cannibalistic fish destroyed, and now the ponds and streams are all stocked with trout.

While in London, two years since, Mr. Corbin purchased twenty thousand hawthorn trees. Four thousand of these have been planted this spring. They are for the purpose of forming a hedge strong enough to prevent the buffalo and other large animals from getting out. This tree, of which there are two varieties, the white and black, is used very extensively for inclosing the game parks of England and France. It grows from 8 to 10ft. in height, and is the toughest and strongest tree that can be found, making with its interlocking and elastic branches a hedge that would resist a battering ram. The trees are being planted inside the big fence of barbed and woven wire, and will eventually take its place when the latter becomes weakened through rust and exposure.

There will be no hunting in the park at present, though in future years when the animals have multiplied beyond the resources of their domain, it is possible that Mr. Corbin may adopt this means of thinning them out. It is sufficient to say that the park is not designed for hunting. Similarly it is not primarily intended for scientific research into the habits, breeding, etc., of the various animals, though it is safe to say that it would yield rich returns in this direction.

The development of Mr. Corbin's game park enterprise is being watched with decided interest by sportsmen and naturalists. It happens that the present article has been prepared just in time to supply additional information on the subject sought by the directors of the new National Zoological Garden in Washington. Success in New Hampshire, when it shall have been demonstrated beyond the peradventure of a doubt, will prompt similar enterprises in other parts of the country. While much interest is felt in the introduction of foreign species, Americans are naturally most concerned with the successful conservation of bands of American big game, the elk and the antelope and the buffalo. Of the unfamiliar picture these great animals present, grouped on a New Hampshire hilltop, our cut, from a photograph, gives excellent illustration. May these wild creatures yet feed on a thousand hills of the New England and other Eastern States, and on the game preserves of the West.

Beside the great New Hampshire park, Mr. Corbin has two other game preserves. On his Long Island estate he now has twenty-two elk and about eighteen deer, and at Manhattan Beach he has twenty-five elk. At the latter place he has ten acres inclosed with an open wire fence. There will soon be dug here a large pond, which will be filled with salt water from the tides of Sheepshead Bay. In this pond are to be a dozen seals and ten sea lions. The former are now on their way from St. Johns, N. F., and the latter are making their long journey from the Pacific coast. Later in the summer a number of other animals will be added to the inclosure.

MAY, 1892. B.

BUFFALO IN THE CORBIN GAME PARK.

BUT I GOT HIM.

IT WAS hunger and not sport that made me turn out on Aug. 3, 1890, at half-past two A. M. and saddle my pony and start for the licks on the Columbia River, four miles below my mining claim. I rode along at a brisk trot, as it was already daylight, and I knew the earlier I got there the better chance I would have for meat for the next ten days.

I crossed a very brushy spring branch about fourteen miles above the strongest lick, and then I tied my pony and went up to the bank very carefully and peeped out. Not more than 40ft. from me stood a fine blacktail doe. She was eating dirt. I looked the licks over, but could not see any bucks. I drew back, for I did not want meat badly enough to shoot a doe at this time of the year.

My dog Frank was watching something down the river very steadily; and in about one minute I saw a very large buck start bouncing for the mountain. He had about 100yds. to run to get to the foot of the mountain, and then at least 600yds. up very steep before he would be out of sight. I ran down to get a better view, and began turning up my rear sight as I ran along. Pretty soon he stopped. I looked at my sight, it stood at 12 points, which would be right for 350 to 400yds. I knuckled down, took a knee rest, and banged away, but I saw dust raise just a little too low. The deer never moved, so I made an allowance for the next shot, and at the report away bounced the deer. He ran for a few jumps and then trotted off, humped up, and I knew I had shot him, though too far back. He crossed the point and went out of sight.

I went up to where he was standing when I shot, and told my dog to go on slow, which he did. I found a big drop of blood where he had crossed a small log, and on examining it closely I saw it was from the paunch. I followed on until the deer had gone into the thicket on the spring branch above where my horse was tied. I told the dog to go after him, which he was glad to do. He soon jumped the buck, but as it was only a short way to the river, he could not catch him before he took the water. I hurried on after them, but I met the dog near the horse, coming back. I followed on to where the deer had taken to the river, but I could not see him come out anywhere.

I went back to my cabin, got my breakfast, took my boy, gun and dog, got into my boat, and started to see if I could find my wounded deer. When we got opposite to where the deer had taken to the river, I landed and told the dog to go ashore, knowing that when he came to where the deer came out of the water he would follow it. We went down about one-half mile, when the dog started to leave the river, trailing the deer. I whistled to him and he waited until we landed, tied our boat and went up to him. He followed the track out on the bottom to the miner's ditch, then the deer got in the ditch and kept in it for at least one-half mile, and when he left it he jumped out over a log, the dog lost the track, and would go back to where the deer had taken to the ditch. I called him and made a circle and pretty soon he struck the track again. We followed it up into some pine hills about one-half mile distant, when I saw the buck lying by some brush, not more than 100yds. off, and I shot it through the head. I went back down the river a short distance to where four men were rafting and told them they could have half the deer if they would come and get it, which they gladly did. I had shot the deer just before four o'clock, and it was half past ten when I killed it. The ground that he traveled over was very dry and sandy, and the dog never missed the track except while the deer was in the ditch. This I considered was a nice piece of work.

LEW WILMOT.

REBOUNDING LOCKS.

Editor Forest and Stream:

Your correspondent "Awahsoose" very justly complains that rebounding locks are dangerous. I have noticed the same defects of which he writes, but I think the rebounding lock of itself is all right.

The trouble is in the tumbler, which is too often carelessly made. There should be a half cock notch on a rebounding lock, just as strong and secure as ever was made on a muzzleloader, and the rebound should bring the sear into this notch. Then no blow on the rear of the hammer and no raising of the hammer part way up and letting go can fire the gun without breaking the lock.

If the half-cock catch will not hold the hammer up away from the firing pin then the gun should be fixed—or traded off to some one who breaks the game law—for it is dangerous. You can easily test the matter. Put in a cartridge, as "Awahsoose" says, then draw the hammer back almost to full cock and let go. Only I would advise a well loaded cartridge to be used, for then the impression would be more lasting in case it went off.

As your correspondent says, there are too many accidents, and many high-priced guns are unsafe. For myself I have never used a hammerless gun and have one objection to them. I may be an old fossil but I refer to that gilt-edged word "safe" which is on all of them. No gun is "safe" when there is a load in it, and the man who thinks it can be is *unsafe* to hunt with.

Others may think as they please and carry their guns as they choose to, but I am afraid of the man who is continually pushing the slide from safe to unsafe or raising and lowering the hammers of his gun.

Now you man with the high-priced gun, perhaps you don't believe me. Let me relate an incident that happened near here. A man with a fine hammerless gun came in the house for a drink and left his gun on the bed with the cartridges in—just for a minute. No danger, it was "safe." A few seconds later a hole was blown through the partition and the house was filled with smoke. His little girl rushed to his arms, saying, "Papa, I know how to shoot the gun, just push on that little thing that goes click and then pull the other thing." A good lesson cheaply learned.

Now, let me tell my way of carrying a gun while hunting — always at full cock; and my gun never yet went off unless I intended it should. I have hunted in the thick brush, climbed fallen trees and stepped into concealed bog holes and ditches, but my gun always behaved itself. There are more careless hunters than there are unsafe guns. "Oh, it was not my fault; it must have jarred off," you will hear some one say as an excuse. If you want to test the "jarred off" theory, take a gun with a light trigger-pull or even a set-lock rifle and jar it off if you can. You can jar the stock into kindling wood before you can fire the gun by this means.

Let us have good guns, but above all, let every one who takes a gun in his hands realize that the business end of it means death to everything within its range.

BACKWOODSMAN.

EAU CLAIRE, Wis., May 16.

Camp-Fire Flickerings.

"That reminds me."

HOLT and Mann had been on the warpath all day, and after a short-order supper lay down on the open prairie on the lower side of an irrigating ditch. They had but one blanket to spread over them and nothing under them but mother earth.

At the very witching hour of midnight, when churchyards yawn and men who sleep outdoors want the blankets tucked in snug to the windward, the lower story of Mann's back got cold. He was so tired that he didn't want to wake up sufficiently to pull the blankets over him, and thought he could relapse into his usual sound slumber: but the more he tried to sleep the more his spine congealed.

Finally he was forced to take measures for his protection. He put his hand behind him to yank the blanket, but instead of going out into the chilly night it went into six inches of chilly water. He realized the situation at once. The ditch had broken above them and he and his partner were both thoroughly irrigated on one side. Mann and a long string of expletives got out at the same time, taking the blanket with them. By this time Holt was rubbing his eyes with one hand and wringing the water from his half laundried business suit with the other.

Both men escaped to the higher ground, rustled some wood and, as the wee small hours dragged through the darkness, turned themselves in front of the fire to dry their clothes. Holt was over anxious to complete this work and get to bed again. In an unguarded moment he got too near the fire and burned the whole north side off the south leg of his trousers. He was thirty miles from home and had to wrap up the exposed member in a gunny sack until he could return to the ranch and replenish his wardrobe.

G. O. SHIELDS.

EDDY, New Mexico.

THE ART OF GAME BUTCHERING.

THE Blackfoot Indians have a tradition that when they were first created, their Maker taught them how to build piskuns and how to drive the buffalo over the cliff. After the first herd had been run into the pound, the Creator took them down and they stood there beside the dead animals. They tried to tear their limbs apart, and they tried to bite pieces out of the buffalo, but they could do neither. They did not know how they were going to get at the meat. Then the Maker went and broke off some sharp pieces of rock, and made stone knives, with which he taught them how to cut up the dead animals.

The first time that I ever killed a buffalo and stood by it, wishing to take out its tongue and carry it back to camp as an evidence of my prowess, my feelings were a good deal like those of these newly created Indians. There was the buffalo lying dead before me, but though I had a knife in my belt, I had no idea of how to go to work to remove the tongue. After considerable thought I could devise no better plan than to pry open the beast's huge jaws, pull the tongue out as far as possible and then cut it off. I did this, and with about 6in. of its tip rode proudly to camp. It is hardly necessary to say that I was unmercifully laughed at when I got there.

Like many other operations, the process of removing from a freshly killed animal the unnecessary parts and preparing the carcass for transportation to camp, is a very simple one—when one knows how to do it—but until he has received some instructions and has had some practice the novice is likely to find some difficulty in neatly butchering his large game. Many men have with them on their hunting excursions guides who are familiar with these operations, and do for their employers whatever is necessary, but many hunters like to know how to perform these operations for themselves. Most men prefer to know how to do what is necessary about camp and in the field, and those who do not care for this knowledge ought to have it, for in the wilderness circumstances may arise which will throw a man on his own resources, and a little instruction and practice will enable any one to become a good butcher, and to perform these tasks, which are really a necessary part of the big-game hunter's work.

We will suppose a man to be just dismounting from his horse by the side of a dead antelope, deer or elk, which has just fallen before his rifle. The first thing to do is to bleed the animal, but before doing this he should secure his horse, which, if young or unused to hunting, may be frightened at the dead deer or at the smell of its blood, and may run away. Let him drop the bridle rein over its head, and throwing down his trail rope take a turn of this around a bunch of sage brush, or if it is in the timber, tie the horse up to a small tree.

His knife, which according to my notion should have a short and rather wide blade and round point, may be supposed to be in good condition and with keen edge. If it is not, a good deal is added to the labor of the work before him. The proper place at which to insert the knife to bleed the game is at the point of the breast, on one side or other of the projecting end of the breast bone or sternum, which extends a little in front of the ribs. A push will send the knife in to the hilt. Its back should be toward and pretty close to the sternum, and after it is inserted its whole length its edge should be moved two or three inches toward the backbone, though the hole at which the knife enters need not be enlarged. This motion will cut the aorta, or great blood vessel, two or three inches long, which leads from the heart, and the blood will flow from it and will be collected in the thoracic cavity which contains the heart and lungs. But little of it will flow from the wound. The reason for cutting an animal's throat in this place, rather than near the head, is that it does not injure the skin of the head and neck, which the hunter may wish to preserve for mounting. A slash across the throat just below the head will bleed it just as well; but no taxidermist can ever sew up a great gash at this point in such a way that it will be unnoticed. The accompanying diagram shows the point

FIG. 1.

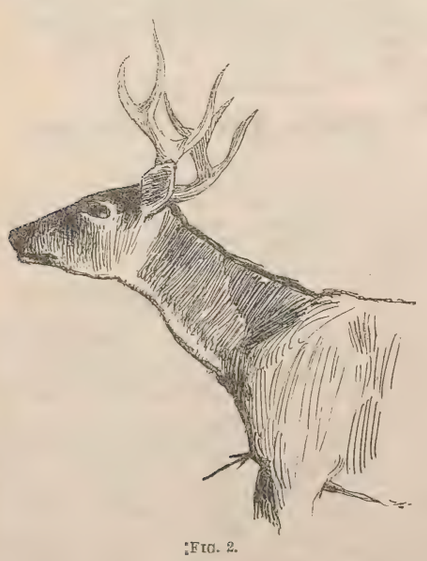


FIG. 2.

After the operation of bleeding has been performed the animal should be turned on its back, and either held in position by a companion or propped up by a stone, or what is quite as easy, supported by twisting the head around and wedging it under one side. For slitting the skin a knife with a sharp point is handier than the round-pointed skinning knife. I often use either the large or small blade of my pocket knife. The removing of the entrails follows. The point of the knife, back down, should be inserted in the middle line over the paunch, and the skin slit from here up to the point of the breast, care being taken not to perforate the walls of the paunch.

This having been done, go back to the point of starting and continue the slit backward, still in the median line, the knife this time running back until it reaches the tail. Thus the skin is split on the middle line of the belly and breast from the tail to the point of the breast. While this is being done the paunch will have swollen and will protrude from the opened belly. Pay no attention to this, but beginning at one side of the breast bone, run your knife forward from its posterior to its anterior extremity. In a young animal there will be no difficulty about this, and with an ordinarily sharp knife you will find it easy to cut through the cartilaginous ribs, which unite the sternum to the true ribs. If, however, the creature is an adult, these false ribs may be so completely ossified and hard that the knife will not go through them easily. In this case it is necessary to cut them through one at a time, searching with the point of your knife for the soft point of union between these ribs and the sternum, or between them and the true ribs. The place is there and the bone is soft enough to be cut through by a sharp knife, provided you find just the point at which to cut it. Having run your knife up to the point of the breast, the whole visceral cavity of the animal is open. Try to spread the ribs apart by pulling them away from each other, so that the opening will be two or three inches wide. This gives you more room to work in. Now reach in and on either side cut away the diaphragm, the fleshy partition which separates the heart, lungs and liver from the stomach and intestines. It runs across the animal's body from the dorsal to the ventral side just about where the long ribs end. This being cut away on both sides and at the back, the contents of the visceral cavity are free except at two points in front and behind. Reach in your left hand and grasp the vessels which run up into the neck, that is to say, the windpipe, gullet, veins and arteries. Cut them across from above downward, looking out carefully that you do not slice off your fingers, and by pulling on the part in your left hand you will bring away the heart and lungs. Throwing these to one side you keep on pulling. All these parts are slightly attached along the backbone, but they will easily come away when strongly pulled. It is well when practicable to have the animal on ground that is slightly sloping, its head up hill, so that the fluids set free by the work will run down toward the tail. Continue pulling, using the knife if it should prove necessary, as it seldom will except perhaps where the diaphragm joins the backbone, where very likely you have not cut that partition entirely free, but always taking care not to cut any vessels lest the contents of the stomach or of the intestines should run out. Now remove in the same way the paunch and the intestines, and everything is taken out except the small intestine which is still fast at the rectum. This can either be cut off a foot or two in front of the pelvis and tied up, to prevent its contents from running out, or what is much better can be removed at once. In a young animal it is easy to split the pelvis by cutting through the suture in the middle line. This having been found—it is the highest part of the bone—place the edge of the knife upon it, lengthwise, bear down on the back with your left hand, and rock the knife up and down a little and its edge will cut through the soft, gristle-like substance uniting the edges of the two bones. In an old animal it is useless to attempt this. The bones are so firmly united that no knife can cut through them. An old hunting partner of mine used to carry in his belt a tiny hatchet (Fig. 3) with which he split the pelvis to save himself the trouble of cutting. However, with a sharp knife, after a little practice, it is a simple matter to cut around the rectum and urinary organs within the pelvis, following the bone as closely as possible, and in this way to free the end of the small intestine, the whole pulling out on the belly side. This having been accomplished, everything is taken from the animal which need be removed. There is probably a lot of blood still within the carcass, which should be turned over, belly downward, its legs spread apart to drain.

FIG. 3.

Every one who has hunted much knows how difficult it is to lift or handle a freshly-killed animal. A man who would have no difficulty in tossing into a wagon a deer which has been killed twenty-four hours, may be quite unable to do the same thing when the animal is limp and hanging loose. If there are two men, each can take an end and readily enough swing the animal upon a horse's back, but if a man is alone, as may often happen, it is not so easy to get the game on the horse. I used to manage in this way with a deer or antelope when I wanted to take the animal into camp whole. Taking my picket rope, I would make it fast around the deer's hind legs, throw the line over the saddle, and by my weight lift the hindquarters of the animal until the hocks were up even with the saddle. Then I would take a quick turn of the rope around the saddle horn, which would hold this part of the deer in place. It was then easy to take the animal by its head and forelegs and to swing this up over the saddle, balancing the body in the saddle seat. If a man is specially anxious to spare his horse, the game could be carried to camp in that way, the hunter walking and leading his animal. Of course it is essential that the deer should balance well; that is to say, should not sag on one side or the other of the saddle. If it does, the horse will probably have a sore back next day. The ordinary saddle strings, one's trail rope and the latigo straps, can all be used to lash the load in its proper place and keep it from slipping. Of course, before such a load is put on the saddle should be recinched, the blankets having first been moved into their proper place. If the distance is too great for a man to walk comfortably, he can, after he has put the deer in the saddle seat, move it back behind the saddle and tie it there by the strings, bringing the legs forward on either side and tying them to the rings of the flank cinch, if he is riding a double-cinched saddle.

An elk is too large to be carried in bodily, and in the old days when game was plenty we seldom took any game into camp whole. It always seemed simpler to take off the hams and shoulders and tie these pieces to the saddle, leaving the frame work of the animal, the ribs, backbone and pelvis lying on the prairie. To carry in the meat of an elk or buffalo, turn the animal on its back without removing the entrails, spread the hindlegs apart, cut down between them to the pelvis in the middle line and then following the bone of the pelvis cut down to the thigh joint. Cut through the membrane which surrounds this and the leg will fall down loose. The knife should then be run forward along the pelvis up nearly to the middle line of the back, then backward still along the pelvis toward the tail, following the bone around to the point of beginning. Cut through the meat along the bone and the leg is free. The same operation should be performed on the other side. The hams being off, are to be dragged to one side. Now the sirloins must be taken out. Turning the animal over, the knife is now inserted on one side of the backbone just in front of the pelvis, the edge of the blade toward the animal's head, and moving it forward, the meat is cut away from the dorsal spines until the shoulders are reached. Then make an outward cut. The long and thick piece of meat is now free at one side and at both ends. By feeling with your hand you can easily tell where the flesh of the loin ends on its outer side over the ribs. In an elk it is not much more than four inches from the dorsal spine to where the ribs can be felt. Beginning at the shoulder just over the point where the rib is felt, cut through the skin and flesh down to the ribs, and then back toward the tail parallel with the backbone Then when the skin has been divided, run your knife in close to the ribs and strip this meat off. It is free next to the backbone and will readily come away as you cut it. The loin on the other side is taken off in the same fashion. If you wish to carry in the shoulders as well, they are taken off by lifting the foreleg backward and outward and slashing with your knife between the leg and the breast. There is no joint here, and by cutting close to the ribs you will not strike any bone, but the whole leg, including the shoulder blade, will come away.

Perhaps the most intricate operation in the whole act of cutting up an animal is the taking off of the shanks. These are cut off just below the hock or ankle joint behind and the wrist, which is commonly called "knee," in front. There is a square joint here, and if a man knows how to hit it the shanks come off in a moment, if he does not know where to cut, he may work for a week with a knife and never succeed in freeing the feet from the other bones. The accompanying diagrams give an idea of how

FIG. 5.

FIG. 4.

the bones lie in this joint. To cut them off it is necessary to cut square across through the skin and muscles in front of and 1½in. (in a deer) below the hock (Fig. 4), and then to make another cut behind the hock and just opposite the first one. Then resting the hock against your knee, give a sharp pull backward or push downward, and if you have hit the joint the shank will break back square off, and will be necessary only to cut through a few little strings of skin and tendon which hold the pieces together. On the foreleg (Fig. 5) make similar cuts about 1in. below the "knee" and behind and break forward. A small square joint will be seen if you have hit the right place, and the foot will readily come away. Then make incisions between the great tendon lying up behind the hock and the bone, large enough for the ropes to go through, and cut small incisions in the forelegs just above the "knee." Through these holes you may run your saddle strings—or if the animal is a buffalo or elk, can put your trail rope—and tie the hams either behind your saddle, or, in the case of a large animal, across the saddle seat. The sirloins of the buffalo or elk can be tied behind the saddle, while the hams ride as stated.

It sometimes happens that the man may wish to cut the head off an animal, desiring, for whatever reason, to save only this part The natural place to take off the head is between the skull and the first cervical vertebra, but one may want to save the skin of the neck as well and may not have time to skin it at the moment. In such a case he can easily cut the head off at any point and still save the whole skin of the neck. Insert the point of the knife between the ears and run it back on top of the neck along the median line as far as the shoulders. Here make a cut at right angles to the previous one, running from the withers down over the front of the shoulder blade to the point of the breast on each side. Flay back the skin along the neck toward the head until you have room to work, then make a downward cut through the flesh muscles, windpipe, gullet, veins and arteries. Cut through all the flesh until you reach the backbone. Search along this for an inch up or down, until you find where the bodies of two vertebræ meet—the flat joint between the faces on their ends. A knife can easily be run between these bodies, but it will be stopped by the interlocking processes of the vertebræ about the spinal cord. Having separated these vertebræ as far as possible and cut through most of the flesh about them, lift the animal's head from the ground, holding it by the nose with one hand and the horns with the other, and twist it around and around until you hear the bones crack, and so know that the connection between the two vertebræ is broken. Throwing it down on the ground again, you can readily cut away the flesh and muscles which still hold the fore part of the neck to the back part, and the head is free and can be carried away.

To complete the preparation of the head, after reaching camp the skin must be removed from the neck and head and the skull cleaned and dried. It has been stated that the skin is divided along the back of

the neck in the median line, and the whole neck to be skinned free and cut off at the point where the first cervical (neck) vertebra supports the skull. The freeing of the skull from the skin of the head is a more intricate operation than any of the others, but even so, it is not difficult. For this work the large and small blades of an ordinary jack-knife are better than a butcher knife.

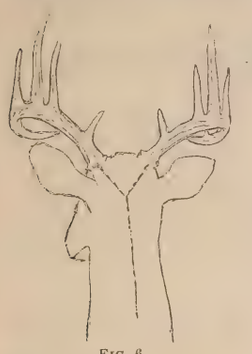

FIG. 6.

From the point between the ears, where the cut along the back of the neck ends (Fig. 6), make two diagonal cuts, one to the base of each horn, the two forming the sides of a broad V, whose angle lies between the ears. Now cut completely around and close to the horns. Beginning at the back of the head, flay away the skin toward the ears on each side, cutting through the cartilage of each ear close to the skull and skinning down toward the sides of the head. Next skin away the V-shaped flap of skin between the horns and work the skin down away from the horns, both on sides of head and on the forehead toward the eyes. This is quickly done. Care must be exercised when the eyes are reached not to cut their lids, nor to cut the skin below the eye, where it goes into the deep fossa, or pit, in the skull. Follow the bone closely with the point of the knife and keep the skin well pulled out and you will have no trouble. Following down toward the nose, the next place where care is needed is about the lips. It is safer to cut the flesh off close to the bone and afterward to clean it away from the skin. This takes a little longer, but by doing this there is no danger of cutting through the lips. The nose should be cut off well back from the nostrils. The skin is now free from the head, and the meat should be removed from about the ears and from the lips, nose and chin, care being taken not to cut away too much of the skin of the lips. The object of all the work is to make the skin so thin that it will dry readily and that the salt, or poison, if you use a preservative, shall penetrate everywhere. After the skin has been cleaned it should be hung up in the shade to dry. If you have salt or powdered arsenic, use it freely, but do not if you can help it, neglect the drying of the skin. Never attempt to dry a skin by a fire nor in the sun.

You must now clean the skull by cutting away all the meat that there is on it. Disarticulate the lower jaw and clean that. Take the skull down with you to the stream and with a stiff stick small enough to enter great foramen, through which the spinal cord passes, break up the brain, every now and then filling the skull with water and pouring it out. In this way the brain can be removed in a very short time. The skull should then be put where it can dry.

Before the skin of the head and neck is dry, it is well to turn it inside out and carry it home with you reversed. Pack it in a sack and put the sack in a box if convenient. It is thus protected from rubbing and from many dangers to which such a mass is exposed. In drying your head skins see that they are hung up out of reach of dogs, coyotes, rats and other animals that may destroy them. I have had the nose chewed off more than one valuable skin by dogs, wolves and foxes.

If the hunter should wish to bring home with him for mounting a complete skin of any animal, he must exercise some care in skinning. The cuts along the legs should begin as near the sole of the foot as possible and should be at the back of the leg. In a deer or any hoofed animal, insert the point of the knife between the dew claws and split up the back of the leg to the "knee" or hock, thence up inside the leg about midway between its front and hind border to the breast or belly, and then straight across to the middle line of the

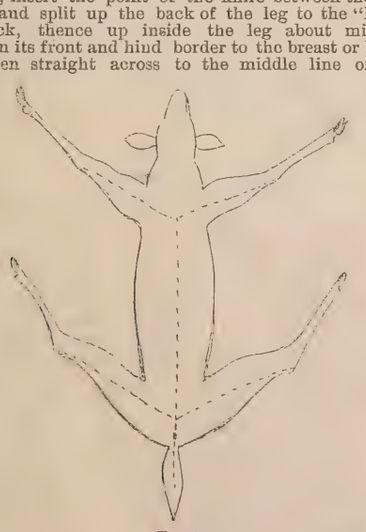

FIG. 7.

belly. By doing this the seams made by the taxidermist in sewing up the legs will all be out of sight. For a skin which is to be mounted, the bones of the legs and the skull should all be saved, cleaned and brought back with the skin. It is best in the case of a large animal to take the bone of the tail out by splitting the tail on the under side. Often the bone can be taken out without splitting, but if this is done the tail dries slowly and there is danger that it may spoil.

I have thus given very briefly, yet, I hope, clearly enough to be of service to the ordinary hunter, some of the operations necessary to be performed in dressing and skinning an animal—butchering it, as the phrase is—and if any reader desires to go into the subject in greater detail, he should read carefully a copy of Mr. Hornaday's excellent work, "Taxidermy and Zoölogical Collecting."

OLD MAN.

Sea and River Fishing.

Trout and Bass Fishing.

WE have secured, for the private information of the readers of FOREST AND STREAM, knowledge of a number of streams and lakes easily accessible from this city, where we believe that good fishing for trout and black bass may be had. The information we shall be glad to furnish without charge to any reader of FOREST AND STREAM who will apply for it, either personally or by letter.

AN ANGLER'S SONG.

WHEN the springtime rains are falling,
When the birds their mates are calling,
Haste away,
Nor delay,
Where the mountain streams are brawling.

Grassy banks and leafy cover,
Mossy rocks the brook leaps over,
Waiting there,
Sweet and fair
As a maiden for her lover.

In the meadows, violets springing;
In the orchard, bluebirds singing;
Birds and flowers,
Sun and showers,
All the summer's promise bringing.

Hear the trout brook splashing, dashing;
See the sunlit riffles flashing;
Down the glades
Leap cascades,
Into foam the water lashing.

Overhead the clouds are drifting,
Through the pines the sunlight sifting
Flecks the way,
Gold and gray,
With soft shadows ever shifting.

Make your rod and tackle ready;
With a careful hand and steady,
Cast your fly
(Trout are shy)
In the foam beside the eddy.

Trail the feathery lures across
Where the dancing wavelets toss;
There's a rise!
Note his size;
Strike or else you'll mourn his loss.

From sylvan pool to pool we tarry,
Where our casts the waters harry;
Size and weight
Compensate
For the heavier creels we carry.

So the angler wends his way,
Fishing down till close of day,
When the west
Bids him rest
And his cunning hand to stay.

By the river's rap'd flowing,
With the Northern pines bestowing
Life and health,
Nature's wealth,
Soon the camp-fire's flame is glowing.

L'ENVOI.

Pleasant is the angler's roaming
Through green woodlands, going, coming;
Lofty mountains,
Sparkling fountains,
And the upland air health giving
Make the angler's life worth living.

WILLIAM AUSTIN BROOKS.

MAINE MAY TROUTING.

PROBABLY the sportsmen have never experienced colder weather in the spring than that of the past few days. But the welcome rain has come, where it has not been actual snow, and higher water is following in all of the lakes and streams of New England. Snow fell on Friday and Saturday, to the depth of four or five inches, in some parts of Vermont and New Hampshire, while in the region of the Maine trout lakes the weather was very cold, with more or less of snow. Such weather is not usual after the middle of May, and the fishermen have found it very uncomfortable. Trout fishing has also been unusually poor. There are very few accounts of good catches. I am in position to hear of good catches both by mail and telegraph, either at the Rangeley or Moosehead waters, but the sources of news are almost entirely silent. Even the Maine local newspapers, the business of which it is to puff the fishing all it will bear, and which never mention any thing that is damaging to the trouting interest of certain localities, have no big fish stories to tell. When such papers are silent sportsmen may rest assured that fishing is indeed poor. But heavy rains have fallen and the lakes and rivers have been rising—never a good condition of affairs for trout fishing. They were previously the lowest on record, at this time of the year. The entire condition of trouting affairs is likely to change. When the water has reached its height, and begins to fall, with the weather changed to warmer, then look out for good fishing in the Maine trout waters.

Still the trouting parties are going, though some of them have also begun to get home. A party of Boston and Charlestown gentlemen left Saturday morning for Enchanted Lake, in Maine. The following names made up the list: Herbert A. Skinner, Jesse A. Dill, L. Frank Hinckley, Frank A. Morrill, A. V. Peabody and J. H. Powers. This party has every reason to expect about the finest trout fishing to be had in the country. The lake is but little visited and comparatively but little known. It is well up to the Canada line. They go as far as Bingham, Me., by rail, thence by buckboard up the Canada road, over about the same route as that of Benedict Arnold in the days of the Revolution. They go by buckboard some thirty or forty miles to the vicinity of Parlin Pond, where they leave their teams and go nine miles on foot over a tote road to the lake. The FOREST AND STREAM is promised an account of the locality and the trip after the gentlemen return. The theory is that the trout are abundant, but not large there.

Mr. C. D. Sias, of the well known coffee and tea firm of Chase, Sanborn & Co., has just returned from a happy fishing trip to Grand Lake and Grand Lake Stream. His wife was with him, and this doubtless added much to the pleasure of the outing. Mr. Sias is as brown as a ripe chestnut, and Mrs. Sias—I dare not say how brown. They took in all about 50 landlocked salmon, ranging from 2lbs. to 4lbs. The salmon are running small this season, making it all the more curious why the salmon of Sebago run up to even 32lbs., while those of Grand Lake rarely reach 7lbs. Both are landlocked salmon, with very little distinguished difference. The Maine Fish Commissioners are of the opinion that it is a lack of food that leaves the Grand Lake salmon so small, and an abundance of it that causes the Sebago salmon to grow so large. Mr. Sias says that it is not at all difficult taking six or eight salmon a day at these waters. But his greatest catch was something larger. It was a lake trout or togue that weighed 16¾lbs. This big fish he sent home to his friends at the store. He was trolling for salmon when the big fellow was hooked. He uses only a 7oz. split-bamboo rod for trolling for the Grand Lake salmon. By the tugging and pulling he was aware that he had hold of a very heavy fish. He had out some 70 or 80ft. of line, a part of which the fish would allow him to take by means of the reel, but about there he had to stop. After sulking for a while the fish would make a run, taking out again the 35ft. of line Mr. Sias had reeled in. He found that he could work his prize out into the deeper water and, as he was rather near a rough shore, he directed the guide to head the boat that way. In this way the fish was worked out where there was "plenty of sea room." After a hard struggle, Mr. Sias begun to get his fish occasionally up toward the top of the water and to get his big mouth open. Then the stubborn fighter would go down again and sulk. When Mr. Sias did at last subdue him so that he would lie quietly at the top of the water and near the boat, he found that his prize was too large to secure with the landing-net. Here was a dilemma. It would not do to lose such a fish. He was well hooked and the rigging was as good as ever. The tired sportsman decided to try and beach him. The boat was slowly paddled toward the shore, Mr. Sias leading the monster trout. Once or twice he made turns and ran for deep water. In such cases he had to be given line again. After a struggle of an hour and forty-eight minutes the trout was beached and saved. The rod was not injured and the rigging was all whole. Mr. Sias justly feels somewhat proud of his skill in handling a big trout on a 7oz. rod.

Mr. and Mrs. Sias also found the weather very cold. There were spits of snow in the air during a part of three or four days of their trip, and it required all their extra wraps to keep them from actual suffering. Mr. Sias thinks Grand Lake a very windy one, as Maine lakes usually are during cold weather. On Tuesday evening, May 17, there was ice in the puddles and the mud was actually frozen in the road.

May 23.—A party of some twenty-five or thirty of the members of the Megantic Club and invited guests had planned to leave Boston, by special car, on Tuesday, for a couple of weeks fishing at the club's preserve, but so cold and disagreeable had been the weather up to Monday, the trip was put off to more genial days.

The well-known Tuttle party went in to Mr. R. A. Tuttle's handsome camps, just above the Mountain View House, Rangeley Lake, on Saturday, the 14th. This party was composed of Mr. R. A. Tuttle, of Boston; Peter Reid, of Passaic, N. J.; Moses Worthen, of New York; O. H. Sampson, of Boston; F. S. Dickson, of Philadelphia; K. M. Gilmore, C. F. Hutchins and Col. U. Corcoran, of Boston. These gentlemen are all regular visitors in that region, and are very successful fishermen. Mr. Dickson has a most beautiful camping establishment on the island of a long name in the middle of Rangeley Lake. The Parlin party, or perhaps better known as the Magee party, is to leave Boston on Wednesday or Thursday of this week. The FOREST AND STREAM has already had a full list of the names of the party, and there are no changes, I believe.

Mr. C. Z. Basset, of Geo. B. Appleton & Co., with his friend Mr. G. N. Smalley, started on Saturday for the Maine lakes. They go direct to Billy Soule's camps, on the island in Cupsuptic Lake, though they are to make extended excursions through the lake region during their stay. They are both expert fishermen, preferring the fly to trolling. Mr. H. G. Jordan, a well known member of the Boston coal trade, is now absent with a small party of friends at Moosehead Lake. They write home accounts of very cold weather.

I got an account yesterday of some very good fishing that the Shattuck and Stevens party is having at the Narrows, Richardson Lake. The report is that on Thursday they took two trout weighing 7lbs. each, followed the next day by one of 6¾lbs. and another of about 7lbs. This is good luck enough for a party of four, and it is the best report yet of the season.

Senator W. P. Frye, of Maine, is now at his cottage on Mooselucmaguntic Lake, I suppose. But the society gossip columns of a well-known Boston Sunday paper announced yesterday that Senator Frye was at his "log house, Moosehead Lake." It is a curious fact, nevertheless, that he has visited his camp on Mooselucmaguntic every season for many years, which is not a log camp at all and is more than fifty miles from Moosehead Lake. Newspapers do blunder occasionally. Mr. Calvin Austin, who has been a member of the Harry Moore fishing parties for several seasons, does not go a-fishing this spring. On the contrary, he sailed for Europe on Saturday to meet his bride to be, a sister of Harry Moore. The lady has been traveling in Europe for some weeks. The boys, several of his fishing friends, conceived the happy idea of giving Mr. Austin a "good send-off." They invaded his stateroom on the Cephalonia before she sailed and loaded it with flowers and all the best things of the season. They also chartered the tug Emily to take them back from Minot Light, going down to that point on board the steamer with their friend. The tug was well supplied with bombs and rockets, which were sent off as a parting salute by Mr. Austin's friends. But alas! the know-it-all reporter of a Boston daily announced that "the tug Emily accompanied the Cephalonia as far as Quarantine to take back the friends of a noted pugilist who was departing for Europe" and that "they saluted their friend right nobly." Mr. Austin is about as far from a pugilist as a man could be. His friends are naturally a little disturbed at the item.

SPECIAL.

LITTLETON SPORTSMEN.

WHILE waiting the other evening in one of the stores in town I became interested in a conversation which was being held among a group of four or five at the further end of the room.

"Talking of dogs reminds me," said one, "of a little fellow I had some time ago. I doubt if he has had his match in this whole country."

"What one was that?"

"'Twas old Skip; he was half setter and half spaniel, and a better dog I never had."

"'Twas the one that Ben Kilburn made that record with, wasn't it?"

"Yes, the same fellow. He shot fifty-eight partridges over him one day. Guess that ain't been beat by many."

"What became of the dog, Ran?"

"Well, he got foul of a flock of sheep, killed two or three and some one shot him."

"Too bad to lose a good hunting dog like that."

"Yes, an' if I'd known who 'twas 'twould have gone hard with the fellow."

"'Taint very often you find a dog that'll tackle sheep. Some of 'em have it born in 'em, but gen'rally if a dog is taken good care of and not ill-treated he won't kill sheep."

"Guess that's so, Ran; but did you know the town here paid $63 for killed sheep, and $33 was to one man, last year?"

"No, is that so?"

"Guess some one must have antied up."

"That dog of yourn was a good duck dog, wasn't he?"

"Yes, he'd bring a duck 'cross a lake for over half a mile. I've seen him do it lots of times."

Probably no dog in this section was better known than little Skip, for his reputation went even beyond the White Mountain region. His owner, N. W. Ranlett, is one of the oldest and most prominent hunters here. Years ago, when this region was not so thickly settled, he followed the trail of bear and deer for weeks at a time.

Mr. B. W. Kilburn, who is at the head of the largest stereoptic view works in the world, located in Littleton, is a hunter of no small magnitude. Every fall and winter he makes a trip into the woods, and his efforts are always attended with success. Prominent among his feats is the ascent of Mt. Washington in the winter. Few men have climbed the ice slopes of this monster more times than Mr. Kilburn, and more than one hardy adventure has been experienced by him in snow storms and darkness.

The five veteran hunters of Littleton are probably B. W. Kilburn, N. W. Ranlett, Charles Goodwin, G. S. Nurse and C. H. Nurse. All have owned valuable hounds, and some of them now are seen about our streets, who still awaken the echo of hill and dale as fox and deer dart forth in front of their keen noses.

For the last few years these veterans have taken little active part in hunting, though their interest in this line has not abated. They are always ready to tell a story, or hear any comment upon the experiences of our younger nimrods.

The other day Rev. J. B. Merrill, pastor of the Baptist church here, was in the *Journal* office, and while looking over a copy of the FOREST AND STREAM and reading some of the reports from fishermen, said he guessed he could tell a story about fish that few could re-echo. "It was only a few years ago," he said, "that in company with a friend I was fishing at West Newfield. We had been having some very good sport and were about winding up our lines when I felt a strong pull. For about five minutes I struggled, and then hauled out a large eel. It was some time before we could cut his back with a knife, but after chasing him over the ledge, we finally cornered him between two rocks. After we had taken him home and he was cut up and ready for the pan he weighed four and one-half pounds."

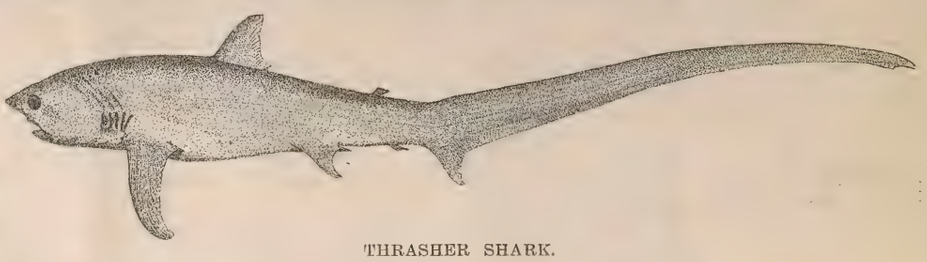
This is not an average fish story, and as it was told by a Baptist minister we cannot attach anything but truth to it. W. STANHOPE HUSTON.

LITTLETON, N. H., May 15.

FISHES OF JAMAICA.*

WE have received, through the courtesy of Mr. Edward M. Earle, Managing Director of the Jamaica Fisheries, Limited, Bulletin No. 1 of the Institute of Jamaica, being a provisional list of the fishes of the island of Jamaica. This list has been compiled by Mr. T. D. A. Cockerell largely from Mr. Richard Hill's list of the fishes of the island published in 1855, in which were enumerated 113 genera and 276 species; the Catalogue of the Fishes in the British Museum, and a list of 100 species published by Dr. Bean and Mr. Dresel, of the U. S. National Museum, in 1884.

As is well known, the number of fishes found in the West Indies is large, and in this list are recorded a total of 331 species. Many of the fishes of Jamaica are valuable for food, others are remarkable for form and color, while quite a number come under the category of game fishes. For the angler we note that universal favorite, the striped bass, the white perch, a number of groupers, some of which attain to a very large size, the brilliant hogfish, bluefish, mullets, porgies or sea breams, the snook or sergeant fish, the weakfishes, croakers, spots, the pompano, the tarpum, the swordfish, the sailfish, yellow mackerel, amberfish, bonito, Spanish mackerel, cero, kingfish, or caballa, cobia and barracuda. The mountain streams contain fresh-water mullets of rare excellence for food and with all the shyness and cunning of the brook trout—species well adapted to the art of the fly-fisherman. The goldfish and a small pickerel have been introduced into the island.



Among the highly colored kinds are the parrot fishes, the bristle-toothed fishes, the dolphin and the sculpin-like fish known in Jamaica as lionfish. Some of the curiosities are the sucking fish, the trunk-fishes, the soursop or porcupine fish, the sea toad or goose fish, the flying gurnard and the flute-mouth.

It will appear from the above hasty sketch that Jamaica has great wealth of fishes and can offer the angler and naturalist rich rewards for the time they may spend within her borders.

* Institute of Jamaica, Bulletin No. 1. A provisional list of the fishes of Jamaica, compiled by T. D. A. Cockerell, Curator of the Museum of the Institute, Kingston, Jamaica: Government Printing Office. 1892.

THE THRASHER.

A THRASHER SHARK fourteen feet long recently created a strong ripple of excitement at Nassawadox, Va., where it came ashore. The thrasher is a novelty in that region and its immense tail, shaped like a scythe-blade, captured the crowd. In Europe this animal is known as the foxshark, and in New England as the swingle-tail. The name fox is derived from the length and roughness

THRASHER SHARK.

of its tail, and thrasher is said to refer to its habit of defending itself by blows of its tail. Fishermen believe that the shark kills fish by striking them with this flexible weapon. There is also a theory that the trasher attacks whales, but this must be founded on error of observation or confusion of names; the thrasher which gives battle to whales is probably one of the killers, a species of *Orca*, which has strong teeth, wonderful agility and ferocity and formidable size, reaching a length of 30ft.

SCUP IN OIL FACTORIES.

Editor Forest and Stream:

I have always lived on the shores of Boston Harbor, and I have seen with regret the fishing grow poorer year by year, and I should like to know the cause.

My own idea is that fish that are killed cannot produce eggs or renew their species; but I am told that some philosopher had said several hundreds of years ago that "man could make no impression on the fish supply," and that the cause of the scarcity of fish was unknown. Now, I think that the wholesale destruction by the weirs, or trap pounds, purse seines and the menhaden oil factories must have an immense effect in diminishing the fish supply. There are now many thousands of barrels of scup yarded in the Seaconnet River, for which there is no market, as the consumption does not equal the catch just now, as all the scup are caught in the few days that they are running to their summer feeding grounds. I should suppose that if these fish were allowed to escape they would produce many millions of eggs, a large proportion of which might hatch. There are now about 900 barrels of scup in Church's oil factory, and most of those now yarded in Seaconnet River will probably find their way there in the course of a few days if the storm don't destroy the yards. I saw the steamer Seven Brothers unloading at the factory yesterday, and all the fish I could see were scup. This steamer is bringing them as fast as she can make the trips. A vessel named the Patience is now, at this moment, unloading at the factory. The fish are sweet and good. I think there will be hundreds of barrels of scup in sight at the factory for several days to prove my statements, if they should be doubted, or to satisfy anybody that these oil factories do put other fish besides menhaden into their vats. One of these porgy pirates captured 900 barrels of shad in Sheepscot River last summer, and sold a few to the farmers at 10 cents each, and threw all the rest overboard, as they had shot their spawn and were very lean. WILLIAM H. REED.

TIVERTON, R. I., May 15.

TOLEDO NOTES.

Editor Forest and Stream:

The unhappy fisherman at the head of Lake Erie has about made up his mind that he is to have no spring bass fishing this year. Ordinarily the very cream of the spring fishing occurs between the 15th and 25th of May, although in exceptional years it comes ten days earlier. Under Canadian regulations, the bass fishing at Pelee and the other islands just north of the international boundary has for many years opened on the 15th of May, and we have scarcely ever failed to strike the gamy smallmouth within the first two or three days. But this year the season was changed so as to open on the 10th, and our Dayton friends were landed on the island on the 9th, consistent with their usual custom of beginning the campaign on the first day. But with the exception of the 15th and a part of the day following we have had absolutely no bass weather since the 10th, although we have had every other kind conceivable.

Around the Bass Islands on the Ohio side it has not been possible to do any fishing, even if the weather had been propitious, since the Maumee River, swollen with the May rains, has unloaded about their shores several million tons of what the geologists call "silt," which bears a striking resemblance to what is commonly known as mud. These same freshets of course have put the river in such a condition that it will not be low enough or clear enough to work in the latter part of May or the first half of June, when our spring stream fishing is ordinarily at its best.

In the northern part of the lower peninsula of Michigan we count on our best bass fishing in the first half of June, and there is some compensation in store for those who are fortunate enough to strike Bear Lake or Crystal or any of the score of good fishing waters in that territory during the time named. This is also a capital season for trout in that region, and the man who knows where to go at this time will find a very agreeable variety in his outing. JAY BEEBE.

TOLEDO, O., May 21.

Hudson River Striped Bass.

KINGSTON, N. Y., May 18.—A striped bass weighing 71lbs. was caught in a shad net near this city by Ira Cole last night. This is said to be the largest striped bass ever caught in the Hudson River. It measures 4ft. 1in. in length and 37in. around the belly.—*New York Times.*

NEW HAMPSHIRE WATERS.

LANCASTER, N. H., May 23.—The long looked for "warm spell" has not reached here yet; the two or three rain storms of the past two weeks have been cold and have done but little to start vegetation, and it is reported that 6in. of snow fell at Fabyans and Twin Mountains, fifteen miles east of here, last Saturday. Pilot Range Mountains, just east of our village, were as white as mid-winter. Such are the disadvantages under which the angler must labor in order to secure a few trout, and very few they have been thus far this season, too. I have yet to hear of a good catch, though our local anglers are an industrious set and have been unusually persistent this spring.

The ice is out of the Connecticut Lakes, also Diamond Ponds. Both Noyes, of the Diamonds, and Bumford, of the lakes, were to send word as soon as the fish began to appear, but I hear nothing. I expect ere long to be able to send you a "certified" account of the numbers and size of the fish taken at some of Coos county's famous fishing resorts.

Saturday a friend and myself drove out to a pond or stream, which I had never visited before, and I was quite surprised to find so favorable a fishing ground so near by; and hour and a half drive from here. Owing to the cold storm we only got a few, but they were beauties. Later on, when they rise to fly, I anticipate some sport, and should any of the readers of this chance to be in Lancaster this spring, and have a day to spare, I would be pleased to have them give me a call and, if they feel so disposed, assist me in "foreclosing on a mortgage" which I think I have on some of those trout. ROB.

COLEBROOK, N. H.—Among the curiosities that were found at the hatching house that was erected last fall east of the village of Colebrook, was a trout that had two heads. It is living and doing nicely in a jar of fresh water in the store of C. Colby. Twenty thousand trout fry were taken from this hatchery this spring and placed in Diamond Pond. There are some 20,000 young salmon there at present, which are to be removed to the Connecticut Lakes a little later in the season. HALFORDE.

MICHIGAN TROUT STREAMS.

GRAND RAPIDS, Mich., May 20.—Trouting in this State has not yet opened with any degree of liberality, owing to the cold weather and the swollen condition of the streams from the constant rains of the past two or three weeks. There is quite an array of anglers at this place eagerly waiting for clear streams and bright sunny days to industriously indulge in the slaughter of the tinted innocents. I may take a hand in it myself by way of a preparatory course for a raid on the big beauties of the North Shore.

The weather is now really "beastly," cold and rainy, and overcoats are really necessary for outdoor comfort.

I almost daily look over my stock of tackle to ascertain if it is perfect in every particular, and also as a gentle reminder of the sport in prospect. My invoice of flies I have is all O.K., for I have them from the minimum to the maximum and from Alpha to Omega.

The river here is on a rampage, manifest evidence that there will be no trouting till the warm days of June arrive. I am quite patient with the adverse state of the weather, but I assure you that I would generously pay for an opportunity now to hang and kill a redcoat or two of a few pounds. ALEX. STARBUCK.

Sunday Fishing.

ULSTER COUNTY, New York, bids fair to lose its attractions to many New Yorkers who like to combine a quiet Sunday in the woods with a little trout fishing. Early in May two business men journeyed to Shokan, and from there drove five miles to a favorite stream, where they were soon overtaken and threatened with arrest for Sabbath breaking by Game Constable Van Benscoten. On the following day they were arrested in earnest, taken to Olive City, tried before Justice Bardin, and fined $5 each with costs of prosecution. The offenders paid $15 05 and left the county, probably never to return. This will doubtless reduce the inflow of summer visitors to Ulster and cut off a large part of the income of its farmers.

Pennsylvania Trout.

PIKE COUNTY TROUT have thus far proved a delusion and a snare to anglers, owing, perhaps, to low water and the cold weather. In Saw Kill Creek only a few small trout have been taken; large fish are conspicuous by their absence. Bushkill Creek and the streams in the vicinity of Dingman's Ferry, Pa., are in the same disappointing category, and here the general public are cast down by an additional burden of trespass signs which threaten dire punishment to all who lack vested rights in the fugitive trout. Verily the Pike county brook trout is fast becoming as uncertain as last year's star ball player.

Shad Caught with Grasshoppers.

IN a paper on fishes of Lake Ontario (p. 194 of Bulletin U. S. Fish Com. for 1890), Dr. H. M. Smith records the capture of 26 shad by Mr. H. L. Matheson, of Oswego, N. Y., at Thousand Island Park, St. Lawrence River. This was in August, 1881, when the fish were apparently running down the stream. The bait used was grasshoppers. Several shad were taken at the same time with the same bait by other anglers.

Lake Champlain Fish.

Editor Forest and Stream:

I noticed recently an article from a Vermont correspondent complaining of the netting of fish across the Canadian line in Missisquoi Bay. It seems that one McPhee gets a permit or license to fish from the Canadian or Provincial Government for a nominal sum, he being, it is claimed, a politician of some note. He commences to net before the ice goes out and keeps it up while the fishing lasts in a manner to pay, and catches an enormous quantity of wall-eyed pike, together with other game and food fishes. If the people of Vermont would put a fishway in the dam at Swanton and cut a passageway through the Sand Bar bridge, it would keep a large number of fish in Vermont waters that now go further north to spawn, as a way through the bridge would afford them access to the Lamville River without going around Grand Isle, a thing I don't believe they will do, as they now follow the east shore north until they come to the Missisquoi River, when those who care to run up that and the balance go on north. But the river below the dam is not all good spawning ground and a fishway would let them go up, and by relieving the over-crowded stream below, cause three fish to run up the river where there is one now.—DEXTER.

Conroy's New Catalogue.

MR. THOMAS J. CONROY, who has recently removed his fishing tackle establishment to No. 308 Broadway, has just issued a new catalogue. He charges twenty-five cents for it. Every man is warned not to send for it unless he has time to go fishing, for its pages set forth about everything an angler can need or may indulge in as a luxury, and everything is set out with illustrations and arranged so seductively that to turn the leaves breeds a longing to go fishing. The Conroy catalogue is excellently arranged and is a very complete and handsome specimen of its class.

Length and Weight of Bass.

MR. J. C. CLAGETT, of Frederick, Md., on Sept. 20, 1884, caught a small-mouthed black bass at Point of Rocks, in the Potomac River, which measured 23¾in. in length, 14¾in. around behind the gills, 16¾in. in greatest girth, and weighed 6lbs. 10oz.

HOW TO TIE SALMON FLIES.*

THIS is one of the most beautiful books which it has been our pleasure to review—in quality of paper, beauty of typography and illustration and in its orderly arrangement. Capt. Hale herein relates "the experiences and ideas of an amateur fly-maker and fisherman; the desire of the writer being to describe the details of the art of salmon fly-making in such homely language as would convey the several processes clearly to the comprehension of all beginners who care to approach it." All the essentials to the fly-maker's art are clearly set forth. The seven principal chapters of the book relate (1) to hooks, (2) to materials, implements, etc., (6) on dying furs and feathers, (4) gut loops, etc., tags and tails, (5) butts, ribbing, bodies and hackles, (6) hackles, pointed bodies and grubs, (7) wings; and in the appendix are given full directions for the dressings of forty flies. The text is thoroughly illustrated by seventy figures, drawn from photographs. For these photographs Capt. Hale acknowledges his indebtness to Mr. C. O'Meara and to Mr. R. B. Marston, of the *Fishing Gazette*, for assistance and useful suggestions.

However amateur fly-tyers in America may differ from Capt. Hale in little details as to choice of hooks and the various odds and ends belonging to the fly-tyer's outfit, they will richly enjoy the reading of his book and place it among the classics in their libraries.

*"How to Tie Salmon Flies," A treatise on the methods of tying the various kinds of salmon flies, with illustrated directions and containing the dressings of forty flies. By Capt. Hale, East Lancashire Regiment, London: Sampson Low, Marston & Co., Limited. 1892.

"THE PRACTICAL ANGLER."

THE above is the title of the latest publication in book form from the pen of Kit Clarke, the author of that fascinating little volume "Where the Trout Hide," that holds so warm a place in the affections of the disciples of rod and line. "Where the Trout Hide" is eminently a book for fishermen, written by a fisherman. Not a guide book or a manual for the novice in the art, but the experienced angler's companion and friend, destined to occupy a place in his pocket or gripsack when starting out afishing, alongside those other trifling packages, necessary adjuncts of a fishing excursion, one containing glossy sheets of variously spotted cardboard, the other—if report speaks truly—filled to the bung with a liquid destroyer of microbes, warranted to have come from old Kentucky, the south of France or the Highlands of Scotland, and destined to be mingled with the water drawn from the lakes and streams, "where the trout hide." What roars of laughter have followed the readings on the cars or by the camp fire of some of Kit's drolleries, and what a delightful *raconteur* sits by the side of the solitary camper by a far northern lake, who reads and feels the excited blood coursing through his veins as he fancies he sees our author's struggles on Lake Edward with 13lbs. of *fontinalis* almost evenly distributed between his three fly-hooks or keeps the tally and holds the "kitty" during that exciting game of fish poker at Lake Hopateong.

How much, too, of the genuine experience of every angler is recorded in this booklet. In "The Practical Angler" there is no romancing. As the author relates in his preface, the book is written for the benefit of the man whose angling education, to his great misfortune, has been neglected, and who desires to acquire a knowledge of the most delightful health-bringing and harmless recreation in existence. Technical phrases and rhetorical pyrotechnics are studiously avoided, as they are of no use, as Mr. Clarke well says, in the practical pursuit of catching fish. "The Practical Angler," as all old fishermen who look into its pages will readily concede, well fulfils its mission of teaching—so far as precept can teach—how, where and when to catch fish, giving a description in the author's well-known and infatuating style, of American game fish caught with hook and line, methods of capture, their habits and haunts, and all requisite information whereby the novice can acquire the art, and enjoy the delightful recreation of going a-fishing. One of the most valuable features of the book is the chapter containing "one hundred hints to anglers," for many of which Mr. Clarke will undoubtedly receive the thanks of many a veteran in the piscatorial art. The illustrations of the various American and Canadian game fish are excellent, and worthy a place in any authentic text-book of natural history.

Canadian anglers, and Americans accustomed to whip Canadian streams and lakes, have been placed under deep obligations to Mr. Clarke for having assisted in the great work of popularizing and making known the principal resorts of successful fishermen in the Lake St. John region of Quebec. In the work before us he has added to these obligations by a readable chapter upon the ouananiche or fresh water salmon of Lake St. John. Landlocked salmon these fish are not, for they descend the Saguenay to the sea, and have been captured at or near Tadousac. Mr. Clarke is not the first author of repute who writes the name of this illustrious game fish "winninish," and the spelling undoubtedly aids the pronunciation. But this is the only good reason that I can find for substituting for a pretty, melodious Indian name with a meaning, an English form of the word that has neither derivation, meaning nor character. *Ichi* is an Indian diminutive when used as an affix, *ouanan* in the Montagnais dialect signifies salmon; so that "ouananiche" is "little salmon." The chapter on this remarkable fish in "The Practical Angler" is a valuable contribution to the literature of the subject; the description of the species and of the angling for ouananiche is such as only an angler who has handled the fish and enjoyed the sport of fighting it could possibly write, while the time and place for taking it in springtime in rivers tributary to Lake St. John, are correctly defined. It may be added, however, that the ouananiche is to be freely taken in the same rivers in the late summer months after it has left the Grande Discharge.

The presentation copies of his exquisite book received by a few of Mr. Clarke's privileged friends, have looped up upon their satin covers, with the charming originality that characterizes him, one of the favorite flies of the talented artist-angler-author.

QUEBEC, May 7. E. T. D. CHAMBERS.

"THE HUMAN SYSTEM is like a bow, which, in order to preserve the tension must be relaxed occasionally, and which becomes a worthless thing when its elasticity is no longer apparent."

Moral: Take a day off and go fishing via the Erie R. R.—*Adv.*

NEAR-BY FISHING AND SHOOTING.—A few vacancies exist in a club owning 7 miles of excellent trout streams and 1,500 acres of good quail, ruffed grouse and woodcock grounds within 30 miles of New York. Address P. O. Box 25, New York city.—*Adv.*

Fisheulture.

AMERICAN FISHERIES SOCIETY.

THE twenty-first meeting of this organization was held at the Holland House, New York, May 25-26, and brought together one of the largest and most influential bodies of men that has up to the present assembled to discuss fish and fisheries. In the absence of the President, Dr. J. A. Henshall, who was detained in Washington by sickness, the Vice-President, Dr. Joel C. Parker, of Michigan, presided. At roll call thirty-six members responded to their names.

Letters were read from Dr. Henshall and A. N. Cheney, both of whom were unavoidably absent. C. J. Bottemanne, of Holland, would have attended the meetings but could not leave his duties. Raveret-Wattel, secretary of the Société National d'Acclimation, France, sent greetings and regrets. Fish Commissioner Jno. W. Titcomb, of Vermont, could not be present because of work for the State, but his colleague, Mr. Warren, represented the commission.

The non-resident members of the Fisheries Society were invited by the New York Society for the Protection of Game to dine with them at the Holland House on Wednesday, May 26. The South Side Sportsmen's Club invited the members to visit their preserves at Oakdale, Long Island, and partake of a collation; a special train was provided for the excursion.

The proposals for membership included forty-five names for active membership and two as corresponding members, the latter being Mr. Thos. Andrews, of England, and Dr. Desio Vinciguerra, of Rome.

The report of the treasurer, Mr. H. C. Ford, showed a comfortable balance to the credit of the Society. The corresponding secretary, Mr. Doyle, stated that the numerous circulars sent out to increase the membership had brought scant returns, and more was done by personal efforts on the part of Mr. Cheney, Mr. Amsden and other members.

The committee on nomination of officers for the next year are W. L. May, H. H. Carey and W. A. Butler, Jr.

The next order of business was reading of papers.

J. E. Gunckel, of Toledo, O., read a very interesting article on "Fish and Fishing in Ohio," and was followed by Prof. J. D. Quackenbos, who read a paper by Mr. A. N. Cheney, of Glens Falls, N. Y., on "The Food of Fishes," also a paper by Wm. P. Seal on the "Present Status of Trout Culture." The reading of this paper was not concluded when the FOREST AND STREAM went to press.

Those present were: F. J. Amsden, John Gay, H. C. Ford, C. C. Warren, H. H. Carey, L. Streuber, W. A. Butler, Jr., Hoyt Post, H. Whitaker, Dr. J. C. Parker, W. H. Bowman, Fred Mather, E. P. Doyle, W. L. May, G. B. Goode, J. F. Ellis, F. N. Clark, J. E. Gunckel, Henry Burden, Dr. E. Bradley, J. D. Quackenbos, W. H. Rogers, C. B. Reynolds, W. F. Page, L. D. Huntington, T. H. Bean, Jas. Benkard, A. S. Bickmore, W. L. Gilbert, D. Morell, C. F. Orris, Dr. F. J. Ferrall, T. W. B. Hughes, J. W. Hoxie, Dr. W. H. Hudson, Judge Asa French, W. L. Powell.

FISHERIES OF THE PACIFIC STATES.

FROM Census Bulletin No. 167, dated March 4, 1892, and prepared by Mr. Charles F. Pidgin and Dr. Hugh M. Smith, we learn that in 1890 the fisheries of the Pacific States, U. S., gave employment to 13,850 persons, $6,498,239 were invested in the industry, and products to the value of $6,387,803 were obtained. According to the tables, the fisheries of California are more important than those of either Oregon or Washington. The canning of salmon is still the most important branch of the fisheries.

In the three States there were 63 canneries, and the quantity of fresh salmon put up is given as 41,632,223lbs., for which the fishermen received $1,783,227. The total output of 622,037 cases was worth, at the ruling market prices, $3,703,838.

The fisheries of this region, as a whole, show a decided advance over 1880. Increase in capital invested, 182 per cent.; value of products, 50 per cent. There has been a decline in a few special branches of the fisheries. Among the causes of the increase are mentioned: "The rapid growth of the country, the natural abundance of fish in the rivers and adjacent to the shores, and the decreased supply of mackerel, whales, etc., on the Atlantic coast. Especially worthy of notice is the great increase in the whale fleet of this coast and the maintenance of the extensive salmon fisheries in the face of the enormous yearly drain on the species."

In the general remarks Messrs. Pidgin and Smith call attention to the fact that the natural conditions of our Pacific coast are unusually favorable to the development of fisheries of great importance, which are as compared with those of our northeast coast in their infancy. The off-shore vessel fisheries for miscellaneous food fish are yet to be developed. San Francisco vessels monopolize the whole fishery, and this port has become the greatest rendezvous for whalers in the world. "The river fishery for salmon on this coast is the most extensive in the world, and the business of canning salmon, which is dependent on the fishery, is of great magnitude." The shore line of California is given as 1,910 miles: that of Oregon as 1,170, and of Washington 1,345.

The yield of shrimp has doubled in value; the oyster industry returns products worth half a million of dollars.

Tables showing amount of capital invested, vessels, boats, nets, fish wheels, seines, and other apparatus used, number of fishermen and shoresmen employed, canning of salmon, etc., are given. The values of the different fisheries were as follows:

Fish	$2,865,349.00
Mammals and their products	2,523,281.60
Mollusks, crustaceans and reptiles	986,733.00
Secondary products	12,440.00

The average value of the fish proper is 4¼ cents per pound; that is the gross price received by the fishermen. Salmon constituted 72.41 per cent. of the entire quantity of fish taken, and 72.69 per cent. of the value. No other single species shown exceeds 5.33 per cent. of the catch, or 3.14 per cent. of the value.

In the mammal fisheries the fur seal ranks first, being 63.66 per cent. of the total value of all skins, bone, ivory and oil taken, or nearly three times the value of the whale fishery, which is next in importance. Sea otters ranks third, and yield 8.76 per cent. of the value. Among the shellfish oysters rank first, while the yield is but 9.32 per cent. of the shellfish fishery, the value is 61.01 per cent. of the total. Shrimp, prawn, abalones and clams are the other objects of these fisheries.

A table giving a summary of the fresh fish trade of San Francisco in 1888 and 1889 is very interesting. For instance, the average price of Spanish mackerel is given as $1.50 per pound, pompano $1, striped bass $1, eels 30 cents per pound, while brook trout are 30 cents, lake trout 25 cents and anchovies 5 cents per pound. Notwithstanding the fact that fresh-water perch are 12½ cents, salmon are a fraction less than 7 cents. To an Eastern man's eye it looks as if the subjects and prices were mixed, but we are assured by Dr. Smith that these figures are practically correct.

The average price of oysters is given at $3.90 per bushel, hard-shell clams $3 per sack, crawfish 7½ cents per pound, shrimp 8 cents per pound, prawn 20 cents, terrapins $3 per dozen, frogs $3 per dozen and turtles 5 cents per pound.

Although of small size, but 25 royal octavo pages, this bulletin is full of interesting statistics and of great value to those seeking for information about the west coast fisheries.

Netters Taken In.

COMPLAINTS concerning unlawful fishing in Vreeland's Pond, in Passaic, have been numerous of late. It lies without easy reach of the sportsmen of that city, but the recently imported Hungarians seem to have arrived at the conclusion that they can do as they like with the pond and the fish in it. The recent conviction of Domus Barkalow, who has been frequently suspected of having netted the lake, did not seem to have the deterrent effect expected and nets have been used there since. A number of the Hungarians were in the habit of going after dark and netting all they could get hold of. Fish Warden Shriner made it his business to watch the place last night. Shortly after dark two Hungarians put in an appearance and proceeded to use a large dip net. The net was about ten feet square and was placed in the water; after leaving it there a few minutes the Hungarians raised it. At this juncture of affairs the Warden put in an appearance, confiscated the net and arrested the violators of the law. They offered no resistance and were at once taken before Justice of the Peace Hamilton M. Ross, where they pleaded guilty. They had the same attenuated excuse to offer, "Ignorance of the law and poverty." One of them ingenuously supplemented this excuse by saying that he had been told that there was no danger of being caught if they did the netting after dark. The Justice imposed the statutory fine of $20 and costs in each case. The Hungarians declared they had no money, that they had been trying to save up enough to buy shoes, etc. The Justice proceeded to make out a commitment, when one of the two weakened and sent out and got the necessary cash. The other held on a little longer and then also weakened and paid up. The Warden hopes that this will break up the unlawful practice. The names of the convicted were Stephen Petrie and William Morrisse.—*Paterson, (N. J.) Daily Press May 18.*

Trout Poisoned by Mill Refuse.

FISH COMMISSIONER RAMON E. WILSON says that the poisonous liquids used in the paper mills along Paper Mill Creek and which are emptied into the creek have poisoned the trout. The Commissioners are, however, "powerless," they say. Who ever knew them to be otherwise? They are in the attitude of the Railroad Commissioners. They request that somebody will do the necessary watching or investigating and make a complaint. Perhaps this is not a remarkable similarity, seeing that the Fish Commission is a sub-department of the Southern Pacific. The company has one of its attorneys on the board. It always takes care to have a tailor or two or an attorney or two on all these commissions, boards, etc. Sometimes they can't help much, but often they are very useful.—*Report, San Francisco, April 26.*

The Kennel.

FIXTURES.

DOG SHOWS.

Aug. 31 to Sept. 3.—Second Annual Dog Show of the Blue Grass Kennel Club, at Lexington, Ky. Roger Williams, Sec'y.

Sept. 6 to 9.—Second Annual Dog Show of the Hamilton Kennel Club, at Hamilton, Canada. A. D. Stewart, Sec'y.

Sept. 6 to 9.—Rochester Kennel Club, at Rochester, N. Y. Dr. O. S. Bamber, Sec'y.

Sept. 12 to 16.—Fourth Annual Dog Show of the Toronto Industrial Exhibition Association, at Toronto, Canada. C. A. Stone, Sec'y.

Sept. 20 to 23.—Western Michigan Kennel Club, at Grand Rapids, Mich. H. Dale Adams, Galesburg, Mich., Superintendent.

Sept. 27 to 30.—Dog Show at Ottawa, Can. Alfred Geddes, Sec'y.

Oct. 25 to 28.—Omaha Kennel Club, at Omaha, Neb. E. L. Marston, Sec'y.

Nov. 23 to 25.—American Pet Dog Club, at Madison Square Garden, New York. Marion E. Bannister, Cranford, N. J., Sec'y.

FIELD TRIALS.

Sept. 6.—Manitoba Field Trials, at Morris, Man. A. Holloway, Winnipeg, Man., Sec'y.

Nov. 7.—International Field Trials Club, third annual trials, at Chatham, Ont. Amateur Stake, Nov. 7. Open Stakes, Nov. 8. W. B. Wells, Sec'y.

Nov. 7.—United States Field Trials, at Elizabethtown, Ky. P. T. Madison, Indianapolis, Ind., Sec'y.

Nov. 8.—New England Field Trials, at Assonet, Mass. Geo. E. Stickney, Newburyport, Mass., Sec'y.

Nov. 14.—Fourth Annual Trials of the Brunswick Fur Club, at Princeton, Mass. J. H. Baird, Sec'y.

Nov. 15.—American Field Trials, at Columbus, Ind. W. J. Beck, Sec'y.

Nov. 21.—Eastern Field Trial Club Trials, at High Point, N. C. W. A. Coster, Sec'y.

Nov. 28.—Philadelphia Kennel Club Trials, at High Point, N. C. F. G. Taylor, Sec'y.

Dec. 5.—Central Field Trials, at Lexington, N. C. Col. Odell, Sec'y.

THE MERCER CASE AND THE C. K. C.

Editor Forest and Stream:

A case can only be prejudged when new facts may be forthcoming later which might alter the decision if taken into account. All the facts have long been before the public, and the Ottawa committee had already acted upon them before my letter appeared. The facts are these: Mr. Mercer, a member of the Ottawa committee, knowing the rules of bench shows well, entered another man's dog without his knowledge or consent, by which he obtained a money prize and retained the same until obliged to return it by the command of the Ottawa bench show committee. If this is not fraud, what is it?

There has been a great deal of sophistication about this case, and it is about time things were called by their right names. Apologies are excellent in their place, but they do not alter the nature of this transaction.

Had the C. K. C. uttered any uncertain sound in this case they would simply have been encouraging others to indulge in similar sharp practices. Strong letters on this subject were addressed to me, and the purpose of my letter in the *Canadian Kennel Gazette* was to strengthen that public opinion on which the respectability of our Canadian kennel world depends, and I shall not hesitate to speak my mind on any similar occasion. MOUNT ROYAL.

[The above does not alter our opinion as given in "Dog Chat" last week.]

LEWISTON DOG SHOW.

THE members of the Androscoggin Kennel Club should have no reason to feel anything but highly elated at the success of their first venture in giving such a nice little show as that held May 17 to 19. The class of dogs was considerably higher than one would expect to meet, considering the limited prize list, and this season of the year when the regular handlers' teams are scattered to their respective homes. The dogs entered numbered 142, and therefore, when once started, it did not take the judge, Mr. James Mortimer, very long to place the ribbons in the respective classes.

As other matters pertaining to the show will be treated elsewhere, I will at once turn to a description of the dogs present. A complete prize list was issued last week in FOREST AND STREAM, ahead of any other kennel paper.

MASTIFFS.—There were no challenge classes, and of the three dogs present in the open class, Frank and Fritz supplied the winners. Frank's superior size, bone and body offset any slight advantage Fritz may have in shape of head, the latter being more massive in skull and shorter in muzzle, but Frank's head is not a bad one though rather long; he is a trifle cow-hocked but moves well; Fritz is small, has a bad tail and his forelegs are not straight. Madge Minting had some difficulty in winning over Galatea, as the latter is straight on her forelegs, has quite as good a body and skull but is pinched in muzzle; Pansy, third, hardly deserved her place, as she is small, narrow in head with ears cocked high and well back. There were no others in the class.

ST. BERNARDS.—The presence of the dog of dogs, Sir Bedivere, gave additional interest to this breed, though to the majority of the unsophisticated visitors to the show he did not command that attention that is usually accorded him when shown at the larger shows. It would not be possible for Sir Bedivere to have, barring his coat, looked in better health; his actions were quite kittenish and he romped around in a very different fashion than when he was shown at New York in the early spring. Al Cooper, his keeper, deserves great credit for the way he has him. This dog is now being kept on common sense methods, dosing and drugs have been abandoned and plenty of good walking exercise and solid food substituted. He was alone in the challenge class. In open dogs, Mr. Sears showed his wisdom in running up to handle his young dog Wyoming Hesper himself, as he met no mean competitor in Mr. Miles's Rudolph. Hesper has a capital head that with time will about follow that of his illustrious sire in general formation; he loses, however, in forelegs both in bone and straightness to the second winner, who also is much better behind, Hesper being rather straight in hocks; both dogs are light in body, but as Hesper is only a year old and the other three, it is hardly fair to criticise the former severely yet. Prince V., third, lacked shadings and was not a correct shade of orange; his disgruntled owner was wrongly allowed to take him out of the show as soon as the ribbons were given out. The well-known Lady Adelaide was the only entry in bitches; she looked very well, albeit a trifle too fat. Two nice looking pups, Roswall and Tabatha, with no particular merit, were shown in the puppy class and placed as named. Sir Bedivere, of course, won the special for best of the breed.

J. E. LAWRENCE.
President Androscoggin Kennel Club.

BLOODHOUNDS.—Quite an unexpected show of these dogs with the well-known Jack the Ripper upholding the challenge division. His kennel companion, Belhus, the only entry in open dogs, will, however, soon divide the honors with him, as he shows much more quality, though his ears are not carried so well. In bitches, Delphia, also from Mr. Glazier's kennel, had everything her own way. An abbreviated tail mars her appearance; she is also too sharp in muzzle and needs more swell of ribs, but leather and legs are well formed.

DEERHOUNDS.—Only one entry, Tasso, that is too short in head, not enough bone and rib, is long cast and looks more like a bitch than a dog; is also soft in coat.

GREYHOUNDS.—These graceful dogs made a brave showing. Mr. Pope's crack dogs were entered too late for competition but were nevertheless present and made quite a pretty group under Stewart's care. In dogs Pious Pembroke was an easy winner from back of the head. Mack, second, a local dog, is thick in skull, would do with more rib, is long in couplings and falls away too sharp in quarters. Ruby, third, is better in body than the second but loses in head and is a much plainer specimen; both had fairly good running gear. Lady Clare, who seemed in whelp, won nicely from Marguerite, vhc. at Boston this year, the latter is well ribbed, stands on nice legs, good quarters, but has a wretched tail and is heavy in shoulders and short in muzzle. Lady Laville, from the same kennel, is light in loin and bone and needs more rib.

POINTERS.—This breed was very well represented, considering the size of the show. In challenge dogs Lad of Kent, in Tempest's absence, had no competition, and this capital pointer was looking in elegant shape. In heavy open dogs the Boston winner, Duke of Dexter, which is owned in Dexter, Me., won well from Devon Ranger, who was in much better condition than when shown during the circuit; he still looks leggy and wants more back rib; still he has many good points about him. Don Graphic, third, stands on good legs, but is heavy in shoulders, short in neck, needs more rib and also loses to the others in head. Bracket's Lad, entered in this class, was transferred to the light-weights, where he won. In heavy-weight bitches Jarvis's Lass of Kent was unopposed, but was nevertheless quite prepared for the keenest competition. As stated before, Bracket's Lad won without competition in the light-weight dogs, Dictator being absent. Bloom of Kent was picked for the winner in the bitch class; she is not filled out yet, needs more rib, is narrow in front and her head is plain and rather short. Donyo, second, has a Bang Bang head, nice body, but coarse shoulders. Bonita, third, is too prominent in eye, fair skull, but is pinched in muzzle, is light in bone and was shown too fat. Mollie, vhc., has a well formed head, spoiled by lack of sufficient stop, is full in eye, but stands on good running gear. Lad of Kent won the special for best in show.

ENGLISH SETTERS.—There was no lack of entries in this breed, but the quality was far from commendable. In open dogs the judge withheld first and second and gave third to San Pablo, who, if he had a little more stop, would have a nice head; fair front, light bone and body; but being only 12 months old, needs time to fill out, and in a show like this might have had a place higher up. Robert Gladstone deserved some commendation for his good body, the others were rightly passed over. In bitches, the Boston winner Blue Nell, was head and shoulders over the others, the nearest of which could only get vhc., this was Topsy F, whose ears do not hang close enough, is too short and thick in head, a little wide and heavy in front and body not deep enough, his well formed neck is in striking contrast to his other mediocre points. Cleo, bc., the secretary's dog, is too fat, stands on fairly good legs, is heavy and coarse in head and shoulders, and hocks are too close together, Saddie C. is houndy headed and "bull necked." In puppies, San Pablo took first, this time over High Low Game, who is big and coarse. Blue Nell of course won the special.

IRISH SETTERS.—With the Oak Grove Kennels out in force, led by Joe Lewis, the quality in this breed was about as representative as can be shown. All the winners were described so often during the past season that it is needless to more than draw attention to their placing. Duke Elcho and Seminole furnished the challenge dog winners, and Norna and Edna H. occupied their accustomed positions in the corresponding bitch class; they all looked well. In open dogs a very promising youngster, Kildare Glenmore, a son of Elcho, Jr., out of Ruby Glenmore, won well over Kildare Elcho, a brother of the above dog from the previous litter; Glenmore has a capital head, typical and strong, good neck and shoulders, body needs time, pasterns could be stronger, but color and coat good, in fact a dog, if he goes on well will take some beating; Kildare Elcho loses considerably in head, but is at present better furnished in body, and a little better on his legs and superior in color; Exile, third, was not in good form, showing the effects of his spring travels, and is not so good behind as the others. Onota Bell proved the winner in bitches, she is plain in head, nice body, but feet turn out a bit; Bonnibel, also from the Oak Grove Kennels, has a short English type of head, is better ribbed than Onota and is stronger in loin and of a richer color; Maid of Borstal is a plain bitch, and was spoken of at Boston. Alice Kent, vhc., loses in condition.

GORDON SETTERS.—In challenge bitches Heather Belle upheld the honor of Mr. Blossom's kennel, and his Heather York, in dogs, won easily over Dash L., who has also done some winning at other shows; he loses in head and tan, which is smutty, and is slack in back, heavy in shoulders and short in neck. Flomont, the winning bitch, is known to the veriest tyro in show matters.

SPANIELS.—Rex T., the winner in the field class, is a very moderate specimen, short and thick in head, dachshund front and coat inclined to curl. Dixie, the only entry in the cocker dog class, a curly-coated, oversized cocker, was transferred to the field class. In bitches the pretty little Woodstock Dora made up for the deficiency of quality in the other classes; she was shown in nice shape.

BEAGLES.—No challenge entries. A new one came out in the open dog class, Diamond Forest; his sweet expression, nicely formed head, well shaped body, well carried stern and good legs make one pass over his soft coat and the fact of his being a trifle leggy. Tomboy, second, was the winner at Philadelphia and Washington. The others were over-sized. In bitches the well known Forest Queen won very handily from Lady Flute, whose flat face, wide front and faulty quarters, not to speak of her soft coat, were very much against her. Parthenia, third, is long cast, though nicely ribbed up, has good bone, but her feet turn out, and her head, though well formed, is too long. In the class for under 13in. Butterfly, a little round in skull and with too much stop, has, withal, a nice expression, good leather, body and legs. Forest Daisy was absent, and so was Clyde in the dog class.

FOXHOUNDS.—This breed was not represented as well as I expected to see it in such a fox-hunting country as Maine and it looked as if the worthy fox-hunters had sent the cripples and kept the workers at home. In open dogs Bouncer has a well-shaped head but is light in loin, shallow-chested, shoulders heavy and not oblique enough, but boasts a capital hound coat. Beecher, second, is one of Dr. Thurber's pack of American type of hound, is slack in back, long-waisted and hocks turn in. Fred is also not so long in back as he should be, and is not straight in forelegs, nor is he equal to the others in head properties. Jack, vhc., has a heavy, coarse head, and is not good enough on his pins; his coat is correct, however. Femur, the second prize winner at New York, won easily from Gipsey, whose heavy shoulders and faulty legs offset any advantage she has over Femur in head. In puppies Femur and Beecher were placed as named. Beecher, when he fills out, will be quite a fine hound.

COLLIES.—These were few in numbers, but the Kilmarnock Kennels showed a couple that can hold their own in more important shows. In open dogs, Renown, well-known, had no difficulty in accounting for Strap, whose thick skull and blunt muzzle could get him no nearer than c. In bitches, that sweet-faced collie Mother Shipton was alone and was looking in tiptop fettle. Lady Martha, in puppies, with her short head, fat body and soft coat, could not expect more than a third.

POODLES.—Black Jack, quite a fair specimen, a little woolly in coat, good head and ears, but a little light in loin, was the recipient of premier honors and the only one in the class.

BULLDOGS.—Carisbrooke was the only one with any pretensions to proper bulldog type, and he is well known but hardly in the front rank. Bessie was the only representative in bitches; she is not deep enough in muzzle, is light in bone, not out enough at shoulders, but nice body.

BULL-TERRIERS.—A familiar face in Comet turned up in the dog class, and though he is too much cut out before the eye has many good points. In the light weight division the prizes were withheld from a motley crew, and the only Boston terrier, with one ear up and the other down, was turned out for being undershot—a comical little parody on the breed he is.

FOX-TERRIERS.—Nearly every one of the entries in these classes are known more or less to fame. In dogs Ebor Spendthrift won his first blue ribbon in this country, beating Warren Tripper in head; the latter has too much stop, and is too full in skull, nice body, bone, and ears nicely carried. In bitches the well known Warren Sparkle, also from the Wilton Kennels, had to succumb to Venus, whose legs and feet could be better, head needs more stop, ears carried too high on head, and was hardly in show shape, having just left some puppies; Sparkle's round skull, weak muzzle, however, put her back; she has a fair front and nice body.

IRISH TERRIERS.—Two fairly good ones turned up in the dog class, the verdict being in favor of the wheaten Sharon Rue, who is better in body, front and bone than Valley Boxer, whose head is a trifle longer than the other's, but his feet and pasterns should be better; he is leggy and not furnished in body as well as the younger dog. In bitches Colleen Rue's smarter head, though faulty in muzzle, too sharp, better bone and more finished appearance served to put her ahead of Salem Witch, who is leggy, light in body, drop ears and not very well carried, good coat; considering the amount of black on Colleen's rump and loin, the decision must have been in doubt, especially as the latter is undershot.

BLACK AND TAN TERRIERS.—In challenge class Matchless was unopposed, and so was Prince Raglan in the open dog class. Messrs. Toon & Symonds also furnished the winner in the bitch class with Rosette, who beats her competitor Tiney in nearly every particular, the latter being one of the what might be termed "ordinary street terriers." Skye terrier prizes were withheld from some nondescript Yorkshires, though Pet would do for a silver Yorkshire. The only Yorkshire showing real merit was Venus, an old timer, though Rosa had some pretensions to form and could have had a letter or two; the other prizes were withheld.

PUGS.—The indifferent-looking Curtis added a challenge win to its score, though such dogs are a parody on the present system of challenge wins. In open dogs Mrs. Ballentine showed something very much better in Robin Hood, the winner of several prizes this spring. Smut, second, is large but has good wrinkle, skull flat and muzzle too long; is too wide in front, has a fair curl and, what we seldom see, correct black toenails. In bitches Fanny was unopposed; ears faulty, muzzle too sharp, bad loin and quarters and tail does not curl well.

In miscellaneous class the "Pom." Sheffield Lad won easily over a big black dog, yclept a Newfoundland in Lewiston.

T. R. CATLAND.
Secretary Androscoggin Kennel Club.

Boston Model in the light-weight division took first from a large Maltese terrier with a fairly good coat. Scotch Hot, the Scotch terrier, brought up the rear of the classes; though badly named for a prohibition State, he is nevertheless a capital terrier.

H. W. L.

FIELD TRIALS AND FIELD TRIAL JUDGES.

Editor Forest and Stream:

In your issue of May 12 "Tarquin" calls attention to an article by "A. Scrub," published in the *American Field*, March 26, on "The Methods of Conducting Field Trials." It appears that after having digested the article in question, "Tarquin" has condensed his inferences and presents the same to your readers in the form of seven distinct charges, which (with one exception), if true, would be sufficient evidence to debar any one from the society of honest men engaged in any undertaking, whether relating to the dog or hog. With one exception, the charges are purely imaginary and well calculated to create a false impression as to the spirit actuating the writer, if allowed to pass by unrefuted. It is hoped the reader will comply with "Tarquin's" request by reading "A. Scrub's" article. By so doing the line of argument adopted by "Tarquin" can readily be accounted for by an apparent desire on his part to evade the question at issue and substitute positive charges of a criminal character, without foundation, and which are hereby denounced as being utterly erroneous.

A perusal of "A. Scrub's" article will convince the most earnest supporter of the "spotting" system that the objective point attacked is the system itself, and that not one syllable can be construed into heinous charges against members of clubs or field trial judges, with whom, without exception, the writer is upon the most amicable terms.

The seven charges referred to are quoted as follows: "First—The fraudulency of the 'spotting system.' Second—Its real object the placing of certain dogs. Third—That judges and clubs are alike corrupt. Fourth—There is no actual competition. Fifth—No efforts are made to equalize chances. Sixth—Errors in placing dogs are not errors in fact. Seventh—Field trials are nuisances and should be abated."

The foregoing charges comprise the subject of "Tarquin's" article and, with exception of the fourth, are pure inventions from which he is enabled to write two columns of matter, ostensibly in defense of field trial judges and club members against the scurrilous (?) attacks of "A. Scrub," but in reality he is merely knocking down cob houses of his own construction. Attention is called to the fact that "Tarquin" failed to quote a single paragraph, or even a word of the article which he denounces; a discourteous procedure denoting total ignorance of, or wilful disregard for, established usages commonly observed by literary dabblers. Until evidence is offered more convincing than inferences of his own drawing, a verdict is somewhat premature. "Tarquin" is assuming too much by arraigning "A. Scrub" before a sportsman's tribunal on erroneous charges, installing himself judge, jury and witness (a living illustration of a Trinity) and then rendering a verdict "the first clatter out of the box."

A review of the facts here presented strongly reminds one of the renowned "Don Quixote" and his terrible battle with the windmill.

In regard to the fourth charge, "there is no actual competition," "Tarquin's" attention is directed to the rules of the several clubs from which is quoted the following: "In issuing the revised rules in conformity with the spotting system, the club has these principles which it wishes to bring forward: First, that each and every trial is simply a trial in the true sense of the word and not a competition, etc."

Now if there really is a competition at trials conducted under the "spotting system," it is in violation of the rules; furthermore judges are instructed to try each dog separately if they so elect, which strengthens the belief that public trials are exhibitions, instead of competitions as many suppose.

In this connection I beg to compliment "Tarquin" upon

the graphic style in which his field trial experience was depicted. Such reminiscences are always pleasant and afford a subject upon which one can dilate *ad gustum*. His attendance at the Southern trials enabled him to form an intelligent opinion of the manner in which affairs were conducted at those trials; but it is very bad form to cite instances occurring at the Southern field trials in support of the "spotting system," or as an argument to disprove "A. Scrub's" assertions, when sportsmen, at all interested in such matters, know that the "spotting system" was not used in rendering decisions at the Southern field trials. As to the gentlemen he met there, or that can be found in attendance at any meeting of like character, their honesty or capabilities are not under discussion, and never have been so far as the writer is concerned.

The very worst feature about the "spotting system" is the prevalent disposition on the part of its supporters to hold aloft the character of club members and judges to shield the system from adverse criticism; in fact anything said not in full accord with the "spotting system" is generally construed into a direct insult to gentlemen who kindly act as judges under the system. When it is well known that judges are compelled to discharge an important duty, with no guide but their personal opinion, and that opinions are as liable to differ among judges as among any other class of individuals, it is remarkable that those so deeply interested in "the advancement of the bird dog" have not agreed upon a universal standard of field excellence to insure uniformity and equity in rendering decisions. Without an accepted standard of excellence it is nonsensical to expect unity of action in any undertaking resembling a competitive test of merit.

No, Mr. "Tarquin," it is not a question of honesty or capability; and the general morality of mankind is altogether foreign to the subject under discussion. "A. Scrub" advocates explicit rules, unmistakable definitions of all technical terms used to express the qualitiies of a "high class" dog, and a competitive test of those qualities, with no donations whatever; every competitor should win what he gets in actual contest, and if beaten or dropped out, it should be for cause and by an established system of some kind, agreed upon and understood by participants. "Spotting" by a system is somewhat more in accord with the principles which should govern competitors, than to award honors and prizes at discretion in the absence of an established standard.

If one judge, acting at discretion, cannot conscientiously place a dog which runs like a wolf, he should not be abused for enforcing his opinion in rendering decisions. The writer indorses his action. Another judge may possess a warm spot in his bosom for a general rustler and the matter of finding birds for the gun is of minor importance; jumping into and flushing a bevy of birds may be considered as an indication of great dash and energy: chasing about, like an escaped lunatic, may be mistaken for a "desire to find birds," and be accredited as "bird sense," whether the desire is real or artificial. Chasing rabbits is considered as an unpardonable crime by one judge and another may be impressed with an idea that a dog is a "plug," if he fails to make an occasional rabbit "hump himself."

The terms "pointing" and "backing" are variously interpreted. A dog may lie on his belly, or take in the situation by assuming any comfortable position, while in the presence of birds; most any attitude can be designated as pointing, at discretion. Then again, there is an impression which seems to prevail that "pointing" can be represented only by assuming an erect, rigid, stylish and unmistakable attitude, in accordance with "A. Scrub's" definition of the term. As all terms relating to the bird dog are undefined, the definitions depend upon the fancies of the individual acting as judge.

"Tarquin" mentions the names of a number of prominent sportsmen who officiate as judges of dogs, on the bench and in the field, and I venture to say that they entertain different opinions concerning both bench and field qualities; their character, which is unquestioned, to the contrary notwithstanding. It has been the writer's good fortune to have run dogs, in hundreds of heats, under many of the most prominent judges of the country, and also to have enjoyed many days sport afield with them, affording ample opportunity to become qualified to express an opinion concerning their several standards of excellence. With due respect for the gentlemen in every particular, it would be a false assertion to say they are all unified in matters pertaining to the dog. However, the gentlemen referred to are fair-minded, and they, with others, could very readily agree upon a standard so specific that the many unsettled differences which now exist would cease to affect the management of field trials.

The many qualities to be considered in a competition of so much consequence to sportsmen as field trials are should be positively defined, which would at once and forever settle the important question. The matter of training should receive especial attention, without which a dog is utterly worthless for any purpose. We have books and books on the subject of dog training, making it an easy matter to determine the extent of training necessary to properly exhibit field qualities without jeopardizing the chances of a competitor. Many a good, honest dog has been ruined by working him in company with a brainless, untrained brute for a season, and the best dog living will be seriously affected by being placed in such company. It is impossible to exhibit the field qualities of a well-trained dog in company with an unbroken mate, and a few such raw dogs will change the result of a field trial, whether conducted under the "spotting system" or otherwise.

Dogs that are worked by lung power, and must be urged onward by constant blasts of a whistle (to which no attention is paid by them), to the annoyance and confusion of their competing mate, may be of use in advancing the dog; but in accordance with accepted theories of breeding, they should never be elevated to the important position occupied in the canine world by field trial winners. Many dogs show up wonderfully well in so-called natural qualities, until an attempt is made to control them, when their great brilliancy is transformed into contemptible sullenness.

The much mooted question of retrieving at field trials has brought forth various opinions. The importance of the accomplishment in field work is nothing compared with the disposition necessary in a perfect retriever. A disposition that is not controllable is a feature that should be avoided in breeding; and a brainless, timid or sulky dog that cannot be taught retrieving without detriment to other qualities, is not calculated for breeding purposes, and should not be foisted on to the public as such; the same miserable trait is as liable to be exhibited upon any occasion when crossed, checked in unsteadiness, etc., as in retrieving. In closing, I beg to inform "Tarquin" that, regardless of success or failure at public field trials in the past or future, the importance of specific and uniform rules and the adoption of a universal standard of field excellence will at all times be advocated by A. SCRUB.

The question as to whether Princes Florence is a breeder has been satisfactorily proved, though the result has not, we regret to say, been very encouraging to Mr. Reick. Princess Florence whelped three more than ordinarily large pups last Thursday to his dog Refuge II. One pup died in whelping and the other soon after, the remaining one is still alive. The bitch has plenty of milk, is in the best of health, and is as lively as a cricket. Naturally her owner feels disappointed, as the pups were beautifully marked, and pups out of the queen of St. Bernards are worth something these days. Princess is still young yet and may have many more litters, with which her owner will, we hope, be more successful.

POINTS AND FLUSHES.

CHICAGO, May 21.—The breeding of setters and pointers with a view to their improvement in form and working powers engages the attention and best efforts of a large number of sportsmen in this country, and it is a fact, judging from their writings and methods of breeding, that their theories are practically the same. The most important consideration appears to be to have the greatest number of winning ancestors in the pedigrees, the only consideration being that the ancestors are winners, the full value thereof being acquired in a catchy pedigree which will suit the market promptly, breeders knowing from long experience that such pedigrees sell their stock quickly and well.

Many breeders point with pride to the fact that the pedigree of some dog or dogs traces back to the same dog or dam through perhaps a half dozen different lines of blood in the ancestors. They do not specify wherein such breeding has any advantages; but it sounds nice to report the name of some famous winner a number of times in a pedigree, his good qualities inferentially being distributed throughout the ancestry and fixed wherever his blood occurs. This naturally results in the selection of dogs for breeding purposes which are winners and whose parents were winners, the only consideration being that they were winners, the purpose being to build up a good selling pedigree, the quality of the produce being of secondary consideration.

That most men who imitate this method truly believe in its soundness, there is no doubt. Everything in the doggy world tends to prove the correctness of it, under the established order of things. At every turn one meets with evidence of the firm establishment of the popular ideas of breeding. The names of a few dogs constantly recur in pedigrees, and if there be a strange name in them, though the dog possessing it may be of the same race and the purest blood, such would be called "outcross" by men who pose as authorities. There is more humbug about the pedigree theories of breeding, as practiced in this country, than in all other doggy matters combined.

A dog, simply because he or she is a winner (and that is all which is usually considered), may not be all desirable as a sire or dam. He or she may be deficient in intelligence, or hard-headed, or lacking in endurance, or rattle-headed, or highly nervous, etc. How many breeders know anything whatever of the winners they breed to, aside from the one fact that they have made winnings? Many times owners send their bitches a thousand miles, perhaps, to be warded by dogs they never saw, their data being a pedigree table and the dog's record. They cannot possibly know anything of the dog's temper, intelligence, energy, disposition, manner of work, endurance, physical formation, etc., all necessary to know if one breeds dogs intelligently.

That inbreeding has injured the setters of this country I firmly believe, and this with all deference to the eminent authorities who differ from me. The injury is shown in many cases both physically and mentally, mostly the latter. This is shown by the large number of dogs which are highly nervous, or rattle-headed, ones which work with no plan or judgment, although they may keep very busy in their aimless fashion. Such dogs are difficult to train and never improve beyond a certain point, as they are not intelligent enough to manage their work. They have no plans of their own and have to be directed constantly.

It may be said in reply that the dogs at field trials show good capabilities and are intelligent. Such dogs, it should be remembered, are the picked lot of all the dogs bred, and many of these are not intelligent. The exhibition of what is called bird sense is becoming rarer every year. The cool judgment, the skillful management in being in the right place and working all details to the advantage of the gun, the knowledge and memory shown in working out the grounds intelligently in searching for birds are not seen in the dogs of to-day as in those of ten years ago.

Inbreeding no doubt, up to a certain point, will establish more uniformity of type, although it can be carried to extremes, resulting in weediness or weak constitutions. It does not follow, however, that all cases of inbreeding will produce uniformity of type. Because certain lines of blood result in such uniformity, it does not follow that some other lines will do so. On the other hand, some families which are not inbred, have great uniformity. It is a notorious fact that the English setters of to-day are a most unsorty lot, varying greatly in form, size, color and coats. This is apparent at any bench show.

There is another feature about breeding which is misleading and tends to obstruct the best development of the breed. This is making an invidious distinction between the inbred dogs of fashionable pedigrees and all others. The distinction is made between "hot blood" and "cold blood," and "blue blood" and "native" or otherwise, which is simply nonsensical. The Llewellin, which is the favorite strain in this country, is simply a family of English setters, the origin of which was not as good as that of many families then in existence. The blood of Duke and Rhœbe, both short in pedigree, was crossed on Laverack blood, and Laverack's test of a dog's merits was in actual work, that being what he considered the most important data in breeding. Laverack's pedigrees are open to a great deal of suspicion, and if they are correct, they are certainly most marvelous. At all events, they have been the subject of much controversy and contain inconsistencies which have never been explained. This is not brought forward to cast any reflection on the merit of the dogs, for Laverack's system of breeding or no system produced good dogs. It is mentioned to show that the jargon about hot and cold blood, etc., is absurd. As applied to horses, such terms have a meaning, but dog breeding, particularly in this country, is a thing of yesterday compared to horse breeding.

These remarks are not to be understood as implying that there are no good well bred dogs. There are such. The motive is to call attention to the prevailing bad theories of breeding.

* * *

The proof reader is the one who, according to time-honored usage, is blamed for any errors which appear in print. Sometimes, however, he is not to blame, and he then justly resents any charge of error. Some writers have atrociously bad hand writing, to which class I belong. These sad thoughts came up as I read in "Points and Flushes" last week the following: "For a concise and farcical," etc. For "farcical" read "forcible." For "cleanness," in the same paragraph, read "clearness." I meant to express my admiration of the article in question, "Field Trials and Field Trial Judges," but the word "farcical" came near spoiling the statement of it.

* * *

The question as to whether dogs are guided in their acts through life by instinct or reason is not settled beyond dispute, although it seems absurd to attribute acts which are the result of knowledge and experience to instinct. This the more so as many accomplishments are the result of experience in every day or of teaching. Acts which are exercised in the present with discrimination and a purpose, showing memory and perception, are not instinctive. As bearing on this point, a description of some of the acts of a Skye terrier owned by a friend of mine, who told me the circumstances, will be pertinent. The dog's favorite seat was the sill of the front window, where he had a good view of the street and could watch the ever-changing scenes. On one of the recent rainy days he took his daily seat, but the moisture on the window entirely obstructed his view, depriving him of his expected pleasure. He rubbed the window pane with his ear, afterward licking off the superfluous moisture from the pane, thus accomplishing his purpose to view the sights. When laughed at he cuts eccentric antics and barks violently, presumably protesting against being the subject of levity. He was once caught by the dog catchers, there being some legal requirement overlooked which justified them in his capture. He remembered them ever afterward. On their appearance in his street he would instantly scamper home. If the door was not open he would run on down the first alley and hide until all danger was past.

* * *

At the June meeting of the board of the Western Michigan Kennel Club, running rules will be adopted to govern the field trials which will be held next fall.

* * *

Mr. W. W. Titus is now settled at Coal Grove, Ohio, and will hereafter have charge of the Coal Grove Kennels at that place. B. WATERS.

RETRIEVING AT FIELD TRIALS.

Editor Forest and Stream:

In respect to the now greatly agitated question, "Should retrieving be recognized as a feature of value in a setter's or pointer's work while competing for honors at a field trial?" my reply to your question is, most emphatically it should not. Field trials as I understand them are for the development of the ideal field dog, the high class dog, that we all so much admire and envy, and which to own is a source of great pleasure, as well as the minor (?) consideration of his being a paying piece of property if judiciously handled. It is, as a matter of course, a subject of the greatest importance to the whole sporting fraternity, that the dogs with the highest public honors should be dogs with the most indisputable natural qualities; qualities, too, that are most certainly to be expected to be handed down from sire and dam to their progeny, from the fact that the dogs that are credited with such rare capabilities will be much sought after in the stud and will be the direct means of improving, or the reverse, the next immediate generations of field dogs. It will, therefore, at once be apparent to all careful and progressive sportsmen how much harm or how much good may arise from even one poor decision of a judge at a public field trial.

I hardly think that the greatest upholder of retrieving will claim for it to be a natural quality, outside from the fact that it is impossible at a trial, for many reasons, to give practical retrieving tests, owing to lack of time, scarcity of birds, and the impossibility of making surroundings the same to each and all contestants.

When the fact is ascertained that a dog is a good retriever, nothing of more importance has been discovered than that he has been properly and thoroughly trained by his handler and that the latter understands that portion of his business, as proved in the one instance of the dog he is handling. What should we think of a man that was afraid to breed his bitch to Antonio because his trainer had not considered it essential to his dog's chances of winning to put retrieving on him? Yet we should all expect to get puppies of true speed, style and desirable qualities from this dog, if mated with bitches of correct breeding and individual merit.

Again none of us would breed to a dog that was a good retriever with expectations of getting pups that would be retrievers of more than average merit, from the fact that the sire was above mediocrity in this respect; hence, I for one, see no importance in attaching value to a quality that is wholly an acquired accomplishment. The way that retrieving has been insisted (?) on in public competition is a most ridiculous burlesque on "ordinary shooting," and the sooner such absolute fiascos are eliminated from field trial competitions the better. Many of us can picture the miserable shooting that is done, when a bird that if killed will be certain to fall in a most undesirable place for a good retrieve. Again, the next bird that is pointed will fall on bare ground in plain view of the dog, he is then ordered to fetch, which he does in good form. Does the fact that a dog will pick up a bird that he has seen fall, demonstrate that he is a good retriever? I, for one, think not.

Again, cut out retrieving from the scale of points and it gives an opportunity to an owner to run a good Derby entry in the All-Age Stake. We all know that a pup that can now win a Derby is likely to prove a hard nut to crack in the All-Age Stake. Consequently the entries will be greater, which in turn means that the purses will proportionately increase. Again, is it fair to allow the shallow course that has been adopted for the past two years, for a dog to win that will not retrieve, when the scale of points allows ten out of a possible hundred for this one feature? A great many men fail to realize how it has been possible for a dog to win with such an enormous handicap, high class indeed, though he may have been, and I think rather than let such probabilities occur again it would be fairer for all interested to toe the mark on the same footing, and what it is not possible to test correctly had far better not be tested at all. H. S. BEVAN.

LAMAR, Miss., April 28.

THE BEAGLE STANDARD.

Editor Forest and Stream:

You ask my views in regard to raising the standard of the beagle from 15 to 16in. If it would benefit the beagle any by such a change, I would be heartily in favor of raising it. But for what the beagle is intended in our country, where no dog is supposed to (or at least seldom does) run down and catch an old hare or any other kind of game, I cannot, for myself, see why a 15in. dog is not as good as a 16 or 24in. dog. For New England rabbit hunting, with the way we have to hunt them here, I think a 15in. dog is about the right size; not under 14in. Although I have seen and owned some very good dogs, both over 15 and under 14in., and today own as good a show dog as I have got or ever owned, barring height, standing a trifle over 15in., I do not think it advisable to change the standard for the sake of one or two dogs, that I or any one else may own, in order to show them up and make great stock dogs of them.

Breed still larger and in a few years some one else will want a new standard to benefit some other oversized dog, and so on from 15in. up, until the beagle will be about the same as a good-sized foxhound. F. KIMBALL.

BROCKTON, Mass.

[A letter from Mr. Phoebus on this subject will appear next week.]

FLAPS FROM THE BEAVER'S TAIL.

TORONTO, Can.—The field spaniel Rideau Rab, one of Bob Obo's get, and a frequent winner on both sides of the line, is another victim of the "poison fiend." He was owned by Mr. C. E. Fenton, of Essex Center.

The bench show committee of the Industrial Exhibition met on Thursday, the following members being present: Messrs. Postlethwaite (chairman), Donovan, Juna, Mitchener, and Stone (superintendent). The American Collie Club will offer a $20 silver medal for best American-bred collie under 2yrs. exhibited by a member of the Collie Club. Also a bronze medal for the best collie in novice class. In addition to these and others, the association will offer $10 cash for the best collie in the show. The Spaniel Club will offer specials, value $20, and probably a cup. It is altogether likely the Pet Dog Club will also support the show and an endeavor will be made to bring the classification up to suit the members. A challenge class of $5 and silver medal for poodles was added to the list. H. B. DONOVAN.

DOG CHAT.

THE little show held by the Androscoggin Kennel Club proves conclusively that the interest in dogs in Maine is very much on the increase, and though such gatherings are a novelty the people of Lewiston seemed to take kindly to the one held last week. To the secretary, Mr. Catland, is due most of the credit of both getting up the kennel club and the successful working of the show, as he is both a courteous and hard-working man. Mr. Lawrence and the treasurer were also active workers, both as stewards of the ring and during the show.

After the disastrous fire the first day of the show held by the Androscoggin Poultry Association in 1889, matters looked pretty blue for any future attempts in this direction, but Mr. Catland, not being able to interest the poultry contingent to organize another club or hold a dog show, determined to form a kennel club, which he did last January. As the former show was in the old City Hall, which, as we have remarked, was burnt down in 1889, it was an appropriate idea to hold the first show of the new club during the week that the handsome new City Hall was opened. The show was held just opposite this new building, in the skating rink, which is also dignified by the name of Grand Opera House. The building is excellently adapted for such a display; it is light, airy, and large enough for a show of three or four hundred dogs. The benching was excellently well made, and contrary to the general run of such structures, had quite a comfortable and pleasing effect. The judging was on the stage at one end. The building throughout the show was kept very clean and free from offensive odors. The expense of the show being comparatively small the club should not be losers, as the attendance at night and on the last day, when the new Town Hall was opened, was quite gratifying, so that no doubt next year the club will make a more ambitious effort, and as Lewiston is easily reached a good entry should be forthcoming. Before leaving the subject we cannot pass on without speaking of the kindness and courtesy shown to the visitors by Mr. Catland and the townsmen with whom we were brought into contact, and to Dr. Brackett, the veterinarian, especially we were indebted for many favors such busy men find little time to indulge in. We may also remark that outside of the pointer kennels of Messrs. Roberts and Ledyard there are very few good show dogs owned in the State, and the show just held must have been quite a public educator, as the quality of dogs in some of the classes could compare most favorably with some of our spring shows.

Geo. Jarvis took his team up by boat from New York, and remarking his pallid look we were informed that the return journey would be made by rail as the ship's roll was not the kind of one he was partial to, both "George," Lad of Kent and Warren Tripper having suffered from *mal-de mer.*

Mr. L. C. Whiton's greyhound Spinaway is after all not in whelp, and the long journey and the tremendous fee demanded for Fullerton's services, to say nothing of Mr. Whiton's enterprise in sending his bitch so far, have resulted in bitter disappointment. Mr. Whiton has our sympathy and we trust there will be no difficulty about a return service. It is a risky undertaking anyhow, and in view of the many failures in the past, not at all a profitable investment when one considers the risk. We have some pretty good dogs over here now, and McKinley principles should dominate.

We have received some pretty pictures of the Lansdown Kennels' fox-terriers for which Dr. Darby will accept our thanks. The front view of Desperado is exceedingly lifelike.

Mr. "Square Deal" Eberhart informs us, in a letter which lay unopened last week on account of our absence at Lewiston show, that he has purchased the pug Patsy Bolivar, by his Cashier out of Flossy II., that is by champion Bradford Ruby. This dog will be brought out at Lexington show. The Humane Society of Cincinnati will take charge of the stray dogs in that city June 1, and the city has appropriated $2,000 per year for this purpose. A new pound will be built and all dogs that the Society cannot sell or find homes for will be put out of the way in a humane manner. The example of this society should be followed by other cities, and the duty of protecting our streets from the homeless curs that give the whole breed a bad name taken out of the hands of the politicians, as in New York, for instance.

"How is yoh gettin' 'long?" "Fine. I'se dribin' a dog kyart now." "Go way!" "Yaas, I is. I'se wuh'kin fur de pound."—*Washington Star.*

The Brunswick Fur Club will hold its fourth annual field trials at Princeton, Mass., commencing Nov. 14.

We regret to hear of the death of Mr. Frank Windholz's favorite English setter bitch Princess Phoebus. She was missed from the kennels for about twenty minutes, when found she was lying cut in two by the railroad cars. Mr. Windholz tells us she was probably on the way home along the track and, as her hearing was imperfect, was run into by the train. Her owner feels his loss keenly, as she was the first of the many good English setters he has imported, and besides being a grand field dog was a winner on the bench and very valuable on account of her breeding. She was whelped in June, 1883, and was by Prince Phoebus out of Patch, by champion Rock; Prince Phoebus being a son of the noted Tam O'Shanter out of Prue. Mr. Geo. Hellewell was her breeder. It is a peculiar circumstance that when South a few years ago, while out hunting, she ran along a railroad track and, intent on pointing some birds on the bank, she was lifted by the cow-catcher of the express train and thrown up the bank some distance ahead. Mr. Windholz was a quarter of a mile away and of course expected to find her cut to pieces, instead of this, when he reached the place, she was limping back to where she had first caught the scent of the birds. Needless to say this bitch found a place very near her owner's heart the rest of her life.

The New Jersey Kennel Club having seemingly dropped into innocuous desuetude, there is a feeling among many dog lovers round Newark that some action should be taken toward forming a new club, with the intention of holding shows and otherwise improving the status of the dog. With that end in view the following circular has been issued, which we trust will bear fruit in due course: "There is a general desire among sportsmen and owners of dogs in and around Newark, and throughout the State, that an organization be formed, which shall give exhibitions and in other ways increase an interest in the dog and their general improvement. After preliminary gatherings I have been asked to call a meeting at the Continental Hotel, on Friday evening, May 27. We shall be pleased to see you and all interested at 5 P. M. sharp.—E. H. JOHNSON." As there is now no kennel club in New Jersey, a member of the A.K.C., the new organization should have little difficulty in obtaining recognition.

At a meeting of the bench show committee of the Industrial Exhibition Association, held May 20, several judges were selected, and upon their acceptance their names will be published. The Canadian Kennel Club will offer diplomas for best kennel, best brace, best dog, best bitch and best dog and bitch (pointer and English setter) with a field trial record owned by members of the C. K. C. A new feature at bench shows will be sweepstakes in a large number of breeds for the best dog or bitch whelped on and after Jan. 1, 1891, Canadian or United States bred, who have never won a money prize, $2 entrance, divided into 40, 30, 20 and 10 per cent. All the money in the sweepstakes will be divided, but all competitors must be entered in their regular classes at the show.

Mr. A. D. Stewart is agitating the formation of a fox-terrier club for Canada, and with the number of fanciers of the breed over the border the idea should meet with support. This will be the first Canadian specialty club, we believe.

The noted pointer Duke of Dexter, owned by Mr. Charles D. Roberts, will, on June 1, be put in the hands of C. F. Waterhouse, Oakham, Mass., to be prepared for the New England field trials next fall.

As Miss Marion E. Bannister is continually receiving letters sent to her old address at Cranford, N. J., in future all letters to the secretary of the American Pet Dog Club should be addressed to Blenheim Cottage, Springfield, N. J.

The following agreement, sent to us by Mr. H. L. Kreuder, has the true sportsmanlike ring in it and should be numerously signed, or the prospects of enough game for the N. B. C. trials next fall will be very small:

"AGREEMENT.—It having transpired and come to our notice that by a recent bill introduced in Assembly by Member McLaughlin, of Kings county, and signed by our Governor, it is lawful to hunt and kill rabbits at any time in New York State, excepting on Long Island. By this it can readily be seen that unless some local arrangements be made, the rabbit will soon become extinct and our customary amusement in the fall would soon become a thing of the past. Therefore, we the undersigned, being true-spirited and sport-loving citizens of Nanuet and vicinity, do hereby agree to ignore the privileges given by said enactment and will hunt and kill the rabbit only between Nov. 1 and Jan. 1, as heretofore. In order that non-residents may not do what we ourselves would not, we further agree to consider all strangers who come to hunt rabbits as trespassers and order them off our grounds. Signed."

In losing by death the St. Bernard Lord Bute Mr. Kroskey has sustained a severe loss, both in a pecuniary sense and as a breeder. The dog, since his importation to this country, had been more or less under a cloud, having skin disease and other ailments, and though he has served a number of bitches he has not proved so successful as a sire on this side as he did when owned in England. The idea seems to prevail that he was not properly acclimated before being put to stud. An autopsy proved that embolism of the pulmonary veins of the heart causing congestion of the lungs was the cause of death. It is hinted that this was an old trouble, though Mr. Kroskey received a veterinary certificate when he purchased him stating the dog was in perfect health. Lord Bute has sired some of the best dogs in the breed, notably Sir Hereward, Siegfried, Young Bute, Lady Gladys, etc. He was whelped June, 1887, and was by champion Save out of Sabrina, so he came honestly by his good producing qualities. Mr. Kroskey's Madame Bedivere is in whelp to Lord Bute, so we will hope that this gentleman may still get something that will in part make up for his great loss. The year of 1892 will long be remembered among our St. Bernard breeders as one of the most disastrous to the fancy, Plinlimmon, Prince Regent, Scottish Prince and now Lord Bute having passed away. It is a fact that America has paid the largest prices for dogs of this breed, only to lose them sooner or later by disease of some sort or another. How is it?

The adjourned meeting of the National Greyhound Club took place at Mr. L. C. Whiton's office, 115 Broadway, New York, at 4:30 P. M. Monday last. It was decided that three bronze medals should be given at the Toronto show. The action of the "Psovoi" committee was indorsed and the name stands "Psovoi" for the breed known as Russian wolfhounds. Messrs. A. L. Fitzgerald, A. L. Page and W. R. Caminoni resigned. The treasurer's report was read and accepted showing a balance of $52 61. A resolution of condolence was passed on the death of Mr. Geo. Shepard Page. The old committee on judges was disbanded and a new one appointed composed of Messrs. Osborn, Whiton and Drake. Mr. L. F. Bartels was elected to fill the vacancy on the board of directors owing to Mr. Fitzgerald's resignation, and Mr. Van Hosen will fill the vacancy caused by Mr. A. L. Page's resignation. Additional members on committees were elected as follows: Prize committee, C. F. R. Drake; Committee on Membership, Messrs. H. Osborn and James Mortimer; Committee on Publication, C. F. R. Drake. The following new members were elected: Messrs. A. C. Usher, Horatio Nelson, W. D. Blenes, T. W. Bartels, L. F. Bartels, Geo. McDougall, Chas. Barrow, James Mortimer, C. B. Crouse and H. W. Smith. Col. North and Mr. Geo. Raper and the president of the National Coursing Club of England were elected honorary members. Mr. James Mortimer was put on the board of governors in the place of Mr. Geo. S. Page, deceased.

The Northwestern Field Trials Club have decided to hold their inaugural trials at Morris, commencing the first Monday in September. Entries for the Derby close July 1 and the All-Age Stake Aug. 1. All the entry and starters' fees, besides some special donations, will be given in prizes, which will amount from promised entrances to nearly $1,000. Mr. P. H. Gotzian, of St. Paul, promises six entries, W. T. Hunter, of Wheatland, Dak., four, Rev. W. H. Spence, Grand Forks, two, besides a number with one and two. These with the Canadian entries should make quite an interesting International trial. Forms of entry, containing full particulars, can be had from any of the undermentioned, to whom all entries can be made, viz: Paul H. Gotzian, St. Paul, Minn.; W. T. Hunter, Wheatland, North Dakota; Thos. Stone, Calgary Alta., or Thomas Johnson, Winnipeg, Manitoba.

Mr. E. H. Moore does seem to be about the unluckiest of our breeders in some ways. Now we hear he lost by fire, last week, his new house and stable. The loss is said to be $20,000, on which there was $9,000 insurance. The loss of Minting and Ilford Caution, Ben Lomond, Alton and Plinlimmon was hard to bear, but this last catastrophe would put a damper on any man's spirits, and Mr. Moore has our sincere sympathy.

It seems to be our task this week to chronicle disasters or losses of some sort, and the mail has just brought us news of other deaths. This time it is the greyhound poor old champion Memnon, without doubt the finest greyhound that ever came to this country. Old "Dick" has held on well, for when he succumbed to old age last Saturday he was fourteen years old. This grand greyhound could hold his own when in his prime with any of them, as his 65 prizes on bench and in the field fully prove. Peace to his ashes! It will be long, we fancy, before we see another such a perfect greyhound. Mr. Wixom, of the Hornell-Harmony Kennels, owned him at the time of his death. He was imported by Mr. H. W. Smith, sold by him to Mr. King, of Toronto, who, we believe, sold him to Mr. Huntington, and he in turn passed him over to Mr. Wixom, some three years since. This same kennel also lost April 30 the beagle bitch champion Una, she dying in parturition. This bitch was one of the best in America, and had won 35 prizes. Mr. Wixom says he still has some good ones left and intends to keep up the reputation of the Hornell-Harmony Kennels with some good youngsters which he has ready for the fall shows.

Dr. O. S. Bamber, secretary of the Rochester Kennel Club, writes us: "At a meeting of the Rochester Kennel Club on May 20, the following officers were elected: President, Warham Whitney; First Vice-President, J. R. Fanning; Second Vice-President, G. E. Peer; Secretary, Dr. O. Stewart Bamber; Treasurer, Harry Yates; Veterinary, Dr. Albert Drinkwater. The clash in dates for show with Hamilton, Canada, was discussed and the secretary was instructed to correspond with the Hamilton Club, with the idea of effecting a compromise agreeable to both. The Rochester Kennel Club claimed the dates, Sept. 6 to 9, in the March number of the *American Kennel Gazette* before Hamilton had claimed them in any kennel paper published in the 'States,' and were totally unaware that Hamiliton had claimed the same dates with the C. K. C."

AMERICAN KENNEL CLUB MEETING.

THE quarterly meeting of the executive committee was held May 19 at the rooms of the club at 44 Broadway, New York city. Delegates of the following clubs were present: The associate members (three officers), American Pet Dog Club, Continental K. C., Great Dane Club, Gordon Setter Club, Kansas City Club, Keystone K. C., Maryland K. C., Pointer Club and Westminster K. C.

The credentials of the following delegates were accepted: Elmira K. C., F. A. Cheney; Tri-City K. C., E. S. Arnold; Am. Pet Dog Club, F. Farrar Rackham; Beaver Field Trial Club, Geo. A. Chabot; Hermitage K. C., Hon. J. H. Ackley; Maryland K. C., W. Stewart Diffenderffer; Western Michigan K. C., Geo. B. Thomas; Pointer Club, G. Muss-Arnolt; Keystone K. C., Dr. M. H. Cryer; Mascoutah K. C., G. H. Goodrich.

Dr. Cryer presided. The treasurer's report was as follows and was accepted:

Receipts from all sources from Jan. 1, 1892.....	$8,473.61
Expenses	3,793.90
Balance.....	$4,679.71

The Louisiana Poultry and Pet Stock Association and the Kansas City K. C. were dropped from the club for non-payment of dues.

The committee on the World's Fair and field trials and coursing were discharged, also the dog ordinance committee.

The appeal of Mr. Francis G. Taylor was then taken up. Mr. Taylor having resigned as an associate member demanded a stud book for 1891 from the club, though for part of the year he had not been a member. His request was refused by the secretary, and he appealed to the club. The action of the secretary was sustained. At the same time the secretary was instructed to furnish a book to Mr. Taylor as a matter of courtesy only.

The question as to whether an exhibitor could purchase simply the show rights in a dog was then discussed. It was the sense of the meeting that this might lead to fraud in order to make up teams, etc., and it was decided that the rule must be upheld and the dog must be the *bona fide* property of the exhibitor.

The St. Bernard Roland, Jr.'s cancelled stud book number being given in the New York show catalogue the owner was called upon to explain; he maintained that the number had been inserted by the show committee unknown to him. The matter was eventually referred to the stud book committee for investigation. The appeal of Mr. C. M. Nelles for reinstatement was laid on the table. The action of the Canadian Kennel Club in the Mercer case was sustained.

The subject of licensed veterinary surgeons was next taken up, and it was decided that candidates for licenses be compelled to show their diplomas and must have had five years practice in veterinary surgery before they could receive a license from the club to act, and only licensed veterinarians shall be allowed to act at shows held under A. K. C. rules. The further consideration of the matter was referred to the committee on rules.

Re the claim of L. F. Whitman for $36 railroad expenses from Chicago to the February meeting of 1891, Mr. Vredenburgh stated that as this claim was not presented till April, 1892, he refused to pay it, as his accounts were all closed for 1891, also stating that it was peculiar that the claim should be made at this late date, and especially so after FOREST AND STREAM had stated in February last that Mr. Whitman had made a claim for $36, which statement was corrected the following week by the secretary, who stated that this amount was paid to Dr. Perry for his expenses as an associate officer out of the fund set aside for that purpose. After some discussion the secretary was instructed to ask Mr. Whitman to furnish an itemized account of his expenses that made up the $36 he claimed. The rule that allowed $100 as a fund for associate delegates' expenses to meetings was then rescinded. All agencies of the A. K. C. were also abolished.

The Importation committee reported progress, stating that owing to their appeal to the Department, the importation law now required for dogs imported to this country to enter free as breeding stock, one registered sire on the sire's side and four sires on the dam's side, together with a certificate from the secretary of the stud book in which they were registered.

The Removal committee reported progress and stated that they will now issue a call for membership in the new club, the limit at present being 100 life members at $100 fee, 200 non-resident members at $12, and 100 resident members at $20. The money received from this source to be held in trust, and as soon as a suitable building has been secured and everything is ready the members would be notified and their membership commence from that date.

The committee on transportation to secure better express rates, reported progress and stated they had appealed to the monthly Express Conference, in Chicago, to have the dog rate reduced to that for merchandise and also for a limited liability for accidents; they expect a favorable result. No other business of importance was transacted and the committee adjourned.

"WOLF COURSING."

MINNEAPOLIS, Minn., May 5.—*Editor Forest and Stream:* In "wolf coursing" I was amused; but do not blame the dogs so much. There is an affinity between wolves and dogs, especially at certain seasons. That old she wolf was quite safe anyhow, as her sex will usually protect her, and her condition also usually would. The man who shot a good hound should know that the dog had dog sense, if he had not enough of the human kind. Having owned and imported Scotch deerhounds "before the war," when game was plentiful, I know something relating to dogs and game, be they wolves, buffalo or any of the prairie game or that of the Rockies. The cactus plant is dead against the dogs in coursing on the plains, when found in quantities. R. S. W.

THE four full-page pictures, Young Mountain Sheep, American Elk, Group of Elk, and FOREST AND STREAM'S Grizzly, from the "*Forest and Stream Animal Series*," handsomely printed on heavy paper suitable for framing. The set of four (in tube) will be sent for ten cents (stamps will do).—*Adv.*

EASTERN FIELD TRIAL CLUB'S DERBY ENTRIES

Editor Forest and Stream:

The entries for the Eastern Field Trial Club's Derby closed May 1, with 53 English setters and 15 pointers, all whelped in 1891:

ENGLISH SETTERS.

CECIL H. (R. L. Shannon's), black, white and tan dog (Dr. Maclin—Cosette), Jan. 8

HOOSIER GIRL (Joseph H. and John A. Hunter's), orange and white bitch (Dad Wilson—Daisy Hunter), Jan. 1.

HOOSIER LADY (F. R. Hitchcock's), liver, white and tan bitch (Dad Wilson—Daisy Hunter), Jan. 1.

CRICKET (F. R. Hitchcock's), black and white bitch (Roderigo—Juno A.), Jan. 3.

CHINAMAN (F. R. Hitchcock's), black, white and tan dog (Chance—Bessie Avent), May 30.

BESS (F. R. Hitchcock's), black, white and tan bitch (Chance—Bessie Avent), May 30.

BELL (F. R. Hitchcock's), black, white and tan bitch (Roi d'Or—Nelly Bly), June 24.

BELLE OF KENTUCKY (Fairmont Kennels'), black, white and tan bitch (Dad Wilson—Bohemian Girl), June 23.

GALE NOBLE (H. K. Devereux's). black, white and tan bitch (Breeze Gladstone—Katie Noble), March 11.

PROCTOR KNOTT (Blue Ridge Kennels'), black, white and tan dog (Gath's Hope—Dashing Lady), January.

HOPE'S MINT (Blue Ridge Kennels'), orange and white dog (Gath's Hope—Dashing Lady), January.

DICK FOX (Blue Ridge Kennels'), black, white and tan bitch (Chance—Countess Rush), April 8.

LADY BROOKS (Blue Ridge Kennels'), black, white and tan bitch (Chance—Countess Rush). April 8.

LANCIER (Blue Ridge Kennels'), chestnut, white and tan dog (Gath's Hope—Stockings), May 9.

QUAIL (C. W. Tate's), black and white dog (Dakota—Rose), April 17.

DESSIE HOPE (P. T. Madison's), orange and white bitch (Gath's Hope—Stockings), May 9.

GAIETY (Royal Robinson's), black, white and tan bitch (Lone Jack—Gay Rhœbe), Feb. 13.

——— (Greenfield Hill Kennels'), black, white and tan bitch (Rowdy Rod—Celeste C.), Sept. 4.

GUY'S LADY (Geo. T. Leach's), black and white bitch (Guy—Belle), May.

MODOC (Gen. F. F. Myles's), black, white and tan dog (Dan Gladstone—Princess Joy), May 21.

FAY (Gen. F. F. Myles's), black, white and tan bitch (Dan—Princess Belton), April 10.

FANNIE (Gen. F. F. Myles's), blue belton bitch (Gus Bondhu—Lady Dixie), Jan 27.

ROXIE (Gen. F. F. Myles's), black, white and tan bitch (Jean Val Jean—Queen Ella Noble), March 27.

BEV. S. (Gen. F. F. Myles's), blue belton dog (Tennessee Dictator—Tennessee Livy), July 10.

FRA TURNER SUNFLOWER (C. S. Cross's), black, white and tan bitch (Dick Turner—Babe Gladstone), April 11.

ROD'S SUE (Pierre Lorillard, Jr.'s), liver, white and tan bitch (Roderigo—Gladstone Girl), March 3

DOT ROGERS (Pierre Lorillard, Jr.'s), black, white and tan bitch (Roderigo—Gladstone Girl), March 3.

ADDIE T. (Pierre Lorillard, Jr.'s), liver, white and tan bitch (Roderigo—Maggie Gladstone), March 3

MAIDEN MINE (Pierre Lorillard, Jr.'s), liver and white bitch (Vanguard—Georgia Belle), Jan. 8.

SPIKE'S GIRL (Pierre Lorillard, Jr.'s), black, white and tan bitch (Chance—Spike), May 25.

SCHLEY (Pierre Lorillard, Jr.'s), black, white and tan dog Chance—Lutra), May.

GLADEOLA (Pierre Lorillard, Jr.'s), black, white and tan bitch (Blade—Estelle), Jan. 15.

SLING (Bert Crane's), black, white and tan bitch (Rowdy Rod—Maud), Jan 6.

FLIRT (Randolph Kennels'), black and white bitch (Dakota—Rose), April 17.

RONAIR (Avent & Thayer Kennels'), black and white dog (Roderigo—Juno A.), Jan. 3.

LORIST (Avent & Thayer Kennels'), black, white and tan dog (Chance—Haydee), May 15.

KINGSTON (Avent & Thayer Kennels'), black, white and tan dog (Chance—Bessie Avent), May 30.

LOCHINVAR (Avent & Thayer Kennels'), black, white and tan dog (Chance—Bessie Avent), May 30.

CHEVALIER (Avent & Thayer Kennels'), black, white and tan dog (Jean Val Jean—Lucy Avent), Jan. 7.

SHADOW (Avent & Thayer Kennels'), black, white and tan bitch (Jean Val Jean—Lucy Avent), Jan. 7.

HAMLET (Avent & Thayer Kennels'), black, white and tan dog (Chance—Bessie Avent), May 30

DAN BURGESS (J. M. Freeman's), black, white and tan dog (Dan Gladstone—Lilly Burgess), May 14.

PRINCESS RAY (Geo. A. McLinn's [agt.]), black, white and tan bitch (Prince Lucifer—Princess Lili), March 2.

HOPE'S TRAP (Geo. E. Gray's), lemon and white bitch (Gath's Hope—Trap, Jr.), April —.

PSYCHE (Thos. Johnson's), black bitch (Manitoba Toss—Pitti Sing), May

NAT GOODWIN II. (Herbert Merriam's), black, white and tan dog (Nat Goodwin—Royal Myrtle), May 2.

FAN (Herbert Merriam's), black and white bitch (Nat Goodwin—Royal Myrtle), May 2.

FLYAWAY (Herbert Merriam's), black and white bitch (Rowdy Rod—Eva), May 3.

SPEEDAWAY (Herbert Merriam's), black and white bitch (Rowdy Rod—Eva), May 3.

PHILIP II. (Nahmke Kennels'), orange and white dog (Nahmke Philip—Mercy), May 3.

ALICE (Nahmke Kennels'), orange and white bitch (Nahmke Philip—Mercy), May 3

VICTOR HUGO (W. Hay Bockes's), black, white and ticked dog (Gene—Topsy), May 3.

SPOT CASH (H. K. Devereux's), black, white and tan dog (Vanguard—Georgia Belle), Jan. 8.

POINTERS.

DENNIS (Francis R. Hitchcock's), liver and white dog (King of Kent—Croxie Wise), April 2.

CONSCRIPT (Charlottesville Field Trial Kennels'), black and white dog (King of Kent—Hops), June 26.

COSSET (Charlottesville Field Trial Kennels'), black and white ticked bitch (King of Kent—Hops), June 2.

SEARSPRING (Charlottesville Field Trial Kennels'), liver and white ticked dog (Mainspring—Queeny II.), May 1.

JINGO (Charlottesville Field Trial Kennels'), liver and white dog (Mainspring—Queeny II.), May 1.

CHIN-CHIN (Charlottesville Field Trial Kennels'), black and white ticked bitch (Rip Rap—Fannie Bijou), June 13.

JOHN PAUL (Charlottesville Field Trial Kennels'), lemon and white dog (Rip Rap—Petticoats), July 3.

GRACEFUL II. (Luke W. White's), liver and white bitch (Duke of Hessen—Concave), May 8.

HEMPSTEAD BLOSSOM (Hempstead Farm Kennels'), liver and white bitch (Duke of Hessen—Woolton Game), May 8.

HEMPSTEAD GAME (Hempstead Farm Kennels'), liver and white bitch (Duke of Hessen—Woolton Game), May 8.

MERRY DUCHESS (Hempstead Farm Kennels'), liver and white bitch (Duke of Hessen—Merry Legs), Aug. 2.

BANKRUPT (W. T. Hunter's), liver and white dog (King of Kent—Lass of Bloomo), March 2.

BESSIE RANGER (T. G. Davey's), liver and white bitch (Major G.—Belle), March 9.

CROXIE O'BANNON (R. L. Shannon's), liver and white bitch (King of Kent—Croxie Wise), April 2.

ONWARD (G. W. Amory's), liver and white bitch (Wise—(Velce V.), April 21. WASHINGTON A. COSTER.

KENNEL NOTES.

Kennel Notes are inserted without charge; and blanks (furnished free) will be sent to any address.

NAMES CLAIMED.

☞ **Prepared Blanks sent free on application.**

Happy Toby. By Eberhart Pug Kennels, Cincinnati, O., for silver fawn pug dog, whelped July 1, 1891, by Spokane (champion Kash—Lady Thora) out of Nellie T. (Spokane—Lalla Rookh).

Bradford Ruby, Jr. By Eberhart Pug Kennels, Cincinnati, O., for silver fawn pug dog, whelped Aug. 20, 1891, by Bradford Ruby II. (champion Bradford Ruby—Puss B.) out of Lady Thelma (Spokane—Lady Verne).

Kioto, Lola and Queen Zitka. By Eberhart Pug Kennels, Cincinnati, O., for silver fawn pugs, one dog and two bitches, whelped April 13, 1892, by Spokane (champion Kash—Lady Thora) out of Sara Bernhardt (Lord Roseberry—May Queen).

BRED.

☞ **Prepared Blanks sent free on application.**

Lady Alma—Happy Toby. Eberhart Pug Kennels' (Cincinnati, O.) pug bitch Lady Alma (Eberhart's Cashier—Mabel E.) to their Happy Toby (Spokane—Lalla Rookh), May 21.

Lady Velma—Roscoe. Lansdowne Kennels' bull-terrier bitch Lady Velma (Regent—Edgewood Belle) to E. W. Moulton's Roscoe (Bendigo—Starlight), May 14

Tenny—Rasper. Lansdowne Kennels' fox-terrier bitch Tenny (Suffolk Toby—Temptation) to Belmont's Rasper (Venio—Racket), May 11.

Dimity—Triton. Lansdowne Kennels' fox-terrier bitch Dimity (Raffle—Warren Vivid) to their Triton (Raffle—Warren Dainty), April 28.

Lorna—Desperado. Lansdowne Kennels' (Lansdowne, Pa.) fox-terrier bitch Lorna (Teeford—Doane) to their Desperado (Rossdor—Desperate), March 12.

Fleet—Tamarack. H. K. Devereux's (Cleveland, O.) pointer bitch Fleet (Dash II.—Spot) to his Tamarack (Tam O'Shanter—Croxteth's Rival Queen), March 28.

WHELPS.

☞ **Prepared Blanks sent free on application.**

Lady Bess. F. L. Abbey's (Detroit, Mich.) Irish setter bitch Lady Bess (champion Tim—Lady Flora), May 17, ten (four dogs), by Seminole Kennels' Jerry Jarvis (Elcho, Jr.—Maid).

Jenetta. C. G. Fiedler's (Astoria, N. Y.) pointer bitch Jenetta (champion Graphic—Underhill's Jane), April 30, eight (six dogs), by G. Jarvis's Lad of Kent (champion Bracket—Renie).

Little Girl. C. T. Brownell's (New Bedford, Mass.) Gordon setter bitch Little Girl (Ben Butler—Chloe), May 10, eight (six dogs), by his Gordon Grouse (Murkland Ranger—Beaulah).

Shamrock Belle. H. G. J. Halloweli's (Conshohocken, Pa.) Irish setter bitch Shamrock Belle (Henmore Shamrock—Daisy), May 17, eight (five dogs), by his Chief of Tara (champion Chief—Bizreena).

Lorna. Lansdowne Kennels' (Lansdowne, Pa.) fox-terrier bitch Lorna (Telford—Doone), May 13, four (three dogs), by their Desperado (Rosador—Desperate).

Cambriana. W. B. Wells's (Chatham, Ont.) English setter bitch Cambriana (Cambridge—Romp), May 1, four (three dogs), by J. E. Dager's Toledo Blade (Roderigo—Lillian).

Daphne. W. B. Wells's (Chatham, Ont.) English setter bitch Daphne (Toledo Blade—Cambriana), May 10 six (four dogs), by J. E. Dager's Cincinnatus (Count Noble—Dido II.).

Lady Desmond. R. Graham's (Mexico, Mo.) pug bitch Lady Desmond (Spokane—Lala Rookh), May 18, five dogs, by Ebernart Pug Kennels' Eberhart's Cashier (champion Kash—Lady Thora).

SALES.

☞ **Prepared Blanks sent free on application.**

Fred Silver fawn pug dog, whelped Oct. 1, 1891, by Douglas II. out of Lady Verne, by Eberhart Pug Kennels, Cincinnati, O., to O. H. Stapleton, Parkersburg, W. Va.

Lola. Silver fawn pug bitch, whelped April 13, 1892, by Spokane out of Sara Bernhardt, by Eberhart Pug Kennels, Cincinnati, O., to Jackson Sparrow, same place.

Lalla Rookh. Fawn pug bitch, whelped August, 1887, by Leo II. out of Simple, by Eberhart Pug Kennels, Cincinnati, O., to E. F. Milliken, Hazelton, O.

PRESENTATIONS.

Tamarack. Liver and white pointer dog, whelped December, 1885, by Tam O'Shanter out of Croxteth's Rival Queen, by Frank Billings, Cleveland, O., to H. K. Devereux, same place.

ANSWERS TO CORRESPONDENTS.

There is no charge for answering questions under this head. All questions relating to ailments of dogs will be answered by Dr. T. G. Sherwood, a member of the Royal College of Veterinary Surgeons. Communications referring to other matters connected with Kennel Management and dogs will receive careful attention.

W. B., Baltimore, Md.—For all information and blanks for registering dogs in the A. K. C. stud book, write to A. P. Vredenburgh, 44 Broadway, New York city. We furnish ordinary pedigree blanks at 25 cents per dozen.

NEW YORK C. C.

THE storm of last week delayed the removal of the New York C. C. house to Bensonhurst, where all preparations had been made for it, and the opening on Saturday afternoon was postponed.

The New York C. C's. annual *sailing* race will be held on June 11 off the club house, Bensonhurst Pier, Gravesend Bay. The trial races, from the results of which a defender of the New York C. C. International Challenge Cup will be selected, are scheduled for the same day. One race will be called in the morning at 11 o'clock and two in the afternoon if possible. The annual sailing race, and the trial races are open to all *canoemen*, and accommodation in the club house will be provided for the visiting canoes. The International Races will be sailed during the week ending June 25.

The club house is reached by taking the South Brooklyn (39th street) Ferry, at the Battery, New York; the electric cars from 39th street, to 22d avenue, Bensonhurst. From there it is but a short walk to the club house. Boats run on the even and half hours. Cars meet every boat. Time of journey, one hour from Battery.

The following regulations have been drawn up to govern the New York C. C. International Cup. They are practically identical with the original conditions, but have been arranged so as to clear up some disputed points which have arisen in the past.

I.—The New York Canoe Club International Challenge Cup shall be held as a perpetual challenge Sailing Trophy subject only to international competition.

II.—The New York C. C. shall be the holder of the cup until it shall have been duly won by the representative of a canoe club sailing under foreign colors.

III.—The canoe club sailing under foreign colors that shall win the cup shall be the holder thereof subject to the following conditions:

(*a*) The holder shall be responsible for its safe keeping under a suitable bond to the New York C. C.

(*b*) Should the holder dissolve its organization the cup shall thereupon revert to the New York C. C. as holder by forfeiture.

IV.—Any duly organized and recognized canoe club sailing under colors foreign to the holder, may, through its proper officer, challenge for the cup.

V.—The challenge must be in writing, addressed to the holder and shall declare the number of representatives (not to exceed three) to be entered on behalf of the challenger, and the time (not earlier than three months from date of challenge) desired for the races to be held.

VI.—The challenger and the holder having mutually agreed upon a time for holding the races, the competition shall take place subject to the following conditions:

1. Races for the cup sailed in the United States of America must be contested on the water in the vicinity of the city of New York, and under the auspices of the New York C. C. and races contested elsewhere must be sailed on the home waters of the holder.

2. The canoes competing must be within the limits defined by the New York C. C. Rules, and the sailing rules of that club shall govern all races, wherever held, to the exclusion of any and all other sailing rules.

3. One series of races only shall be sailed in any one year.

4. Competition shall be restricted to not more than three authorized representatives of the challenger; and the holder shall be entitled to enter in each contest as many chosen defenders as there are entered representatives of the challenger.

5. The representatives of the holder must be selected after a series of trial races shall have been sailed, which trial races shall be open to members of all canoe clubs in the country of the holder; but the regatta committee of the holder shall have the right to select the defenders, irrespective of the results of the trial races.

6. The holder shall be entitled to waive the three months previous notice required from the challenger.

VII.—To win the cup.

1. A series of three consecutive races shall be arranged to be sailed, and two victories out of a possible three shall determine the holder.

2. Only the men and canoes finally selected shall be permitted to race, and each man shall sail the same canoe in all races. The first canoe to cross the home line shall score one victory for the club it represents.

3. The races must be sailed at a time mutually agreeable to the challenger and the holder, and over a course mutually agreed upon

4. The course to be sailed over in each race shall not be less than eight miles nor more than ten miles, within a time limit of three hours for each race.

VIII. —These conditions may be amended by the holder of the cup, subject to the final approval of the New York C. C.

NOTE—So long as the New York C. C. is the holder of the cup any canoe club, a member of which is chosen as a defender of the cup and wins the same for the New York C. C. shall be entitled to the custody of the cup for one year—a suitable bond for its return at the expiration of that time having been given.

CANOE NEWS NOTES.

The annual meet of the Springfield Canoe Association will be held on May 30 at Calla Shasta Grove, on the Connecticut River. Canoeists are invited and all arrangements for meals, sleeping, etc., have been made. The programme of races is as follows, subject to change according to the weather: No. 1, 9 A.M., tandem paddling, ½ mile straightaway. 2, 9:30 A.M., sailing, on triangle, 1½ miles, twice around; 3, 10 A.M., standing paddling, 200yds. straightaway; 4, 10:30 A.M., hand paddling, 200ft. straightaway; 5, 11 A.M., upset paddling, 200yds. straightaway; 6, 11:30 A.M., sailing, 2 miles, windward and return; Mess; 7, 2 P.M., paddling, double blade, ½ mile, straightaway; 8, 2:30 P.M., tandem paddling, single blade, ½ mile, straightaway; 9, 3 P.M., sailing, open to all boats, 3 miles, windward and return; 10, 3:30 P.M., club fours, ½ mile straightaway; 11, 4 P.M., tournament; 12, 4:30 P.M., hurry scurry; war canoe race, 1 mile.

The relay bicycle race of last week, on which a message was carried from Chicago to New York, 975 miles, in 4 days, 12 hours, 55 minutes, took place under such weather conditions as made the hardest possible test of pluck and endurance. The last stage, from Tarrytown to New York, 26 miles, covered between 9.41 P. M. and 1:04:48 A. M., was ridden by H. Lansing Quick of the Yonkers C. C., one of the leading racing men of the American Canoe Association, and the successful defender of the New York C. C. cup in 1890. Like most of the other riders, Mr. Quick had to contend with deep mud outside the city and a heavy rain.

On May 23, C. P. Weeks, of the Brooklyn C. C., and a party, will leave Brooklyn by tug for Jersey City, where a splendid car on the Erie R. R., will take them to Port Deposit on the Delaware River, whence they will cruise down to Port Jervis, 90 miles. The party will include Messrs. G. R. Butler, C. R. Richards, Paul E. Vernon, R. S. Blake, J. Rudd, Jr., R. J. Wilkin, M. V. Brokaw, Frank L. Dunnell, Harry H. Smythe, P. F. Hogan, W. McKay Miller, Brooklyn C. C., Grant E. Edgar and Nate S. Smith of Newburg, L. W. Seavey, Knickerbocker C. C., vice com. of the Atlantic Division, and James R. Steers of the K. C. C.

The Jersey City C. C. will sail its first annual regatta on May 30, off the new club house on Newark Bay, foot of Danforth avenue, Greenville. The programme includes the following races: 1. Paddling, open canoes, ½ mile. 2. Paddling, decked canoes, ½ mile. 3. Paddling, tandem, ½ mile. 4. Sailing, senior, 4½ miles. 5. Sailing, junior, 3 miles. 6. Combined sailing and paddling, 3 miles. 7. Upset sailing. 8. Club representative sailing race, one man from each club, 3 miles. In races 2, 4 and 6 points will be counted for Passaic River Canoe Association cup.

At a special meeting of the Miquononus C. C., on May 21, an offer from the Red Dragon C. C. to hold the Decoration Day regatta off their grounds at Wissonoming Station, N. Y. D. P. R. R., was received and accepted. The regatta will therefore be held there instead of at Camden, as announced last week. The time of closing entries was, in consequence of change of place, extended to May 27.

A. C. A. Membership.—Eastern Division: J. M. Russell, Middletown, Ct.; Geo. S. Hurlbut, Hartford, Ct.

In consequence of the weather on Saturday, the races of the B. C. C. were postponed until next month.

Yachting.

FIXTURES.

MAY.

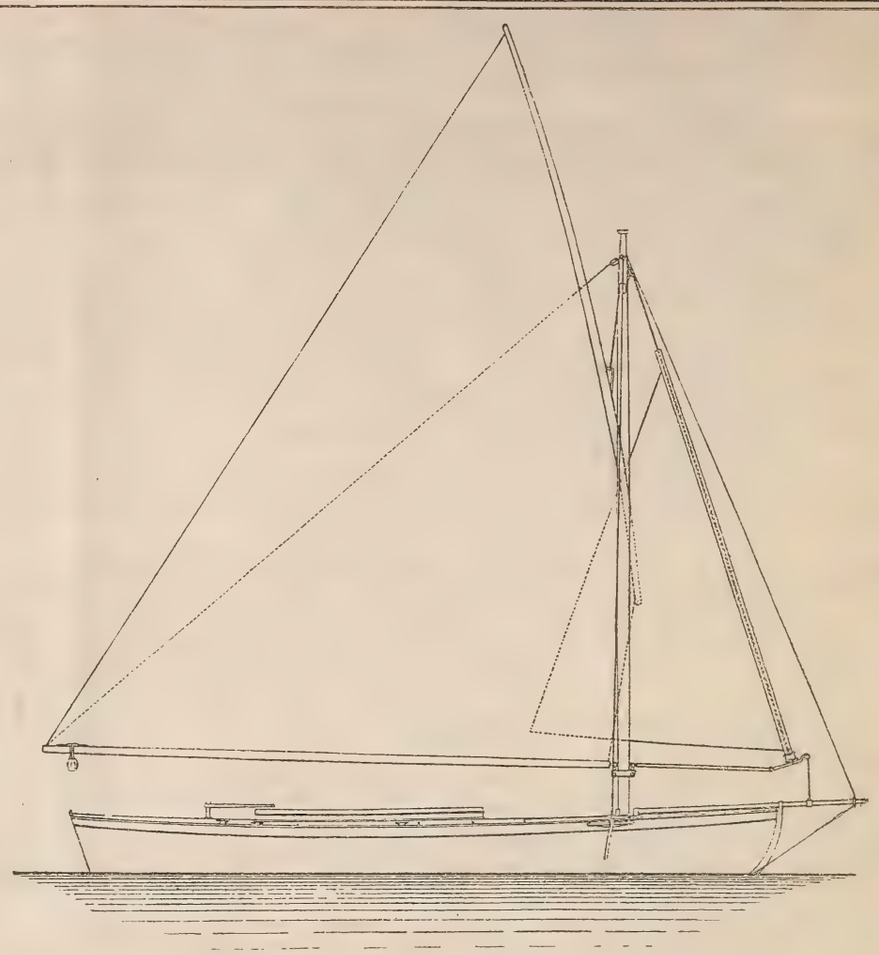
OCTOBER.

1. Corinthian, Atlantic City.
15. Buffalo, Closing Cruise.



THE presence of General Paine at an unimportant meeting of the New York Y. C. is additional corroboration of the rumors that have been current for some time of an attempt to be made to annul the new deed of gift. There is no doubt of the wide-spread dissatisfaction throughout the club at large with the position which it now holds before the yachting world, and the possibility of a successful attempt to rid the club of the heavy burden forced upon it by a few foolish members has been generally discussed. That such action must come eventually has been evident for some time, how and when it comes is a matter that concerns no one save the New York Y. C. It is very unlikely that such another opportunity as the Dunraven episode will soon present itself, or that any easier way out of the difficulty will be found than a square, open and honorable confession of the mistake made in 1887.

THE absurd miscalculations of the value of yachting news which are made by the majority of newspapers is shown this week in the reports of the Royal Thames Y. C. match, in which Iverna and Thistle were the chief competitors. These two yachts have raced so often that their performances are absolutely devoid of interest, but both are large craft, and one is owned by a war lord. While the reports of this race were cabled to all the American papers, not a word is said of a most important race that was probably sailed two days before, the first meeting of the 40-rating class, to which three very interesting yachts have just been added. The performances of Corsair, Varuna and Queen Mab III., with Thalia and the other old boats, far outweigh in real importance any meeting of such back numbers as Iverna and Thistle.

THE probable result of the selection by the New York Y. C. for its schooner sweepstakes of the date already taken by the Eastern Y. C. for its fall regatta, will be that the fleet of racing schooners, already small enough, will be divided, thus spoiling both events. The two dates, Sept. 8 and Sept. 10, are so close together as to be practically the same, as no yacht can race in New York within one day of a race at Marblehead. The fall regatta of the Eastern Y. C. usually brings out four or five schooners, and about as many may be looked for in the New York Y. C. sweepstakes under favorable conditions; but the dates as now set must make of each a mere local race, and diminish the entries proportionately.

THE method of voting in the New York Y. C., which is different from all other American yacht clubs, gives no representation to the great body of members. The right to vote is limited to the owners of yachts in commission within the season, so that the voting for a club of some 800 members is done by not more than twenty or thirty men. At the meeting last week but 17 voters are reported as present, while the entire business of the replacing of the second by the third deed of gift in 1887 was probably done by the smaller number. Under such conditions any measure indorsed by the officers is almost certain to be passed, and the two exceptions to this rule that have recently occurred are all the more notable on that account. The attempt to set aside two of the flag officers of the club at the last election met with such general disapproval from the club at large that the new names were withdrawn prior to the election. At the meeting last week an amendment was introduced to change the office of the measurer, now an officer in the club, leaving it to the commodore to appoint a measurer in May of each year. The manner in which the amendment was received by most of the members and voted down by the yacht owners, was no less conclusive than in the case of the proposed change of officers earlier in the year.

The only reason we have heard for the proposed change is that the measurer is paid for his services, and so is not on the same footing as the other officers. However clear such a reason may appear to the owner of a steam yacht, every sailing and racing yachtsman knows that the office of measurer requires certain important qualifications. He must be a man of long experience in yachting, familiar with all technical details of construction, racing rules, etc., as well as the special duties of his office, and above all he must possess the confidence of the racing men, as absolutely accurate and reliable in his work. The work itself is peculiarly difficult and troublesome, as yachts can only be measured at certain times, in still water and in dry weather, and at distant and inaccessible places, the work always being hurried. Not only is it most desirable that the same man should do the work from year to year, but the clubs have of late recognized the desirability of one common measurer so far as is possible, thus saving an owner the trouble and expense of a separate measurement in every club. So far as the fees of measurement are concerned, they are in most cases a very inadequate compensation for the loss of time, and no capable man would seek the office for the sake of any financial advantage. The measurer's standing in this respect is practically the same as the club secretary and treasurer to whom allowances for clerk hire are regularly made. All things considered, the proposed amendment was a most extraordinary one, and for the sake of the club it is a fortunate thing that it was lost.

SAIL PLAN OF NINY. SCALE, ¼IN. = 1FT.

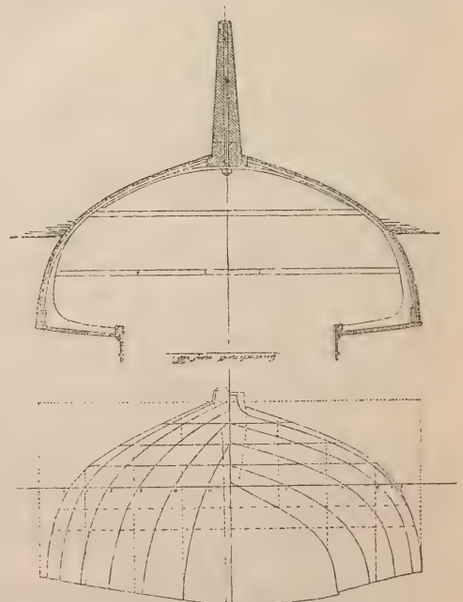
MEASUREMENT RULES.

Editor Forest and Stream:

It certainly was not my intention to further encroach on your columns with remarks concerning the somewhat wearisome matters of length, sail area, etc., but as you have taken occasion to use my name in your comments of last week on "proposed changes in the rules of the Corinthian Navy," and as in so doing you have not quoted me fairly in regard to my position on the question of rules for time allowance in yacht racing, I must again ask the privilege of "calling you to order." I am in favor of adopting the simple waterline length rule in the Corinthian Navy, not that I believe in it as the best and fairest, but that it is better and fairer than that pet of the FOREST AND STREAM, the "rating rule" for classification.

In fact, notwithstanding your misleading assumption regarding my recent remarks in the FOREST AND STREAM, I am not "satisfied," nor did I admit being unqualifiedly satisfied with the existing length and sail area rule or with any other rule for time allowance at present being so persistently preached up purely in the interest of boats having virtually no initial power, and relying for stability entirely on weight hung low, not on power gained from shape. In brief, I am now, and always will be, so long as I can hold a tiller, on deck to oppose rules which have their sole aim in fostering special types. You say that breadth of beam gives power, therefore should be taxed through the sail that it can carry. All right, and for the sake of argument admitting this to be a fact, I say that weight hung low gives power. It gives a power not dependent on the shape of the boat, but is in the nature of an added appendage which automatically shifts to windward of the boat's longitudinal center as she heels, and if large sails should be taxed then in all fairness chunks of lead hung under the boat should also pay a penalty.

A wide centerboard boat, as I have previously shown, is not necessarily larger than a deep narrow boat, and if the former can with advantage and safety carry the larger sail she should be permitted to do so without being penalized. Both lead and sails are attached to boats for the same purpose—to gain speed. I say tax both or tax neither.

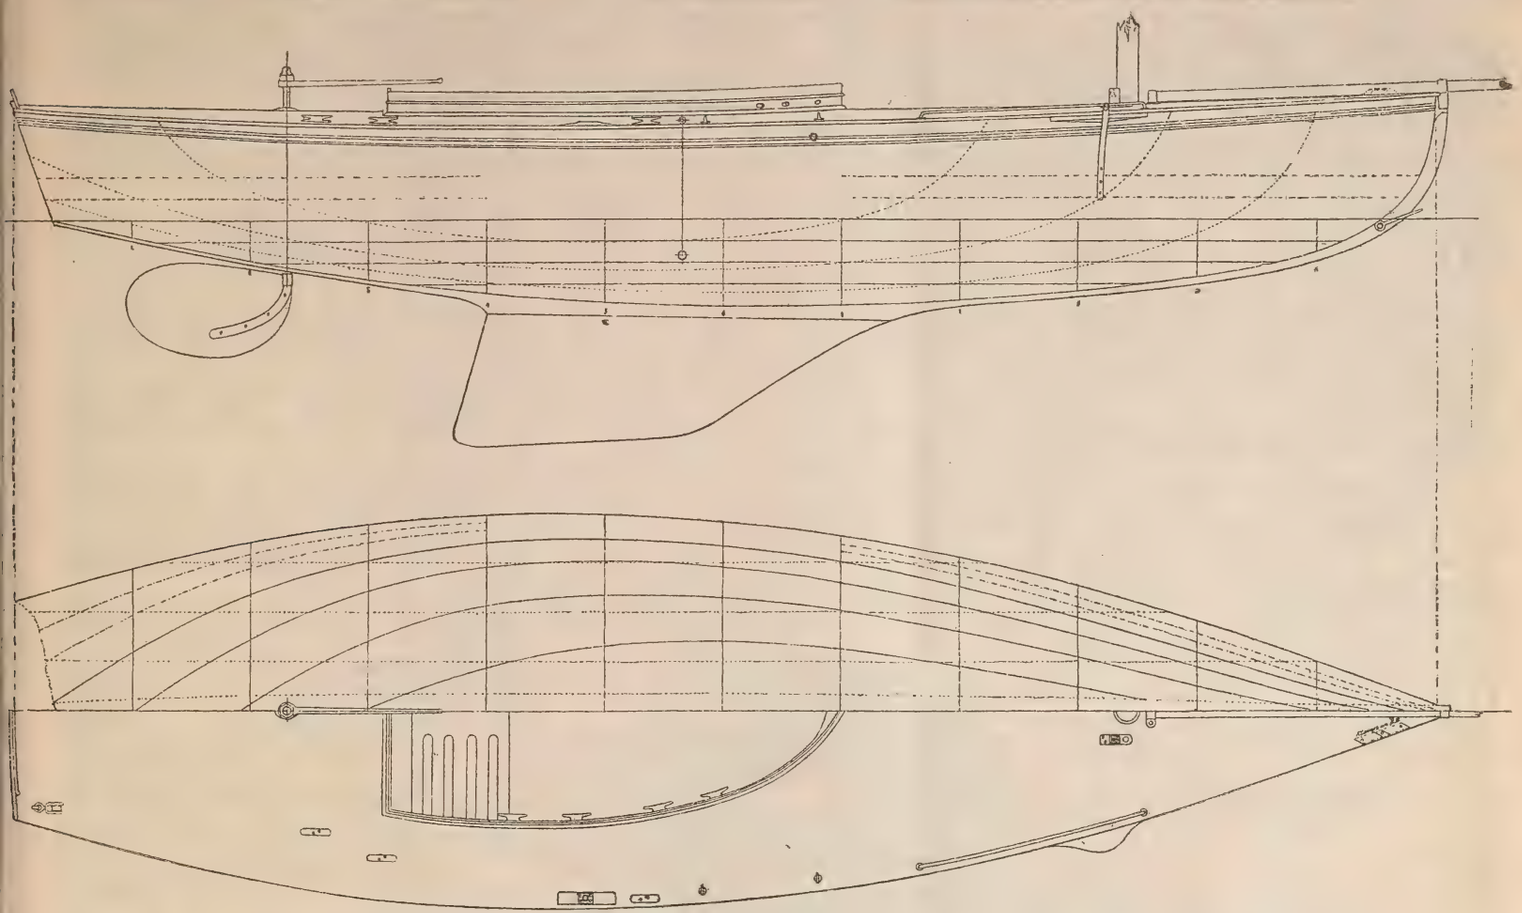


THOMAS CLAPHAM.

ROSLYN, May 23.

[The FOREST AND STREAM not only has advocated no "rating rule," but has earnestly opposed the attempt made by certain American yachtsmen and yacht clubs to ape English ideas by misapplying the term "rating" and "rater." The length and sail area rule which we have advocated both for measurement and classification may be considered as purely American, having been used only in this country, though identical in principle with the rule adopted some years later in England. Our reason for advocating the "Seawanhaka rule" is that it is far less favorable to any one type than any other known rule, in proof of which we can refer to the new 21ft. fleet just built in Boston as a direct consequence of the recent abandonment of the length rule for the Seawanhaka rule. This fleet includes almost every type splasher, skimming dish, cutter and fin keel. From Mr. Clapham's final remark, it appears that he assumes the lead to give speed of itself independently of the sails, a proposition too absurd to admit argument. Our understanding of the question is that the power derived from the lead is measured and taxed by the sail area, just as the power derived from beam is.]

NINY.



WE are indebted to the *Wassersport* for the accompanying design of one of last season's fin keel racers, the Niny, designed and built by Arthur E. Payne for Prince Henry of Prussia, owner of the 40-rater Irene. As distinguished from the new Herreshoff boats, Niny is one of a large family of fin keel racers, but not with a bulb fin. The lead keel is not widely different from the old form, but the adjoining deadwood has been entirely cut away. The yacht is very elaborately constructed of mahogany and Spanish cedar. Her dimensions are:

BODY PLAN AND SECTION.

Length, over all	18ft. 7in.
l.w.l.	17ft. 11in.
Beam, extreme	5ft.
l.w.l.	4ft.
Least freeboard	1ft. 1½in.
Draft, extreme	2ft. 11in.
Mainsail, area sq. ft.	162
Jib, area sq. ft.	31

The mainsail is the standing lug now in general use in England on all racing yachts of 5-rating and under, while the jib is fitted to roll up on its stay, on the principle of a window shade. The yacht is a characteristic example of Mr. Payne's work, to which we lately alluded in connection with Glycera.

NINY. 18FT. RACING BOAT—DESIGNED BY ARTHUR E. PAYNE, 1891. SCALE, ½IN. = 1FT.

LAKE HURON AND GEORGIAN BAY.

THE following cruise was the second one made by the sloop Olivette; her first cruise, in 1890, having been over the complete circuit of the Georgian Bay, and a portion of the North Channel, going as far up as Gore Bay and Spanish River. A full and very interesting account of this cruise was written by Mr. C. T. Sutherland, who was one of the crew on that trip, and who was also with us on this cruise.

The Olivette was built after a model by the late Captain Alex. Cuthbert, of Trenton, Ont.; who made a name famous throughout the Dominion for having designed and built some of the fastest yachts on fresh water, among whom the noted White Wings. Atlanta, Annie Cuthbert, Iolanthe, beside a long list of others.

Her dimensions are as follows: Over all, 42ft.; l.w.l.; 36ft.; beam, 12ft. 8in.; greatest draft, 4ft. 6in.; draft with board down, 12ft.

She has a good roomy cabin 14ft. long by full width of boat with seats on each side of the cabin, comfortably upholstered, which answer for berths at night. Under these are lockers for clothing, etc. The sides of the cabin are also upholstered. A table is arranged on the centerboard trunk. The forecastle is roomy and well fitted up with shelves, stove, dishes, etc., all complete for cruising. There is a roomy cockpit with seats around it, with lockers underneath. A wheel is used in steering. Everything is snug and well put together, so that the boat will in every way answer for the purpose intended.

After procuring a good layout of provisions from the substantials, bread, butter, potatoes, and all kinds of canned luxuries, getting all aboard, we set sail at 4 P. M. on July 15, 1891, a wet, dreary day, with a strong wind from the southwest.

Many of our acquaintances were at the pier to wish us *bon voyage*, and as we sailed out of the harbor, the tooting of the whistles of the tugs and dredge, with the waving of handkerchiefs, convinced us that we were leaving many friends at home.

The different members of the crew may be known hereafter in this epistle as follows: Commodore, Captain, Major, Daddy, Judge and Admiral.

When out about three miles the Admiral came very near taking an impromptu bath. He was attempting to dip up a bucketful of the bright, sparkling water of Georgian Bay, and instead of throwing the bucket well forward and jerking it up quickly, he did quite the reverse, letting it down slowly and nearly perpendicular. It immediately caught the water with such force as to land the dignified Admiral in a very ungraceful position in which he slid over cleats, etc., to the stern, where his feet caught the combing and prevented his going overboard. He braced himself and made a desperate effort, finally landing the bucket partly filled and with the bale drawn into the shape of an acute angled triangle. From this little incident, we all concluded that the Admiral was a man of great grit, who could be depended on under any circumstances, as will be seen further on to be the case.

The breeze was fresh and we bowled along at a good rate under single reefed mainsail, full jib, and staysail; we made full 8 knots, and soon passed that well-known headland, Cape Rich, just west of which are the great clay banks varying in height from 200 to 500 feet and four miles in length.

They are useful as landmarks for sailors, when making for any of the ports on the south shore, especially Medford, Owen Sound or Collingwood. Our watches, which had been arranged early in the day, were as follows: First, Commodore and Major; second, Captain and Judge; third, Daddy and Admiral. We determined to take short watches of two hours each.

After passing Cape Rich, it was a close haul for Cape Croker and Cabot's Head. Before reaching the former, night had fallen about us and shut out everything from our sight except the light on Griffith's Island, which shone brightly and enabled us to lay a good course for Cape Croker.

The wind kept pretty steady during the night, but a little lighter than when we started, so the reef was shaken out and we sailed merrily along. At daybreak we sighted Cabot's Head, about six miles distance off our port bow. The wind had now hauled pretty well ahead and freshened considerably so that very soon a heavy swell was rolling, which caused our dingy to swamp and spill out some of the stuff left in her.

We were not long in getting into calmer water, as we soon got well under the land and abreast of the Head, thereby getting a splendid view of this prominent headland and that snug little harbor, Wingfield Basin. This excellent harbor would answer for any sized vessels, if the government would remove the bar, composed of a few boulders and dredge a channel of sufficient depth to admit large craft. There is now about four and a half feet of water on the bar.

Cabot's Head is composed of three immense cliffs called Boulder, Middle and West cliffs, the latter being nearly 400ft. high. They are of the limestone formation and are certainly one of Nature's most imposing works on the south shore of Georgian Bay. Deer are plentiful on the peninsula and many are bagged during the hunting season. The west bluff assumes an almost perfect profile of a man's face when you are approaching it from the westward, changing its features as you get nearer and finally disappears.

Boulder Rock is an immense boulder 350ft. above the surface of the bay, and evenly balanced on a smooth surface of limestone. This large moss-covered stone is of many tons weight and is a great curiosity.

After passing the Head we had a dead whack all the way to Tobermory Harbor, twenty-two miles distant. This is without doubt the best natural harbor on fresh water. There are in fact two harbors, called by marines the real and false Tub, why one should be called the false Tub, I am at loss to know, as it is equally as good a harbor as the real Tub and is the most used, and has some docks built on its banks. Both of these harbors have plenty of water to float the largest sized boats and either can be approached from any direction in perfect safety. When once inside, perfect shelter is to be had from any sized gale from any quarter.

In the immediate neighborhood of the harbors are a great number of islands, the largest of them being Cove Island on which is situated the lighthouse, six miles from the entrance of Tobermory, Flower Pot Island is so called from the shape of several large rocks now detached from the main body of rock. The base of these are so worn by the action of the water as to form a complete flower pot, or more properly speaking, a huge goblet. They are certainly very picturesque, one of them being 80ft. high. Some of them have had the base worn entirely off and fallen over, the other will probably meet the same fate in a few years.

Taking this group of islands, viz., the Otters, Flower Pot, Doctor, Bears, Cove, etc., all making a total of about fifty in number, as they appear when approaching them from the northeast, present a picture that once seen will always be remembered. Were it possible to truly delineate on canvas all the lights and shadows here seen and reflected in the mirror of clear, sparkling water, it would make one of the grandest landscape paintings ever executed, and would, I think, be worthy of a place in any of the world's picture galleries of renown.

We found lying in the Tub a large steam barge, called the Swallow, having a tow of three large schooners, all four loaded heavily with ties, bound for Detroit. We all came at once to the conclusion that it would be a good scheme to try and secure a tow as far as Goderich. The Com. and Daddy were appointed a deputation to wait on the captain of the Swallow and make arrangements; which they did; and with such success did they carry out their part of the programme, that the tow lasted all the way to Port Huron instead of Goderich.

A gale had been raging for a day or two on Lake Huron, so the captain decided to remain in the Tub until the following day. In the evening the captains of the different vessels, along with the engineer of the Swallow, were invited and joined us in a social gathering in the yacht, and a very pleasant evening was spent, singing and story telling being freely indulged in. Perfect harmony reigned, and nothing to mar the friendly feelings which, as a rule, exists between professional and amateur sailors. The only occurrence that at all jarred the feelings of anybody was that the engineer took the liberty of using the Com.'s grip for a cuspidore.

We left the Tub at 4 P. M. the day after arriving and nothing worthy of note happened until we arrived at Port Huron, the only incident being the passing of little delicacies from the yacht to the schooner J. W. Bissell and *vice versa*. The captain of the Bissell was sending us a carefully prepared lunch which his good wife had fixed up for the boys, all was well packed in pails—placed in a large tub and lowered over the stern, a small line was first sent to the yacht, but it unfortunately escaped the notice of those who were to get the tub, and in consequence of not having hold of the line, the tub swamped, and some of the contents suffered badly, the potatoes fared the worst, but the meal was greatly relished by the hungry crew of the Olivette.

We arrived at Port Huron at 4 A. M. on Saturday morning, and the captain of the Bissel was on hand to let go our line himself, and wishing us a hearty good-bye, we gave him a cheer. This was the last we saw of him until in Detroit, when the Major and Captain ran across him. He certainly is a right good fellow, and we all sincerely wish him and his family all good luck and prosperity for their future.

We remained at Port Huron all day, which gave us an opportunity of taking in all the sights. It is a fine, flourishing city of about 15,000 inhabitants. It contains some splendid and imposing structures. Electric street railway is run on the overhead trolley system. There is a daily line of boats from here to Detroit and numberless ferries plying across to the Canadian side. We crossed over to Sarnia in the afternoon of Monday and attended Robinson's Circus which was exhibiting there.

There is a sad contrast between Sarnia and Port Huron, the former containing only 6,000 people, and of a tumble-down appearance; as to how business was we were unable to judge, as the town was full of people out for a holiday.

Leaving here at 8 P. M. on Monday evening with fair wind, we started for Detroit. This was quite contrary to all injunctions received from old heads as to going down the river by night, however, the temptation was too great as everything was so very favorable. Sail was accordingly made and off we went. It was only a short time until we met two or three of the big iron boats with tows, and things looked rather doubtful, and made us inclined to wish that we had staid in port and not ventured out in the dark. But this feeling soon passed off, as the whistle is invariably sounded and you at once know which side the big fellow wants, so any danger of collision is thus avoided and you steer clear of each other.

The yacht was in charge of Com., Daddy and Major until about 2 A. M., when the Major and Com. went below to obtain a little sleep. Daddy remained up for a short time until the Captain got his eyes wide open. He had not gone far, however, when Daddy put the yacht very close to the rushes to avoid two large tows, one coming up and one going down, meeting in a narrow part of the river. All seemed to be going well, when all at once the main boom went up in the air at an angle of forty-five degrees, then dropped to its accustomed place. The Captain at once perceived that our progress for the present was interfered with by the yacht having her nose stuck in a mud bank, of which there are plenty in the St. Clair flats. The crew were now all called up very quietly, though, as it was not intended to awaken the Com., who was sleeping sweetly. The anchor was got, a long line attached, and all hands pulled with a will, but all to no purpose, as she was in the mud fast enough for all practical purposes, and the swell caused by each passing steamer only made matters worse, as it put us further on.

Finally, when it was seen that all efforts to get off by working, the Captain and Judge took the dingy and started in search of a tug. They found one at the canal three miles away, the captain was persuaded to come and haul us off with his tug, which he did in a handsome manner. When he came up he stopped his tug a long way from the yacht, when one of the crew sang out "Come a little closer captain, there is lots of water." "Oh, yes," he answered, "if there is lots of water, what the —— are you doing there?" And no closer would he come, so the mainsheet had to be unrove, bent on to our towline and sent aboard the tug. It took but one good pull and away we went after him to the canal. We were well out into Lake St. Clair, when the Com. came on deck perfectly ignorant of what had taken place, and all that he noticed in any way wrong, was that the mainsheet block was not properly fastened, it being hooked to the traveler instead of the clews. The others never let on until we had arrived at Detroit, when the Major gave the thing away, thinking it too good to keep.

The sail across Lake St. Clair was simply perfect, the wind being fair and sufficiently strong to make everything pleasant. All were in the best of spirits, in anticipation of being in a very short time in sight of our objective point, the city of Detroit. We saw innumerable large and small craft crossing the lake, going and coming from all directions.

At 10 o'clock we sighted the large red lightship lying near the entrance of the Detroit River and to the right lay the island Belle Isle; we soon passed the latter and opened up the city, which presents a very striking appearance as you round the westerly end of the island. We steered for Davis's boathouse, which had been previously described by the captain of the Bissell, where we found a fine slip and got the yacht safely moored along with twenty-eight other yachts at the very reasonable charge of $5 per month, and as we remained eight days, it cost us $1.30.

When everything was made snug, Daddy says: "Gentlemen, you will have to excuse me for a little while," and he was gone just one week. Many were the surmises as to what had become of him. All were wrong, however, for in a day or two he appeared and gave all the crew he found aboard a kind invitation to dine at his aunt's. Needless to say, all at once accepted, and we did have a pleasant visit at Mrs. J.'s comfortable home. None wondered now at Daddy's absence when we saw what pleasant quarters he had struck.

After we had spent our allotted time, eight days, in the city, all were anxious to turn the prow of the Olivette homeward, so accordingly on Monday we started with a fair wind and soon passed Belle Isle and out into Lake St. Clair homeward bound. It was a perfect yachting day, and the sail across the lake and as far as Grand Point, where we laid up for the night, was delightful in the extreme.

Next morning we were up and off early with a light breeze over our port quarter. The breeze was light all day, and at 4 P. M. fell altogether when we were two miles below St. Clair. Captain and Major struck for the town after we had come to anchor. They soon returned on board the tug Charlie, which took us in tow, and at 9:30 we were in Port Huron.

We passed a very pleasant evening in town, renewing old acquaintances and bidding all good-bye. The Captain on this occasion was particularly lively and endeavored in every way to make himself agreeable to his newly made friends.

About seven next morning we attempted to sail up the Rapids with a light breeze, but signally failed and were going astern at a lively rate when along came the tug Charlie and took our towline and soon had us a mile out in Lake Huron.

No wind and the greatest heat we had experienced at any time during the cruise. Bugs and flies were about us in myriads, on the sails, deck, down your back and in every conceivable place imaginable.

The air was oppressive and all went to indicate what was shortly to take place, a most furious thunderstorm. The storm was seen a long distance off and everything was put in readiness, all unnecessary sail being stowed just as the squall struck us in full force. A double reef was soon put in the mainsail, the jib stowed, and we fairly flew under the close reefed canvas amid the livid flashes of lightning, terrific peals of thunder and a perfect deluge of rain, the latter caused all who had not "oilies" on to beat a hasty retreat be-

low. We thought it would have been a little more comfortable in Port Huron, but none thought of turning tail to the storm.

During the night we had three thunder squalls in close succession, and the wind raised a heavy sea which would frequently splash up through the centerboard box. Here is where the Admiral got in his good work, as he stood with a determined look on his handsome face, grasping a pair of trousers in his hands which he pressed firmly down on the spot where the water came in, and was thus successful in keeping out large quantities. He stood there for three long hours without a murmur while the remainder of the crew were busy outside pumping and handling the yacht generally. The Admiral received immediate praise for his part of the night's work. At daylight it was blowing fresh, the wind and sea rising all the time. We were out of sight of land and had no means of telling exactly how far up we were.

Our course we altered a little so as to get the land in sight and pick out a harbor, as it was plain to be seen we were in for a regular nor'east blow. After an hour's run we made out the land, which was a high, bold shore, but no signs of any harbor, we could see a depression in the land which we thought might be a river, so it was agreed that we should proceed nearer and try to get a lee, as the water appeared good. Just here our dingy broke loose and it took a little time to pick her up, which was done in good style.

We could now make out a dock and some boats lying in what appeared to be a harbor, so we started directly for it. A closer examination proved this to be correct, and presently we rounded the breakwater at Bayfield and the waves were breaking clear over the pier. From two men on the other side of the harbor we learned that there was plenty of water in the narrow channel to allow us to go up into the basin. We did so, and were snug and out of the heavy surf which rolled in at the center pier.

The gale raged all day and all night and filled up the channel so that we were unable to get out the next morning when we made an attempt to start. During our short stay at Bayfield we made the acquaintance of Mr. John Swartz, proprietor of the River Hotel, a first-class hostelry for summer or other visitors, and at the time of our visit his house was filled with guests from all parts of Ontario and certainly they could not find a more obliging, kindhearted host than the same John.

While at dinner at Mr. Swartz's, we received a most startling piece of news from the *Stratford Beacon*. Our genial landlord came into the dining room looking very serious, holding a paper in his hand, he says: "Do you fellows know that you are all dead?" We looked at him in astonishment, and answered that this was the first intimation of the fact that we had received, and from the way the eatables had been disappearing from the table, we did not believe it. "Well," he said, "you are all drowned, for here it is in black and white." He then read the following:

"*Wiarton Echo*: It is rumored that a number of young men from Meaford, who started from there in a small boat last week for a cruise, have all been drowned by the boat upsetting. The following are the names of the young men who are from Meaford: J. C. Sing, H. R. Cleland, Geo. Griffith, C. T. Sutherland, A. H. Stephen and E. R. Whittington."

This item knocked all the appetite out of Daddy, and he exclaims: "Boys, this is too bad," The others were rather inclined to smile, but he made for the telegraph office, vowing vengeance on the reporter who started such a yarn. After he had sent off the dispatch his mind was easier.

How any person can take any satisfaction out of circulating such a report without first being satisfied that it is true, is more than I can understand. Every person must know that one's friends are anxious about them when they are on the water, and exposed to certain dangers, and for a newspaper to deliberately put such lies in circulation that are sure to reach home is contemptible to say the least of it.

With the assistance of Mr. Swartz, two spans of horses and about half the town, we were pulled over the bar at 4 o'clock, and once more floated on the bosom of Lake Huron. A tug happened to be at Bayfield en route for Goderich, and as the wind was very light and ahead, we gave him our line and in two hours were between the piers at Goderich. We will all always keep a warm spot in our remembrance of J. Swartz for his extreme kindness to us while at Bayfield, and I am sure he has the unbounded thanks of the crew of the Olivette.

We left Goderich early, head wind again, but were making good time up as far as Point Clark, when Major said to the Com., who was steering, that he was told there was a bad shoal running out a long way from some point near Kincardine. He was asked the name of the point and said he thought it was Black Point. The chart was consulted and no such point appeared. However it was decided to put the yacht on the starboard tack and stand further out into the lake.

We had gone only a short distance when up came the board and in another instant we were hard and fast on a shoal covering about one-eighth of an acre, two and one-half miles from Point Clark Light, no buoy to mark this dangerous patch which lies in a direct line from Goderich to Kincardine. By moving ballast and dispensing with part of it altogether, we managed after three hours' hard work to work ourselves off.

After the yacht was again put in trim, we made sail and started again for Kincardine where we arrived at daylight next morning. Captain had left us shortly after we struck the shoal to procure a tug to assist us off, and we saw no more of him until about noon next day, when his smiling visage appeared on the dock at Kincardine, mighty pleased to see us all safe and sound in port.

We remained in port all day Sunday, met some very hospitable people who made our short visit very pleasant indeed. Next day we went to Port Elgin, and here Daddy left us and drove home 46 miles, while by water we were 180 miles from home.

Next night we laid at Golden Valley, near Round Island. This is a very hard place to take, as the channel is very intricate and full of dangers in the shape of sunken reefs. Next day we made as far as Cape Hurd and passed through the Cape Hurd Channel and once more found ourselves in old Georgian Bay.

I am not wide of the mark when I say that a great feeling of relief took possession of all hands when we sailed in our beautiful Bay so free from those many traps with which the east shore of Lake Huron abounds. Instead of having to keep six or seven miles from the shore, as you have to from Port Elgin to Cape Hurd, you sail so close to the land that you could toss a biscuit ashore. Just off Half Way Rock we met the steam yacht Straightaway, of Bay City, who heartily saluted us and we returned the compliment. We had a spanking good breeze until off Wingfield Basin when it fell entirely, so all went to explore the Basin except the Com. who was left in charge.

Lying in the Basin was the White Wings, of Meaford, with several ladies and gentlemen aboard. All were glad to meet each other, and as they were getting ready for a start, the yachts sailed in company until the White Wings was headed for Dywer's Bay and Olivette for Lynn's Head. On arriving we took a hearty supper, went down to the yacht and turned in. Up at daybreak and started, light air, but fair, splendid run to Cape Croker, as the breeze had freshened. There we stopped for two or three hours to clean up ship and get everything shipshape before reaching home, now only 32 miles distant. At dark we were off Cape Rich, and as the wind had died away completely, it took all night to make Meaford.

At daylight the Com. took the dingy and rowed to Swarthmoor Camp, where he soon had them all awake and found everybody in good health. The boys reached the harbor soon after, and here ended one of the most enjoyable cruises that it has ever been the good fortune of the writer to participate in.

I cannot close these rambling remarks without commenting on the great contrast between the Canadian and American shore which must be apparent to every person who has ever taken a trip down the St. Clair and Detroit rivers. Take a belt of country five miles in width, commencing at Port Huron and extending to and including the city of Detroit, you find a population of 300,000 people, there being beautiful towns between Detroit and Port Huron, for instance, St. Clair, Marine City, etc. Everything denotes prosperity and a go-ahead, businesslike appearance which on our side is conspicuous by its absence. Now take a similar belt on the Canadian side, and what do you find? Why, the population, including Windsor, Walkerville, and Sarnia is not more than 25,000 all told. Why is this? Our side of the river is the better land, and there is no reason that such a difference should exist in the short distance of half a mile. Will some of our politicians please explain?

The Georgian Bay with a superficial area of 5,000sq. miles and its 57,000 islands (Bayfield's estimate), along the north shore and up the North Channel, offers better opportunities for cruising, camping out, fishing, hunting, than can be found in any body of fresh water.

A fairer spot would indeed be hard to find than in the neighborhood of Moon River or Point Aux Barrie, but there is no necessity to particularize as the tourist cannot go astray. The islands extend out into the Bay in places on the north shore 19 miles from the mainland. The American people as well as ourselves have come to the conclusion that it is the campers' paradise, and large parties come every summer from Philadelphia, Buffalo, and as far as New York to spend a few weeks there. Many of the islands are already sold, and many applied for. The government charges $5 per acre, an office fee of $5 and the purchaser pays for the survey. Many Toronto families remain on their islands all summer as they find it more congenial than in the city. S.

Mr. Robert Goelet has ordered a 65ft. steam yacht of C. L. Seabury & Co., of Nyack.

THE FISHER CUP.

The following conditions have recently been drawn up to govern the contests for the Fisher cup, now held by Norah, Mr. John Bell, of Belleville, Ontario:

Whereas, The rules governing the competition for the Fisher cup for sloop yachts, have proved in practice wholly inadequate.

And whereas, Mr. A. J. Fisher, the generous donor of the said cup, has declared that "I have given up yachting entirely" and declines to further interest himself in the matter;

And whereas, the Chicago Yacht Club, under whose auspices the cup was first offered for competition, is extinct and no authority competent to render said rules practical and workable exists outside of the Bay of Quinte Yacht Club;

Therefore, be it resolved, by the Bay of Quinte Yacht Club, by and with the consent of the trustees of the said cup, that in order to encourage *bona fide* competition for the Fisher Cup aforesaid and thus stimulate and promote yachting in our midst, the following shall be the terms and conditions upon and under which the said cup shall hereafter be competed for:

This cup is subject to challenge by sloop yachts (belonging to any regularly organized yacht club), of not less than 36ft. corrected length measured by the Lake Yacht Racing Association measurement, as existing in 1891, upon the following conditions:

1. It is to be held by the winner thirty days after race without liability to challenge.

2. At any time after the expiration of that period, and up to the 1st of September in each year, the winner must accept any challenge, and be prepared to sail a race for the same within thirty days from the receipt of such challenge in writing, or forfeit the cup to the challenger; but should any yacht succeed in holding the cup in two consecutive races during one season, it will not again be liable to challenge until the commencement of the yachting season of the following year.

3. The challenge for this cup shall be in writing and shall fix the day of the race not less than twenty-five days from the date of the receipt of the challenge by the holder of the cup, unless otherwise agreed between the parties.

4. This cup shall become the *bona fide* property of any yacht holding it successfully for four consecutive races, or for two consecutive yachting seasons without a race.

5. The yachting season in reference to this cup, is to be from the first Saturday in June until the last Saturday in September in each year.

6. Should a yacht holding this cup be destroyed or rendered unfit for racing, or the owner thereof die, or should she be sold out of the club to which she belongs and not into another yacht club, the cup shall be returned to the club to be again sailed for; and if the cup should be held by a foreign yacht, and she should be sold out of the club to which she belongs and not into another yacht club, the cup shall not go with her, but shall be returned to the club to which she belonged when the cup was won, to be sailed for again; and in case any yacht is sold and her owner enrolls her in another club the cup shall go with her to such other club, to be sailed for the same as if no transfer had been made.

7. The course shall be 30 nautical miles in length, triangular in shape, 10 miles around, three rounds, and be sailed over within 6 hours by the winning yacht or no race. In the event of failure to cover the course within the time limited the attempt to be renewed day after day, except Sunday, until a race has been completed within the time aforesaid.

In case of either yacht failing to start, or withdrawing before a race has been completed, the cup shall be awarded to the other competitor. No restriction as to crews or steersman.

The sailing rules, time allowance and regulations of the L. Y. R. Association shall govern in all other respects.

8. The challenger shall address his challenge to the secretary of the club to which the yacht holding the cup belongs.

9. The challenger shall name one judge, the holder of the cup a second judge, and these judges may name a third; failing agreement to do so, the club shall name the third judge.

10. The buoying of the course and all other matters of arrangement and detail shall be in charge of the club to which the holder of the cup may belong.

W. H. Biggar, Commodore B. Q. Y. C.
Geo. N. Leavens, Sec-Treas. B. Q. Y. C.
D. B. Robertson, Trustee Fisher Cup.
R. S. Bell, Trustee Fisher Cup.

Belleville, May 4.

OSWEGO AND LAKE ONTARIO.

Editor Forest and Stream:

The season of 1892 on Lake Ontario will be an interesting one for yachtsmen:

The opening cruise of the Oswego and Rochester Yacht Clubs both occur on May 28 and their destination, Great Sodus Bay, being the same, there will be more than usual interest.

In the Oswego Y. C. fleet, which races for the club pennant on that day, are the noted flyers Yama, Pappoose, Cinderella, Choctaw and others. In the circuit races of the Lake Yacht Racing Association Oriole and Vreda will have to try conclusions with Cinderella, and White Wings and Verve with Pappoose and Choctaw.

In the 40ft. class the new Fife cutter Zelina, of Toronto, especially designed to beat the famous Yama, of Oswego, will compete. Every one expects a close race between Katie Gray, Dinah and Gracie in the 35ft. class.

A new Fife yacht is also building for the 30ft. class which, with Samoa, Kelpie, Erma and Nancy, should make a pretty race.

The new Fife 25ft. No. of Rochester, is expected to keep the Maud B. and the rest of that class in her wake. Our club houses are receiving an overhauling and repainting. Unusual preparations are already begun to make this a memorable year. Tiller.

YACHT NEWS NOTES.

The spring meeting of the New York Y. C. was held on May 19, with Com. Gerry in the chair. Several of the proposed amendments to the constitution and by-laws, including those relating to officers of the U. S. Navy, to nominations of officers, to representation and to racing numbers, were adopted subject to ratification at a special meeting to be held on June 9, when the date and place of rendezvous for the annual cruise will be decided. The proposed amendment making the measurer a paid servant of the club instead of an officer, was opposed by every one of the voting members and was lost. The new cap device recently submitted for the club's approval was unanimously adopted. For yacht owners the device is a red cross, with a white star in the center, on a blue ground, shaped like a half globe, resting on two foul anchors in gold, and the whole fastened to a broad band of black military braid. For non-yacht owners the device is the same, except that the colors rest on a single foul anchor. The report of the special committee on an exhibit of models at the World's Fair was to the effect that the club had no authority to remove or loan the collection, and nothing will be done. The following members were elected: Geo. B. De Forest, J. Edward Ackley, John Henry Purdy, Wm. Salomon, Benj. R. Bedle, Thos. R. Chaney, Tracy Dows, Dwight Braman, Daniel E. Starr, H. R. McHarg, George H. Belcher, James Clinch Smith, John Junius Morgan, Jos. R. Hegeman, Henry Gilsey, Alex. T. Ketchum, R. Cambridge Livingston, Louis M. Kortright, Richard Clay Sibley, C. L. Peters, Herbert E. Dickson, Col. Thos. H. Barber, H. C. Fuller, Jas. S. Manning, H. Melville Hanna, W. J. Matheson.

The official time of the sixth annual Reedy Island race of the Cooper's Point C. Y. C. is as follows:

SLOOPS.	L.W.L.	Elapsed.	Corrected.
Nance	20.05	23 01 00	22 10 29
Hilda	22.05¼	22 23 15	22 23 15
A.B.C.	22.02½	22 36 00	22 30 17
OPEN CATS—16FT.			
W. S. Kinsey		22 19 00	(fastest time).
McCullough		23 40 00	
Burton		Not timed.	

The Humphreys and Lindenborn did not complete course.

The formal opening of the season by the Larchmont Y. C. took place on Saturday, with the usual ceremonies, Com. Colt and a number of the club members being present. The racing will begin on June 4, though there will be a regatta on May 30 at Larchmont under the management of the Corinthian Mosquito Fleet, open to all small craft. The classes will be 21 to 25ft. L.W.L., 18 to 21ft., 15 to 18ft. and under 15ft. The course for boats 18ft. and over will be to the spar buoy on the westerly end of Execution Reef, thence to and around Matinicock Buoy and back; distance 13 miles. For boats under 18ft. it will be to the buoy on Execution Reef, thence to and around Constable Point Buoy and back; distance 7 miles.

The following arrangements have been made for the opening of the Seawanhaka C. Y. C. house at Oyster Bay. A special train has been provided on Saturday May 28 and it will leave New York (foot 34th street, E. R.) at 9:30 A. M.—and returning, leave Oyster Bay at 4:30 P. M. The races for cat boats and smaller classes of yachts will be started at 10 A. M. The function of hoisting and saluting the club burgee will take place at 12 M. Music-breakfast at 8 o'clock and afterward naphtha launch races and dancing.

The Keystone Y. C. has recently been organized by yachtsmen of Long Island City with the following officers: Pres., W. L. Doncaster; Vice-Pres., Geo. Green; Sec'y, C. C. Atwood; Com., Frederick Russel; Vice-Com., Edward Mailler; Trustees, Peter Meardie, H. Karslake, John Soltan, Aaron Cleveland. The club house and station are at Woodbury, on Hempstead Bay, where the opening was held on May 19. A race was on the programme, but owing to the weather it was postponed to May 30.

Wm. H. Vanderbilt, eldest son of Cornelius Vanderbilt, died on May 23 of typhoid fever in his twenty-first year. Mr. Vanderbilt, who was a member of the junior class of Yale, was the owner of the Burgess 30-footer Gladys, and last year built the 46-footer Ilderim. The latter yacht was never fitted out, but has just been overhauled for this season's racing. Mr. Vanderbilt was a member of the New York Y. C. and Seawanhaka C. Y. C.

The Corinthian Y. C. of Philadelphia will open the season on May 28 by a review of the fleet and squadron evolutions, in the afternoon, followed by a reception on board the flagship Speranza. On Sunday the fleet will "dress ship." On Monday the fleet will get under way at 10:30 for a squadron sail, with ensigns half-masted, all yachts in cruising trim. On Tuesday the fleet will sail on a cruise to Baltimore and Annapolis.

The British racing season is now well under way, a number of races in the smaller classes having been reported for the past two weeks in the *Field*. The racing in the larger classes began on May 21 with the new Thames match, around the Mouse Lightship, a clear day, but with variable winds. Iverna won, beating Meteor (Thistle), now sailed by Wm. Gomes.

The Philadelphia Y. C. has elected the following members: Chas. J. Beebe, Wm. Boothby, Chas. B. Krein, Josiah L. Adams, J. Sharp Loyd, Chas. G. Macey, Theodore F. Jenkins, Albert A. Guigues, Samu-l F. Given, Wm. P. Bement, Alfred P. Trotter, M. W. Whitaker, Wm. S. Stockton. Mr. Benson Mann has been appointed fleet captain.

Mr. Samuel Ayres, of Bay Ridge, last week shipped to Chicago three hulls of electric launches, two designed by Mr. Gardner and one by himself. The power will be fitted there and they will be tested prior to awarding the contract for a large number for use in carrying passengers about the Fair grounds.

On May 21 the 25ft. sailing length racer Helcia, designed by Gardner, and built for Prescott Hall Butler, was launched at Webber's yard, New Rochelle. Mr. Webber has put the same excellent work in this boat, and also in the Manning 35-footer, now building, that he did last year in Smuggler and Needle.

We have received the club book of the New York Yacht Racing Association for 1892, containing the racing rules, constitution, list of associated clubs, etc. Twenty-one clubs are now in the Association, from Sing Sing, on the Hudson, to Greenwich, on Long Island Sound.

The judges in the Marine and Field Club regatta will be Messrs. Stephen Peabody, of the New York Y. C., Theodore C. Zerega, of the Seawanhaka Corinthian Y. C. and H. J. Gielow, of the Atlantic Y. C.

The annual regatta of the Corinthian Y. C. of New York will be sailed on Saturday, June 25, on New York Bay. The annual sweepstakes will be sailed on Aug. 15 off Newport.

The opening race of the Eastern Y. C., on May 30, for the 30ft. class, will start at 10:30 A. M., off the club pier, the course, depending on the wind, being about 18 miles.

The Yorkville Y. C., formerly at 102d street, East River, has taken the old site of the Knickbocker Y. C. at Port Morris, where a club house has lately been erected.

Mr. Cyrus W. Poole, chief engineer of the steam yacht Tillie, and formerly of the Stranger and Sagamore, died a short time since at Portland, Me.

The price paid by W. H. Crane for the steam yacht Melissa, built last year by Lawley, was $21,500. Her name will be changed to Senator.

Surf, cutter, has been sold by Mr. Boyce to W. G. Titcomb, former owner of the steam yacht Edgewater, and will now hail from Boston.

New Jersey Rifle Shooting.

[*Specially Reported for Forest and Stream.*]

Hoboken Rifle Club, Captain John Yeck, headquarters Third and Adams streets, Hoboken, Friday May 20. The second regular weekly shoot resulted in better scores, several beginners showing decided improvement. The conditions were ten shots off-hand, 25-ring target, possible 250:

J H Kruse	25	25	24	24	24	23	22	22	21	20—230
Capt Yeck	25	24	24	23	23	22	18	18	16	16—209
Wm Dilger	25	24	23	23	22	21	21	15	15	14—203
H Keneddy	24	23	23	20	20	19	18	16	19	15—195
Jos Schauer	24	23	23	22	22	18	17	17	15	11—193
F Stein	24	24	22	22	20	18	15	15	15	11—187
F Kroeger	25	24	23	20	20	17	17	15	15	11—184
H Wirth	22	20	18	18	18	17	14	14	14	18—168

The scores made last week were: F. H. Kruse 225, Wm. Dilger 219, Capt. Yeck 211, F. Kroeger 198, Jos. Schauer 146, H Wirth 134. The club is considering the advisability of holding a shoot.

Freischutz Company, No. 53, Germania Schuetzen Bund, Captain Joseph Schauer, have about completed all details for the first annual shoot, to take place in Wisch's Hall, Third and Adams street, Hoboken, next Sunday the 29th inst. Bowling for prizes will also be a feature. The money prizes offered to the shooters are; first, $12; second, $8; third, $5; fourth, $4; fifth, $3; sixth, $2; seventh and last, $1. Thirty cents a ticket, two best tickets to count. Thirty gold medals are offered, every marksman scoring 340 points, is entitled to a medal. Tickets thirty cents. The money prizes offered to the bowlers are: first, $8; second, $6; third, $4; fourth, $3; fifth, $2; sixth, $1. A special medal is offered to the holder of the ten best tickets, in both the shooting and bowling department, an unusually efficient committee has the arrangements in hand, and their efforts will no doubt meet with great success. It consists of: Chairman, L. Schmitt; Secretary, William Mahle; Captain Schauer, Ernest Borkenhagen, William Schauer and Gustav Erne.

The Palisade Rifle Club, Capt. John C. Reinhardt, has arranged a neat programme for its two days shoot, to be held at headquarters, 351 Palisade avenue, Jersey City Heights, on Saturday and Sunday, June 18 and 19. It is open to all comers, any .22cal. rifle; first prize $10, second $7, third $5, fourth $3, fifth $2, sixth, seventh and eighth $1. First ticket 50 cents, re-entries 25 cents; two best tickets to count, well-known shooting rules to govern. As a premium a handsome gold medal is offered to the holder of the 10 best tickets. The first day's shooting commences at 2 P.M. and terminates at 11 P.M., the second commences at 9 A.M. and closes at 8 P.M. The committees who have charge of the affair are: Shooting—George W. Graf, chairman, Adolph Malz, Henry E. Boddey, J. H. Kruse, Henry L. Hansen and Charles E. Bird. Arrangements—Charles Burk, chairman, Jacob Kehrwald, Herman Rosenthal, Thomas A. Reynolds, Frederick Fischer, Gustav Russ and Adolph Rossy This is the Palisade Clubs first attempt in this line and their initial effort to cater to the taste of the many riflemen of the vicinity will, no doubt, meet with much well-earned success, as the committees are doing some tall hustling.

The second semi-monthly out-door shoot of the Miller Rifle Club

took place at the Union Hill Schuetzen Park, Wednesday afternoon, May 18. Every man present fired 25 shots, the scores made being appended below:

Geo Schlicht	23 24 25 21 21	F Liell	23 17 22 12 19
	24 23 21 24 23		22 19 20 10 21
	21 24 23 21 21		22 22 21 18 25
	25 21 19 18 22		22 21 21 13 25
	23 21 18 25 22—560		21 23 23 23 23—514
E Fisher	21 16 19 21 22	H Lieth	23 20 14 16 17
	22 24 24 23 23		24 22 20 18 14
	21 21 19 21 22		16 19 16 18 19
	21 23 18 16 24		16 24 18 16 16
	23 24 22 21 24—539		17 19 23 22 20—477
A Meyns	20 18 16 17 22	J H Kruse	21 23 21 18 20
	23 24 23 21 20		17 22 20 10 19

	16 17 21 20 16 15 14 23 18 19 19 14—446		

The club held its weekly shoot at headquarters that evening with this result, the conditions being 10 shots, off-hand, 25-ring target, possible 250:

D Miller	25 25 25 25 24 24 24 24 23 23—243
E Fischer	25 25 25 24 24 24 24 24 23 23—241
L Vogel	25 25 25 24 24 24 24 22 22—240
F Liell	25 25 25 25 24 24 24 23 20—240
F Brandt	25 25 25 24 24 24 23 23 21—239
A Meyns	25 25 25 24 24 24 24 23 23 21—229
L Sohl	25 25 25 24 24 24 23 23 22 22—237
Capt Dewey	25 25 25 25 24 24 23 23 22 23—234
F Meyer	25 25 24 24 24 23 23 23 21 21—233
F Drewes	25 25 25 24 24 24 23 23 21 18—232
H F Meyer	25 25 25 24 24 24 23 22 20 20—232
F Kloepping	25 25 24 24 23 23 23 22 22 20—231
C Prien	25 25 24 24 24 24 23 23 21 20 20—230
R Zach	25 25 24 23 23 23 23 23 22 20 19—227

A special meeting will be held at headquarters next Sunday afternoon to complete all further details for the big festival which takes place at the Union Hill Schuetzen Park next Monday.

Palisade Rifle Club, Jersey City Heights, Captain John C. Reinhardt, Friday, May 20. The scores made to-night in the several classes are appended below. The conditions were 10 shot, off-hand, 25-ring target, possible 250:

First Class.

Geo W Graf	25 25 25 24 24 24 24 25 23 23—241
Capt Reinhardt	25 25 25 25 24 24 24 24 22 22—237
A Malz	25 25 25 24 24 23 23 23 22 20—234
C E Bird	25 25 25 24 24 23 23 22 22 20—233
Thos A Reynolds	25 25 24 24 24 24 23 23 21 20—233

Second Class.

H Rosenthal	25 25 24 23 22 22 22 21 18 17—219
O Burk	25 24 23 23 23 21 21 20 20 18—218
A Rossy	25 25 23 22 21 20 20 18 18 18—210
J Kehrwald	25 23 21 21 21 20 20 19 19 18—207
G Buss	24 23 23 21 21 20 20 20 17 17—206
F Fischer	20 25 25 19 19 19 18 18 18 14—209

In the medal shoot in progress for the past eight weeks under the auspices of the above club, who by the way are making rapid strides in shooting circles, Henry E. Boddey leads the first class men with scores of 23, 25, 25—73, 24, 25, 24—63 and 25, 24, 24—73, total 219 out of a possible 225. Herman Rosenthal leads the second class members with scores of 22, 23, 23—68; 23, 22, 25—70 and 23, 24, 25—72, total 210. The shoot closes June 12.

JAY H. KAY.

Cincinnati Rifle Association.

THE regular shoot of the Cincinnati Rifle Association was held on its range May 22, conditions 200yds., off-hand, at the standard target:

Best	80	80	76	Simon	70	66	74	
Gindele	87	87	85	Stegner	80	68	67	
Wein'him	78	75	78	*Brumback	66	59	59	
Payne	78	76	82	Zelger	68	63	61	
Copeland	80	73	69	Speth	83	78	75	
Drube	75	72	75					
Hosenzahl	83	74	85					
Topf	64	58	56					
Hanck	57	46	60					

*Military.

Heidenreich Rifle Club.

NEW YORK, May 23.—The weekly scores shot at our range, 425 West Fifty-third street, distance 100ft., were as follows:

Dalton	240	Goodman	231
Aigeldinger	236	Voelckel	230
Horn	234	Hippold	228
Hicks	231	Reinholdt	223
Kaufman	219		
Schmitz	219		
Le Claire	216		

The friendly shooting match between Capt. Fred Schill and Mr. Val. Horn took place at the Heidenreich Rifle range and Fritz Wendel's rifle range. The conditions were, any .22cal. rifle, 25 shots to be shot at 25-ring target by each contestant at each range, $15 a side. Capt. Schill scored 1,142 out of a possible 1,250, and Mr. Horn 1,113, Capt. Schill being the winner by 29 points. After the match was over the members present of the Blumenthaler Schuetzen Company and Heidenreich Rifle Club sat down to a good supper. Complimentary speeches were made by Messrs. Schill, Horn, Aigeldinger, Dr. Kolb and others, and all parted better friends than they ever were before.

Garden City Rifle Team.

THE Garden City Rifle Team met for their weekly contest Tuesday evening May 17, at George McCune's Shooting Gallery, 146 South Halsted street, Chicago. Conditions were; 25yds., 25 shots each, open sights, free off-hand position, Massachusetts paper target, possible 300 points:

Geo McCune	270	Roy Taylor	262
W J Gibbs	268	M Tadro	262
C A Hankle	267	A McBean	260
John Polities	264	Jas Ford	258
H S Burley	256		
F Erickson	250		
W Frisby	247		

In a sweepstake shot after the regular club shoot Geo. McCune won scoring 109 out of possible 120.

Lisdhke Scores.

SCORES of the members of the A. Lischke Rifle Club, who made over 200 on May 13:

Capt Lischke	25 25 25 25 25 24 24 24 23 22—242
Langenberger	25 24 24 24 23 22 22 21 20 17—222
Steidel	25 24 24 23 22 21 20 20 20 19—218
Schulte	24 23 22 22 21 20 19 19 18 18—206
Strater	24 22 22 22 22 21 21 19 18 15—206
Dyroff	25 24 24 23 21 21 20 16 15 15—204

Medals were won: First class, A. Lischke; second class, Langenberger; third class, Steidel. OTTO SCHULTE, Shooting Master.

Trap Shooting.

All ties divided unless otherwise reported,

FIXTURES.

If you want your shoot to be announced here send in notice like the following:

May 24-26.—Iowa State Association tournament, at Des Moines, Iowa.

May 24-26.—Knoxville Gun Club, annual tournament, at Knoxville, Tenn.

May 24-27.—Windsor Keystone Gun Club tournament, at Windsor, Ontario, Canada.

May 26.—Emerald Gun Club, at Dexter Park.

May 26-27.—Harrisburg Shooting Association, third annual spring tournament, at Harrisburg, Pa.

May 26-27.—Carmen Gun Club tournament, Carmen, Ill.

May 27.—Linden Grove Gun Club monthly shoot, at Dexter Park, Long Island.

May 30.—Canajoharie Gun Club, king bird tournament, at Canajoharie, N. Y.

May 30.—White Plains Gun Club tournament, White Plains, N.Y.

May 30.—Open shoot and team match for Connecticut Keystone Trophy, under the auspices of the Bridgeport Gun Club, at Bridgeport, Conn.

May 30.—Maplewood Gun Club tournament, Maplewood, N. J.

June 1-3.—Schuylkill County Shooting Association, three days' shoot, at Tamaqua, Pa. R. T. Clayton, Sec'y.

June 1-3.—Minneapolis Gun Club tournament, Minneapolis.

June 6-11.—Eighteenth annual tournament of Illinois State Sportsmen's Association, at Chicago. W. L. Shepherd, Sec'y.

June 7-9.—Interstate Manufacturers' and Dealers' Association tournament, at Brooklyn, N. Y.

June 13-18.—New York State Association's Thirty-fourth Annual Convention, at Syracuse, N. Y. Chas. H. Mowry, Sec'y.

June 14-16.—North Star Gun Club tournament, Minneapolis.

June 15-17.—Waverly Gun Club tournament, at Waverly, Ia.

June 16-18.—Sportsman's Association of the Northwest tournament, Seattle, Wash.

June 20.—Fifty bluerock match. $3 entry, at Dexter Park, L. I.

July 21-22.—Independent Gun Club tournament, Plainfield, N. J

Aug. 9-12.—Pennsylvania State Sportsmen's Association's annual tournament, Reading, Pa. Walter D. Eller, Sec'y.

Aug. 10-12.—Missouri State Amateur Association tournament, at Lexington, Mo. Added purses. Address G. A. Sturges, Sec'y.

Aug. 23-26.—International tournament, Des-cbre-shos-ka Island, Detroit, Mich. Live birds and targets.

Aug. 30 to Sept. 1.—Hackettstown Gun Club tournament, at Hackettstown, N. J.; two days at targets, third day at live pigeons. Address James L. Smith, Hackettstown, N. J.

September (second week).—Interstate Manufacturers' and Dealers' Association tournament, at Auburn, N. Y.

Oct. 5-7.—First annual tournament of the Riverside Gun Club, at Red Bank, N. J. First two days targets, last day live birds John P. Cooper, Sec'y.

Journalist and Trap Shot.

ACCOMPANYING this article is an excellent likeness of Allen Willey, editor and proprietor of the Hartford *Globe*, and one of the most popular trap shots in Connecticut. He is 34 years of age and was born in New London. In 1879 he removed to Hartford, where he studied law for two years, after which he gave up his legal aspirations for the more congenial field of journalism. In 1883 he bought the Hartford *Globe*, a Sunday newspaper, and has since performed its editorial functions.

Mr. Willey commenced trap shooting in August, 1888, when he joined the Colt Club of Hartford. He is now a member of the Colt and the Hartford Gun Clubs, of Hartford, the New Haven and the New London Gun Clubs, and also of the Essex Club, of Newark, N. J. As a target smasher he has participated in many of the leading tournaments in the East and has been a familiar

ALLEN WILLEY.

figure at the Connecticut shoots for the past few years. On Oct. 29, 1890, he won the State championship cup at Union Grove, Hartford. On Nov. 4, 1891, at Union Grove, in a practice shoot, Mr. Willey broke 99 Keystones out of 100, missing his sixty-seventh target. He then broke 24 out of 25 Bandle clays, making 123 out of 125. Mr. Willey is president of the Hartford Gun Club, and a director in the New Haven Club. On Jan. 31, of this year, he shot his first live bird from the trap, going to John Erb's and entering in a 25 bird sweep. He killed 20 and got a part of third money. At the present time Mr. Willey has all told shot at 234 live pigeons, 202 of which he has killed. His work at Erb's on Wednesday last, when he killed 59 out of 65, with two dead out of bounds, speaks well for a novice at live bird shooting. On Feb. 11 Mr. Willey and Chas. H. Burbidge, of Hartford, defeated J. B. Savage and H. H. Bates, of New Haven, in a two-man team race for the State championship, Mr. Willey's score being the highest of the four.

The Man With a Broken Leg Wins.

DAVENPORT, Ia., May 20.—Between 200 and 300 people assembled on the grounds of the Forester Gun Club yesterday afternoon to witness the $50 entrance fee shoot between Chris. Reese, of Moline; Thos. Laflin, of Milan; Harry Clifford, of Chicago; Max Starr, of Rock Island, and Geo. Somerson, of Coal Valley. The match was to have been at 50 live birds per man, but the birds of the country are being gobbled up by the agents for the Iowa and Illinois State shoots, which are fast approaching, and difficulty was experienced in obtaining the requisite number of birds. The contestants agreed to shoot at 35 birds apiece when the shortage in supply was reported to them, and these were only fair birds. The scores under the circumstances were good, but not remarkable. They were as follows:

Laflin	31	Reese	26
Starr	20		
Clifford	29	Somerson	21

Laflin, who broke his leg on the 7th inst., has not recovered from the effects of the injury, and shot standing on one foot with the other in a chair. He won first money, Clifford the rest, while the three losers; under the trrms governing the contest, paid the expenses.

The next event of the afternoon was the third match, at 25 targets, of a series of three team contests between R. C. White and W. C. Voss, of Geneseo, Ill., and James Montgomery and C. F. Rost, of Moline, Ill. The first match was shot at Moline, and was won by the Moline boys, the second, at Geneseo, was won by the representatives of that town, and the third, here, was won by them by the following score:

Voss	23	Montgomery	19
White	19—42	Rost	20—39

Sweepstake, 10 targets, entrance $1: Voss 8, Warner 8, White 7, Burk 6, Tain 6, Stohle 6, Rost 6, Cooper 4. Rost third on shoot-off.

The four highest scores divided stakes in the following:

Ten targets, entrance $1: Stohl 10, Lewis 9, Warner 8, White 7, Voss 6, Hoffman 5, Rost 5, Burk 6, Cooper 6, Harbaugh 5, Tain 3.

Six targets, entrance 50 cents: Hoffman 6, Stohl 6, Warner 5, Rost 4, Burk 3, Ecklon 3, Reese 3, White 2, Cooper 2, Voss 2.

Ten targets, entrance $1: White 9, Stohl 8, Voss 7, Warner 6, Burk 5, Kincaid 4, Harbaugh 4, Ruder 1.

Ten targets, entrance $1, two moneys: Lewis 7, Voss 7, Harbaugh 6, White 6.

Wilkes Barre Coming into Line.

WILKES BARRE, Pa., May 21.—Following are the scores made by some of the employes of the Wilkes Barre Gun Co. on the grounds at the factory on the 21st. All are beginners at the trap but some are "catching on" to the flying targets in good shape. The match was at 10 single Keystones, three known angles, the prize a fine bass-rod:

C Woodhull	1011111111—9	C Mulks	0000111010—4
E Tilghman	0101111111—8	E Turner	1000010101—4
Ted Reed	0111111001—7	C Card	0000110110—4
J Wilson	0101110111—7	Cyclone	0001110000—3
J A Austin	0111011100—6	D Ferris	1000100000—2
Knickerbocker	0011010011—5	Arnold	1000000000—1

W. BARRE.

DRIVERS AND TWISTERS.

Von Lengerke & Antoine, the popular sporting goods dealers, have sent us one of their catalogues, the first ever issued by the firm, and after a look at the beautifully engraved cover and elegant interior typography, we do not blame the firm for saying that they are "as happy as lords" over their premier publications. The front cover shows a reduced cut of Coppernoll's famous picture, "Coming In," beside enumerating the various specialties of the firm. It is a work of art and should be inspected by all sportsmen.

* * *

George S. Atwater, who is not only a well-known and expert field and trap shot, but a prominent bicyclist as well, has located in New York where he will look after the eastern interests of the *Sporting Goods Review*, he having been elected secretary of the company. If George works as hard in his new field as he did for the L. A. W. when he was chief counsel for the District of Columbia, and afterward chairman of the Racing Board, he will be sure to create a boom. He has become an active member of the Boiling Springs Fish and Gun Club, of Rutherford, N. J., and will be a strong card for future contests.

* * *

The Peekskill (N. Y.) Gun Club will hold an all-day's bluerock tournament at the Shooting Park, Union avenue, on Memorial Day, and all shooters are invited.

* * *

The Eastern New York League will hold a tournament at Canajoharie, N. Y., on Memorial Day, under the auspices of the Canajoharie Gun Club, when kingbird targets will be thrown. The regular programme comprises ten events at from ten to twenty targets per man, beside which there will be the monthly match for the League championship. This is open to teams of four men from any club in the league, each mile to shoot at 21 singles and 6 pairs of kingbirds. The rapid firing system will be used and all shooting will be governed by A. S. A. rules. There will be no postponement on account of weather.

* * *

The Social Gun Club, of Steelton, Pa., will hold an all-day's tournament, using U. S. targets and live birds on Memorial day. In the target events all moneys will be divided on the "Jack Rabbit" system. The Paul North handicap will be enforced, all the target events to be at 15 U. S. targets, $1.50 entry, targets extra. There will be two events at ten live birds each, $7.50 entry.

* * *

The Harrisburg Shooting Association will draw a big crowd to-day, to-morrow and on Saturday, when its third annual spring tournament will be held. A number of shooters will stop there on their return from Knoxville, and another party will go there from Altoona. Blue rock targets will be thrown from two sets of expert traps. On the second day the local club offers to back its five-men team against any club team at 25 targets per man for $25 per team. There are ten events each day, $1.50 entry, all moneys to be divided under the system devised by "Jack Rabbit" Brelsford. The average moneys will be donated by the club.

* * *

The Winchester, Va., Gun Association will have a monster tournament the latter part of June and are willing to guarantee fifty entries if the weather is favorable. There will be a long list of merchandise prizes offered in the regular events. A feature will be a contest for a "Virginia State Championship Cup," which will draw a big entry list. Exact dates will be given later. The officers of this club are Chas. F. Nelson, president; W. F. Summerson, first vice-president; A. M. Zirkle, second vice president; P. W. Miller, secretary, and G. W. Haddock, treasurer.

* * *

During the Washington shoot, some of the boys entered into a discussion as to the relative merits of various kinds of provender in regard to quieting the nerves. Some asserted that onions and lettuce comprised a combination that "beat the world" for steadying the nerve. William Tell Mitchell, of Richmond, Va., took exception to this and says he will stake $50 on being able to beat any man in the world in a contest at fifty live birds each under these conditions. The match to be shot directly after dinner, during which Mr. Mitchell's opponent shall partake of nothing but onions and lettuce. The boys were greatly amused at the terms suggested, but Mr. Mitchell was in down-right earnest.

* * *

R. C. Clayton, of the United States Hotel, Tamaqua, Pa., sends us word of a big tournament to be held there on June 1, 2 and 3, the first two days at targets and the last day at live birds.

* * *

During the second day's shoot of the Capital City Gun Club, J. H. Hunter lost a very highly prized fishing knife, and upon the assertion of some of the party that the knife had slipped under the station platform, he offered a dollar to a little darkey to recover the property. The darkey was suspicious of some trick and refused to go under the planks while the party was on the scene. Joe told the coon to recover knife before the next day and come to the grounds for his dollar, not suspecting any trick. At dinner the next day, Billy Wagner brought the darkey into the dining room, and to the delight of Hunter, the darkey brought the lost knife. Joe did not wait long before rewarding the finder, after which he entered the barroom to "celebrate." Shortly after, as he was crossing the road, the little darkey came up and said: "Say, Mr. Hunter, dat Mr. Wagner dun gimme a dime for just givin' you dat knife wat he had in him pocket since last night." This gave the snap away and Hunter is now trying to devise a scheme for getting even with Wagner.

* * *

Billy Wolstencroft says he has a corner reserved for a big mascolonge head which he is to receive from Bre'r Hough. And by the way, Bre'r H., how did that combination shooting-fishing suit fit?

* * *

Nearly all the visiting shooters dropped in on M. A. Tappan while in Washington last week. Mr. Tappan is one of the best known sporting goods dealers in the town and is always ready to extend a welcoming hand to visitors.

* * *

Once more we wish to impress upon the minds of our readers the necessity for addressing to FOREST AND STREAM instead of individuals, all matter intended for publication. The trap editor of the paper is away a great portion of the time, and during his absence many letters are received addressed to him, the result being that publications of important notices are often delayed. When you have anything for publication, address it to Trap Department, FOREST AND STREAM, 318 Broadway, New York. C. H. TOWNSEND.

Rochester Wins the Final.

ROCHESTER, May 20.—The Rochester Rod and Gun Club met the enemy from Syracuse yesterday afternoon and the deciding match of the inter-city series was won by the local gunners by 20 birds. Previous to the match, which commenced at 2:30 o'clock, eight sweepstakes were shot, and again at the conclusion of the big match three more sweepstakes, the rain balking any further proceedings. The wind blew a gale at the Monroe avenue grounds and brilliant shooting was out of the question. All things considered, however, the scores was remarkably good. The match was at kingbirds and 5,000 of them were thrown. When the day's sport was over the Syracusans were royally entertained at the Hotel Bartholomay. Score:

Rochester.

The Onondaga sportsmen have extended an invitation to the local gunners to come to Syracuse some time after the State shoot. A friendly match will be shot and the Rochester marksmen will be entertained in a lavish fashion. Insomuch as the invitation has been accepted, a team match on that day is highly probable.

Grand Island.

GRAND ISLAND, Neb., May 14.—The tournament of the Nebraska State Sportsmen's Association, held in this city May 10 to 13 inclusive, was fairly attended, and had the weather been favorable the attendance would have been much larger. Tuesday and Wednesday were cold, and a high wind blew from left to right across the traps, making it very disagreeable for the shooters. Thursday was a damp, cold, disagreeable day. Friday it rained all day, and the shoot was postponed until Saturday. On reaching the shooting grounds Saturday morning we found the water standing in pools on the ground, but the management had hay hauled and scattered over the mud at the scores, and the shoot went on. The management announced on Friday night that only two open events would be shot on Saturday. The Oxnard Beet Sugar Co.'s shoot at 15 live birds, $10 entrance, five moneys, $20 added to each money; and shoot No. 32, 25 single targets, entrance $3, $25 added. At the conclusion of the shoots all were ready for home.

Among the sportsmen in attendance from abroad were Messrs. S. A. Tucker, R. Merrill, J. A. R. Elliott, Joe Batcheler, Wm. Everhart, C. M. Grim, Ed Bingham, John Ruble, Haywood, Burgeson, the Schuneman brothers, Eicholtz and Budd.

At a meeting held on the evening of May 11 the association elected the following officers: W. H. S. Hughes, of Omaha, Pres.; C. B. Campbell, North Bend, Vice-Pres.; Frank Parmalee, of Omaha, Sec'y; N. D. Nason, of Omaha, was re-elected Treas. A vote of thanks was given to the Grand Island Club and to W. H. Harrison and Secretary Stauffer for their able management.

No. 1, 10 singles, entry $1; No. 2, 15 singles, entry $2; No. 4, 20 singles, entry $2.50; No. 5, 25 singles, entry $3; No. 6, same; No. 7, 10 singles and 5 pairs, entry $2.50; No. 10, 20 singles, entry $2; No. 11, 10 singles, entry $1.50; No. 12, 15 singles, entry $2; No. 14, 20 singles, entry $2.50; No. 17, 25 singles, entry $3; No. 19, 30 singles, entry $3; No. 20, 15 singles, entry $2; No. 21, 20 singles, entry $3; No. 23, 20 singles, entry $2.50; No. 28, 15 singles, entry $2.50; No. 32, 20 singles, entry $3:

Kansas State Shoot.

COUNCIL GROVE, Kan., May 25.—The fourth annual State Tournament of the Kansas State Sportsmen's Association was held at Council Grove this week, and closed last night with the election of officers for the ensuing year, resulting as follows: President, A. L. Wilcox, of McPherson; First Vice-President, Dr. R. S. Dinsmore, of Troy; Second Vice-President, W. E. Dennison, of Council Grove; Secretary, J. F. Larderer, of McPherson; Treasurer, G. W. Jenkins, of Wamego.

The association is in a flourishing condition, having a membership bordering on 400, and despite the rainstorms of the early part of the week, the tournament was a success on the whole. But little could be done on Tuesday, the opening day, and the regular programme was not commenced until Wednesday.

The weather was more favorable on Wednesday, the rain having subsided, and the result of the day's work was as follows:

No. 1, 10 single bluerocks, entrance $2, 23 entries, purse $43; First money divided between M. DeTarr, A. L. Elwell, L. Erhart, E. H. Young, R. Matthews, G. N. Barber and J. N. Barber. Second money, J. W. Jenkins. F. M. Chandler, Dr. Dinsmore, W. R. Fisher, William Eicholtz, L. O. S. Clary, P. F. Whitehare, William Allen and C. E. Audis.

State medal shoot, 10 live pigeons, use of both barrels, entrance $8, guaranteed purse $50: First money divided between Dr. Dinsmore, C. E. Audis, D. W. Edwards, J. J. Gray, R. Matthews and W. B. Spears. Second money, A. L. Elwell, J. M. Hershey, J. N. Barber and J. W. Logue.

No. 3, team shoot, 2 members of same club, 10 singles and 5 pairs bluerocks, entrance $6, team purse $66, 11 teams enter: First money divided between Elwell-Chandler, Erhardt-Spears. Second money, Clary-Jenkins and DeTarr-Audis.

No. 4, 15 singles, entrance $2.50, 27 entries: First money divided between L. Erhardt, H. A. Knight and J. J. Gray. Second money, A. L. Elwell and R. T. Renfrau.

No. 5, 10 singles, entrance $2, 39 entries: First money divided between William Spears, E. H. Young and C. Stevens. Second money, A. L. Elwell, G. W. Jenkins, R. S. Dinsmore and J. N. Barber.

On Thursday the weather was perfect, and good scores were made both at live birds and targets. Several of the events were specially exciting and interesting, several first moneys having won on 25 straight, and those scoring 24 had to be satisfied with a division of second money. The following is a summary of the day's work:

No. 6, 25 singles, entrance $5, 12 entries, purse $60: First money, R. S. Dinsmore; second money, Wm. Allen.

No. 7, 5 pairs bluerocks, entrance $2, 17 entries, purse $34: First money, A. L. Elwell; second money, J. C. Cully, L. H. Hedges.

No. 8, 10 single bluerocks, entrance $2, 18 entries, purse $36: First money, A. L. Elwell; second money, D. W. Edwards, L. O. S. Clary, B. R. Fisher.

No. 9, 10 live birds, entrance $8, 16 entries, purse $128: First money, R. Dinsmore; second money, D. W. Edwards, F. L. Dunmyer.

No. 10, 5 pairs live birds, entrance $7.50, purse $115, 15 entries: First money, R. Dinsmore; second money, J. J. Gray.

No. 11, 12 single bluerocks, entrance $2.50, purse $60: First money, C. E. Andus, J. J. Gray, E. H. Young; second money, G. W. Jenkins, Wm. Eldred, M. Detar, W. R. Fisher, L. Erhart.

No. 12, 25 single bluerocks, entrance $5, $50 purse donated by Council Grove Gun Club, first place gets purse, second place first money, etc.: $50 purse won by G. W. Jenkins, of Wamego; first money div. by R. S. Dinsmore and Wm. Eldred; second money J. J. Gray.

No. 13, 4 pairs live pigeons, entrance $5, 20 entries: First money, div. by A. L. Elwell and H. E. Abercrombie; second money div. by J. W. Hershey, R. Dinsmore, A. L. Bennett, W. E. Dennison and R. L. Raney.

No. 14, 5 pairs bluerocks, entrance $2, 8 entries: First money, R. S. Dinsmore; second money div. by M. Detar, E. H. Young, L. Erhart, J. W. Jenkins.

No. 15, 10 singles, entrance $2, 11 entries: First money, A. L. Elwell; second money, M. Detar.

The principal event of Friday's programme was the race for the individual championship of the Sunflower State, which was won by G. W. Jenkins, of Wamego. Another feature of the last day's shoot was a match between the McPherson and Council Grove gun clubs for $250 a side, each club being represented by a team of four, each man shooting at 25 live birds. The McPherson team won by 5 birds, although Dick Raney, of Council Grove, made the best individual score, grassing 24 out of his 25.

WHITFIELD.

The South Sides of South Norwalk.

SOUTH NORWALK, Conn., May 15.—At the regular club shoot of the South Side Club of this city, 14th inst., Messrs. Hubbard, Smith, Wheeler, Thomas and Dr. Rice of the Park City Gun Club of Bridgeport joined us, and the close of the shoot attested their appreciation of our efforts to make their shoot enjoyable by three hearty cheers for the South Sides, and a vote of thanks tendered our club on the spot showed the fraternal feelings existing between the two clubs. Mr. Wm. Wheeler, by breaking 51 straight, beats the record thus far upon our grounds. E. H. Fox broke 28 straight and Walter Lewis broke 38 out of 40. As a rule the shooting was first-class and beyond the average of our local and visiting shooters. Following are the scores, 25 cent sweeps, three moneys in all events:

No. 1: Hubbard 7, Smith 10, Wheeler 7, Thomas 6, Seymour 7, Coleman 9, Rice 9, E. H. Fox 9.

No. 2: Hubbard 9, Smith 7, Wheeler 8, Thomas 4, Seymour 10, Coleman 10, Fox 8, Rice 4.

No. 3: Hubbard 7, Smith 5, Wheeler 10, Thomas 6, Seymour 8, Coleman 8, Fox 8, Rice 5.

No. 4: Hubbard 9, Smith 7, Wheeler 9, Thomas 7, Seymour 8, Coleman 9, Fox 8, Rice 4, McHugh 8, Drake 9.

No. 5: Hubbard 7, Smith 10, Wheeler 8, Thomas 8, Seymour 7, Coleman 8, Fox 10, McHugh 4, Lewis 9, Drake 4, Shewood 4, Ferrish 6.

No. 6: Hubbard 8, Smith 8, Wheeler 7, Thomas 6, Coleman 6, Fox 10, Rice 8, Lewis 9, Drake 6, Sherwood 3, Ferris 2, Fields 8.

No. 7: Hubbard 8, Smith 7, Wheeler 8, Thomas 6, Coleman 9, Lewis 10, Fox 9, Drake 10, Sherwood 8, Ferris 6, Fields 7, Rice 8.

No. 8: Hubbard 8, Smith 9, Wheeler 10, Thomas 8, Coleman 7, Lewis 9, Fox 7, Drake 6, Sherwood 5, Ferris 6, Fields 10, Rice 6.

No. 9: Hubbard 7, Smith 8, Wheeler 10, Thomas 5, Coleman 10, Lewis 8, Fox 9, Drake 3, Ferris 7, Fields 9, Rice 5.

No. 10: Hubbard 9, Smith 8, Wheeler 10, Thomas 7, Coleman 7, Lewis 6, Fox 6, Fields 8, Rice 6.

No. 11: Hubbard 10, Smith 8, Wheeler 10, Thomas 6, Coleman 8, Fox 9, Fields 5, Rice 6.

No. 12: Hubbard 9, Smith 7, Wheeler 9, Thomas 4, Coleman 7, Fox 9, Fields 8, Rice 7.

This club proposes at an early date to purchase an entirely new set of expert traps, trap pull and all complete, and a tournament for early in June is under contemplation with two sets of traps and all "modern improvements" of which more anon.

E. H. FOX.

Forester Gun Club.

KANSAS CITY, May 13.—The Forester Gun Club held its regular monthly shoot this afternoon. There were 13 entries for the club trophies, and with a few exceptions the work was high class. The birds were better than an average lot, but there were three ties on 14 out of 15 for the first medal. C. F. Holmes, F. S. Groves and J. H. Knoche tied on 14, and in the shoot-off the former won. V. W. Floweree, C. A. Young and Dr. J. P. Jackson tied on 13, and Floweree won the shoot-off. The score was as follows:

J H Knoche	1121211120111—14	J W Jones	2110011011011122—11
F S Groves	1212111112112201—14	C A Young	2002222121212122—13
J S Harrison	1012112202211—12	W Barton	0202210010002220— 7
F C Hoover	1121201121100020—11	F G Graham	0201202020002201— 7
J S Mohr	2120001200300000— 5	V W Floweree	2112212121210010—13
Dr Schauffler	1212121210011011—10	J P Jackson	1022011111112122—13
C F Holmes	1212121212102222—14		

J. Scott Harrison, one of the members of this club, and who grassed 12 out of 15 in to-day's shoot, is a brother of President Harrison.

A distinguished visitor at the park was Dr. W. F. Carver, who gave an exhibition of his marksmanship. He shot at 31 birds and killed 30, most of them falling dead within 10ft. of the traps. He shot a Cashmore gun, made at Birmingham, Eng., which he bought in Australia, and was so well pleased with it that he purchased the mate to it. His loads were 3¼drs. of Schultze and 1¼oz. of No. 7 chilled shot. He also broke a batch of "saucers" in fine style.

Carver is here making arrangements for a theatrical venture in connection with Fred Whitney, of Detroit. While in Melbourne Carver made his debut as an actor in "The Scout," taking the title role. It is an American border drama, and will include Indians, cowboys, a shooting tournament, broncho riders, etc. Their plans are to open in Denver in June and then make a tour of the country, working East.

WHITFIELD.

Gate City Club's Medal Shoot.

KANSAS CITY, May 21.—The Gate City Gun Club held its regular monthly medal shoot at Elliott's Park, Thursday afternoon. The birds were an average lot and the work of the club was fairly good. There were 13 contestants, but Burrell was the only one who grassed 10 straight, and was awarded the trophy. The score:

Rickmers	1201010101—6	Johnson	2120002001— 5
Kearns	1112101002— 7	Burton	2000102100— 4

Great Sport at the National Capital.

"COME to Washington, boys, and we'll give you a big sho ot as well as a royal reception," said Billy Wagner to trap shooters from the North, South, East and West, and a large number of them took his advice. They went to Washington; they had a big shoot; they were royally entertained and they came away regretting that the affair lasted only four days. The Washington boys are a genial, whole-souled lot and everything they own is placed at the disposal of visitors who visit the capital. At th is season of the year Washington is a very attractive place and when the Capital City Gun Club announced that its second annual tournament would be held on May 16 to 19, inclusive, a large number of shooters from various sections arranged to take in the shoot and at the same time do a little sight-seeing. Several of them arrived in town on Sunday, the 15th, and passed the major por tion of the day in "doing" the town and its environs. The major ity of the visitors put up at the Owen House, where they were well attended to by Proprietor J. T. Moylen, who is an active mem ber of the above-mentioned gun club. Mr. Moylen does very little trap shooting owing to pressure of business, but nevertheless he is ever ready to help along the good cause, as is evidenced by donating $25 toward the first prize in the team shoot. His house is run on the European plan, the table being of the best. The sp ortsman who visits Washington and fails to stop at the Owen Ho use will make a big mistake.

Monday was the opening day of the tournament, and a warm summer day it was, one on which shooters discarded sweaters, and even "Rainbow" Thurman's blouses, thin as they are, were relegated to the wall and collars and cuffs were laid aside. It was after 10 o'clock when the first gun was fired and the fun was fairly started. The shoot was held on the driving park grounds at Ivy City, a suburb of Washington, distant about three miles from the Owen House. The grounds are beautifully situated for shooting purposes, being as level almost as a billiard table, with a clear fore-ground that admits of late shooting. These grounds are provided with a one-mile track that is said to be equal to any in America, except the one at Monmouth Park. The home stretch is an eighth of a mile straight away from the lower turn and has a slight downward grade, which is said to be about one-tenth of a second fast. At present the track is used only for training purposes, and the buildings show neglect. The traps were set in the center of the field and in rear of the firing points was a huge fly, under which the shooters found seats and tables where they were able to rest out of the rays of the sun. To the left of the firing points was the cashier's and secretary's office and the scoring boards. In rear of the office was a snow-white tent in which the

GEORGE A. ATWATER.

great and only Billy Wagner, the major domo of shooting affairs in his locality, had a big stock of ammunition on hand for the accomodation of "the boys," who cleaned out his entire stock before the week was ended. He also had a stock of guns on hand for the use of his friends. His tent was well patronized during the entire shoot, and this made Billy happy.

The cashier's duties were performed by F. A. Happers, who holds the responsible position of captain of the club, and O. E. Hart, who performed their duties in a manner to win encomiums from all sides. J. B. Peyton manipulated the chalk of the official black-board and did his work in a masterly manner. J. B. Gulick, President; B. L. Osborn, Vice-President; A. S. Mattingly, Secretary and J. M. Green, Treasurer of the club, exerted themselves in entertaining visitors and keeping things running smoothly. But the bulk of the real work outside was done by jolly Jack Parker who had come all the way down from Detroit, Michigan, to assume the general managment of the tournament. Jack was here, there and everywhere, looking first at the traps, then at the score board; next in the office figuring up the surplus, and a minute after chatting with a friend, refereeing a shoot or hustling out shooters for a coming event. I have seen considerable tournament hustling in my day and had made weak attempts at the "hustle act" myself, but I am fain to say that "Athletic Jack" with his unfailing good-nature and winning way can run events in closer order and draw entries from the boys' pockets in better shape than any one I have ever met.

The first day's shoot was sort of a preliminary affair, there being seven events on the programme, with $100 in guaranteed money. Among those present on the opening day, besides the local talent, were W. B. Hobart of Von Lengerke & Detmold, New York; E. D. Miller of Springfield, N. J., representing the Standard Keystone Target Company; Paul North of Cleveland, Ohio, representing the Chamberlin Target Company; William and James Wolstencroft of the North End Gun Club, Philadelphia; W. F. Summerson and W. O. Sydnor of Staunton, Virginia; George S. McAlpin of Richmond, Virinia; Neaf Apgar of Henry C. Squires, New York; R. Bond of Jessnps, Md.; Wm. Hartlove of Wilmington, Del.; Charles ("Dutchy") Smith and "Tee Kay" Keller of Plainfield, N. J.; H. M. Heflin of Baltimore, Md. and Wm. R. Fieles of Christiana, Pa.

The shooting was done under the ten-trap rapid firing system, bluerock targets being thrown from expert traps by the North electric pull. A number of spectators were on the grounds during the day. The leading average of the day was made by E. D. Miller, who broke 93 per cent, under expert rules. North made 88 per cent., Wagner and W. Wolstencroft each 85 per cent., Hobart 81 per cent. and Apgar 79 per cent. The experts shot from known traps at known angles. In the amateur class Harry Happert, sixteen years of age, was high with 88 per cent. Several extra events were shot in addition to the regular programme. The events all filled well and the scores were high. Dinner was served at Sanderson's Club House. Below are given full scores of the regular events and a summary of the extras:

No. 1, 10 singles, entry $1.50, $20 guaranteed. No. 2, 15 singles, entry $2, $30 guaranteed. No. 3, 20 birds, entry $2.50, $40 guaranteed:

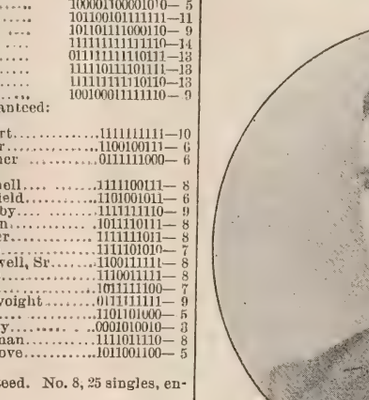
The Second Day



drew out a large crowd of contestants, there being an average of over thirty entries in each of the eleven events. The day was warm and pleasant although the wind was tricky. The guaranteed moneys aggregated $370. Ten per cent. was deducted from all purses, this amount being used for average money, 30 per cent. going to the highest and 20 per cent. to the second highest average in the expert class, 25 per cent. to first, 15 per cent. to second and 10 per cen t. to third best average in the amateur class.

The contest for the averages was spirited from start to finish. The average money aggregated $53, the divisions being $15.90 and $10.60 in the expert class, $13.25, $7.95 and $5.30 in the amateur class. Will Hobart and Paul North had a close tussle in the expert class, being even up on the seventh event. A run of 35 straight, however, in the final two events put Hobart on top with the fine average or 92 9-10, North having 89 7-10. W. H. Wolstencroft averaged 87 5-10 and Wm. Wagner 87. The amateurs meanwhile were having some close work. "Dutchy" Smith, Harry Happers, Joe Hunter and Steele being neck-and-neck for the averages. At the finish Hunter secured first on 91 3-10, Happer being second on 90 8-10, Steele third on 89 7-10 and Smith fourth on 88 6-10. In the opening events Wm. R. Fieles was placed in the expert class, very unjustly, I should say, but after the third event he was returned to the amateur ranks. Young Harry Happers, the 16-year old son of F. A. Happers, captain of the club, showed himself to be a master-hand in the use of the gun, and had he not intentionally lost several birds in order to get into money divisions his average would have been close to 94 per cent. The shooting was ended at 5 P. M., no one having any inclination to shoot longer, as the programme events called for 185 shots. Below are the detailed scores:

No. 1, 10 singles, entry $1, $10 guaranteed; No. 2, 15 singles, entry $1.50, $15 guaranteed; No. 3, same:

On the Third Day

several new faces were seen, among them being those of Milton F. Lindsley, of Hoboken, N. J.; "Rainbow" Thurman, of Germantown, Pa.; Geo. S. Atwater, of New York; E. E. Baltzley and W. Fred Quimby, of New York; and P. S. Trego, of Manheim, Pa. The weather was fully as pleasant as on previous days and the attendance was good, there being nearly half a hundred shooters on the ground. All the arrangements were carried out in good shape and the shooting was fine. Spectators were present to the number of at least 400 and everybody showed great interest in the work.

Some dissatisfaction was expressed at the tournament committee in allowing Happers, Hunter and Steele to remain in the amateur class, the first two in particular clearly outclassing their companions. The guaranteed purses aggregated $425 and the averages were provided for the same as on the second day. The prettiest work of the day was done by W. R. Hobart, who rolled up an average of 95 5-10, Wm. Wagner also distinguishing himself by breaking 93 5 10 and Paul North getting 89 7-10, these in the expert class. Among the amateurs Happers and Hunter again had a "cinch," Happers making 94 and Hunters 93 5-10 per cent. These averages proved conclusively that these two men were out of place and should have shot along with the experts. Happers's three days shooting showed 88, 90 8 10 and 94 per cent., a net average of nearly 91 per cent., which is a showing of which any expert might feel proud. Hunter's two days showed 91 3-10 and 93 5-10, a net average of 92 4-10. Smith and Fieles div. third average money on 89 1-10 each; James Wolstencroft made 87, Mitchell 86 5-10 and Bond 85 per cent.

When the shooters left the grounds in the evening everybody was discussing the probable winners of the team match scheduled for the following day, and the majority seemed to think that the chances were in favor of the Union Gun Club, of Springfield, N. J., which had eight men present from among whom to select a team of six. Up to the time of starting for the hotel the writer supposed that this team would shoot in the contest. What was my surprise then, later in the evening, upon being told by E. D. Miller that the Jersey team would not be allowed to compete unless its members shot from unknown angles, all other teams to shoot from known angles. This was a sort of a puzzler, as the idea of imposing a handicap in a team contest was something entirely new. Shortly after the writer searched up J. H. Gulick, president of the Capital City Gun Club, and asked him if the above rumor was true.

"Yes," said Mr. Gulick, "we have got to handicap the Jersey team. The Baltimore people have promised to enter three or four teams provided we make the Jerseymen shoot under expert rules, and the promise has been given."

"But," I asked, "are you aware that your programme says nothing of any handicap in the team race, and that such a precedent has never been established?"

"Well," was the reply, "I know that, so this will be an innovation. Another thing," he continued, "is this, the team race was never intended to be thrown open to teams outside of the District of Columbia, Delaware and Maryland, and the programme should have stated so."

"Granting that such was your intention, your programme did not say so, and furthermore Mr. Wagner requested FOREST AND STREAM to 'boom' this team match in order, as he stated, to get teams from all over the country. How do you account for this?"

"I don't know about that," he said, "but we can't make another change without having a 'kick' and that we don't want."

In order to show clearly the position taken by Mr. Gulick, we append an excerpt from the final day's programme and another from the rules governing the tournament:

"Event No. 5, 25 singles, team race, 6 men, entrance $20 per team; first prize, $60, $25 of which is given by J. T. Moylan, proprietor Owen House; second prize, Parker hammerless gun, and other valuable prizes to be announced during tournament."

"All teams must be composed of *bona-fide* members of the club they represent. Any club may enter one or more teams, but a member can shoot on only one team."

The above are given without comment, as the mass of shooters are possessed of intelligence enough to judge for themselves as to whether or not the local club had any right to bar or handicap any team.

No. 1, 10 singles, entry $1.50, $25 guaranteed; No. 2, 20 singles, entry $2.50, $40 guaranteed; No. 3, 15 singles, entry $2, $35 guaranteed:

The Final Day

opened with a pouring rain and a look overhead that did not presage a change for the better. Along toward 9 o'clock, however, the clouds grew lighter and the rain stopped. About 10 it commenced again and kept falling for an hour. Then there was another lull until 12 when the clouds opened and there was a genuine torrent that did not cease until 1 P. M., but after that time the conditions were fairly good. There were four regular events on the programme beside the team event, the guaranteed money aggregating $185. The attendance was fully as good as on the previous days, there being over forty shooters on the grounds. The events were run off in good order, the scores being high.

Then came the big event of the week in the form of the team match. But lo and behold the names of the teams which entered, and note how nobly the Baltimore's alleged promise was kept. The entries comprised two teams from the Capital City Gun Club, one team from the Washington R. and G. Club and just one team from the Baltimore Gun Club.

The match was almost a walkover for Team No. 1 of the Capital City Club, who rolled up the splendid total of 135 breaks out of 150, this being an average of 92 per cent, a showing that would win them 90 per cent. of all matches shot. The only clean score of the match was made by young Harry Happers, who proved himself to be good company for his older and more experienced team mates. After the team match two extra sweepstakes at 15 targets each, $1.50 entry, were shot under the North handicap system. This ended the tournament, which can be said to have been one of the best of the season, as a whole.

Of course the unpleasant turn of affairs in regard to the team match cast a sort of a gloom over some of the party, none of whom seemed to feel worse than did Wm. Wagner, who had been untiring in his efforts to get teams from Jersey and other States to enter. Mr. Wagner was very indignant at the turn of affairs, and denounced the action as an outrage.

During the evening, in the dining-room of the Owen House, the writer had the pleasure of a chat with the members of the tournament committee of the Capital City Club, every member of whom declared that he was ignorant of any deal or dicker having been made for the purpose of handicapping or barring any team. Mr. Mills declared that the said committee had taken no such action and had not even discussed the necessity of taking such action. Who is really responsible for the action it is hard to say, but having received my information directly from the president of the club, I was obliged to be convinced of its truth.

Mr. Mills stated that the Jerseymen had had no positive intention of entering the team match until the evening of Wednesday, but in this respect he was mistaken, as Mr. Miller, who is captain of the Union Gun Club, of Springfield, N. J., exerted all his influence for a couple of weeks previously in order to get a full complement of members to go to Washington. On this point I am certain. However, the affair is over and, as I have said, the shoot, taken as a whole, was a very enjoyable affair and one which reflected creditably upon the management.

No. 1, 10, singles, entry $1.50, $25 guaranteed. No. 2, 15 singles, entry $2, $35 guaranteed. No. 3, 20 singles, entry $2.50, $40 guaranteed:

A. C. COLLINS,

Dr. Carver will Defend the Title.

KANSAS CITY, Mo., May 16.—*Editor Forest and Stream:* In the last issue of FOREST AND STREAM, I see there is a proposition from a Mr. Elliott, in which he says: "I will shoot Dr. Carver for one thousand, five thousand or a million." Can there be anything more disgusting on the face of the earth than the great bluffs so often made by men such as Elliott and a few others who have nothing to recommend them to the shooting world but bluffs and bad defeats. What has Elliott ever done that he can risk $5,000 to shoot with me? Elliott would not bet $5,000, he is alive to-day. I will be prepared to shoot any man in the world in November or early winter as soon as the birds are good—no owls for me. Then let the boys come with their five thousands.

DR. W. F. CARVER, Champion Shot of the World.

Chicago and Western Traps.

CHICAGO, Ill., May 17.—An early look at the programme of the Illinois State Sportsmen's Association convention and tournament for this year discloses it to be all the earlier prediction of these columns claimed for it. Mr. Knox, who had the programme in charge, is much to be congratulated upon his taste and energy. The front cover page is a work of art. A valuable and unique feature is the plate published by arrangement with FOREST AND STREAM, showing in group 52 shooters prominent at the trap or in the field and resident in Chicago or Illinois. This plate is under FOREST AND STREAM copyright. The make-up of the programme is artistic throughout, and puts in evidence the advanced taste of the day in such matters.

The fifteenth annual of this powerful body of shooters will begin Monday, June 6, and last throughout the week. The convention will be held Tuesday evening at the Palmer House. The great Board of Trade badge contest adds six prizes, from $100 down, to the capital prize. The L. C. Smith cup has $264 added. The club team championship race, teams of four, has a cup worth $100, and three cash prizes, $65, $60 and $50. With exception of the three events above, the tournament is open to the world.

American Association rules will govern the live-bird shooting in the open shoots, except 1¼oz. shot limit, shooter not to put gun to shoulder till he calls pull; 10-gauge guns at 30yds., all other gauges, 8lbs. and under, have ½yd. allowance per gauge. A bird must show shot marks, and must be gathered within 3 minutes. In the State shoots the Illinois State rules will govern. The King automatics, 5 ground traps, will be used. Bluerocks will be the targets. This tournament could be held nowhere else than at Watson's Park, Burnside.

Mr. F. H. Lord, general passenger agent of the Chicago, St. Paul and Kansas City Railway, is just in from Des Moines. He says he can hardly understand where the Des Moines men are going to hold their State tournament next week, as their grounds are all under water. Mr. Lord thinks he will be able to be at Des Moines for one day next week, and will beg the privilege of firing a gun just once to see if he can make a noise with it. He bemoans the fact that he has not had any shooting lately.

The patients who have returned from the much boomed and much-expected-of Grand Island shoot out in Nebraska are now slowly recovering. They say there was a string to it.

The twelfth annual tournament of the Minneapolis Gun Club, Minnesota, falls on June 1, 2 and 3, and will be a pleasant affair if it doesn't rain.

Messrs. Von Lengerke & Antoine, of this city, put before the shooters this week a tasty catalogue, with an artistic front cover by the young Chicago artist Mr. F. E. Coppernoll, the main design after Mr. Wells's fine piece, "Coming In." E. HOUGH.

Kansas Shots.

KANSAS CITY, May 17.—The O. K. Gun Club held its regular monthly medal shoot this afternoon and twenty-one members were on hand to contest for the trophy. The birds were only a fair lot, and but for the poor work of Thomson and Kreeger the average shooting would have been high class. Thomson lost seven out of ten and Kreeger four, but the average was over 82 per cent. Bob Mize and Fred Maegley tied on ten straight for the medal and in the shoot off at five birds Mize won the trophy:

J B Porter	2222102222—8	W V Rieger	2101111212—9
J R Elliott	2121021222—9	F Maegley	1112111111—10
Ed Hickman	1211220222—9	R D Mize	2122222121—10
D Hughes	2212101121—9	O Cogswell	1112222120—9
J K Guinotte	1112011212—9	F J Smith	2121012112—9
D S Gordon	1220112122—9	J Thomson	2000002100—3
J A Bolem	2011212111—9	R Kreeger	2202210201—6
W K Everingham	1201100221—7	J L Porter	2121222120—9
W Bryant	0211210110—7	Dr J P Jackson	1102022102—7
G B Orr	1011122110—8	W S Halliwell	0202221121—8
W K Stark	1122022111—9		

Another new club was organized here yesterday which is composed of trap shooters in business at the stock yards and will be known as the Stockyards Club. It starts out with a membership of thirty and its first officers are T. J. Gilliam, President, and Ben Baldwin Secretary and Treasurer. The club will hold its first shoot on May 30, Decoration Day.

Another match will be arranged between Irwin, of Coffeyville, and Elwell, of Ossawatomie for the championship of Kansas, and the race, 100 birds for $250 or possibly $500 a side, will be shot in Kansas City the latter part of June. WHITFIELD.

BOOKS RECEIVED.

TIMBER PHYSICS.—Part I. Preliminary Report Compiled, by B. E. Fernow, Chief of Forestry Division, Washington: U. S. Department of Agriculture, Forestry Division. 1892.

A WINDOW ON THRUMS.—By J. M. Barrie. Cassell Publishing Co., New York. Price, 25 cents.

BY
CHARLES HALLOCK.

CONTENTS: Distribution of the Salmon. Life History of the Salmon. Technology of Salmon Fishing. Salmon Fishing in the Abstract. Luxury of Salmon Waters. Itinerary of the Salmon Rivers.

A book to read *now*; and to be put in one's pocket for reading again in camp.

Cloth, 126 pages. Price $1.00.

FOREST AND STREAM PUBLISHING CO.,
318 Broadway, New York.

SOME anglers labor under the false impression that large dealers and manufacturers charge more for their goods than the keepers of small shops. A glance at our new Illustrated Catalogue and Price List for 1892, which we will mail on receipt of 6 cents to cover postage, will show how much they are mistaken.

ABBEY & IMBRIE,
Manufacturers of All Grades of Fishing Tackle,
18 Vesey Street, New York.

Notice to Fishermen! Cut Prices for 1892!

I am with you again with lower prices for Fishing Tackle. I find by experience that putting down prices and not decreasing the quality, it increases my business every year.

ROD AND GUN AND CAMERA.

As a recognition of the important place of amateur photography in its relation to sports of the field and prairie and mountain and forest and stream, the FOREST AND STREAM offers a series of prizes for meritorious work with the camera. The conditions under which these prizes will be given are in brief as here set forth:

There will be ten prizes, as follows: First $25. Second $20 Third $15. Fourth $10. Six of $5 each.

The competition will be open to amateurs only.

The subjects must relate to FOREST AND STREAM'S field—game and fish (alive or dead), shooting and fishing, the camp, campers and camp life, sportsman travel by land or water.

There is no restriction as to the time when the pictures may have been or may be made—whether in 1892 or in previous years.

Pictures will be received up to Dec. 31, of this year.

All work must be original; that is to say, it must not have been submitted in any other competition, nor have been published.

There are no restrictions as to make or style of camera, nor as to size of plate.

A competitor need not be a subscriber of FOREST AND STREAM.

All photographs will be submitteed to a committee, shortly to be announced. In making their awards the judges will be instructed to take into consideration the technical merits of the work as a photograph, its artistic qualities; and other things being equal, the unique and difficult nature of the subject.

Photographs must be marked only with initials or a pseudonym for identification. With each photograph should be given name of sender, title of view, locality, date, and name of camera.

The photographs shall be the property of the FOREST AND STREAM. This applies only to the particular prints sent us.

From time to time we shall reproduce by the half-tone process samples of the work submitted, and should the interest in FOREST AND STREAM'S Amateur Photography Collection prove to be what is anticipated, we may ask for an expression of opinion by a vote of all our readers after the manner of the successful and famous "Camp-Fire Flickering Vote." Such popular vote will be quite distinct from the award by the committee.

FOOD FOR FISHES.

UNDER the above title we print a noteworthy paper, by Mr. A. N. Cheney, in our series of articles read before the American Fisheries Society. Mr. Cheney relates how a New York lake, thirty-six miles long and from one to two and one-half miles wide, was stocked in 1878 by planting 18,000 crayfish as food for the black bass and other game fishes. For several years past the entire lake has contained crayfish in abundance.

Among the best known and most widely distributed of the natural foods for trout are the fresh-water shrimp belonging to the genus *Gammarus*. These give to Caledonia Creek its pre-eminence as a trout stream, and they flourish there on a kind of moss (*Hypnum*) which is native in few localities, but may be easily and advantageously transplanted. This little "shrimp" is not a near relative of the salt-water shrimp, but is closer to the sand fleas of our sea shore; the common form in trout streams is only about one-half inch long, but makes up in numbers what it lacks in size, and its fertility is wonderful. In brooks near Marquette, Michigan, Prof. S. I. Smith found, in stomachs of brook trout, a larger kind measuring from three-fifths to four-fifths of an inch. A figure of this one is published on Plate II., Report U. S. Fish Commission, Part II.; the illustration (figure 6) is greatly enlarged, in order to show details of the structure. By the use of another kind of shrimp Mr. Thos. Andrews, of Guildford, England, secured a rapid growth of trout in his ponds, the young of the crustacean having been found admirable food for his fry. Mr. Andrews introduces insect eggs and larvæ also into his waters, particularly the alder-fly, grannom-fly and May-fly. Snails prove exceedingly useful, their eggs furnishing abundant and suitable food for small fish, while the large trout dispose of the adult animals. The shrimp and snails are fed upon liver and horse flesh. Mr. Cheney reminds us that the alder-fly and grannom-fly are caddis flies, and their larvæ are called "caddis worms."

In conclusion Mr. Cheney relates his experience in transplanting the May-fly and establishing it in waters wherein it was unknown. He gathered the flies in a bait bucket and a tin biscuit box, but afterward learned of Major Turle's method of using band-boxes with lines of worsted from side to side for perches. By this means the flies can be easily carried by railroad train and distant waters may be readily stocked. The subject treated in this paper is interesting and practical and deserves the closest attention.

FISH AND FISHING IN OHIO.

IN our columns will be found a timely and valuable paper by Mr. John E. Gunckel on "Fish and Fishing in Ohio." In this article Mr. Gunckel calls attention to the destructive methods of the commercial fishermen, particularly in the use of small-meshed nets, which kill immature and comparatively valueless fish, and in hauling seines over the spawning grounds of certain species. The sturgeon, once so abundant as to pass unnoticed and seldom used, has now become extremely valuable and, in consequence, unusually scarce in Lake Erie. The practice of setting trawl lines on the spawning beds of these fish has nearly exhausted the species. To make matters worse, the spawning grounds are infested by legions of suckers, which consume vast quantities of eggs. Various circumstances combine to interfere with the protection of food and game fishes. Among these are the inadequate compensation of the fish wardens, the obscurity of the laws, and the lack of uniformity as to the legislation of contiguous States. Many of the fishermen oppose any interference with their vocation, although some of them recognize the wisdom and the necessity of regulation of the fishery and of its promotion by fishcultural methods.

Mr. Gunckel mentions what is conspicuously brought to the attention of every observer of the fisheries, the need of missionary work among the people. The enforcement of the laws has become so difficult, owing to the indifference of the people at large, to say nothing of their secret sympathy with law breakers, that the ordinary machinery of State authority has been unable to master the situation, and the belief is rapidly gaining ground that no wild animals can be properly protected until they become the private property of individuals or associations, who will take the steps necessary to protect their rights. We commend this paper of Mr. Gunckel's to the serious consideration of our readers.

CROAKERS TO THE REAR.

CRUSTY old croakers and vinegar-spirited wiseacres solemnly assure us that summer half-holidays are a device of the devil, and that working men and women would be far better off if they stuck to their work six full days in the week all the year around.

This proposition has just enough truth in it to give it at first blush a tinge of plausibility, for it is not to be gainsaid that multitudes do make a miserable failure of their half-holiday, and would be better in spirit, body and purse if they worked all day Saturday instead of going off into foolish dissipation.

Nevertheless the fault is not in the holiday, but in the ignorance, or folly based on ignorance, of those who mis-use the holiday.

What the busy world needs is not fewer holidays, but more sensible ways of spending those it has.

They who can truly help the working man are not the croakers, who would wall him in the more securely for the good of his soul; but the men and the women of large heart and ready sympathy and thoughtful concern and inventive genius, who will point out the ways and provide the means for a more profitable enjoyment of his play time.

If in his unwonted freedom from the drudgery and grind of his accustomed round, he mis-spends his opportunities and fails to pluck the golden fruit of a summer's day in the open air, the remedy is to be sought not in repression, but in instruction, encouragement and enlargement of opportunities.

The problems—and they are important problems—of rational holidays for the great masses who do the world's work, will never be solved by the croakers. Let these Knights of the Sorrowful Visage go to the rear. The voices the half-holiday world wants to hear are of those cheery souls who will show it how to get the most good out of its play hours.

SNAP SHOTS.

"THE SUSQUEHANNA, its Past, Present and Future," is the subject of a paper by Mr. A. F. Clapp, which appears in our present issue. The story of the depletion of this river of its shad, herring and striped bass through obstructions, pollution and injurious fishing is briefly, but forcibly told. The work of restoration by planting bass, pike perch and other valuable fishes is favorably mentioned, but the writer is alarmed, and with good reason, for the future of that noble stream. Mr. Clapp sent us a letter in June, 1889, about a California salmon which washed ashore at Sunbury, and to this he refers in his article, having overlooked its publication in FOREST AND STREAM, July 4, 1889.

With each recurring spring and the coming of the songbirds the mails bring multitudinous inquiries respecting the Audubon Society and the mission of bird protection undertaken by it. The organization is no longer in existence; it was disbanded in 1888, after accomplishing a vast amount of work in the field of its endeavor. It cannot be said that the work was completed; it never will be so long as fashion shall decree that woman shall wear bird feathers in her headgear. For after all fashion rules. Common sense, humanity, decency, all these count for nothing; fashion says feathers, and the milliner's agents scour the land in quest of bird skins. However enormous may be the destruction by other human agencies, this killing for woman's wear exceeds them all. An ornithologist of world-wide note tells us that the number of birds of plume killed by a single millinery collector in the course of one winter trip to Florida exceeded by 10,000 the total number of bird specimens in the two largest museums in this country. In fact the killing by naturalists—real and imitative—is in the estimation of this competent judge, exceeded even by the small boy with his humble sling-shot engine of warfare.

The penalties prescribed for having game birds in possession is $25 per bird. This makes the fine accruing from the game seized by Protector Brown in this city last week aggregate $27,000. With such a prod it is to be expected that the interested parties should be stimulated to fight the law, and we are not surprised to find in the *Times* a statement that the case will be defended by the Game Dealers' Association. This organization is reported to be levying on the steamship lines, express companies, caterers and other interested classes a fund of $10,000 to carry the case up to the United States Supreme Court. Such a test should be welcomed. The law, we believe, will stand it.

The meeting of the American Fisheries Society, held in this city last week, was pronounced by the older members present to be the best in all the twenty-one years of its history. The complexion of the attendance and the character of the papers and discussions demonstrated the intelligent and substantial interest now felt in this important branch of public economics. Several of these papers we print to-day. Others will follow.

It happened last week that at the very hour when the New York Association for the Protection of Game was seated at its banquet to the American Fisheries Society, one of the State game protectors, accompanied by a member of the FOREST AND STREAM'S staff, was raiding a New York cold-storage warehouse packed with illicit game.

Adirondack fishermen are to have more black bass in the future. The Fish Commissioners have determined to supply bass for stocking waters in the North Woods now inhabited by pickerel. An order for 9,000 adult fish has been sent to Ohio, 1,000 of which will go to the Adirondack Preserve.

The Sportsman Tourist.

A SCOUT IN IDAHO.

IT was some time in August, 1877, after the Nez Percé war, that I made a little scout in Idaho. The Indians had left the country, that is the hostiles or the great majority of them had, and they had taken General Howard after them. The stage had not begun running between Lewiston and Mount Idaho since the outbreak, and it was often rumored that signal fires had been seen between Cottonwood Butte and the Salmon River. There was a number of women and children who wanted to go to Lewiston, and among them was one whose husband had been killed on Salmon River.

One day the captain of the company of Mount Idaho volunteers and Mr. L. P. Brown wanted to know what I thought about the stage going across the mountain. I told them I thought there was no danger, but to make it safe it would be better to send a party as an escort down as far as the old Mason place. Then next day they could go over on to the breaks of Salmon River and see if there was any Indian sign near where the signal fires had been seen. They wanted to know if I would take ten men and make the trip. I said that I would go, and they urged me to get everything ready and make an early start in the morning.

Next morning early, the stage drove up to the hotel porch and four women and six children got aboard, and we pulled out for Lewiston. With my ten men I followed along behind, until we passed Cottonwood, where we stopped long enough to water the stage team and our saddle horses. When we started again I sent two men on ahead, with orders to keep about half a mile ahead of the stage, and then sent four more, who were to keep half-way between the first two and the stage. When we began to pass the graves of those who had been killed with Lieut. Rains, the women began to grow nervous, and would ask me every few minutes if I thought it was safe to proceed. I assured them that there was not a hostile Indian within one hundred miles of us. When we reached the rocks where the soldiers had taken refuge and had stood the Indians off until their ammunition had been exhausted, some of the party wanted to turn back. I told them we were safe, and as I had been over the road on horseback a number of times since the fighting I considered it safe or I should not have started. Our progress was quite slow going up the mountain, but once on top we made good time until we came to a small branch one mile west of Willow Creek. Here we halted, fed our teams and had our dinners, and as we had not seen any Indians, or signs of any, the party were much better pleased. In an hour and a half we hitched up and went down near the old Mason Ranch. I concluded we were perfectly safe, and with the consent of the women, we left them and struck across the country to the breaks on Salmon River. My advice to the boys was not to shoot at anything but an Indian. We had not gone far, when I saw a fine red buck, and on showing it to Ben Morris he wanted to shoot at it.

"Oh, no," I said," we must not fire a gun until after we get on to the breaks of Salmon River, but if there is no Indian sign on the Maloney Creek, or the Pittsburgh Landing trails, we will shoot deer, grouse or anything we want to." We saw quite a number of deer running, and a great many grouse, and we passed through an immense huckleberry patch. Here we halted for about fifteen minutes.

After we started again, we were soon at the trail which runs along on the breaks of Salmon, but saw no signs of Indians; that is, fresh signs. We camped at a spring in a small meadow, and after going into camp I, with another man, went down on to some breaks, where we could have a view of the country, and seeing nothing we considered we were just as safe here as if we had been home.

When I got back to camp I told the boys to shoot all they wanted to, that I was going out to see if I could kill some game for supper and breakfast. Two of them took camp kettles and went back after huckleberries. I went down below camp but a short distance, when I started up a nice flock of grouse a little over half-grown. I was shooting them with my revolver, and had shot nine times and killed seven, when old Peter Beamer came down from camp and said he knew I was shooting my revolver, so he thought he would bring a gunny sack along, as it would be better to carry them in than to carry them by the legs. "All right, Peter," I said. "We will gather them up in a minute. There sits one up in that tamarack near the top; you try it with your Ballard."

"All right," said he, and raised his gun when I said, "Head, or no meat." He quietly lowered his gun and said, "I cannot hit his head, and neither can you."

As I had a Remington target rifle with globe and peep sights, I thought I could take its head off, and I said that I thought I could, and that if he would go and get it if I killed it I would try.

I raised my rifle and banged away, and out came the grouse, and as the hill was very steep it went fluttering down a long way with old Peter in hot pursuit. He finally caught it and when he came back he said with a smile, "You came pretty near missing it; you just touched the top of its head." When I had gathered up the other seven we went back to camp where we cleaned our grouse and soon had them on the fire stewing for supper.

The boys had come in with their kettles filled with berries and I had taken my horse down about 200yds. to a small hole in the branch to water him. As I turned to go back I saw two red bucks trotting quartering toward our camp. I let my horse walk along a short distance until I had got behind the hill, then I chirped to him and went running into camp. Every fellow jumped for his gun and wanted to know what I had seen. I told them two bucks, and that they could get a shot by running up on the small ridge back of camp. Peter Beamer, Ben Morris, Theo. Swarts and Jack Rainey started for the deer. As they left I advised them only to kill one of them. They got up just in time, and they opened fire on the deer and kept it up till they had killed both of them, and in a few minutes they came dragging them into camp. As soon as they came within speaking distance old Peter spoke up and said, "Lieutenant, you must not get mad. The boys killed 'em. I tried to keep them from it but they won't mind me like they do you."

We dressed the deer and hung them up, and they were fine. We soon had our supper and then sharpened a splint about six feet long and dug a hole and built our fire over it. Just before we went to bed we put the deer heads in, put some grass over them, then heaped on the coals and hot ashes and built a rousing log fire on top. We took our blankets and some of us went over to a small ridge and slept there. We did not think it was any use to put out a guard.

Next morning at daylight I got up, and, rousing camp, we unearthed our deer heads, and they were thoroughly done to a nice brown, and a better breakfast I do not think ten men ever sat down to in the mountains.

Soon after breakfast we saddled up and were on our way home. We passed between Cottonwood Butte and Salmon River, and found where the Indians had been camped when they killed Lieutenant Rains and his men and where they had camped the night before they fought the eleven volunteers near Cottonwood July 3d.

We reached home about 3 o'clock, when our friends were glad to meet us and all in the settlement were more comfortable when we told them we had not seen any Indian signs that had been made since they had left the country a month before. LEW WILMOT.

REMINISCENT.

THE modest hepatica and fragrant mayflower, harbingers of springtime and welcome guests, have come and gone, and the catkins on the willow that appear before the snows of winter depart, have long since been succeeded by the frondescence of early summer. The burning sun of June invites to shade and cool retreat whence we may see the heat waves rise from earth and dance and tremble until lost in the higher atmosphere. Not a breath stirs, and it seems as if we are all alone in the world and nature is enjoying a siesta. But no, for right here on our left a colony of ants ply their honest toil, a spider noiselessly spreads his net in the branches overhead, and a katydid breaks in with his sibilant, nasal song. Our companion of many a day in field and covert, tired of panting and lolling, throws himself broadside upon the ground, and let us hope that he, like his master, finds comfort and pleasure in the recollection of distant but not forgotten days of autumn time.

Ah! we have been there! and in these sweltering days it does one good to recall those other days of comfort and pleasure, days when the cares of business and the perplexities of life were laid aside and forgotten. Our thoughts go back to a day upon the hills and in the runs of the old Bay State that will linger long as a cherished remembrance, not because we shot remarkably well or scored such a large bag of birds, for we never measure our pleasure by the size of our bag. The early drive in the clear, frosty morning air, genial companionship, no friction or mishap, cordial reception at our destination, fine working dogs, reasonable number of birds and fair success in their capture, all contribute to the enjoyment of our outing.

Mr. C. A. Parker and the writer had planned for a day out during the full moon of October, and with the enthusiasm of school boys we awaited the arrival of the day. We arranged for an early start as our destination was a dozen miles distant, and we have a decided preference for the early morning hours in the covert. The writer turns in early and dreams of birds, birds, birds. Arousing from a sound sleep we think it daylight, and hastily arising find it only 2 o'clock. We return to bed but not to sleep. At 5 o'clock we are measuring off distance on the road. The morning air is keen, clear and bracing, and we spank along at a good pace, well bundled up and comfortable. We soon arrive at our destination and find our old stamping ground posted. We are about to drive along to other haunts, when Mr. Blank came out of his house and accosted us with a cheery "Good morning, gentlemen, good morning."

"Good morning, Mr. Blank. We drove out for a day's shooting, but we see you have your place posted."

"Yes, but drive your team right into the barn and shoot all you want to. I have posted my place because of a few pot-hunters who in years past have been here day after day, and you'd think to see and hear them that they owned the place. They never thought it worth while to ask permission, and they've killed lots of birds here and have never had decency enough to offer me a pair or even as much as to thank me. Then I've been annoyed by a good deal of Sunday shooting, and I won't have it. But you fellows are just as welcome as ever to come here and shoot."

"Thank you, Mr. Blank; we certainly appreciate your kindness and will endeavor not to abuse it."

"That's all right; I've never had occasion to regret your coming."

Before the conversation was ended the team was cared for and two eager gunners were ready for the fray. Our steps were turned toward a small brook below the house, flanked on either side by a narrow alder run, with a few scrub pines and apple trees, and elevated land on either side.

Parker's William Tell (5224), that rare good dog, accompanied us, and he was as anxious and joyous as his owner and companion for the sport of the day. Parenthetically, I may say that Tell descended from generations of noble ancestry and that his unsurpassed performances in the field were his by honest inheritance. Nor were his good qualities limited to the field, as his winnings on the bench at New York, Boston, Providence, New Haven and other places bear ample testimony. Nat. 1884. Ob. 1891.

"Doc, you keep along on the edge of the hill a little ahead and above the alders, and I will go in with Tell. It is so thick in there I don't think I can shoot; and if old Mr. Grouse boils up I want you to knock him over."

"All right, Charley, I'll do the best I can."

We move quietly along some little distance, when I am informed that there are birds there, as Tell is making game.

"Look out, Doc, Tell has a point!"

No need to caution Tell to steady him, as he was as staunch as a rock and was never known to flush a bird through his own fault.

Whirr-rr-rr-bang!—bang!—rr-rr-rr. As he rose Charley got a snap shot in close cover, and he "boiled out," so I thought at least, out of gun shot from me, but I did my best to stop him. Certain it was the wary grouse escaped us both unscathed.

"Charley, come up here! I have nailed him down up there in that undergrowth by the stone wall on the other side of the road, and we ought to get him now!

"Well, Doc, I'll go up around to the other side of him and turn him back down the run. If he goes up over the hill it will be good day to him. So you get in between him and the run and you will get a good open shot."

We are soon in position and Tell again points him under a snarly grape vine, which, with sumac and pine, made a cover so dense that Charley could not see him when he arose. But down the hill he came by me flying low and much like a flash of greased lightning. I threw in ahead and pulled with "the finger of instinct and eye of faith," and had the pleasure of seeing feathers drifting down the hillside as a result.

"Did you get him, Doc?"

"He is our bird, Charley, I think. At least I have some of his plumage as a souvenir. But didn't he go, though?"

Tell is soon on the scent and trails him down to the water's edge, but finds no bird. We join him in the search and look the ground over carefully and thoroughly, but without success.

We are somewhat winded by the chase up and down the hillside and so sit down while Tell continues the search. He travels up and down along the brook challenging every nook and cranny, starts back where the bird struck the earth and works the ground over and over again. Half an hour is spent in the search, for we would rather miss several clean than fail to secure a dead or wounded bird. Skirting the brook downward to an unusual distance Tell strikes scent on a flat stone in the middle of the stream, which at this point is quite wide and shallow, and is soon on the other side where he again takes up the scent and trails along the brook some distance and comes to a staunch point at some gnarly roots of a partially overturned tree. We look in vain to see anything of the bird, but reaching in under the roots as far as he could Charley grasps and withdraws from his hiding place a very large cock grouse with one wing shot off. We agreed that we had never seen more persistent or better work retrieving done by any dog, as the cunning of the bird had doubtless prompted him to run in and across the water to break the scent. We resumed our work down the run and did not proceed far before another bird broke cover out of shot nor stopped in his flight until after passing out of sight over the distant hilltop. In due time

"Mark!" Bang! and Charley's gun does the deed of death before the bird showed himself above the alder tops. We are soon at the lower end of the run and I take my position upon a little cleared knoll around which the brook makes a bend at nearly a right angle to its former course. We usually found a covey of birds at its foot, scattered among the blackberries and scrub growth which when flushed flew directly over the hillock to the dense woods beyond.

"Now, Doc, don't get rattled. If there are any birds in there you know Tell can be depended on. I won't send over but one at a time."

Charley and Tell strike out and surround the spot and soon "Point! Look out!"

Whir-rr-rr—bang! bang! right into my face and past me without touching a feather.

"Are you ready? Look out!" Bang, and a clean kill as he went quartering away on my left.

"Another point! mark!" and Charley's gun stopped another in his flight before he got well under way.

"Tell has another point! mark!"

Whri-rr-rr right in line for the muzzle of my gun and killed clean at easy range. Another bird took wing on Charley's left which went quartering away out of gunshot, and no ammunition was wasted on him.

"Well, that is good sport, Doc. How many did you get?"

"Two."

"Well, two out of three shots is not bad."

We gather up the birds and return to the barn for lunch with five nice plump birds. We are invited into the house, but prefer to sit in the warm sunshine. A pumpkin pie and a pitcher of milk were sent out to us, and they served to round out a hearty lunch. We put one of Uncle Sam's promises to pay on the plate when it was returned to the house. Being somewhat fatigued from the unusual exercise of the forenoon, we took a short rest and then started for the run above the house, and worked over considerable territory without getting a point. We arrived at a well-known marshy place that was densely overgrown with grapevines and which seldom failed to hold birds.

"Now, Doc, you go around and get into that old wood road and I will work this the best I can. You know a fellow can't get a shot in such a jungle."

"All right, Charley, give me five minutes to get my position, then come right through."

I have not long to wait before the thunder of pinions apprises me to be on the alert. Instantly I see a bird coming directly toward me and another making off at nearly a right angle. Bang, bang; and when Charley appeared he inquired:

"How many were there?"

"Two."

"Which way did they go?"

"Come here and I will show you."

"Here is one," said I, pointing to my foot, "and the other is over by that little sluice where it runs under the road."

"Both?"

"For certain."

"Bravo! but that is good."

"Charley, that makes a pretty good bag, and as we are somewhat tired and the afternoon is on the wane, what do you say to going over to the white birches and trying for woodcock?"

"It's a go," said Charley, and we lose no time in reaching our favorite flight woodcock ground. We did not go 75yds. beyond the stone wall before Tell pointed, and Charley walking in flushes a fine bird which he grasses neatly with a single gun. We work along some little distance, Tell challenging frequently but finding no birds until nearing a little opening, where he points near a tussock grown over with a brushy undergrowth. Both have good positions, and when he is flushed two guns at the same instant roar out their message of death, and another plump bird is deposited in our game bag.

The sun had kissed the topmost hills and we were warned to retrace our steps, and making a detour in the direction of our team we had just climbed over a stone

wall when up flew a bird without any warning, and making a hasty snap shot I made a miss with my first, but scored a nice, clean kill at long range with my second. Another bird fell to Charley's gun on the way to the house, making our score for the day eleven birds. We selected a fine brace of grouse and presented them to our host, who was much pleased, and he gave us a very cordial invitation to come again. We reached home in the early evening, tired, contented and happy, our appetites whetted by the exertion and bracing air of the day. Soon after getting thoroughly warmed up and eating a hearty supper, Morpheus wrapped us in his mantle and transported us to the land of pleasant dreams.

WORCESTER, Mass., May. GEO. MCALEER.

ON THE PAMPAS OF ENTRE RIOS.

DURING a sojourn of several years on the pampas of Entre Rios, in South America, stock raising, I became familiar with many of the ways of hunting and fishing practiced by the Gauchos, or natives of that country. This was twenty-five years ago, and at that time our estancia, which was very large, teemed with wild animal life. There were ostriches, partridges, horned plover, ducks, paroquets and wild pigeons, deer, capinchos (a species of amphibious pig), armadillos, opossums, iguanos, to say nothing of prairie dogs, skunks, tarantulas, scorpions, centipedes and fleas.

Partridges were thicker than English sparrows are in this country, and the native mode of capturing them was as follows: On the end of a cane rod about 8 or 9ft. long there would be lashed a small running noose made of twisted horse hair or the rib of an ostrich feather. Armed with this weapon, we would sally forth on horseback and within 100yds. of the ranch we would be sure to find partridges. On our approach the birds would scatter through the grass, each one selecting a tuft in which to hide. When one was located all that it was necessary to do to capture it would be to ride around it several times. This would excite its curiosity so that it would stretch up its head above the grass, when with a dextrous thrust of the rod the noose was slipped over the head and the bird hauled from its hiding place. I have captured hundreds of partridges in this way; and one Sunday morning, when I had a large influx of visitors and very little meat, I caught thirty-nine of them in little over an hour, and had them stewed for dinner.

The killing of ostriches for their feathers was carried on systematically, as a source of revenue to the estancia. As soon as a flock of ostriches was sighted from the house, the hunter would start off on horseback, and get as near as he thought it was safe to go without frightening them. He would then dismount, and walk along the side of his horse, which was trained to the work. The horse would walk slowly toward the ostriches, occasionally taking a nip at the grass. The hunter always rode on these occasions bare-back, and with a very light rawhide bridle, and carried his ammunition tied around his waist. When within gunshot he would fire, and if successful in killing a bird, he would have little difficulty in getting several more before they ran away. As soon as one ostrich falls the others crowd around it, and perform a sort of war dance, going through the most laughable gyrations, and stupidly allowing themselves to be shot down one by one, and not until only three or four are left, do they seem to realize their danger, and take safety in flight. As soon as these run, the hunter would collect the feathers from the wings and tails of those he had brought down, taking care however, first to kill any wounded birds, and keeping well out of the way of their feet while doing so, for their kick is very dangerous. He would probably cut off a few wing-joints, and cut out a few gizzards before leaving the carcasses to the vultures. These are the only edible parts of the ostrich. The flesh of their legs is full of parasitical worms.

The Gauchos also hunt the ostrich on fleet horses, using their *boleadores*, or *bolas* to stop their flight. The *bolas* is made with three stones covered with rawhide, or lizard skin, each attached to a thong about three feet long, and all joined together at a common center. One of the stones is smaller than the others, and is called the *manico*, and is the one held in the hand. The hunter starts after the ostrich on a dead run, swinging the *bolas* around his head; as soon as near enough he will throw it with wonderful accuracy on to the back of the bird. The *bolas* will wrap itself around the neck and legs of the ostrich, and so hamper its movements that it falls an easy prey to its pursuer. The ostrich has many strange ways, and I was particularly interested in studying them. They go in flocks of three or four females and one male about their nesting time, and for several weeks before locating their nests, the hens drop their eggs all about the pampas. These are called *haucho* eggs (pronounced "watcho"), and are much more delicate in flavor than the eggs taken from the nests. They have a thinner shell, and when fresh laid are of a beautiful golden color. We cooked them by roasting them before the fire. We would first break a hole in the small end of the egg large enough to insert a tea spoon. The egg would be set up among some hot ashes, a pinch of salt and pepper put into it, and the contents kept stirred with a stick so that all would be done alike. The flavor is excellent and one egg would satisfy a very hungry man. As soon as the ostriches decide upon a suitable place for a nest, the male bird scratches away the grass and slightly hollows out the ground for a space of about 3ft. in diameter. All the hens of the flock lay in the same nest until there are from 25 to 35 eggs laid. The male birds then take possession and sit on the eggs until they are hatched. As soon as the brood can leave the nest the old fellow leads them away to feed on flies and small insects, and everything is lovely until he espies another male bird with a brood. As soon as the old birds see each other they make a peculiar booming sound and every little ostrich disappears in the grass. The old ones then approach each other and engage in a most deadly conflict. They fight until one or the other is killed or runs away. The remaining one will then utter another peculiar sound and both broods will spring up from their hiding places and follow the victor, who struts off as proud as a peacock. I have seen old male ostriches with three broods, each of a different size, two of which they had captured.

On the end of the first joint of the wing of these birds there is a long spur. This is evidently given them as a means of defense, but the Gauchos say that the bird uses them to accelerate their speed when running by spurring themselves with them. However this may be, there are always large bloody spots on the sides of the ostrich that has been captured by chasing, caused by these spurs digging into the flesh.

They become very tame in captivity, but are a perfect nuisance about a place, as you cannot keep them out of the buildings, and they will gobble up anything they can swallow. One of them cleaned out a work-basket one day, swallowing spools of cotton, emery bag and thimble, ending his repast by eating up a bowl of marrow we had on the table to use in lieu of butter. They will stalk around the grounds in the most sedate manner, then suddenly commence dancing in the most comical way, tumbling all over themselves and running around like mad. They will stop this foolishness as suddenly as they commenced it and walk off as demurely as if they were going to a funeral.

I spoke of the danger of their kick, and will tell of an instance that came under my own observation where a man was killed by one. We had been working hard for several hours to corral a point of about two hundred very wild cattle, which were determined to stampede for their grazing ground about fifty miles north of us. We finally got them well on the run for the corral, and after they were in one of the men dismounted to put up the bar at the entrance. Just as he put it up four or five ostriches that had been driven in with the cattle made a rush to get out. One of them struck the bar which threw him on his back, and the Gaucho with great foolhardiness attempted to capture it. He received a fearful kick in the stomach, which cut deep into his flesh, and from the effects of which, in three days, he died.

Ducks were very plentiful on the pampas, and I had great sport shooting them. Their nests were found by every small pond, and if the eggs were fresh we always gathered them in. The horned plover were very numerous, and afforded fine wing shooting. They are good eating, and their eggs are delicious. They lay three or four eggs on the ground, which they resemble so much in color that they are very hard to find. We located their nests by the fuss the birds made when the sheep came near them. They would fly at the sheep to drive them away from the nests, uttering all the time their piercing cry of *tira-tira*, which is the name given them by the natives.

My men were constantly bringing iguanos and armadillos, both of which were good eating. The armadillo has given me many a fine chase on horseback; they can run very fast, and dodge as quick as lightning. When they think escape is impossible they roll themselves up into a ball and quietly await their death, which is effected by inserting a knife between the joints of their armor as near the head as possible. Roasted in the shell they are a great delicacy. Deer I killed by stalking, but as no one in the estancia would eat the meat but myself I killed very few. Fish were very scarce and only found after continued high water in the arroyos. During the flood these fish would work their way up stream, and as the water subsided they would be left in the holes and small ponds in the bottom of the arroyo. These fish were a kind of large catfish, called bagre, and weighed from three to five pounds. They could be seen swimming around in the ponds, but no lure that I could devise would tempt them to bite. The native mode seems to be the only way to capture them. Three or four of the men would ride into the pond on horseback, and flounder around in the mud until the water gets so mixed with it that the fish swim to the surface. They then knocked them on the head with a club and threw them out on the bank. We frequently captured five or six from a pond and they made a very acceptable change in our usual diet of beef and hardtack. EDWARD A. ROBINSON.

BALTIMORE.

Natural History.

ANIMAL WISDOM.

WE are all familiar enough with examples of intelligence in cats and dogs, but of these stories we do not easily tire. Here are some facts from a correspondent:

In moving to a new place of residence we found on the premises a large cat which had been left there by a former occupant. She was not of the real domestic kind, but lived principally in the barn, occasionally venturing into the house to obtain her food. On one occasion, much to the surprise of my wife, she came up to her and mewed several times, turning each time toward the door leading to the barn. This she repeated until Mrs. N. was induced by curiosity to follow her, when she led the way to a barrel half full of straw, up the sides of which she climbed, all the time mewing and looking at my wife, and there were five kittens, cold and dead. Mrs. N. remarked, "They are cold and dead, pussy," and the cat went away satisfied.

She would sometimes scratch the children and we were fearful she would seriously injure them, and one day I said in her presence that "I would shoot her." She was missing for about six weeks and of course I had then "got off the notion."

On one or two occasions she brought some kittens into the house, when Mrs. N. said to her, "I shall not have these kittens in the house; if you bring them in again I will have them drowned." The result was the kittens disappeared one by one till they were all gone; a few days subsequently the old cat was seen coming across the meadow, back of the house, bringing one in her mouth. She had been putting them out among the neighbors, and as this one was not wanted she had brought it home temporarily while she looked up another home for it, as we afterward learned.

When my sister was just old enough to sit upon the floor our little dog Fidel would place himself behind her so as to prevent her tipping over. He evidently had a plan in it, for he did it repeatedly day after day.

The old family cow I used to drive to pasture when a boy would always come running at my call, though sometimes so far away I could scarcely distinguish her in the herd.

I once had an English spaniel who in cold weather used to lie under an old couch in the kitchen. On every occasion that my wife spoke of going down town, no matter how low the tone of voice, he would come out from his bed and shake himself, as much as to say, "As I have nothing else to do, I think I'll go with you." And if he could get out of the house he was sure to follow her. Did he understand the language used? I think he did, for it is very certain that most animals understand the difference between the language of caress or affection and reproof or repulse. This dog would sit upon his haunches and sing or howl at command for half an hour at a time. N.

SNAKE GOSSIP.

WE cull from our mail bag the following notes on snakes, some of them brought out by Miss Hopley's recent paper:

While walking over a newly-plowed field at Barnegat, N. J., one day in August, I found three perfectly round white eggs, nearly one inch in diameter and having a thick, rough skin. A few minutes after this I found seven more in the same field and about 200yds. from the first find. They were so much alike that when put with the first found they could not be told apart. I carefully took them home, put them in a small box and covered lightly with sand, placing a glass over the top of the box, and put the box where it would get the full benefit of the sun. After that I patiently waited results. In two days I had seven small whitish snakes, about 5in. in length and as lively as any snakes I ever saw. Several days after a small black turtle hatched from one of the other eggs, and as the other two did not hatch I broke them, and each had a turtle inside. I think that snakes deposit their eggs in the sand, where the heat from the sun hatches them. The eggs were found on Mr. Mitchell's farm at Barnegat, N. J., and had been uncovered by the plowing. W. H.

STAATSBURG, N. Y.

Speaking of the old discussion as to snakes swallowing their young, which has so many times been gone over, a Philadelphia correspondent sends us a note from old Sir Izaak Walton, who, after discussing some characteristics of frogs, says:

"And let me tell you, that as there be water and land-frogs, so there be land and water-snakes. Concerning which, take this observation, that the land-snake breeds and hatches her eggs which become young snakes in some old dunghill, or a like hot place; but the water-snake, which is not venomous, and, as I have been assured by a great observer of such secrets, does not hatch, but breeds her young alive, which she does not then forsake, but bides with them and in case of danger will take them all into her mouth and swim away from any apprehended danger, and there let them out again when she thinks all danger to be past. These be accidents that we anglers sometimes see and often talk of."

A correspondent who writes from San Francisco, Cal., says: "A few years ago I spent five or six weeks at Wilmot, Annapolis county, Nova Scotia, and during the removal of some old railroad ties on the line of the Windsor and Annapolis Railway, discovered a large 'garter' snake with young. Immediately on being attacked she opened her mouth and the young snakes took refuge therein. I then killed the mother, and took from her stomach thirty-six young snakes about ½in. in length." There is here clearly some error of observation, for the young garter snake when it first makes its appearance is usually much longer than ½in.

MASSACHUSETTS SHARPTAIL GROUSE

Editor Forest and Stream:

While at Seaconnett Point (southeast corner of this State) last week waiting for the flight of whitewings, which occurs, if all things are favorable, about May 17, and about which much of interest might be written, but you won't be inflicted with it now, I was called on to identify a bird which had been killed near Westport and put into the hands of a local taxidermist for preservation. A country boy had spied it as it ran across a road, shot it, alas, and ended it.

It was a sharptail grouse, a female in fine order, and one of those the Massachusetts Society had taken so much trouble to turn loose. Such will be the fate of all of them I fear. This was the work of a poor, ignorant country boy who knew no better. From what I know of the average shooter, if he had been a man grown it wou'd have made no difference. Kill, kill, kill, is all they think of—anything that wears feathers. Selah!

And I was there to kill the "coot" in their spring migration. "Consistency is a jewel:" perhaps I had better not preach any more, but I must tell you of an incident:

On May 15, wind southeast, rain and fog, I saw several flocks of birds flying over the land which I took to be sandpipers of some sort. As I am a taxidermist myself in an humble way, and always on the lookout to increase my own and my friends' collections, I sallied forth to see what species it was. To my surprise they proved to be northern phalaropes. Hundreds of flocks flew, from half a dozen to thirty in a flock. I secured eleven and am sure there were thousands of them in the flight that day. Offshore they are not rare along our coast, but I never saw them over the land before. So I learned something about their numbers.

No one has ever answered my query about the "Little Brown Crane," a specimen of which was killed here two years ago in October. Where does he live? I never saw him in the West. NEWTON DEXTER.

BUZZARD'S BAY, Mass.

BOLDNESS OF A RAT.

CLEVELAND, O., April 9.—*Editor Forest and Stream:* A curious instance of a rat's boldness came under my notice this morning: I had two small chicks, with their mother, in a coop on a board walk. My wife heard tremendous sounds of distress from one of the chicks, and thought the old hen was treading on it. But on investigating I found it was caught between the boards of the walk. So lifting off the coop, I tried to pull it out of the crack, when to my astonishment I saw a rat had seized it from beneath the boards. It would not let go, although I shouted and my wife and two good-sized children were present also and by no means quiet either. I then made a pass at the rat with a bone that was lying there, but it was too large for the crack. Finally I rushed into the house and armed myself with the carving knife, with which I made a furious dig at the "varmint," which all the time was hanging on like a bulldog. That made it let go, and I released the chick, dead, however. Even then the rat made another rush at the blood and feathers which adhered to the boards; after which I saw it no more. R. J. T.

DOES THE RATTLESNAKE SPIT?

Editor Forest and Stream:

In your issue of May 26, current series, you invite attention to a statement made by Professor E. D. Cope, in a paper entitled "A Critical Review of the Characters and Variations of the Snakes of North America," relating to certain alleged habits of the genus *Crotalus*.

I must confess that the remarks made by Professor Cope, relating to our rattlesnakes, as far as they pertain to the following quotations of his in italics are entirely at variance with my observations.

"They throw the body into a coil and sound the rattle, giving a sigmoid flexure to the anterior part of the body on which the head is poised *with open mouth ready for action.* At this time drops of poisonous saliva fall from the fangs, *and by a violent expulsion of air from the lungs are thrown at their enemy.*"

As our rattlesnakes have already a far worse reputation than they really deserve since I for one consider them a very amiably disposed, if a dangerous reptile, I do not propose to see them charged with further misdeeds, such as lying with mouth wide open on the lookout for anything approaching and spitting poison at an enemy, unless such statements are more fully substantiated.

During a residence of more than twenty-five years in the western portions of the United States, a considerable part of this time having been spent in the field, where rattlesnakes were and are still common, and during which time I have seen hundreds of these reptiles, I have never yet observed one with its mouth open when coiled and ready to strike, neither have I ever seen one attempt to throw poison, even when teased and much provoked. Such habits, if true with any of the Eastern species, of which I admit I have had but slight knowledge in their native haunts, differ greatly from all the Western rattlers as far as I am aware. According to my observations a rattlesnake never opens its mouth unless to capture its prey and to eat it, or while in the act of striking at an enemy; in the latter case this is generally done so quickly that the mouth is not even seen open till after the blow has been delivered, when the much distended jaws close slowly.

As for their spitting venom I must personally see it to be convinced of the fact. I have as yet never met a rattlesnake educated up to such a point and simply cannot believe it, and I have experimented with many a one.

This venom-spitting trait is also attributed to the Gila monster, found in southern Arizona, the *Heloderma suspectum* (Cope), where all the Indians and native Mexicans believe it, but mere say—so does not prove anything, and it simply is not true. Their bite may be poisonous but otherwise they are perfectly harmless.

Knowing how widely FOREST AND STREAM is read I hope that others of its many readers will let us hear from them on this subject; and if it turns out that Professor Cope is right in this matter and I am wrong, I will at least have the satisfaction of having learned something more about a genus of reptiles with which I considered myself well acquainted heretofore.

Some years ago a correspondent in FOREST AND STREAM ridiculed Audubon's statement that the rattlesnake is able to climb. That they do climb bushes and even fair-sized trees I was able to corroborate from personal observations, but I shall be very much surprised if in this case Professor Cope's statements are confirmed by satisfactory evidence.

These so-called habits of the rattlesnake would not have surprised me if they had appeared in certain papers given to "snake stories," but they seem out of place in a scientific publication, and should not be allowed to stand unchallenged. CHAS. E. BENDIRE.

WASHINGTON, D. C., May 27.

Editor Forest and Stream:

Under ordinary circumstances the testimony of one man who has seen is of more value than the negative evidence of a dozen who have not, but the statement of Prof. Cope concerning the genus *Crotalus*, quoted in your issue of May 26, is so altogether at variance with preconceived ideas that I question whether he ever saw "the poisonous saliva fall from the fangs" while a rattler was coiled with head poised ready for action.

I have had experience with captive snakes, having handled them daily for months at a time, and during two seasons on the plains of Montana and Wyoming captured and dissected nearly a hundred specimens.

In not one single instance have I ever seen anything that would justify the description given by Prof. Cope, which reads more like a city reporter's account of what he thought had happened or ought to happen than the utterance of a trained observer.

While living in southern Illinois I had a captive nearly 5ft. long—a vicious fighter who would strike at any object thrust toward him, and often caught his curved fangs in the fine wire netting covering the cage, thus holding his open mouth in position for a fraction of a minute. The venom from each fang, a light amber-colored fluid in drops about about the size of No. 6 shot, could be seen on the gauze where it collected when he struck, but there was nothing more, no saliva, no spitting nor hissing, nor have I even seen these manifestations in any of the many individuals that have come under my immediate notice. Nor have I ever seen a snake's mouth open, with fangs exposed, while waiting a chance to strike. When they strike the jaws open at an angle of nearly 180°, but not until the final moment.

EAST ORANGE, N. J., May 29. T. M. W.

Black Chipmunks.

PROCTORSVILLE, Vt., May 23.—I have here a curiosity in the shape of three black chipmunks. There were four in the family, but one was of the natural color and the other three as black as anything can be. They are one year old and I see them nearly every day. Can you account for it in any way?—C. E. F. [Such freaks occur in most species of animals.]

Caught by the Tail.

RICHMOND, Ky.—*Editor Forest and Stream:* Our yard seems to be a place of refuge for quite a number of gray squirrels that stay here and raise their young. A den of them live in an old walnut not three rods from the door, and they jump from that into a large sycamore, then to a grove of cedars, thence over the roof of an old building into a cluster of grape vines. Last February I saw one of them swinging by its tail from a limb on the sycamore tree, and seeing me it reached with its forefeet and caught hold of an elm limb remaining there helpless until freed. In some way its tail had become wrapped around a sycamore ball or fruit which held it fast. The little fellow had probably been there several days, as when released he was very weak and could hardly climb.—W. L. Y.

Game Bag and Gun.

MAINE LARGE GAME.

FARMINGTON, Maine.—*Editor Forest and Stream:* Some time ago a very interesting article appeared in the Boston *Globe*, issued Jan. 4, 1892, entitled "Maine's Game," consisting mainly of the opinions of many well-known sportsmen and game officials of this State in regard to the quantity of large game now roaming at will in our forests, and the causes that regulate its increase or decrease.

In brief, it states that deer are increasing, caribou about holding their own, and moose decreasing. If that statement applies to the whole State taken as a unit, it may be true, but if claimed to be equally applicable to any of its parts, independent of other localities, there certainly exist reasonable grounds for dissent.

Personal observation made while hunting and fishing in that strip of country lying north of Eustis in the Spencer and Kibbey valleys, and facts of experience elicited from the most practical hunters and guides in our State—men thoroughly schooled in all manner of woodcraft, and life students of the habits and peculiarities of our game—are sufficient to convince any intelligent person that, if caribou are only holding their own and moose are decreasing, no confidence can exist in the testimony of human eyes.

It is true that deer are increasing yearly, and the increase is so marked, so self-evident, that all persons who have visited their haunts for any purpose whatsoever, have necessarily noticed it; on the other hand a correct knowledge of the habits and numerical existence of caribou and moose, is not so easily obtained, although those that know where to go have no difficulty in finding indications of their existence sufficient to warrant the belief that their number continues to hold good, the statements of others to the contrary notwithstanding. Game officials and sportsmen may be good authority for what they know, but very few have had the opportunity of judging for themselves what changes, if any, are actually taking place among such game.

A game official who takes occasional trips to fishing hamlets and lumbering camps, and spends his time in dogging the erratic footsteps of a surmised poacher, or in searching under old sleeping bunks for indications of illegal catching or killing, is none the wiser as a judge of the quantity of game in his precinct.

The average sportsman, too, is wiser only in his own conceit after a successful hunting trip to our wild forests. It is not generally known, but remains true nevertheless, that about every visiting sportsman that returns to his home in triumph, bearing the spoils of a successful hunting trip with which to awe and surprise his friends, deserves but very little, if any, of the laurels of the capture. If the game be moose, presumably one or more experienced and trusted guides are engaged to follow his trail day after until the noble fellow, exhausted and footsore, shall cease his flight and hope for safety in battle.

It is now that the experience of the sportsman commences; if he be within an easy journey he is informed of the surrender of the moose and urged to forego the pleasures of his warm camp-fire for a few hours that he may see the moose alive and afterward shoot it.

Another method of capture is for the sportsman to be stationed upon some well known runway, while guides, taking a circuitous route, beat up the woods, as it is termed, and drive the game before them in all directions. Should any take the desired direction they necessarily present their bodies as targets with varying degrees of success to the hunter.

Facts pertaining to our large game, obtained from such officials and sportsmen, must be very meagre and of very little worth to those desiring accuracy.

The party who will strap his well laden bag or pack upon his back and with rifle in hand share with his guide the difficulties and hardships of the tramp, will travel day after day through the forest in search of "signs" or "works," and when found if those of moose, will have the courage to search for their whereabouts until found, and will then persevere in following the trail of a chosen bull, will camp on his track at night and arise to renew the chase in the morning until the noble animal is brought to bay, will be rewarded with opportunities from which to form an accurate and practical knowledge of the relative scarcity and plentifulness of their number as well as other species of game, too valuable to be compared with that obtained from many other sources.

Again, very few people know the habits of the moose, and where to find them during the open season; and this ignorance has been the cause that has blighted the hopes and expectations of many hunting expeditions, and given rise to windy exhortations upon the practical extermination of these monarchs of the forest.

Perhaps it would not be amiss to state here briefly a few facts that may throw a little light upon this matter. Moose yard quite early in the fall; usually on the northerly cant of the highest mountains, as the instinct of their race seems to apprise them that such localities are free from the intermittent thaws and freezes of winter, and consequently void of all hard frozen snow and crust so damaging to their sensitive and tender feet. When once settled in their winter quarters, they remain there until spring, unless frightened away; and as they seldom or never wander away from the limits of their chosen feeding ground, it is possible for a hunter who is ignorant of these facts to travel for days without finding indications of their existence, especially as the usual sportsman is loath to climb, actuated by no special hope of reward, to the summits of lofty mountains.

When the denizens of any yard are frightened and startled by the approach of hunters, they usually take different courses: the bulls in one general direction, the cows in another; but very seldom do any two or more, unless it be a cow and her calf, take exactly the same course. This statement has its exceptions. Usually they head for yards occupied by other moose, and he who follows in the wake of a choice bull will soon have abundant opportunities of judging for himself, accurately and critically, from the indications of their "works" and the number of their trails, their whole number in the localities through which the chase leads him.

It takes a continual tramp of five consecutive days to run or walk down a moose; and in all cases, if your guide be well schooled and skilled in following the trail, so as to be able to tell the footprints of his moose from others, and be able to follow them without mistake through other yards, where they become to the inexperienced eye confusedly mixed with other trails, he will always be rewarded with success.

The best moose of the forest can be walked down in that time, unless the traveling be such as to greatly impede the progress of the hunter, in which case the time may be lengthened a day or so. The failures of others to accomplish this feat within the prescribed time is no proof of the incorrectness of my statement, but shows rather that they were unable to follow the same moose continually. Very few guides are able to do it with any degree of certainty, and as success depends primarily upon their skill, the very best, at almost any price, are the least expensive in the end. Probably none in the State of Maine are better skilled in this work than the veteran guides, Andrew S. Douglass and Joseph St. Ober, of Eustis, the former being the first man that ever walked down a moose in the Dead River region. After the first moose is started on one of such hunts (and I refer especially to the strip of country above referred to) moose tracks will be found in sufficient abundance to astonish all unbelievers. They will be found going in all directions, and their "works," carried on for years in rubbing trees and breaking branches, can be observed for many square miles around.

The nature of the country is such that it is especially adapted for the home of the moose and other wild game exclusively, and as it is unfit for purposes of agriculture will probably remain so for many years to come; the hunter, fisherman and lumberman are the only parties that can disturb its wildness.

Caribou are found in abundant numbers in the Spencer Valley and the country contiguous thereto; their tracks, crossing and recrossing each other in confused numbers, their many beds and places of frolic, give the surface of the snow an appearance not unlike that of a field having been occupied by a large flock of sheep after a first snow. As they depend upon the moss of the trees for their food in winter, they could hardly exist in greater numbers and find means of sustenance.

The modest recitals of past events by the guides that I have mentioned, of their many years of living in the forests, and my knowledge of their honorable course as guides in the woods, have taught me to believe that in that part of Maine, at least, both caribou and moose are increasing, and that under our present beneficent laws regarding their killing, they will be as plentiful at some short period in the future as the extent of their feeding grounds will permit. The guides as a rule are a law-abiding class, who look upon the preservation of their game as capital invested for their benefit and, in the case of moose especially, studiously endeavor to comply with the wishes of the law. They may wink at acts of illegal shooting, if the game be deer, for they recognize their abundance and the injustice of our law in making September a close month for such. It must be granted, too, that more or less unlawful meat finds its way to the many lumbering camps, but the killing is confined to deer, and generally sanctioned by all parties interested as not all derogatory to the interests of sportsmen or the number of deer. Few moose are destroyed out of season, and individual cases or exceptions exist only to prove the rule. This last fall was the first hunting season under the recent law, making it close time through the year for the cow moose; as a result, only two moose were killed in that country directly north of Eustis, both bulls, thus leaving all the cows to throw calves this spring.

Commissioner Stilwell, of Maine, says that they are so timid that they do not breed if disturbed, and therein fortifies his belief that they are decreasing; but he is hardly accurate in so stating. Facts of experience and observation in the woods directed toward their habits does not verify his assertion. During the rutting season moose are especially amorous, and the cows' plaintiff bellowings, which no temporary fright can suspend, can be heard for days calling for mates; the bulls become bold and ferocious, and the experience of many a person has warned him never to care for a second meeting with them while engaged in their *affairs d'amour;* even dogs often fail at such times to drive them, and this boldness and ferocity is one of the wise provisions of nature in insuring the future preservation of the race through the number of their offspring.

The advancing tide of civilization alone may in time threaten their extermination, for their nature is such that the wilds of the forests only can furnish for them a home. But until the arrival of that distant day, when our woods shall be reclaimed from its state of wildness for the purposes of settlement, we will, under our present wise laws, find moose in abundance in certain parts, at least, of our Maine wilderness. E. W. WHITCOMB.

Mongolian Pheasants for New York.

MT. MORRIS, Livingston Co., N. Y.—Secretary C. W. Gamble of the Mt. Morris Gun Club has received the good news from S. S. Howland, Esq., who has been passing the winter in Washington, that Mr. W. A. Wadsworth and himself have recently purchased in Oregon some of the celebrated Chinese pheasants which have been so successfully introduced there and live so well in a climate much like ours, and that they intend to make a strong effort to introduce them in the beautiful and romantic Valley of the Genesee. Mr. Howland says if they breed as rapidly here as in Oregon, we shall in three or four years have them in numbers large enough to make superb shooting.—G. S. E.

Geneseo Association.

GENESEO, N. Y., May 24.—I wish you had more readers of FOREST AND STREAM in Geneseo, and perhaps the sentiment regarding game matters would be in a more healthful condition. The Game Protective Association organized here last fall has not been able to accomplish a great deal beyond planting wild rice in the ponds and lake, and liberating some Chinese pheasants.—GENESEO.

RAID ON A COLD STORAGE WAREHOUSE

ON the afternoon of May 25, between the hours of three and seven, Game Protector Robert Brown, Jr. effected what is the largest and most important recent seizure of illegal game made in this country. It has long been an open secret that game of various kinds was kept through the close season in the cold storage warehouses of this city, but it has hitherto been extremely difficult to get sufficient evidence that the law was being violated to warrant a search and action.

On Wednesday last, however, Protector Brown appeared before Judge Duffy of the Tombs Police Court, with convincing evidence that a quantity of game was stored in the cold rooms of the New York Refrigerating Warehouse Co., contrary to the provisions of the law, and he was granted a search warrant.

Accompanied by Roundsman James Campbell, of the First District Police Court Squad, he went to the *Forest and Stream* office for one of the staff of that paper to go with him to identify the game. Mr. J. B. Burnham, of *Forest and Stream*, and Protector Brown at once proceeded to the warehouse, which is situated at 107 Murray street. Wm. H. Place, the manager of the concern, was found within, and the warrant read to him, together with Section 247 of the State Game and Fish Law, under the provisions of which the warrant was granted, and which reads as follows:

Any justice of the peace, police justice, county judge, judge of any city court, or magistrate having criminal jurisdiction, upon receiving proof of probable cause for believing in the concealment of any game or fish taken or possessed contrary to the provisions of this chapter, shall issue his search warrant and cause a search to be made in any place, and to that end may cause any building or enclosure to be entered and may cause any apartment, chest, box, locker, crate, basket or package to be broken open and the contents examined.

Mr. Place was much taken aback by the warrant, and requested time to confer with the company, which was refused. He also requested that the search be deferred till the following day, which was, of course, out of the question, and finally he flatly refused to permit the search, saying that he believed the law to be unconstitutional. Seeing that civility had ceased to be a virtue, and that valuable time was being wasted, it was decided to proceed to execute the warrant without Mr. Place's assistance, and despite his further protestations the search was begun.

The warehouse is a four-story building, and on three of the floors, at least, are the cold storage compartments. On the first floor are rooms Nos. 1, 2, 3 and 4, and on the second floor are rooms from 5 to 9 inclusive. It was decided to try those on the second floor first, as the evidence of their illegal contents was a little more certain.

Protector Brown led the way up the stairs, and as he gained the second floor said to Mr. Place, who had followed:

"You can help us a good deal if you will show us rooms 6 and 7." Mr. Place seeing that further resistance was useless, opened a massive wooden door, and taking in his hand a lantern led the way into a low passageway. Opening out of this to the left were the rooms numbered from 5 to 9.

The moment the door swung back on its hinges a cold blast of air swept out and mingled with the summer temperature of the outer air. The *Forest and Stream* man had brought along his overcoat, but neither Protector Brown nor Roundsman Campbell was so protected. All shivered involuntarily. The manager of the company led the way a few steps down the passage, having first carefully closed the door that guarded its entrance, and stopped before the second door, which bore the number 6. He opened this and Protector Brown at once entered, followed by the *Forest and Stream* representative. The room was filled to within a few feet of the ceiling with boxes and barrels securely closed. Around the sides were ranged perpendicularly metal cylinders containing the freezing mixture and coated with an inch of hoar-frost. These cylinders were placed side by side, and looked very much like the log supports with which the tunnels in coal mines are sheathed. The atmosphere was pervaded with a faint suggestive odor, and was cold as death itself.

Protector Brown, with characteristic energy, at once set to work to find some of the illegal game which he knew to be stored somewhere among the multitudinous parcels that the room contained. Mr. Place, watching him with ill-concealed animosity, remarked that he wouldn't stay in that place for $50.

"Well, we'll stay in here until hell freezes," retorted Protector Brown with epigrammatic force.

The party was provided with candles, and fortunately so, for at this juncture Mr. Place withdrew with his lantern. He was about to close the outside door on those present in the interest of the game law, when Brown observed him and hastily directed Campbell to prevent the maneuver. The thought of being locked up in the dark vaults of the warehouse and slowly congealed was not very pleasant, and after that Roundsman Campbell kept guard at the door while the two others continued the search.

Protector Brown had the numbers of the several packages that he knew to contain game, but it was no easy job to find them. Piled up in a room about 12x20ft. were hundreds of boxes and barrels of all shapes and sizes, as well as hampers, frozen joints of beef and large fish, stiff as so much wood. In the search the back part of the room was finally reached, and here a green paper box was seen, from which peeped some suspicious feathers. It was secured, and on the lid the words "English Pheasant" were deciphered, written in lead pencil. It wasn't an English pheasant, however, but as subsequently identified by the *Forest and Stream* men, a fine specimen of the ruffed grouse and commonly known as partridge. The next minute a box was found bearing one of Protector Brown's significant numbers, and it was carried with some difficulty to the front of the room and then to the outer air.

In the meantime Roundsman Campbell had secured a hatchet and in a jiffy the box was opened. Half a hundred large game birds fell out, which were at once identified as prairie chickens, and the first great step of the work had been brought to a successful conclusion.

After the birds had been carefully counted and a couple taken as samples, they were returned to the box, which was then marked and carried back to the room where it had originally been found.

Room 7 was next examined and yielded a plentiful return. Box ——, marked very plainly "50lbs. Philadelphia Broilers," by some strange process of transmutation was found to contain 122 quail. Box —— added the mute evidence of 96 more Bob Whites.

These birds were all frozen stiff. They had evidently been packed when still warm, and as each box was opened came out in one solid mass like a mould of frozen cream. When they were broken apart and counted they could never be returned to the same box from which they came as they occupied twice the original space. It was useless to stand on the top of the box to try to pack them. There was no give to their frozen bodies, they were no more elastic than so many stones.

The next important find was in room 8. Here lot —— gave interesting results. This lot was composed of eleven boxes, all bearing on the outside the stamp of the Armour Packing Co., of Kansas City. Of course they were second-hand boxes, but being of the same kind and having the same number made it certain that they came from the same consignor. These boxes contained on an average four dozen quail apiece—the lot yielding a total of 499.

The quail were neatly wrapped in paraffine or wrapping paper, and were skillfully drawn. Evidently it was an A No. 1 lot.

At this stage a white cat took the place that the manager of the warehouse had spasmodically occupied, and eyed the quail greedily. She was not allowed to close her jaws on any of the juicy morsels that had met their death months—or perhaps years—before, as they had now become the property of the State and were not to be trifled with.

"I'd rather somebody else had got this job than me," mournfully remarked Roundsman Campbell, as he tried to balance the 499th quail on top of its bulging receptacle. Whereupon Protector Brown encouragingly remarked, "The Lord'll reward you."

The only venison seized was found in room 2, hidden away in the back part. Only one saddle was taken. There was plenty more there, but it took too much valuable time to move it and birds at $25 apiece were more valuable. In Room 3 three lots of woodcock were seized.

In all 1,074 birds were taken. This includes 717 quail, 173 ruffed grouse, 140 woodcock, and 44 prairie chickens.

The violators of the law will be proceeded against by civil instead of criminal law, as conviction under the former is thought to be the most certain.

The fine, according to the game law in force is $25 for each violation. If this were inforced in each one of the 1075 violations of which evidence has been secured, the New York Refrigerating Warehouse Co. would be indebted to the State the round sum of $27,000.

"PODGERS'S" COMMENTARIES.

YOUR reference to the discovery of the fossil remains in Kansas of a prehistoric deer 15ft. high, furnishes me a text for a "preach" on the subject of the wild ambition on the part of every sportsman to kill a deer or at least every man owning a gun.

I am a moderate sportsman myself, or a sportsman in a moderate way, and I cannot comprehend this pride in the achievement of the murder of so graceful and harmless an animal, not in moderation and simply for camp food, but wanton slaughter—to see how many can be destroyed, merely to be able to boast of the prowess of the hunter and think it something to their credit.

I know I shall be called a crank in entering my protest against such indiscriminate slaughter as we constantly read of in the histories and stories of camp life in FOREST AND STREAM, of this beautiful and graceful animal, whose life from its infancy is one constant terror of cruel mankind.

I confess to a sympathy for this harmless denizen of the forest, and am proud to say I have never killed a deer, and never fired a gun at one but once, and then as a judgment upon me, the gun burst and came nearer finishing me than the deer. I have walked over them hundreds of times, with my gun upon my shoulder, and have stopped to admire their graceful forms and innocent faces, as they looked at me in astonishment to find I had no desire to murder them. One reason perhaps, for my sympathy for them, may lie in the fact that I have had them as pets around the house, and have experienced their affections and gentle natures.

For years I had a pair that were cherished members of the household, they slept on the rug at my bedside, took their breakfast with me, and trotted after me in my excursions in loving companionship, and I am proud to confess I have not the death of one upon my conscience. I know I shall be ridiculed for such mawkish ideas as they will be termed by the average sportsmen, but I shall survive all the ridicule, and never lose an hour's sleep nor a square meal in consequence.

Those articles in the FOREST AND STREAM in the several recent numbers on "South African Reptiles at Home," illustrated in the last issue by a cut of a species that has evidently undertaken a job considerably beyond its capacity, are very interesting as long as the subject treats of the uncanny things at a distance; and as long as South Africa has the credit and honor of their maintenance we won't complain; but just fancy the effect on some reader picking up the FOREST AND STREAM of a morning after having been out with the boys the night previous, as he glances at the cut of the hideous object on page 493. His ejaculation will doubtless be, "Great Scott! Got 'em again, have I." In that connection perhaps you are doing missionary work in the cause of temperance. Is there a method in it?

In a recent number you exhibit a cut of "big horns." Is it a subtle purpose to point out the effects as a moral? inasmuch as snakes come after "horns?" Are you, as the boys say, playing it low down?

"Better bear the ills we have than fly to those we know not of," should be the motto of the California farmers on the question of introducing the mongoose into the country. "Arefar's" article in the last issue of FOREST AND STREAM is very timely and presents the question in a very serious light, and his quoted evidences of the mischievous character of the mongoose should be heeded.

The gopher, or ground squirrel, is comparatively harmless and his sin is confined to marauding on grain fields; but is not that one evil trifling compared to the general destructive characteristics of the mongoose?

The California farmer has, as I know, very little interest or sympathy with the sportsmen and would be glad to see the quail annihilated, begrudging the poor birds the few grains of wheat they consume; but how would it be if Mr. Mongoose made predatory excursions into his chicken yard? What a howl would go up then.

With all due respect for the popular idea that this world was made especially for the granger, and all things that militate against his sole interest must be sat upon and abolished, he being the Lord's annointed, I have the temerity to declare it as my firm belief and opinion that a more selfish, illiberal and narrow-minded specimen of mankind than that same class does not exist.

If he had his way he would burn, sink and destroy every bird and object that pecked a few grains off his fields.

He never takes into consideration that the Lord gives him the soil, and his prolific crops, and that for every grain he sows he reaps a thousand fold; and the birds are as much a part of the gifts of the Lord as the ground, which was as much intended for their support and existence as his.

I have seen this sweet specimen of all the moral virtues (if you believe the newspapers and accept their own opinions of themselves) sowing grain soaked in strychnine in his grape patch to poison quail and the singing birds that had the audacity to peck at a few grapes.

If the mongoose would only confine himself to depredations on the granger's farm yard, I say let him in as a judgment for poisoning game and singing birds. He sadly needs such disciplining to bring him to a realizing sense of what constitutes his share of the things the Lord intended as much for birds and beasts as for him, even if he is a political power and fancies he is going to rule the world.

He and his advocates may despise the ridiculous custom of wearing socks, but "Because thou art virtuous shall there be no more cake and ale?" "Go to," and mend thy ways or we will let the mongoose loose upon you.

Note.—Address all challenges that result from the above expressed opinion to my office. I have hired a fighter for the occasion.

It is to be hoped that serious punishment will be meted out to the violators of the game laws in the recent case of the seizure of frozen game. The most embarrassing question is, what shall be done with the stock seized. One newspaper suggests that it be sent to paupers and the gentlemen residing temporarily for their health at Blackwell's Island. I enter my protest against the cultivation of such epicurean tastes at that public institution, as it might, and probably would, lead to the necessity of continuing the supply, and cause a strike if refused woodcock diet.

What a lot of people, as they read of the seizure, will groan in spirit at the thought that all this epicurean food may have to be destroyed, inasmuch as the law makes it a penalty for any person to have game in his possession during the close season, although many an epicure would take the chances of its being proven if he had it once safely in his stomach. He could not be sent to the hospital to be surgicalized to discover what he had eaten for his dinner.

To make the punishment fit the crime why not put the violators of the law in the refrigerators with their game, and keep them there until they were in the same condition? Cold comfort for them truly, and perhaps a cool proceeding. I have a theory in this question of punishment, which is that the teachings of the good book should govern, for does it not say "Do unto others as you would have others do unto you?" (If the editor of FOREST AND STREAM is not sufficiently familiar with the work in question to feel sure of the correctness of the quotation, let him work it up.) So, if a man hits another a whack on the head he should expect a similar one in return, and be generally gets it. If a man steals your watch or your wife somebody should steal his, and so on. The system would save time, trouble and expense, and do away with police courts, lawyers and similar abominations.

PODGERS.

REBOUNDING LOCKS.

TOM'S RIVER, N. J., May 21.—*Editor Forest and Stream:* I just want to say a word in favor of good rebounding locks. I do not think so many accidents are due to them as to careless or ignorant handling of the gun, and the practice that many have of fooling with hammers and triggers.

To illustrate: I once had my gun roll off a seat in my father's launch (where it had been placed by a friend) and fall directly on both hammers, which were at full cock (another wrong thing on board of a boat). Had the gun gone off, in all probability I would not be here, for the barrels pointed at the naphtha tank and we were on the bay in a heavy sea. The gun was an old Parker 12-gauge and her locks are as good as ever.

Speaking of fooling with the triggers of a loaded gun, recalls a sad accident in which two of my young friends figured. They were out in a small boat reedbird shooting, and one of them, a proverbially careless fellow, in attempting to let down the hammers of his gun, placed thumb on one hammer and finger on the opposite trigger, resulting in sending a load of shot from a 10-gauge gun through his companion's leg close to the ankle. Thanks to the skillful surgery of the late Dr. Levis, of Philadelphia, the limb was saved.

No boy should be turned out to learn to shoot without some good instruction and watching. Early lessons in care will stick to him always after. BROADBILL.

Spring Shooting.

GENEVA, N. Y., May 20.—I was told yesterday that a few days ago a so-called sportsman living in Waterloo, N. Y., went shooting for the unprotected snipe, and on his dog's coming to a point in some cover, flushed and shot a woodcock. My informant received his information from the perpetrator of this offense. And so it will be until sportsmen become united and put a stop to spring shooting.—J. G. S.

Adirondack Notes.

PHILADELPHIA, N. Y., May 27.—Two golden robins flew against a plate glass window and killed themselves. Several large pickerel have been caught on trolling spoons. A large trout was caught in the Indian River several days ago. Bullheads are being caught on the marsh, a place that is overflowed every spring.—RAY SPEARS.

CHICAGO AND THE WEST.

[From a Staff Correspondent.]

CHICAGO, May 26.—My old time friend, Col. E. S. Bond, whom I have often called the "king of the game dealers," and with whom some wordy wars are of record, writes me as follows. There will be a great many very sorry to hear of Col. Bond's physical trouble. There are many FOREST AND STREAM readers who may not agree with him on this and other questions, but I imagine the paper will not be averse to publishing his Philistine utterance. Col. Bond says in his letter:

"I inclose a short article on the snipe question. The only thing that creates a doubt as to my conclusion is the fear that I may be in accord with a great many sportsmen for whose opinion I have no respect.

"I have retired from business for good. Last July I had a slight attack of paralysis of the left side which compelled me to give up business April 1. In 1870 I spent a year on the north shore of Lake Superior and put in my whole time hunting and fishing. I have been thinking of writing a series of articles, giving an account of my trip and may give them to FOREST AND STREAM.—E. S. BOND."

The article reads as follows, and is of interest as bearing upon a present question which deserves discussion:

"Our game warden appears to be determined to stop the sale of snipe, on the ground that they are waterfowl and protected by law. It is presumed that he will bring his suit before the ass of a justice who decided that antelope were 'wild buck,' and will have no trouble in obtaining a conviction. The fact is there is no animal known in natural history as a wild buck, and it would be impossible to be guilty of a violation of the law by killing or having in possession an animal that has no existence. The word 'buck' simply signifies sex and not variety or species. While Webster defines the snipe as a wader, he probably consulted Linnæus or Cuvier for his definition, fifty or sixty years ago. In late works on ornithology there is no bird known as a wader, and the classifications of all old writers on the subject are obsolete and done away with. Baird, Coues and Jasper are the recognized standard authorities in ornithology now. Jasper, in his 'Birds of North America,' in the part entitled the 'Science of Birds,' divides birds into classes and subdivides into orders and groups. Baird and Coues do the same. In the fourth class, called 'Runners,' will be found turtle doves, prairie chickens, quail, golden plover, and snipe; hence, if snipe are water fowl, turtle doves, prairie chickens and quail are also water fowl. In the fifth class, called 'Swimmers,' will be found all birds with web or semi-web feet. These are properly water fowl. Any bird that makes its home on the water, though it may go on land for food, is a water fowl, and any bird that makes its home on land, though it frequents wet marshy land in search of food is not a water fowl in any sense of the term, hence snipe are not water fowl.

"A few years ago a friend of the writer was arrested for killing snipe before Sept. 15, and was taken before a justice, and on the evidence of four persons who had never consulted a work of natural history, and who swore that snipe were water fowl, was fined $30 and costs. Believing that he had been robbed without authority of law, the writer wrote the Hon. L. B. Crooker, of Mendota, who drafted and secured the passage of our present law, as to his understanding of the law. Mr. Crooker replied that the migrations of snipe were so irregular and uncertain it was thought best not to give them any protection, for which reason they were purposely omitted from the law. He said further, that the justice in admitting such expert testimony was all wrong, and that it would be much easier to prove such a justice a jackass than to prove that snipe were water fowl.

"Col. Chas. E. Felton and Wolfred N. Low, both ex-presidents of the State Sportsmen's Association, and Dr. Hensy Yorke, a well-known local ornithologist, were also consulted and all agreed that snipe were not water fowl in any sense of the word. Dealers on South Water street are advised to make a test case as there can be no question as to the results as soon as the case gets beyond the jurisdiction of a justice court.—E. S. BOND."

There is this to say about Col. Bond's position, that it unquestionably is that of the majority of our sportsmen, although the latter will not be so uncompromising upon it as the worthy writer of the above, who cares so little for their opinion. In all the talks I ever had with those who assisted in the framing of the above-mentioned game law or who were familiar with the situation at that time, I have been told that it was a time of compromise, and that snipe were intentionally left out of protection, so that other birds could be gotten into better protection. The law is the law as it stands, however, and the construction of its clauses is for the upper courts, and not for us. It would be a great pleasure to hear from Warden Bortree, and learn his position and authorities in a matter which is of so much local interest to our sportsmen as well as the dealers. The sportsmen certainly are not without demur to his position, though they will be ready to abide by the law. The question is: What is the law?

Mr. Charles S. Hampton, State game and fish warden for Michigan, was in my office, and I directed him to Warden Bortree, it being the wish of both to discuss some sort of reciprocity treaty as to the shipment of illegal game between Michigan and Illinois. Mr. Hampton says that the State attorney of Michigan advises him not to arrest for shipment of game out of Michigan, as the Legislature of 1889 intentionally abolished the clause of the statutes prohibiting such shipment. Mr. Hampton is proprietor of the *Daily Resorter*, issued during the summer season, and devoted entirely to the resort interests of his resortful State.

Singularly enough, there be two Hamptons in the field. Yesterday also there came, by chance, Mr. O. H. Hampton, of Williamsburgh, Ind.; no relation of the Michigan man. Mr. O. H. Hampton has been correspondent of FOREST AND STREAM since 1874. He tells me of a pleasant day's shooting this spring in the Indian Nations. At Prior's Creek he and a friend bagged fifty-nine snipe each in one day.

Mr. Wm. M. Tracy, all the way from Massachusetts, writes as follows under date of May 17: "I would be grateful to you if you would give me any information whereby I could have what you Western sportsmen would call fair prairie chicken shooting this coming season. I would like to meet some party or parties who were well equipped with dogs, conveyance, etc., for this kind of shooting. I am planning to come West this coming season, just where I have not decided yet, but will as soon as I can hear where it is best to go."

It is altogether too soon for any one to give advice as to a good chicken locality for the coming season. No one can tell yet what damage has been done by the unusual rainfall of this spring. Offhand it might do to say that ordinarily Orrville, Minn., or Mitchell, S. D., would be safe to start for as a central point, or at least a point of local inquiry, but I would not presume to say that for next fall. Last year these points were not good, for everything was too dry. This year it may be too wet. The chicken crop nowadays depends on such conditions. Probably the best chicken country to which I could send Mr. Tracy would be my much-discussed game-pocket, whose whereabouts I cannot divulge till Aug. 1. If Mr. Tracy will write me then I shall probably be in position to be of much greater service to him. It is quite too early to predict chicken shooting for any place yet.

E. HOUGH.

CALIBERS OF HUNTING RIFLES.

BOSTON, Mass.—*Editor Forest and Stream:* In your issue of May 19 there is an article by Ed Richmond entitled "Experience with Calibers."

I have always held that large rifles are better than small ones for large game. The first few seasons that I hunted I used a .44-40-200 Winchester repeater. With it I have killed a good many white-tail deer and one moose. It satisfied me very well until one day when I was hunting on a bog I jumped a small buck. If I had had a big rifle I would have got him the first shot, but as it was I fired nine shots before he stopped. The eighth and ninth bullets fell short and the tenth broke both left legs, whereat he stopped from loss of legs rather than from loss of strength. Four bullets had landed in the deer's haunches, one went through his neck and the other tore a gash in his belly. That evening I wrote for a .45-90 300 new model Winchester, with half magazine. Since then I have had nothing to do with wounded deer.

I use a split bullet in preference to an express bullet. It is quartered about two-thirds of its length from the point. When it hits the four pieces break away from the butt, and amount to about the same as five .32 40's.

By the way, I have a .32-40, and I do not agree with various writers as to the deadly work that can be done with one. One might as well use a bean blower if he intends to use a .32 40 on any game larger than squirrels and rabbits. Of course I do not say that anything larger than the above cannot be killed with one. I have killed a deer with a .22 short; nevertheless, I would not use a .22 short expressly for deer. I hold that a rifle for hunting ought to be large enough to go through the haunches, bone and all, and into the vitals. A hunter ought to be humane. Consequently he should use a rifle that has a tremendous shock, so that he will run no danger of wounding and losing his game.

A split bullet has more shock and much more penetration than an express bullet. For grizzlies, where penetration is more necessary than shock, the new Winchester metal-patched bullet is first-rate. A .45-90 shooting one of these bullets has more penetration than a .45-70-500, much less recoil and a good flat trajectory. These bullets have good, honest accuracy. A rifle using a large cartridge ought to weigh more than 7 or 8lbs., so that there will not be excessive recoil, and if you cannot carry 9lbs., stay at home and leave the game in peace. The recoil depends more on the amount of lead than the amount of powder, though the weight of the arm is of the most importance. A .22 is large enough if you can get a side shot at close range and put the bullet in the right place. But you do not know what kind of a shot you will get; perhaps you will be lucky if you hit at all, to say nothing of hitting in the right place. So use a "small-sized cannon," and get what you hit. The next trip you make, be humane, and take along your biggest rifle or buy a larger one.

DUCK.

WAYS OF THE RUFFED GROUSE.

ONCE I was out in pursuit of the ruffed grouse in the month of December on a bright, warm day when there was a light snow upon the ground. I was in Glenville and was accompanied by a man who had been more than an average good shot in his own country, which was England, and in truth he was one of the best at woodcock it has ever been my fortune to meet.

In passing to the timberland we went through a large field interspersed with clumps of shrubbery and dotted with dwarf evergreens. When we were nearly across, a grouse sprang out from under an evergreen and went away very swiftly and close to the ground. He evidently intended to take us by surprise, as he certainly was not more than 15 feet away. This was a difficult shot and one which would have taxed the skill of my old friend Bogardus. But the Englishman was quick and bringing his gun up he delivered his first fire before the bird had gone 40 feet, and by the time the grouse had reached 35 yards, he had brought his second barrel to bear with a like result. Never had I seen a grouse, unaided by the wind, move faster, as he skimmed over the glistening surface, and never did my heart go out more in admiration toward one than on this occasion.

We followed this bird up into the next lot, which was covered with low, thick undergrowth. We kept 50 yards apart. When we were in about the middle of the lot the grouse flew on a stump 4 feet high, and stood with his tail spread out midway and directly between us. Neither of us, of course, could shoot, had we felt inclined to do so. The grouse looked very handsome as he stood there. This bird hearing noises around him had sought this elevation through pure curiosity in order to ascertain the cause. Twice since then I have seen grouse do the same thing. It appears that when the bird is surrounded and hears noises on two or more sides of him (he lying low in thick shrubbery), he has an intense desire to know the cause and will seek some elevation, a mound of earth, a log or a stump, if at hand, and sometimes the lower limb of a tree where he will stand and look around, and it will be observed that when he takes wing from the ground under these circumstances, he will mount up to an unusual height and look all around him before going away.

This grouse, however, did what I have never seen one do; he jumped down from his elevation to the ground again. It happened in this wise: My companion, probably with the intention of taking the bird as he stood, moved back a few steps so as to get me out of range, when the grouse, seeming to understand this move, and leaping to the ground, disappeared in the covert. We followed the bird, tracking him on the snow to the heavy timbered woodland, when my companion went in one direction, I in another. After I had gone about 100 yards I started the bird again, but was unable to get a shot from the density of the cover. The bird after going about 40 yards lit in a pine tree, and as I approached he got out on the opposite side in such a manner that by keeping the tree between himself and the gun I was unable to get a shot or even to see him. I followed what I supposed was his line of flight, going on and on, without starting him again. I think I must have gone nearly a half-mile in the woods when it dawned upon me that the bird had played me a trick, and that when he left the tree he had gone away and then taking a wide circle had returned to the place whence he had flown previously to taking to the tree, and which was just within the edge of the woods.

Getting into the field I went straight back, and as I approached the spot I kept a sharp lookout, moving cautiously, when the bird flushed within 20 yards of me, and I had the good fortune to stop him. He was an old male grouse and one of the largest I ever saw, and I may add, one of the wiliest, for I think I never had more difficulty than on this occasion in securing a grouse. Shortly after I rejoined my companion, who had not had the luck to obtain a grouse, though he had shot two rabbits.

On the way home I asked my friend his opinion of our grouse. After some thoughtfulness on his part, he said: "He's a good one."

DORP.

SCHENECTADY, N. Y.

"THAT ELYSIUM."

HARRISBURG, Pa., May 21.—In looking over "Podgers's Commentaries," I note the inquires where he can find that elysium for which he is pining, where fishing and sailing can be had at a moderate cost, and where "biled shirts, tennis rachets and masculine young women don't intrude."

A friend and I, with our families (and the "family" part is all feminine and only sufficiently "masculine" to be fond of hunting, fishing, roughing it and photographing) have just returned from a trip to Chincoteague, Va., and we found there all that the summer could wish for in the way of sport and interesting objects and incidents. "Podgers" may be familiar with the place, and it may be no news to him to be told of it, but there are others whom it might benefit to know that on and near these islands they can have just the elysium that "Podgers" is seeking.

In the first place there is an entire absence of the tennis young man and his blazer, and in his stead are a lot of as rough, good-natured fishermen and oystermen as will be found anywhere on our coast, and to whose kindness and generous hospitality we were indebted for a great deal of our pleasure. An entire freedom from that rough element which is often found in small fishing villages and mountain towns, is one of the best features of the island, and the feminine contingent of our party wandered every day with their cameras all over the island and met everywhere the most courteous treatment and many kind attentions from the residents.

The men were after the shore birds and got all the shooting they wanted by noon of each day, and the afternoons were devoted to sailing and exploring the different islands and marshes.

Chincoteague Bay is as pretty a sheet of water for sailing as any on the Atlantic coast, and during June and up to late in the fall the fishing is simply immense. Catches of two to four hundred weak fish, or as they are called there "trout," are common. Last week they were catching with hook and line drum of a size to make your old correspondent J. M. S.'s mouth water. Boats and boatmen (both good) are plenty. Capt. Jack Snead is possibly the best for gunners and fishermen there. He has a good boat, plenty of decoys and is a good whistler and knows where the birds "rise." From the middle of July to the last of September, sportsmen cannot fail to make satisfactory bags.

In looking over the register of the Atlantic Hotel, we noted when last September 386 birds were credited to two guns in two days shooting under Captain Snead's guidance, and we have since verified the score. In regard to expenses, it is a cheap spot to go to. The board at the Atlantic Hotel, kept by Capt. J. V. Mathews, is only $1.50 per day, and no doubt lower rates could be had for a couple of weeks' sojourn. The less I say about the eating the better, as I was heartily ashamed of our whole party. The way they devoured the oysters, clams, fresh fish, crabs and new vegetables, inspired me to tell the captain he was losing money feeding our party so bountifully as he was doing. Captain Snead charges $2.50 per day for the use of his boat and services, and he fairly earns it, and never leaves you till everything is snug and your gun and tackle cleaned up.

I am not writing this in the interests of the hotel or the guides, but to let the readers of old FOREST AND STREAM know that within six hours' ride by rail from Philadelphia is the "elysium" that "Podgers" is looking for.

PIGARTH.

Camp-Fire Flickerings.

"That reminds me."

"MR. BILLINGS, I don't question your marksmanship, for no man can hit the game in the head as you do and not be a fine shot; but why don't you 'bark' the squirrels as I do?"

"Well, my dog does the barking. In fact the squirrel barks himself. See?"

N. D. E.

In "'Podgers's' Commentaries," he says: "That cut last week of the antlers of the extinct Irish deer suggests the wonder how such animals ever got through the forest." Rogers's Commentaries: "He probably pulled in his horns."

ROGERS.

NOTES FROM MEXICO.

I HAVE been wondering why somebody doesn't say "thanky" to the Editor of "Our Paper" for those exquisite word pictures he has been giving us during the last few months. Perhaps no one reads them with the same wistful pleasure as I, who for nearly ten years have not seen the mystic changes of the revolving year which were the wonder and delight of my boyhood. To me at least, living in this strange land where one day is like another the year round, they have given unalloyed pleasure. Not exactly unalloyed, either, for they have often stirred in me that haunting pain, that incurable mind-sickness, the lot of all wanderers, which our German cousins with such poetic exactness call *heimweh*. How easy it was when reading those living pictures, true to the tiniest detail, to shut my eyes and be again among the "happy autumn fields" or snow-bound fastnesses of my native hills. "October Days," "February Days," "May Days," they are jewels all, perfect cameos, cut by a master hand, and tracing in miniature the mighty cosmos of earth and sky.

I have just read the remarks of "The Old Uncle" as he calls himself. (I hope he will let us youngsters take the same liberty.) They express my sentiments exactly about the "only" FOREST AND STREAM. The above is offered not as a substitute but an amendment.

There is no news down this way. It is not the season for shooting, and there are no fish to catch nearer than the Gulf of Mexico. I have no time to go down there, and if I had the weather is too warm. While "Chicago and the West" are under water, and the South is watching timidly the whims of the Big Muddy, we are in the extremity of a long and painful drought. In all middle and northern Mexico the situation is desperate. No water for irrigation, no rain to start the crops, the brooks dried up, the tanks and *presas* long ago exhausted, the wells low, the stock dying of thirst and the wretched people eating the emaciated carcasses, food scarce and high and getting higher—that is the situation. The rains should come without fail in June. If they do not, not only shall we have no water over which to shoot ducks, but Mexico will have to lean heavily on the strong arm of her sister republic another year.

Like "Awahsoose" I have found rebounding locks tricky. They will usually fire if the hammer is pulled back ever so little and released. If well made however they will not fire from a blow behind, unless it is strong enough to break them. I knew of one fatal accident of this kind, but the hammer was broken entirely off. In this respect they are doubtless an improvement on the old style. But why not use a well made, automatic hammerless? It is true the locks stand cocked, but two separate movements are necessary to fire them, and the probability that these will both be made by accident is very slight. The handiness of these guns in use is another matter, but a few months with them ought to convince the most skeptical that it is no small one. But is it not astonishing that it is still necessary to tell shooters to take the cartridges out of their guns when entering wagons, boats, etc., and in fact everywhere else where there is no immediate prospect of their use? AZTEC.

SAN LUIS POTOSI, Mexico.

NEW YORK GAME LAW.

The full text of the new law has been put into type by the Forest and Stream Publishing Co., and is now ready. Price, 25 cents per copy. A special edition has been prepared for the use of clubs and associations, who may order in lots of 100 or more. These will be supplied at a nominal price. Write for terms, stating the number wanted.

Sea and River Fishing.

Trout and Bass Fishing.

WE have secured, for the private information of the readers of FOREST AND STREAM, knowledge of a number of streams and lakes easily accessible from this city, where we believe that good fishing for trout and black bass may be had. The information we shall be glad to furnish without charge to any reader of FOREST AND STREAM who will apply for it, either personally or by letter.

WHITE MOUNTAIN TROUT.

THE train from Boston, which arrived at Littleton at 7:58 P. M., brought four sportsmen from the north equipped with all the paraphernalia for a siege against the inhabitants of the mountains, brooks and lakes. The first to step from the car was Dr. L. E. Morgan, one of the leading physicians of Boston, and an old friend of the writer. More than once we had tramped over the hills and through the valleys of New Hampshire, and now before leaving for a year abroad, we were to repeat these experiences again. With Dr. Morgan were his brother, Mr. Anson W. Morgan, one of the manufacturers of Needham, Mass., Mr. E. L. Rice, of Boston, and Mr. Thomas Rice, a leading merchant of Newport, R. I.

Valises, rubber boots and rods were placed in the stage, and ten minutes later the party were seated about the supper table at the famous White Mountain hostelry, Thayer's Hotel. While they were satisfying the inner man, my friend, Mr. Charles H. McCarthy, a New Hampshire sportsman, whose name has figured many times in the columns of the FOREST AND STREAM, with myself went for our team, and a little later drew up in front of the hotel with a pair of spirited blacks. In a hurry to start, they pawed the ground with their fore feet, tossed their heads high and snorted impatiently.

Our luggage was hurriedly stowed away under the seats, the chain unhitched from Turk, the black spaniel, who always accompanied us on our excursions, and with a good-bye to the genial landlord, Mr. Frank Thayer, we were off. Crossing the Ammonoosic River, the steeds climbed the hills to the east, and we were fairly on our way for one of the most beautiful drives in northern New Hampshire, passing through the Franconia Valley with Lonesome Lake on the southern spur of Cannon Mountains, our destination.

The night was clear and mild, and the northern lights shooting far up into the sky, their trails changing from purple to white, the mountains on our left and the valley below, made the picture a truly fascinating one, and for some time we watched it without speaking. At length the high hill before us had been climbed, and after a descent of three or four miles, we reached the Franconia Valley. As we passed along the level road, the Gale River flowed past, the little rips here and there showing plainly. Franconia, Lafayette and Garfield mountains were soon passed, their crests covered in many places with snow, and then the famous Franconia Notch was entered. At 2 A. M. we passed the Profile House, and a little later put up our steeds at the shed at the foot of the trail on Cannon Mountain leading to Lonesome Lake. Without stopping longer than to see that the horses were blanketed, we rolled up in the buffaloes on the ground and in five minutes were asleep.

"Come, boys, the fish are biting, and you are losing the best of the day."

It was the doctor's merry voice, and crawling out of our blankets, we rubbed our eyes and finally got up on our feet. Rods were put together, bait boxes filled, and putting on our thick wraps, for the morning was intensely cold, we started down the road for Profile Lake.

"What do you think," asked Charles, "can we fish in the lake now?"

"I don't know for sure," I replied, "but guess if there's any law against our fishing there we will find it out soon enough."

"What are the conditions?" asked the doctor.

"About eight or ten years ago the legislature granted a charter to the owners of the pond giving them the right to stock and use it for private purposes, but only a little while ago the New Hamphire courts passed a law that all lakes in the State over ten acres were public property and could not be held by corporations or private individuals."

"How large is this lake?"

"Fourteen acres."

"But does that act of the court repeal the charter granted by the legislature?"

"That I do not know, and you will have to go further for information, but as the supreme court is a higher body than the legislature, I should suppose it did."

Twenty minutes brought us to the foot of Profile Lake and our lines were soon in the water.

"I've got one!" cried Tom.

We looked to where our friend was standing on a boulder, and saw him struggling to bring in the trout on the end of his line. The rock was slippery, his boots wet, and a moment more and he slid into the water. However, he got his trout.

For half an hour the fishing continued good, the only drawback to our enjoyment being the cold weather. None of us had our gloves, and so cold and numb became our fingers that it was all we could do to bait our hooks. Many of the slippery worms fell from our hands before they became attached. However, it was only one of the many trials which often beset the fisherman, and the sun soon sending down its warm rays thawed us out.

"Strange there aren't any signs around here if they don't allow fishing," remarked one of the party.

"That's so; I haven't seen one."

It wasn't long, however, before we did come to one further up the lake, and a few minutes later a man came down the path and said we must leave, as the owners of the property had forbidden our fishing there.

Tom, Edward and Charles tried the fishing down Profile Brook, while the doctor, Anson and myself started up the bridle path for Lonesome Lake. It is often that one wonders at the strange names which are given to places, and the imagination sometimes draws queer pictures in trying to guess the probable source from which they were derived.

Although we did not meet the owner of Lonesome Lake, Mr. Prime, of New York, none of us had any doubt as to how the lake came by its name. On the top of the spur of Cannon Mountain, and reached by a path as crooked and steep as can be imagined, few people who attempt the ascent reach the place. On account of its seldom having visitors, "Lonesome" is very appropriate.

When we did finally reach the lake, we were so exhausted that we lay down upon the ground, and it was not until the warm rays of the sun shone upon our faces that we awoke from the sleep into which we had fallen.

Lonesome Lake is indeed a pretty spot, and although resting on the ridge of the mountain, is surrounded with peaks rising above it, thus giving the appearance of a lake in a valley. When one considers the immense elevation, this seems very wonderful. At the foot of the lake are the log cabins built by Mr. Prime, where he passes the greatest part of the time when here.

Unfastening the raft near the shore, we paddled out upon the lake, and for two hours had good sport, but the water was so cold that the trout did not bite sharp, and it required both patience and skill to get them to take the hook firmly.

The descent was made without much trouble, and joining the remainder of the party who had returned from Profile Brook, we counted our fish, when 185 were laid out side by side, the boys threw up their hats and gave a cheer. The horses were soon harnessed and we started for Littleton.

On our return we had a magnificent view of the Old Man of the Mountains, and as some of the party had never seen this curiosity, we stopped the horses for a few minutes. It is truly a grand sight, and when viewed for the first time, cannot fail to fill the beholder with awe. Littleton was reached safely in the evening, and when the boys left on the train, all declared they had one of the pleasantest trips they ever experienced.

W. STANHOPE HUSTON.

LITTLETON, N. H., May 23.

Kansas Fishing.

OTTAWA, Kan., May 19.—We have had so much high water here lately that fishing has been out of the question, but the weather has cleared up now and the river is falling. I went up a small creek near this place in a boat the first of the week and the back water was full of fish, so I think the high water will help the fishing. Before the last heavy rains we had a couple of weeks of bass and croppie fishing and some nice strings were brought home. Our best fishing usually comes in June and the first part of July. Although the weather has been bad enough in the last two months to discourage most any kind of game, it does not seem to bother the coyotes very much. A farmer near Wellsville recently dug nine out of one den.—F. B. W.

PENNSYLVANIA TROUT ANGLERS.

Editor Forest and Stream:

On April 6 we put in the spring runs of the Wopwollopen Creek, this county, 50,000 small fry from the State stock. Last year nearly the same number were put into these waters and they have grown to a length of 4 and 5in. There appears to be any quantity of them, and if left alone for about two years more we shall have splendid sport.

On April 15 H. L. Moore, E. F. Roth and I fished the Wopwollopen. Our catch was not so large, but the trout run from 8 to 12in. in length and were in the best condition I have ever found them. The only bait we used were minnows about 2in. long. The creek was very low for this time of the year. Messrs. Moore, Roth and Hilliard made a trip to Wayne county last week, fishing the Laxawaxen and its tributaries with but poor success.

Capt. Bowman, Dr. Hakes, Dr. Moore, Arnold, Bertels, J. B. Carr and others have been to Bowman's Creek, and while their catch was not large the fish were of very good size. Drs. Hakes and Bertels, I hear, caught a large number in two days' fishing since. The principal fly used thus far is a white-winged, red-bodied fly, the name of which I no not know. The cow-dung and brown-backle are the next best. Hud Edgar and Berny Carr returned from the Tobyhanna last week with a fine lot; as they put it, "We got all we wanted." This is the first time for several years that I have heard the expression used in these parts. Edgar says he caught them all on the white-winged fly; he took twenty in less than that many minutes, standing in one place. These trout were very regular in size, running about 9in.

Messrs. J. H. Bowden and John Tonkin were out on the Lehigh, at Stoddartsville; their trout were all of good size, but few in number. These same gentlemen were out the first of the month on the lower end of the Big Wopwollopen, where they caught a nice mess. The streams, with the exception of Bowman's Creek, have been too low for good fishing, but these heavy showers will swell them some, and no doubt during the present week good catches will be made.

The old veteran, Mal. Miller, has been out and did well. Doctor Doyle has met with some success on Pond Creek, a tributary of the Lehigh. L. H. and E. H. Long, A. A. Sterling, Dory Ryman and others have done well on Broadhead's Creek, in Monroe county.

Our old party, Moore, Roth, Hilliard and myself, have a trip laid out to the Tobyhanna, which is without any doubt the best stream we have in this section. Alex. McKean's is one of the best stopping places for man and horse. With good appetites, good things to eat and plenty of them, and then nice, clean, soft beds upon which to rest ones weary self, we never fail to enjoy our trips to the Tobyhanna.

In the work of stocking our waters here the greatest trial we meet with is the small boy and unprincipled men, who fish the small streams where the planted fish resort. I have heard of two fellows who took over two hundred out in a few hours; trout measuring 4 and 5in. in length, and no doubt the most of them the fry we put in last spring. Two cans of the German brown trout were put into a large spring last year, and when they were let out on April 15 they were about 4½in. in length. I could see no difference between them and our native fish. There have been several rainbow trout caught this spring from 14 to 15in. long. Six years ago they were put into Watering Run. These fish are as gamy as our native trout, but they lack the flavor of the speckled beauty. There is no doubt that they will do well here in our streams if left alone until they reach a good size.

We expect very good sport for the next two weeks if the weather is favorable. C. B. M.

WILKESBARRE, Pa., May 23.

CEDAR LAKE BASS.

CHICAGO, Ill., May 21.—*Editor Forest and Stream:* We are all "kicking," so to speak. Nothing but rain. River all over the bottom lands and the lakes very muddy, so much so that a fish can't see the bait. Some anglers think that Cedar Lake, Ind., is fished out. They are very much mistaken. On May 7 I went out for a day of fishing. Was up at 4 A. M. As the water was so muddy I went after croppies, caught one and seven bullhead and quit. On a previous occasion I caught sixty in several hours. After dinner I went for bass. One small strip of the lake is cut off from the rest by the Monon track. Here I noticed the water clear, as it was protected by hill and tree, so I put on my spoon and made a cast, landing a one-pounder at the start, and as lively as they make them. Next, several of ¾lb., and then one of 1¼lbs. The next was a "dandy," how he did pull, he did not like to leave the water a bit and fought hard. Proved his 2¼lbs. by the scales. After I returned home, in the evening, in two hours I had seven bass; and then lost my spoon on a water-lily pad, so had to quit. I used my new Dr. Henshall rod, 8ft. 3in., 8oz.

Cedar Lake is one of the best places for bass that I have seen around Chicago, with good accommodations.

An 8lb. bass was caught there last summer by a boy who was in employ of M. C. Seigler, of the Spring Lake Hotel. I heard from good authority of a Chicago man using dynamite in a trout stream in Wisconsin, getting two bushel baskets full; he ought to be put in Joliet.

F. O. S.

Potomac Notes.

WASHINGTON, May 23.—Messrs. Chas. H. Laird and Henry Weyl in a half day's fishing near the second lock caught 20 nice bass. Seven of these form a very attractive exhibit at Tappan's to-day. The largest weighs 5lbs., and is a beautiful fish. What are here known as smelt were used as bait, and the bass seemed to relish them. Last week the same gentlemen fished at Point of Rocks, where they also had very good luck. Mr. H. C. Coburn fished one week ago between the Great Falls and Cabin John's Bridge, but didn't get a bite. Mr. C. says there were plenty of fish to be seen and more bait fish than he has ever before witnessed, and upon these the bass were feeding, not upon those offered by the angler. Last year Mr. Laird caught near the second lock one of the old mossbacks, which tipped the beam at 6lbs. 8oz. Seven bass averaging 3lbs. each were taken in this same locality by Laird and Weyl last October. Many of our clubs are getting into shape now, and by the 1st of June there will be a regular oxodus for the upper Potomac.—BON.

FOOD FOR FISHES.

BY A. NELSON CHENEY.

[A paper read before the American Fisheries Society.]

AS A RULE fishermen give themselves little concern about the food supply of the fishes which they delight to capture with rod and reel, with fly and bait. If a trout as it is taken from the landing-net is found to be plump and well fed, the fact is noted as it is placed on a bed of ferns in the creel; and so, too, when a trout proves to be gaunt and lean its condition is commented upon, but not one angler in a hundred ever thinks of making the least effort to supply food which will enable the gaunt, lean fish to become plump and well fed.

Nearly ten years ago I prepared a paper upon the subject of Food Fish and Fish Food, which was read before this Society. Since that time great strides forward have been made in all branches of the science of fishculture, and fishermen are reaping the benefits; but to-day, outside of fishcultural establishments, the subject of supplying the ever-increasing output of fish with an abundance and variety of food receives little if any more attention than it did then. This is a matter in which fishermen, if they are inclined, can render valuable aid to the hatcheries and fish-breeding establishments that are planting fish in public waters.

I am of the opinion that there may be many anglers throughout the land willing to render assistance in increasing the food supply of fishes in waters not within the direct influence of the National or State Fish Commissions, if they could know how to go about it, and at the same time know what a simple matter it is to furnish a diversity of food to fishes that from natural causes may be restricted in their diet. Primarily I address the anglers, but the subject is so broad a one that in applying the suggestions that I shall make, others may be interested. As an example of stocking water with fish food not native to it, I may cite a lake in the State of New York, which is thirty-six miles long and from one to two and one-half miles wide, that was planted with 18,000 crayfish in 1878. The plant was made in two or three streams at one end of the lake, and for several years past the crayfish have been found in abundance from one end to the other of the thirty-six miles of water. A form of fish food that I have been and am specially interested in is the fresh-water shrimp, *Gammarus fasciatus* of Say, or perhaps more frequently called *Gammarus pulex*. We have three species of *Gammarus* in our ponds, brooks and rivers, and Prof. S. I. Smith says of them: "They probably breed throughout the spring and summer, as females taken at various times from March to August are found carrying eggs or young in various stages of development." He infers that, as species allied to the *fasciatus* develop rapidly, they breed several times each season. When trout are found to have dark-red flesh with cream-like curds between the flesh flakes, it is a sure sign that the waters they inhabit produce crustacean food in abundance.

I have transplanted shrimp in trout streams with the best results, but never have tried them in ponds. Caledonia Spring Creek, on which one of the hatching stations of the New York Fish Commission is situated, is famous the country over for its well-conditioned trout and its abundance of fish food. The Castalia stream in Ohio is similar in character to Caledonia Creek, and the fish food in many respects is identical because of transplanting mosses and water weeds with accompanying insect and crustacean forms of life from the latter to the former. Prof. J. A. Lintner examined a can of mosses and aquatic plants sent to him from Caledonia Creek after "his attention had been called to the remarkable abundance of trout in the stream, abounding it was believed, as in no other natural locality in the United States."

When the can was opened the mosses and plants swarmed with insect larvæ and crustaceans to such an extent that he could not believe that it was a fair representation of the fauna of the creek, and wrote to know if other animal life than that which naturally accompanied the plants had not been placed in the can, but none had been introduced except those contained in the plant when gathered. Shrimp were so numerous in the moss that one could not raise a handful of it without noticing the very large number of these creatures present. The water from the can was poured into an aquarium and at once "numerous examples of the minute crustacean cyclops were observed, resting against its glass sides or darting swiftly through the water, the females bearing on each side of them the ovoid sac of eggs which forms so conspicuous a feature of their appearance."

Prof. Peck, the State Botanist, who examined the aquatic plants from Caledonia, said: "There is among the mosses one of special interest, both because of its rare occurrence and because of the noticeable coincidence between its abundant growth there and the abundance of animal life that accompanies it. * * * It is known to botanists by the name *Hypnum noteraphilum*, or moisture-loving moss. Franklin and Lancaster counties, Pennsylvania, are its previously reported localities, where it is said to grow in limestone springs. It was discovered in the Caledonia Creek several years ago * * but up to the present time this remains its only known locality in our State." Prof. Peck advises that in transplanting this moss, limestone waters should be selected, although one of the mosses associated with it at Caledonia occurs in waters free from lime. Prof. Lintner says that the small crustaceæ of the family *Gammaridæ* undergo no metamorphoses after their escape from the egg, and therefore give promise of no difficulty in their propagation, and he thinks that in time every order for 5,000 brook trout will be accompanied with an order for 100,000 shrimps. The food of the shrimps is in doubt, "but they are believed to be principally vegetable feeders, although eating animal matter in a decayed state when convenient to them." Again quoting from Prof. Lintner: "The ordinary laws of nature give us a prodigality of insect life almost infinitely in excess of fish fecundity. A fish deposits her spawn but once during the year, but in the aphis or plant louse in one year there may be twenty generations. Latreille says that a female aphis produces about twenty-five young each day, and Reaumur proved by experiment that a single aphis might be the progenitor of nearly six billion descendants during her life. The crustaceans are also remarkably prolific, * * * the proposition to propagate crustaceans and insects for fishculture must be regarded as intimately connected with that of transplantation—perhaps as a corollary of it."

Mr. Thomas Andrews, of Guildford, England, a noted pisciculturist whose reputation as a successful fish propagator is broader than his native land, in writing me of some large fish in one of his ponds, said that they were grown in ponds containing an extraordinary amount of natural food, which he made a point of cultivating. I asked him to tell me what this food consisted of and his manner of rearing it, and he writes as follows:

"WESTGATE HOUSE, GUILDFORD, England, May 7, 1892. —I make a great point of natural food for my trout, and devote several boxes of 10 or 12ft. long, 6ft. wide and 1ft. deep to that purpose, besides numerous small ponds and side streams. In order to appreciate the value of the principal, and I consider the best, food for young trout, viz., *Gammarus pulex*, one must observe them at this season of the year, and they will be found in pairs. If a pair is captured, the male insect detaches itself from the female, and she will look large on the abdomen and of an orange color. If she is placed in the palm of the hand and slightly pressed with a camel's hair pencil, the young will be squeezed from her. This is my food for young fry! The young shrimp is just the size for a hungry trout seven weeks old, and I have often brought the *Gammarus* up from my ponds to the hatchery and fed them there. There are, of course, other insects which are very suitable for the young fish, and I cultivate largely the 'alder fly,' whose eggs are to be found on the rushes and grass hanging over the streams or ponds in May and June in England. I collect these eggs and hatch them out, turning the larvæ into the water. I need hardly tell you that they are almost microscopic, and just the thing for the young fish. Then there is the 'grannom fly,' which I cultivate by bringing home the eggs which are found in bunches, attached to rushes, bits of stick, grass and woodwork in the rivers. To-day I had a can of grannom eggs sent up, and I should think there is a bushel basketful of these. They will be sent down to my ponds on Monday and placed just as they are in among weeds and rushes and will hatch in due time. The May-fly we can and do introduce in the same way, but until last season they were put into a pond where there were about 15,000 yearlings, and they stood but little chance to increase. Last season the eggs of the May-fly had a place devoted to them, where there were no fish, and we have found quantities of larvæ already. We also cultivate the *Limniadæ* (snails), and the young of these make capital food for my fish of all ages. We feed the snails and shrimps on liver and horseflesh, and where my man washes his meat sieve the snails have collected in heaps and devour all that is washed off the sieves. My experience has taught me that one yearling fish is worth a hundred or a thousand fry for stocking purposes, yet I do not deny that a great many fish can be saved in the fry stage by artificial feeding. I get fewer fish perhaps (by feeding natural food), but I get monsters of 6, 7, 8 and 9in. in a year, and my yearlings fetch three times the price of some other pisciculturists. Public opinion also in England is in favor of yearling or two-year-old fish for stocking purposes, and the results are more satisfactory by far. We cannot get anything like enough yearlings or two-year-olds to supply the demand, and most people over here have given up stocking with fry. There is of course a sale for fry in England, as proper rearing ponds have in many cases been made, but the general opinion is in favor of yearlings."

Mr. Andrews's letter shows the way to vast possibilities, not only in the line of rearing trout fry in ponds on natural food, but in supplying mature fish in wild waters with a generous addition to their larder by transplanting eggs, larvæ or imagos of various insects. It is a most fascinating subject, but the pages already written warn me that I must be brief. The alder-fly and grannom-fly, referred to by Mr. Andrew's, belong to the dun tribe, the former being the alder, orl or light dun, and the latter the greentail or shell-fly of the fly-fisherman. The duns belong to the family *Phryganidæ* and are called caddis-flies, and the larvæ are called caddis worms, and are sometimes confused with the May-fly, which they should not be. The dun or caddis-flies are so common that a description of any one of the score or more species is unnecessary. The larvæ or creeper cases are hollow cylinders, smooth inside, composed of straw, grass roots, small stones and shells, and closed at one end. They are excellent trout food; every trout fisherman is familiar with them, and they are easily collected for transplanting. D. Barfuth, of the University of Bonn (Report U. S. Fish Commission 1873 and '74 and 1874 and '75, p. 735), examined a number of the common trout of Europe (*fario*) and found these to contain the creeper cases of *Phryganidæ* as follows: In one, 136 cases; in another, 585; in another, 116; in another, 186, and in another, 115. Of six trout examined, the cases were found in all the stomachs, and also in the entrails; in one, the intestinal canal, as far as the anus, was completely stuffed with the cases.

A book written by a lady for fly-fishermen, with the title, "Favorite Flies," soon to be issued from the press of Houghton, Mifflin & Co., Boston, will contain six plates of natural insects, including the different stages, of the May, caddis, stone and other flies.

Last year I experimented with the May-fly, *Ephemera*, to discover if it could be transplanted to waters where it was unknown, and found that it would bear safely a journey of twenty-four hours, at least. This fly is called the dog-fly, and one of the species—there are more than two dozen—is called shad-fly, and they are the "drakes" of the fly-fishermen, the "green drake" being the largest and best known. Of the abundance of the May-fly it is said (Westwood's Introduction to the Classification of Insects), that in some pools of Europe it is customary to collect their dead bodies and use them for manure. The distinguished naturalist Reaumur gives this account (Introduction to Entomology: Kirby and Spruce): "The myriads of *Ephemeræ* which filled the air over the current of the river, and over the bank on which I stood, are neither to be expressed nor conceived. When the snow falls with the largest flakes, and with the least interval between them, the air is not so full of them as that which surrounded us with *Ephemeræ*. Scarcely had I remained in one place a few minutes when the step on which I stood was quite concealed with a layer of them from two to four inches in depth." This was near the River Marne, in France.

I know personally of but few places where the flight of May-fly is in clouds, but in one place in New York it closely approaches, if it did not equal, that related by Reaumur. In a flight of May-fly there will be discovered green, gray and purplish-black drakes. At first all are green, the female changing to gray and the male to purplish-black. Before my experiments with the May-fly on drakes, had extended beyond confining them to see how long they would live, the *Fishing Gazette*, London, printed an article, written by Major W. G. Turle, in which he described a completely successful experiment in transplanting and establishing the May fly in waters where it was previously unknown. I gathered my flies in a bait bucket and a tin biscuit box, but Major Turle improved upon that by using band-boxes with lines of worsted from side to side for perches. The flies were caught by picking them from the bushes and placing them in the boxes, and the boxes were taken by railroad train to the waters which it was desired to stock, and there the flies were released on the bank. Major Turle was of the opinion that it required two years for the eggs to mature, but, as will be seen from Mr. Andrews's letter, it requires but a year. The illustration of the larvæ or creeper of the May-fly used in this paper was prepared for Mr. Frederic M. Halford's work, "Floating Flies and How to Dress Them," but was rejected for another process, and was very kindly loaned by Mr. R. B. Marston, editor of the *Fishing Gazette*, London, and a corresponding member of this Society.

The illustration is 5in. long, and a particularly fine cut, but the natural creeper is less than 1in. in length. The larvæ as well as the fly can be transplanted, and besides furnishing food for the fish the diet may teach and encourage the trout to rise to a fly.

THE SUSQUEHANNA.

ITS PAST, PRESENT AND FUTURE.

[A paper read before the American Fisheries Society.]

THE Pennsylvania Canal Company commenced building dams as feeders to its system about the year 1826. Previous to that time the Susquehanna River had been one of the most prolific for at least three species of anadromous fishes, the shad, the herring and the striped bass or rock fish, as good fishes of commercial value as any of the Atlantic coast series, and besides these there was an abundance of non-migratory species which furnished ample food for the dwellers along and in the vicinity of its shores. From the time of the erecting of these obstructions commenced the gradual decline of all species and the total loss to all dwellers above of all the migratory tribes except the eel, which found its way through rifts and crevices. Soon other factors of destruction became operative, notably soils washed in from cultivated lands, and later, the immense quantities of debris from the anthracite coal fields which now covers the bed of the river in all pools and eddies, to the almost total destruction of the natural spawning grounds and life of the eggs, from the Lackawanna coal fields at Scranton on the North Branch to the bay at Havre de Grace. The time is also not far distant when the same condition will obtain in the West Branch, from the bituminous field of Clearfield and above, unless a halt is called, and all this deleterious matter is made some other disposition of. As far as relates to soil wash, it seems unavoidable, but proper legislation and enforcement of the laws could remedy the other. The sulphur impregnated water from the mines acts only locally and is gradually disseminated and purified, but to the abatement of the dumping of mine refuse into the streams tributary to the main river must we look if the waters are ever to be again rehabilitated. The dragging of seines over the spawning beds, catching the gravid fish from off their nests and covering up the spawn already deposited, has been another fruitful source of depletion. There are laws to deal with this feature, and the fault lies in the proper enforcement. Up until the early seventies when artificial propagation and restocking was introduced, the supply of all classes of food fish had gradually diminished until the waters were almost barren. Striped bass, shad and herring had disappeared with the erection of the dams, while the pike perch, locally termed the Susquehanna salmon, the pickerel (*Es. ret.*) the yellow perch, the sunfish and catfish, the most esteemed of the non-migratory fishes, had almost entirely disappeared. With the organization of our fisheries commission, about 1870, began a practical regeneration. The black bass, as a new variety, has proved wonderfully prolific, and several others of the smaller perch family have obtained a fast hold. These waters seem best adapted to the percoids, and greater efforts in stocking with this species ought to be persisted in. The reintroduction of wall-eyed pike or pike perch has been manifesting itself in increased numbers very perceptibly. When fish propagation assumed important proportions, we had hoped much for this river as a fit habitat for the Pacific salmon, and many hundred thousands of fry were placed in the upper Sinnemahoning and other tributaries only to remain a year or two as smolts and parr and then disappear. Only one adult specimen did I ever see or hear of, and that came ashore here dead, killed probably in some log jam above during the June freshet of 1889. This specimen would, I estimated, weigh about thirty pounds and was in prime condition, too much putrefied to remove from the water, but was an undoubted quinnat salmon. I gave an account of it at the time to FOREST AND STREAM and to T. H. Bean at Washington, but saw afterward that he was probably in Alaska, as I got no acknowledgment of my letter. Trout (*Sal. font.*) were common in the early years of the present century, but as the settlements increased, the forests became depleted, the water roiled and temperature increased, they decamped for cooler and purer springs.

I have been familiar with this river for forty years and have followed its changed conditions with much interest and with increasing alarm unless the public can be roused up to effective effort for its preservation. The future of our noble river, with its broad expanse, looks gloomy indeed, and not only the Susquehanna, but is it not true of most of our American rivers? And what can we hope for but depletion unless intelligent public sentiment can be aroused to arrest the destructive influences. Our Fisheries Society is doing its best and exerting a healthy influence, and it is with the view and hope of discussion, and efforts that may eventually lead to more important results, that I respectfully submit this paper for your consideration.

A. F. CLAPP.

SUNBURY, Pa., May 16.

FISH AND FISHING IN OHIO.

[A paper read before the American Fisheries Society].

FOR 200 miles within the boundary lines of Ohio the blue waters of Lake Erie dash against rocky cliffs, mingle with tributary rivers or peacefully roll over long stretches of white sandy beach. This great open expanse in early days abounded in food fishes. The choicest were only selected of the now twenty species eagerly sought after. The few inhabitants found the supply more than sufficient for their needs; and indeed it seemed practicably inexhaustible. But as the population increased and industries became diversified, men gradually came to take fish to meet the demand of those living at a distance from the water, making what had hitherto been an occasional occupation, a regular means of livelihood—an industry. Here began the unequal struggle between the inhabitants of the land and water in which was foreseen the inevitable result of the virtual extinction of the weaker creatures. In addition to what then seemed to be wise legislation for the protection of fish, the science of fishculture came to the relief, and it was then seen that man was to be used as an instrument to prevent the extinction of the species of food fishes in our inland waters. In the fall of 1875 the first governmental efforts were made to hatch whitefish. The parent fish were first obtained, the eggs extracted and fertilized, and it is a fact that almost every egg was safely hatched and the young deposited in the waters of Lake Erie. From that date to the present time the State, through its efficient Commission, has deposited in Lake Erie 400,000,000 of young whitefish. Since the spring of 1880 upward of 200,000,000 of pickerel have been hatched by the Commission, and deposited in Ohio waters suitable for them; and from the last official report, dated May 16, 1892, out of four hundred quarts of pickerel spawn sixty per cent. was hatched. Not only do people living along the lake shore find almost daily supply of food fishes for consumption in a fresh state, but by proper methods of preparation and preservation the product of the lake is fitted for long continued keeping and transportation to distant markets where fishing is difficult, impracticable or impossible. With able legislation and increased assistance of the Fish Commissioners the supply of food fishes does not equal the demand, and the fisherman's cry, from shore to shore, is the scarcity of favorite fishes, and each year the perfected net appliances increase. Closer and closer are the spawning grounds limited, deeper and longer are the gill-nets and smaller the meshes until whitefish the size of herring are taken from the deepest waters. Back in the seventies sturgeon were so plentiful and useless that hundreds were daily thrown out of the nets back into the water. To-day nearly every part of the fish is utilized and the net fisherman is fortunate who captures four or five in his daily catch. Again the fishculturist is heard from and he introduces methods of artificial hatching, and it is estimated that 80 per cent. of the young sturgeon released in the waters live to take care of themselves—so hardy and capable of self-defense and self-supporting are the fry. I have the pleasure of personally knowing many of Ohio's foremost fishculturists who have spent years in propagating fish, studying and becoming familiar with the habits and devising ways and means to check the rapid decrease and to replenish depleted waters. Many of the commercial fishermen appreciate and recognize their efforts, and while the fishermen are gradually covering, with killing nets, nearly all the territory where fish visit—for scarcity of fish means more twine—they cheerfully suggested plans and ideas to aid those who are so deeply interested in preserving our food fishes.

The following notes of interest I have gleaned from wholesale fishermen along the various lake ports. Of whitefish, ten out of sixteen fishermen believed that twelve per cent. of the fish deposited in the lake by the Commission were captured with gill nets before they reached 1lb. in weight in the deep water off the Pennsylvania shore. Twenty per cent. lived to maturity, and this could be increased fifteen per cent. more if the young fish were treated like we raise little pigs—deposited in pens in suitable water around the islands until old enough to take care of themselves. In 1857, on the south shore of the lake, during almost every strong northeastern gale the spawn of whitefish was cast up on the beach in such immense quantities it was often strewn to the depth of 2 or 3in., several feet wide, for miles along the shore. The general complaint, although reluctantly admitted, is that the meshes of the rapidly increasing gill nets are too small, they are destroying whitefish weighing less than 1lb., while the leaders of the pound nets are increasing to such an alarming extent as to seriously interfere with navigation, let alone keeping back the fish en route to their spawning grounds. All fishermen agree that the natural spawning grounds of the lake are at the mouth of the Detroit River. Whitefish, pickerel, bass, saugers, sturgeon and other food fishes pay annual visits to this point; the pickerel depositing their eggs as they pass up the river, paying no attention to hatching or caring for their young. Sturgeon are caught while rolling around their spawning beds, or guarding their young. The bed of the river and following the channel far into the lakes is literally alive with suckers of all sizes and kinds. There is no spot on the chain of lakes equal to this clear, rapid river for small-mouthed black bass and other game fish to spawn and thrive. The flavor of fish caught in this magnificent body of water is world known. It is also an admitted fact, and well known by the writer, that the channel in Sandusky Bay, winding, as it does, through a broad expanse of shallow water, is the best protected body of water along the lake shore, and while other bays and tributary rivers formerly abounded with the beautiful white bass and are now almost extinct, this channel leading up the Sandusky River is alive with this clean-looking fish from June until late in the fall; and further inland, among the bends and narrow channels lined with blooming lilies, can be found in great numbers the finest large-mouthed black bass grounds in the world. Referring to pickerel, bass and other food species the majority of fishermen agree that all channels leading to and from the lake through the bays and rivers proper should be kept clear of nets, particularly in the spawning seasons, for eventually the net fishermen must be actually benefited by allowing a large number of fish to cast their spawn in waters above the roving egg-destroying marauders, for as the country with its drainage toward the lake is being tilled to an extent beyond belief the creeks and rivers rise so rapidly and so high that fish are found in great quantities in ditches miles inland from the lake.

While the general public believe that unless some decided and effective measures are adopted to enable a large number of fish to safely reach their spawning grounds, there is great danger of extermination of our lake food fishes; and while many of our commercial fishermen oppose protective legislation mainly because they object to any laws which shall limit their ability to take all the fish possible from a given water area in a given time, the thoughtful fishermen express a willingness to co-operate with legislative enactments looking to thorough preservation of fish. My attention has been frequently called to the fact that there is no legislation on the statute books of Ohio which offers any protection to the game and food fish of Lake Erie during the spawning season. Any attempt at such legislation is met by the organized opposition of the men who wrongfully imagine that their private interests are thereby attacked, and who have been able thus far to prevent the passage of many measures that would have materially benefitted them in the end. On the other hand, most men do not care to expend time and money in urging a species of legislation from which they are to reap only an indirect and remote advantage. Neither for the same reason do they incline to aid in securing a thorough and impartial enforcement of such laws as already exist. Many believe in restriction as to the seasons and methods of taking fish, but they are unwilling to act as either prosecutors or witnesses when such laws are violated. In this connection I might add that in all legislative action taken, whether by national or State governments, care should be taken to properly define what constitutes the waters of the lakes and inland waters. One of the most prolific causes of misunderstanding as to the meaning of various laws now passed has been the claim made by some that the waters of the lake extended up the rivers as far as tide water; it will thus be seen that the efforts to protect the rivers are paralyzed by having their mouths filled with nets. Another trouble is the lack of uniformity of the laws in adjoining States, thus in Ohio some of our best streams are fully protected against destructive net fishing, while their mouths, emptying into the lake in an adjoining State, are completely blockaded with nets, the nets even extending from either shore across the channels. Uniformity would give a clearer comprehension as to the meaning of the law in both States.

Another serious difficulty in the enforcement of existing laws is that the officials to whom such enforcement is committed are left without fixed adequate compensation for their services. An Ohio fish warden receives no remuneration, and even his time and labor in securing an arrest and prosecution are wholly unremunerated unless he secures a conviction. We need most of all to educate the people into a broader and fuller appreciation not alone of the rights of others but of their own interests. We shall succeed in this work when we make the general public comprehend that in protecting the rights of others in the fish of our open waters we are in reality preserving our own. Relative to interior fish and fishing the subject is one of such vast interest that it would require another paper much longer than this to do it justice. It is generally believed that the laws are better observed than along the lake shore: that game fish are increasing and the people are in sympathy with the Commission and appreciate their labors. With the Ohio State fish car, the Buckeye, the Commission has deposited some twelve thousand black bass, weighing from a half to three pounds in the rivers and creeks throughout the State.

I could hardly close without a word about our rod and line fishermen. There seems to be implanted in the nature of every Buckeye angler the love of outdoor sport; they recognize fishing as the keenest of enjoyments. While it is the common destiny of mankind to labor from the cradle to the grave, toil and hardship are brightened by and often endured for the prospect of angling, with its anticipated hopes, fears and pleasures. I can say from a personal experience that the desire to kill and destroy is more a potent motive, with our rod fishermen, than a neccessity. It is a conceded fact that Ohio contains more truthful anglers than any State in the Union, the city of Toledo leading. I will relate an incident narrated recently to me by that venerable fisherman, Hon. Emery D. Potter, illustrating the pleasure of fishing with hook and line in Ohio, under favorable circumstances. "Among the many pleasant incidents of hook and line fishing," said the judge, "and one of the most successful afternoon outings I ever experienced, was in the year 1863, with Dr. Theodatus Garlick, of Cleveland, Ohio. The doctor was a great hunter and frequented the marshes at the head of Lake Erie. One afternoon when hunting was poor I persuaded him to accompany me in a boat to try his luck at fishing. He accepted and we anchored in one of the many guts around Gard Island, and began casting for black bass. We fished thirty minutes and succeeded in landing thirty-two bass, the largest weighing four, the smallest two pounds. A fair afternoon's fishing. In reply to my question, to the doctor, the next day 'to go a-fishing,' he looked very serious and said, 'Well, judge, having no use for the fish I am honestly ashamed to fish for the fun of it.'"

JOHN E. GUNCKEL.

TOLEDO, Ohio.

The Pole Pounding System.

IN some parts of the South the people have a novel way of decimating what they deem a pest. The black red-headed woodpecker, in their opinion, does material damage to certain trees, and the following is the inexpensive method they adopt for his destruction: A pole is lashed to a tree or stuck into the ground for the pecker to alight on. When he does so a sharp blow is given the pole at the foot with a club or ax upon the side on which the bird is. He drops stone dead.—N. D. E.

The Natchaug Fishing Lines.

THE Natchaug Silk Co., of Willimantic, Conn., sent us last week, with the copy for their page advertisement, sample cards of their braided silk lines, and opportunity was afforded on Decoration Day to test one of the No. 1½ size. It proved to be light, freely running and of astonishing strength. The Natchaug lines are manifestly intended to hold game fighters, and the fisherman who is equipped with one of them will have the advantage of confidence in his tackle, which is half the battle in a storm at sea or in a tussle with a trout.

A TRIP FOR ADIRONDACK TROUT.

THREE fishers took the 9:15 train from the Grand Central on Friday night, May 13, bound for Lowville. They partook of a breakfast there and started for Oswegatchie Lake, twenty-two miles distant, in a buckboard that made its five knots an hour despite the cadaverous mud holes and vociferous thank-you-mams that graced each rod of the road. The lake is a pretty sheet of water with its as yet deeply wooded banks and curving outlines, and it was a pleasure to be pulled about its shores that first afternoon dropping a line in the favorite holes pointed out.

Saturday, Sunday and even Monday passed away, and with the cold, rainy days and nights we found it difficult to catch enough trout to keep the frying pan going, and so a council was held and we determined to move on the enemy. Early Tuesday morning, the sun looking down auspiciously, the three guides, loaded with blankets and grub of various sorts, led the way, and we followed along the eight-mile trail to the branch. Now in books sixty-pounds packs and trails, twisting through the leafy forests that are heavy with the fragrance of flower and branch, and light with the sun chasing shadows and the trill of birds, sound manly or poetical, but in fact the one idea is—get there. We asked of our guides, "How far have we come?" till they grew weary of that question, so we thoughtfully changed it to "How far have we to go?" and suggested various inviting places as suitable for campers. They carried us on, though, by stories of trout of ever increasing size and voracity, and then came the last mile. Now if I were a writter of essays, my first would have as its title, The Last Mile," and I should describe in burning letters what a thrill those words mean to the weary tramp; how he is buoyed up and pushes his heavy feet on with something like vigor, and approaches each turn or rise with the firm conviction that at last he will see the long looked for cabin. I should then—no, I wouldn't, for the words describing his every recurring dissapointments would be too burning for ordinary paper.

We came at last, however, to the camp, and found it comprised two shanties, one of which, made of logs, was fairly tight. It harbored too much dampness and too many smells, however, so we turned it over to the guides and took possession of the other one, which was an open bark shanty. After getting our things in fair shape we turned our attention to the river, which ran within fifty feet of us. It was a beautiful stream, some forty feet wide, changing ever from fall to pool, from riffle to still water, and withal had a very fishy look.

A few casts showed us all that our eight-mile tramp was to bear fruit of the speckled kind and much of it, for the trout, many of whom saw man for the first time, gazed at us with open-mouthed astonishment, and so all we had to do was drop in a hook and yank. We caught enough for supper, which was eaten by the firelight, and then prepared for sleep. Our bed was comfortable with its boughs, and we were a tired-out lot, but our one blanket apiece grew thinner as the darkness settled down, and despite the fire, a few feet away, we suffered exceedingly from the cold. For my part I passed more of the night seated by the glowing logs and thinking than I did in dreaming of the big fish to be caught to-morrow.

Dawn came and slowly melted the inch of ice in our wash pail, and a hearty breakfast dispelled the yawns from the sleepy ones, and then followed a day entirely devoted to trout. We had to work for them, and the big ones were not in every hole, at least they did not come out of every hole, but we caught enough and were happy.

What else did we do during our week? Well, we saw four deer, about a dozen porcupines, a partridge sitting on a nest of six eggs and allowing us to come within six feet of her (what strange things we see when we haven't a camera), another one drumming on a log, a brook trout weighing 4lbs. 2oz. but not caught by one of us, and a thousand and one other things that will give us something to dream of and laugh over for six months to come.

F'LIN.

NEW YORK May 25.

Barbs on Chinese Fish Hooks.

THE Chinese produce clumsy imitations of English hooks, but their own hooks are peculiar, having exceptionally small beards, not on the back of the point, but on the side. This is of great importance, for the beard which is commonly used and which is on the inner side or back of the point, has two disadvantages: in the first place, it is as unfavorably located as possible for the rapid entering of the hook, which therefore frequently does not catch; and in the second place it is inclined to come out of itself, for when it enters a hollow space is created between the beard and the lower bend of the hook, which is prevented from closing up by the portions of the hook which surround it on three sides. Whenever the person holding the line momentarily ceases to pull, the hook gets a chance to slip back, and the beard but too readily finds the necessary space to glide out of the wound without catching anywhere, especially when the parts where the hook has entered are lean and possess but little elasticity, as in the case with the pike. But if the beard is placed more or less on the side of the point, this offers the important advantage that the beard does not hinder the entering of the point; the hollow space referred to above will also be created, but it is not, as in the common hooks, between the beard and the bend of the hook, but on the side of the latter, and is consequently less inclined to close up immediately. The point of the beard, moreover, does not lie right over the center of the hollow space, but close to its edge. Even if the hook should slip back the beard will always keep close to the edge of the wound, and will, in most cases, fasten itself somewhere, thus preventing the hook from slipping out entirely. Placing the beard at the side of the point, therefore, offers two decided advantages without having a single disadvantage, and it is really surprising that manufacturers have not given more attention to this matter.—*R. Christensen in Bulletin U. S. Fish Commission.*

The First Restigouche Salmon.

METAPEDIA, May 23.—The first bright salmon of the season in the Restigouche River was caught to-day, May 23. The fish was killed by Gus Aylett on Grog Island pool, and weighed 34lbs. He used a silver-doctor fly.—M. A.

"FOREST AND STREAM" PHOTOGRAPHS

Editor Forest and Stream:

From No. 1, Vol. I., I have read the FOREST AND STREAM, and have never missed reading a single copy. If I were away from home for any length of time, the first evening at home my good wife would say, "You will find the copies of FOREST AND STREAM on your desk." My boys were both too young to read, but the pictures on the outside always intereted them. I read the stories to them; and on Friday nights the first thing after supper was, "Here is the FOREST AND STREAM, now Pop read to us;" and if my business engagements were such that I could not, they were disappointed; they were soon old enough to read for themselves, and I can assure you that the paper has always been a great source of pleasure to us all. Many changes have taken place since I read that first copy, and many of the writers whose articles we loved to read have been called to their long homes; but others have tahen their places, and your paper still stands first with us as a sportsman's paper.

Last week you gave us a pleasant surprise. They say that I am a crank on dogs, guns, game protection and everything pertaining to sportsmen; but if there is anything that I am more cranky on than another it is photographs of hunting, fishing and game pictures, and when I read your offer to amateurs for pictures, I said to the boys, "Let me read to you the FOREST AND STREAM'S offer." When I finished reading we had three cheers for FOREST AND STREAM and their offer, and the following resolution was unanimously adopted:

"Resolved; that it is the opinion of this family (including both setter dogs) that the FOREST AND STREAM always has been and is to-day the best sportsman's family paper of the United States, and in this last movement to get pictures of hunting and fishing scenes they will give us an actual view of what we have had to accept heretofore from description alone, and we believe it will be a great success."

I have a set of pictures taken by an amateur: "A Day with the Quail," another may give us "Our Camp in the Rockies," another, "One Day with the Ducks" or "Two Hours with Jacksnipe on Indian River," etc., and in this way North, South, East and West can be represented and brought together and we can see the faces and pictures of our brother sportsmen in all parts of the country.

I am no photographer, am not advertising any ones pictures, but will give $5, so that you can make the number seven that will receive $5 each, or I will give this amount to the man sending the largest and best picture of a camp where deer have been shot and hung up; or one year's subsbription of FOREST AND STREAM to the person (not now a subscriber) who sends the best picture of two or more woodcock held by the feet in the hand; the judges you select can decide who shall receive my offer and you can select either of the above propositions.

I have just read Orin Belknap on "Our Paper," and with him *So say we all of us.* H.

HUDSON, N. Y.

CHICAGO AND THE WEST.

By a Staff Correspondent.]

CHICAGO, Ill., May 21.—The sporting situation does not improve, so far as the weather is concerned. The season of phenomenally high water continues, and the almost daily rainfall allows no definite prediction of better days. The Kankakee River below Valparaiso is four miles wide. The Tippecanoe is out of its banks. The Fox River still rages. The Illinois is only under control. The Des Moines River has been on a destructive flood. The Floyd River, in western Iowa, has destroyed thirty lives. The farming lands of the Mississippi and Missouri valleys are half under water, and the ravages of their flooded tributaries fill columns of the despatches. At Wabash, Ind., it has rained every day, without exception, for thirty days. A heavy snow storm raged all over northern Minnesota day before yesterday. Snow also fell over a large portion of Wisconsin. Sioux City, Iowa, in addition to her disaster by the flooded Floyd River, was yesterday visited by a blizzard of snow and wind. The elements have gone mad. The effect of all this upon the sports of the field may be well understood.

To the north of us, in the trout country, the rains have not been so bad, though the fishing is not yet good. Fifty miles to the north, in the Fox Lake country, the water is beginning to fall. Some bass fishing will be possible this week. Catches of a dozen or so big-mouth bass, on frog, have been made, almost altogether in the shallows of the overflow.

In the Kankakee River, near Davis, Ind., the natives are spearing large buffalo fish, a fish almost unknown there for years. The nets and dams are now unavailing, and the run up from the Illinois and Mississippi is unimpeded.

Mr. Durham, of Momence, thought that by the close of the week the fishing would be good at that point. It is a singular feature of the Kankakee that no matter how high it gets, it does not become discolored, at least in the rocky bed near Momence. At its highest stage it is only stained a clear coffee color. It is far muddier when it is lower, the reverse of the ordinary state of affairs. When the river is low it drains the muddy ditches into its channels. It has no channel or chief current when high.

Mr. S. D. Thompson, up at Gogebic Lake, writes that on last Thursday he caught 90lbs. of bass. The fish are taking minnow, frog and spoon.

Johnson, the old rancher on the headwaters of the Little Oconto, forty miles west of Ellis Junction, in Wisconsin, writes that one day this week he took 210lbs. of bass to his own rod in a lake near his place. Bass and trout fishing are near by at this point.

It is to Johnson's ranch that Fred Taylor annually takes his small army of trout fishing friends. This great party will start Monday next, and will this year be composed of the following gentlemen: Messrs. F. P. Taylor, W. A. Barton, J. F. Whiting, W. P. Mussey, John Matter, John Hubbard, W. G. Payson, Frank Arrowsmith, and perhaps another one or two who may get ready in time. This party will kill 3,000 trout at least. They have word that the water is in good shape and the trout rising. This is 250 miles north.

The following highly encouraging word comes from Mr. Borders, the attorney who watched the cases growing out of the raid of the Kankakee Association on the netters near English Lake. This is the last of the offenders, and the fight is over for the time in that locality. No one need tell the Kankakee Association that practical protection is an iridescent dream. The letter reads briefly thus:

"WINAMAC, Ind., May 17.—Auge, the Stark county man caught in our Kankakee raid, to-day pleaded guilty in the Stark Circuit Court, and agrees to pay the costs, quit illegal fishing and permit us to burn his nets. We have about 100 of his nets. He is going back to farming.

"Our river has been and is yet very high, too high for boat-fishing or fly-fishing: if it does not rain enough to raise it again I think about June 10 will be our time to fish a few days. How will that strike you?

"B. BORDERS."

The Chicago Fly-Casting Club met Thursday last at the Lakeside restaurant for a pleasant lunch. There were present fifteen members and three visitors. The following were elected new members: Messrs. J. P. Whidden, R. S. Peal, Wm. Walsh, W. Y. Miller. The executive committee reported arrangements made with the South and West Park boards by which any member will be permitted to practice on the park lakes. It was decided that a monthly lunch, under charge of the entertainment committee, be made a feature of the club, the lunch to be followed by the regular "fly-cast" at the park lakes. The next lunch is set for 3 P. M., May 26, and should the weather prove favorable, a pleasant season of practice will follow at Washington Park. This was the plan for Thursday last, but the rain prevented. A transportation committee, Messrs. Strell, Antoine and Milner, was appointed. Mr. Antoine takes the place of Mr. Opdyke, resigned, on the entertainment committee. The club now has on hand $112 90. It is not without the possible that a preserve-owning organization will grow out of this body. The membership at present is constituted as follows:

Chas. Antoine, Geo. W. Stull, C. E. Kenyon, Henry F. Aiken, A. H. Harryman, Oswald von Lengerke, J. M. Clark, W. H. Babcock, Geo. A. Murrell, E. E. Wilkinson, J. S. Rossiter, S. C. Hayes, A. J. Merritt, W. G. Baker, A. Rossiter, R S. Ireland, R. S. Boyd, W. Y. Brunton, A. W. Roth, V. Ware, J. K. Adams, Frank B. Davidson, H. R. Sanning, C. P. Stivers, A. E. Raze, W. A. Brooks, C. A. Burton, R. H. Opdyke, W. G. Allen, H. S. Conard, G. E. Milner, Robert Rae, Jr., Geo. A. Otis, John Christian, W. Krocke, Charles F. Johnson, H. Liphardt, H. M. Dunn, Wm. Herrick. M. C. Farr, W. E. Wills, O. B. Arnold. J. K. McGill, J. J. Parker, H. D. Willie, F. H. Roots, R. A. Shailer, R. B. Miller, R. C. Moore, E. F. Daniels, Chas. Laughridge, G B. Townsend, H. S. Stanton, A. P. White, Dr. A. W. Hoyt, A. Marshall, Dr. Henry Mayer, G. C. Crause, W. H. Tyler, J. V. Ridgeway, W. Q. Hannahs, Chas. Lundquist, J. P. Whidden, R. S. Peall, Wm. H. Walsh, W. Y. Miller.

Gov. G. W. Peck, of Wisconsin, and famous as the author of "Peck's Bad Boy," was in town this week, and engaged in a friendly conversation with Mr. Hirth, the able and amiable enthusiast of Spaldings' tackle counter.

"How far did you ever cast a fly, Mr. Hirth?" asked Governor Peck. "They tell me you are an expert."

"Well, said Mr. Hirth, "to tell the vehy truth, Govehnor, I never weally and actually cast a fly, authentic measurement, oveh 94½yds.—not authentic'ly, no, seh, not oveh 94½yds."

Governor Peck blushed and went back to Milwaukee.

E. HOUGH.

St. Louis Notes.

ST. LOUIS, May 20.—This is the season of the year when anglers should be at work, but no fishing has been done to amount to anything this spring on account of high water. All the various fishing resorts are flooded, and in a number of cases the club houses are deep in the water. In this city a number of gun clubs' houses have been washed away. The sloughs, lakes and small streams have been swept by terrible currents, and the anglers will find all their old pet places gone, and new ones will have to be found. Anglers, however, pretend that when the water goes down there will be better sport than for a long time, as the high water has enabled the fish to pass into all the desirable fishing places. At this writing the floods continues to increase and the bottom lands along the Mississippi is one vast sheet of swiftly flowing water. —ABERDEEN.

Fisheulture.

AMERICAN FISHERIES SOCIETY.

AFTER the close of our last report the reading of Mr. Seal's paper on trout culture was continued, and this was followed by a spirited discussion, to which we shall recur when the articles on trout rearing appear in our columns.

The afternoon session on May 25 was devoted almost entirely to the reading and discussion of papers, but as we shall publish them in due season it will be necessary only to mention their titles:

"Rearing Fish for Distribution," by Frank N. Clark; "Planting Fry vs. Planting Fingerlings," by Jas. F. Nevins; "Planting Trout as Fry or Yearlings," by Fred Mather; "Planting Yearlings vs. Planting Fry," by Herschel Whitaker; "Salmon Planting in Nova Scotia," by W. H. Rogers; "Artificially Reared Trout," by W. L. Gilbert; "State Control for State Fisheries," by Hoyt Post; "History of Fishculture," by Raveret Wattel (abstract only); "Fishways," by W. H. Rogers; "The Susquehanna; its Past, Present and Future," by A. F. Clapp; "The American Salmon and other Food Fishes," by Dr. Bushrod W. James; "A National Park for the Preservation of our Salmon," by Livingston Stone; "Early History of the Fisheries on the Great Lakes," by Herschel Whitaker (titie only); "Impregnating Eggs of the Rainbow Trout," by W. F. Page (title only).

The committee on nominations presented the following names of officers for the ensuing year, all of whom were unanimously elected: President, Herschel Whitaker; Vice-President, Fred Mather; Treasurer, Henry C. Ford; Recording Secretary, E. P. Doyle; Corresponding Secretary, Tarleton H. Bean; Executive Committee, H. H. Cary, W. H. Bowman, L. Streuber, W. M. Hudson, N. K. Fairbank, C. V. Osborn, D. V. Porter.

During the session the following telegram from an absent member was read: "Del Monte, Cal.—Large shad very abundant, selling from eight to ten cents each. Hurrah for fishculture.— BLACKFORD." It is appropriate that Mr. Blackford, who has worked so long and faithfully in behalf of fishculture, should have seen one of its greatest triumphs, especially since the State of California called upon one of his countrymen to make the first attempt to transport shad from the East. A telegram was received also from Capt. J. W. Collins, inviting the Society to hold its next annual meeting in the Fisheries Building at Chicago. The Michigan authorities also offered the use of their assembly room for the meeting. On motion of Mr. Doyle it was decided to hold the 1893 sessions in Chicago, and the arrangements, including selection of the place of meeting, were left to a committee, which was appointed by Chairman Parker.

A motion of Mr. Huntington looking toward the drafting of resolutions in memory of a deceased member, Geo. Shepard Page, was carried and referred to a committee.

The reading of papers was not concluded when the hour arrived for the dinner tendered to non-resident members of the Fisheries Society by the New York Society for the Protection of Game, and several articles were heard only by their titles, but will be printed in the Transactions later on.

The banquet was a delightful affair in every way, thanks to the good taste of the entertainers and the skill of their presiding officer, Mr. Robert B. Roosevelt, whose address of welcome was responded to by Dr. Parker on behalf of the Fisheries Society, Herschel Whitaker for the Michigan Fish Commission, and Dr. T. H. Bean, of FOREST AND STREAM, as a representative of the U. S. Fish Commission. Mr. Chas. E. Whitehead, Dr. Bradley, Roland Redmond, Frank J. Amsden, C. F. Orvis and many others answered to Mr. Roosevelt's call for expressions of opinions on live topics connected with fish and fishing.

Thursday was passed chiefly in the inspection of the beautiful preserves of the South Side Sportsmen's Club, near Oakdale, Long Island. Here we have seen one of the most notable collections of living brook and rainbow trout in existence. The Society enjoyed a collation at the club house and finished its business sessions before returning to New York. The subject of State control of State fisheries was revived and warmly discussed. The Commissioner of Fisheries, Hon. Marshall McDonald, entered into the debate upon the proposition to abolish the menhaden industry and showed how serious a blow would be inflicted upon agriculture and the commercial fisheries if such a measure were carried out. State control of fisheries within the State is tenable and should produce good results, but fishery on the high seas when resulting in great industries are to be treated carefully, wisely, and with due regard for the importance, not only of the fisheries themselves, but of their relations to other forms of activity and to questions of international policy.

The Kennel.

FIXTURES.

DOG SHOWS.

Aug. 31 to Sept. 3.—Second Annual Dog Show of the Blue Grass Kennel Club, at Lexington, Ky. Roger Williams, Sec'y.
Sept. 6 to 9.—Second Annual Dog Show of the Hamilton Kennel Club, at Hamilton, Canada. A. D. Stewart, Sec'y.
Sept. 6 to 9.—Rochester Kennel Club, at Rochester, N. Y. Dr. O. S. Bamber, Sec'y.
Sept. 12 to 16.—Fourth Annual Dog Show of the Toronto Industrial Exhibition Association, at Toronto, Canada. C. A. Stone, Sec'y.
Sept. 20 to 23.—Western Michigan Kennel Club, at Grand Rapids, Mich. H. Dale Adams, Galesburg, Mich., Superintendent.
Sept. 27 to 30.—Dog Show at Ottawa, Can. Alfred Geddes, Sec'y.
Oct. 25 to 28.—Omaha Kennel Club, at Omaha, Neb. E. L. Marston, Sec'y.

FIELD TRIALS.

Sept. 6.—Manitoba Field Trials, at Morris, Man. A. Holloway, Winnipeg, Man., Sec'y.
Nov. 7.—International Field Trials Club, third annual trials, at Chatham, Ont. Amateur Stake, Nov. 7. Open Stakes, Nov. 8. W. B. Wells, Sec'y.
Nov. 7.—United States Field Trials, at Elizabethtown, Ky. P. T. Madison, Indianapolis, Ind., Sec'y.
Nov. 8.—New England Field Trials, at Assonet, Mass. Geo. E. Stickney, Newburyport, Mass., Sec'y.
Nov. 14.—Fourth Annual Trials of the Brunswick Fur Club, at Princeton, Mass. J. H. Baird, Sec'y.
Nov. 15.—American Field Trials, at Columbus, Ind. W. J. Beck, Sec'y.
Nov. 21.—Eastern Field Trial Club Trials, at High Point, N. C. W. A. Coster, Sec'y.
Nov. 28.—Philadelphia Kennel Club Trials, at High Point, N. C. F. G. Taylor, Sec'y.
Dec. 5.—Central Field Trials, at Lexington, N. C. Col. Odell, Sec'y.

THE BEAGLE STANDARD.

Editor Forest and Stream:

As a preliminary I want to say that when I made before the National Beagle Club, at Boston, the proposition to change the standard of the larger class of beagles from 15 to 16in. I had no personal motive, though Mr. Ashburner throws out the imputation that said proposition was based on such grounds.

While I usually have decided views on any subject with which I am familiar, and sometimes express them, perhaps, more forcibly than elegantly, I venture the assertion that none of my many acquaintances can support an accusation based upon such motives; besides, if I know myself, and I think I do, I have never been afflicted with that peculiar and terrible disease commonly known as "big head," which actuated me with a desire to run things exclusively my own way. Neither have I known any one interested in beagles to be so afflicted since the reorganization of the National Beagle Club.

No one denies the ability of the gentlemen comprising the committee that fixed the standard of the different classes at 12 and 15in., and for Mr. Ashburner's edification as a future historical reference, I will say, and I am sure Dr. L. H. Twaddell and Mr. Elmore will bear me out in the assertion, that the same committee established another fact, viz., that there should be three inches difference in these classes.

Let me ask. How did Mr. Ashburner act on the proposition to change the diminutive class to 13in.? Did he then see and feel the sacredness of this act of said committee? I have been informed that there was no opposition to this change further than some suggestions bearing on the present subject. Now here is a precedent to govern the actions of the Beagle Club They changed the standard of one class, why can they not change the standard of the other and have the difference of measurements as the original committee designed? We are not antagonizing the action of that gentlemanly committee. On the other hand, we are supporting, or rather trying to restore it to its original standing. Neither am I individually talking for dogs of the Somerset Kennel, because there are but three over 15in., and should the standard be raised, none of them would appear on the bench. I'll name them: Mist, 15½, by Goodwood ex Rattler; Ecstacy, 15¼, by a son of Tony Weller, and Lady, 15½, by Little Duke. But I do know of dogs in every State from Maine to Virginia, probably not all owned by kennels, but in many instances kept by gentlemen of business, who would show at the various events and thus increase the interest in such displays by making entries in both bench shows and field trials. Perhaps I should not have said that; there may be somewhere a "Beagle Trust" whose object is to keep down the supply, as well as to retard the advancement of the fitting of the dog for the conditions which the nature of the ground of this country requires, as compared with pack hunting in the older countries.

I have known one man to say: "There are too many classes at the field trials." In reviewing the report of those trials, he should have said: "There were too many entries." Why does the gentleman say "If we commence to alter the standard" etc., when the change has already taken place? What does the change show? Simply this: Dogs which could not

win in the 15in. class are now prominent winners in the 13in. class, since that was changed from 12in.

Now there are dogs ineligible to the larger class, by reason of ½ to ¼in., that if this change was made, could come in and "make us all weep." Then we could see again Ralph W. I think, by that good little show dog Royal Krueger, reinstated to the position he forfeited only by reason of being slightly over 15in. Were it not for that he could have won a place in the class. The fact that this class is kept at 15in. is an injustice to many owners, true sporting gentlemen, as well as to the dogs, fine specimens though they are. "Bradley" seems to think, when he says, "Not one beagle has been made eligible" etc., that it is commendable to keep good dogs out and thus keep the classes reduced in numbers. Our idea is to have a fair representation of beagles, something to fight against at the shows; something to run against in the field and to bring to the show ring, dogs that furnish abundant sport in the field: dogs that start their own game, and drive, drive all the time, hustling it to its turning and back again until killed or driven to earth, where it can remain for the time and furnish sport another day.

As to the progeny of large dogs exceeding a new standard I'll say no! There is a limit at which an increase of size will and does stop, and when that limit is reached we have a uniformity in conformation which cannot or never has been secured by breeding from dwarfs and culls. Look at the other types of hounds. Can the foxhound, in which size and strength are necessary, be made or grown large by breeding from the largest? The same applies to the bloodhound. Select any foxhound or bloodhound which has from some cause been stunted. Should it be a female it will produce back to the original size of its kind, or if a male its progeny will conform in size to its breed.

I have bred 14¾in. beagle dogs to 15½in. beagle bitches and in no instance has the produce or any of them exceeded an average of the sire and dam, not once but many times. On the other hand, I have bred 13 to 13½in. dogs to like bitches and seven-tenths of the produce exceeded either sire or dam. Possibly I could have prevented it by stinting food, etc., in puppyhood, but that is cruelty to animals and against principle. Let us take one instance and we can find many. Damper, owned by Mr. Crane, of Dorset, Eng., was 9in. high, his son Barrister was a 10in. dog, whose son Marchboy was 11in.; another remove and we have Bannerman 11¾; still another remove brings Royal Krueger 12¾, while Ralph W., by Royal Krueger, was disqualified at New York for being over 15in. Right here I want to say Ralph W. was one of the grandest beagles I had met for a long time, a dog of substance and seeming ability to work. I said then, "It is a shame that such dogs should be rejected merely because they were a trifle over 15in." I'll guarantee Ralph W.'s progeny did not follow the course of his predecessors and add other inches to their stature. The limit of the breed had been reached in him, as an individual, and would remain approximating his measurement.

There are scores of his kind that do not appear at the shows for the same reason. They are purely-bred beagles in every sense of the word; all generally field dogs of high order and fit to ornament the beagle ring at any kennel club show. It is such dogs as this that I want to see have the privilege of competing for the prizes both on the bench and at the field trials, and I am not alone by any manner of means in this matter. It has been talked of by many, and no doubt would have been discussed at the meeting of the Beagle Club at Boston during the show, but as I happened to be unable to attend said meeting and sent a letter hastily written bearing on the subject, it was deemed that the embodying of that letter in the report would be sufficient to introduce it to the general members of the club.

I know it is entirely out of place to think that all men can be taught to hold like opinions. Neither do I deem this a wordy war between parties who favor the larger beagle and those who prefer the smaller one. But this I will say; each class has a standard provided; such as favor the smaller class, to be brief, found out they could not, or did not, nor can they breed to it uniformly, so they asked for and received an added inch, and members of the club who favored the larger class voted to accord it. Even now such breeders show in both classes, and in many instances litter brothers are shown in the different classes, while the breeders of the larger dogs are confined for their exhibit to a margin of 2in., possibly, excepting a freak now and then in a litter.

Now, to compensate the breeders of the larger class, we shall continue to ask for the privilege of competing with such dogs as are well, grandly and purely bred, but now obscure, because of a fraction of an inch added to their stature.

In conclusion I will only say to friend "Bradley," let us have the three inches difference accorded us by the original committee, and we will guarantee to ask for no more until the owners of the smaller class again encroach upon our territory and as it were usurp our field, which is not in accordance with a principal doctrine of American statesmanship which prohibits the U. S. from acquiring property without just compensation. In this matter all we want is to uphold the original committee who formed the standards, first by determining what the difference should be between the classes, and then fixing each on the basis of that difference.

F. C. PHOEBUS.

BERNARDSVILLE, N. J., May 16.

FLAPS FROM THE BEAVER'S TAIL.

IN Toronto for some years we have been chafing under an exorbitant license fee for bitches, *i. e.*, five dollars. The Toronto Kennel Club took the matter up and appointed a committee consisting of Messrs. J. G. Mitchener, H. J. Hill and J. C. Morgan to interview the city fathers and license department. The committee's work has been crowned with success and now the city solicitor has been instructed to prepare a by-law embodying the following: $10 for a kennel of pure bred dogs, $2 for each pure bred bitch and $1 for each pure bred dog. These fees are quite in reason, especially that for a kennel, which enables an owner of a number of dogs to license all at the nominal charge of $10. An important clause is that all dogs to become entitled to these favors must be registered with the Canadian Kennel Club and the certificates of registration must be produced at the time the license is taken out. Bitches not eligible for registration will be charged the old fee of $5 per annum.

Mr. A. J. Groves tells me he was offered and refused $350 for the second prize St. Bernard puppy at the late Toronto local show. Mr. Geo. Hastings, of Deer Park, Toronto, is the would-be purchaser.

At a meeting of the Toronto Kennel Club a cordial vote of thanks was tendered the "license committee" for the efforts on the club's behalf. It was decided to add a corresponding secretary to the list of officers, whose chief duty shall be to solicit the writing of papers by breeders other than members of the club, no matter where residing, to be read at the monthly club meetings and filed for reference and instruction. By this means it is thought considerable good can be done and the interchange of ideas indulged in, in a manner otherwise impossible. A request will be made of the Industrial Bench Show Committee that the delegates from the club be recognized and added to the committee.

H. B. DONOVAN.

Dr. James E. Hair, of Bridgeport, Conn., is importing the English setter Roy of Coleshill from Mr. Bulled's kennel.

DOG CHAT.

WHO can wonder that Englishmen are such thorough dog fanciers and that they surpass any other nation in breeding high class dogs, when even the poorest workingmen are imbued with the true spirit in wishing to breed only pure-bred stock. In *British Fancier* we are told of a society in Oldham, Lancashire, which is run on the co-operative principle in a similar manner to the building associations with which we are so familiar in this country. Now that well-bred dogs command such prohibitive prices it is almost impossible for workingmen from their hard-earned limited means to spare enough to satisfy their tastes in this direction. This association has therefore sprung into being and is called the "Oldham Workingmen's Canine Society." The members pay 25 cents a week till their subscription amounts to $2.50 in our money, when the member may, if he chooses, purchase any dog he desires through the society, which will advance the remainder of the money and be repaid by installments; but no dog is to be purchased without a pedigree, nor without the society being fully satisfied that the animal has every chance to produce something of note. With such unlimited sources to draw upon it is no wonder that England can turn out the best specimens of every known breed.

Kennel affairs in Ireland in spite of the absence of home rule are looking up. The Irish Kennel Association has just been formed to advance the interests of dogs and their owners. The Irish Collie Club was also formed during the Dublin show.

A question has cropped up in connection with the proposed changes in the E. K. C. rules that, when decided, may form a precedent for action in this country. It is proposed to make a rule that will allow an exhibitor, should the judge advertised to pass on the classes in which he enters his dogs be unable to officiate, to use his own discretion as to whether he will show under the substitute appointed by the committee and whether he shall be allowed to take his dog home or not. There is a good deal to be said on both sides of the question, though it does not affect our shows so much as those on the other side, for we have hardly reached that stage in the game when we must consult the judge's likes or dislikes of different types before deciding upon which dogs to show, except perhaps in the case of setters, English more especially.

The magistrates of Toulouse in France, reports the London *Standard*, are about to have a case brought under their notice which it will tax their discernment and legal wisdom to decide. It originated with a curious incident, which occurred, we read, a short time ago in the refreshment rooms of the Toulouse Railway terminus. A customer, having finished his breakfast at the *table d'hote*, drew a hundred franc note from his pocket and tendered it to the waiter. The latter being a little too far off to reach it, an obliging neighbor took it, with the object of passing it on to the waiter. Accidentally, however, he let it fall into a sauce tureen that was being handed round at the same moment. Another gentleman picked it out of this receptacle, holding the sauced banknote delicately by the corner. Before he could give it to the waiter, a large dog, smelling the sauce, seized the note and swallowed it. All the witnesses of the incident went to the Police Commissary's office, the passenger to whom the note belonged demanding the dog should be killed, so that he might recover his money. The dog's master, however, objected that the animal was worth far more than a hundred francs, and the matter was left in suspense till the following day. By a singular coincidence, in the course of the night the dog, taken with some sudden illness, died. The carcass was opened, but no trace of the banknote was visible. The magistrates of Toulouse have been called upon to decide who ought to sustain the loss of the banknote.

A correspondent to the *Asian* gives the following account of a greyhound which seems to have been equal to tackling either a leopard or a lungoor: "A circumstance which I should say was an uncommon one in the annals of shikar, happened the other day. A gentleman while out shooting in the Eastern Dun in a canebrake started a leopard and cub. Among his dogs that were beating was a powerful English greyhound. This dog drove off the leopard and killed the cub. This same dog also killed a very powerful lungoor (grey monkey), one of the largest size, standing fully 3ft. 9in. or 4ft. One of the spaniels had cut this lungoor off from the tree for which it was making, and it turned upon the dog and bit it in the neck very severely, its tusks being as large as a small leopard's. It then tried to strangle the dog, when the greyhound came to the rescue. It caught the lungoor by the nape of the neck, and with one crunch killed it."

In our business columns will be noticed several new advertisements this week, among those having dogs for sale are: Samuel H. Null, collies, foxhounds and beagles; J. B. Blossom, choice Gordon setters; Fieles & Bro., pointers, setters and rabbit dogs; Sunset kennels, Irish setter pups; J. M. Fronefield, Jr., well bred English setter pups; C. A. Paetzel, choice pointer puppies. At stud: Shoquoquon kennels' great Dane Pedro.

We regret to hear of the Seminole kennels' loss of their noted collie Roslyn Conway, which died from pneumonia. Conway was a full brother of Wellesbourne Charlie and was one of those unfortunates that just missed by a few hairs being a crack-a-jack.

Wire haired foxterriers are becoming more popular; Mr. R. Lyons of Staten Island is importing some more. Among them is Raby Tyro, by Carlisle Tyro ex Quantock Nettle, that is said to be a good one.

Nearly all the breeders of high class dogs are putting forth every effort to breed something good for the World's Fair show next year, and Mr. Paetzel of Hope, Ind., intends to have something of merit if judicious mating counts for anything. His pointers Maud N and Huntress have lately had fine litters, one by Ossian and the other by Trinket's Bang, and on May 15 Busy Croxteth was bred to King of Kent. Mr. Paetzel has also added the dog Nutwood (19235) by Ossian out of Nellie E, to his kennel. Nutwood won 3d in the Indiana field trials, 1890, and will run this fall in the All-Age stake of the United States field trials.

We have received the constitution and bye-laws of the new American Field Trial Club which has it headquarters at Columbus, Ind., where their first trials will be run, beginning Nov. 21. None but members stakes will be run, and the membership fee is $5. There will be a Derby for dogs whelped on or after Jan. 1, 1891, and a Puppy stake for dogs whelped on or after Nov. 24, 1891. Setters and pointers will run separately with an absolute winner race in each stake, for which the prize in the All-Age is a $100 cup, in the Derby a $75 cup, and Puppy stake a cup valued $50. In the different stakes the regular prizes will be a percentage of the entry fees, first prize, 50 per cent., second prize, 25 per cent., and third, 15 per cent. Derby entries close Aug. 1; All age, Sept. 1; Puppy, Nov. 1, 1892.

There will be a meeting of the American Pet Dog Club at 129 East 16th street, New York City, on Wednesday, June 8, at 2:30 p.m. We are asked, on the authority of the secretary of this club, to deny that the American Pet Dog Club intends holding any show in November at the Madison Square Garden. Miss Bannister adds: "I do not know who has circulated the report nor for what purpose." Our information came from one who attended the last meeting of the club and naturally we supposed such information to be reliable.

The following is the text of that section of the circular issued by the Secretary of the Treasury May 2, 1892, which applies to the importation of dogs to this country:

"It having been ascertained that animals which are cross-bred, and others with unknown pedigrees, have been recorded in certain registers, with the sole object of making them eligible for free entry into the United States, and as paragraph 482 of the act of October 1, 1890, provides that no animal shall be admitted free unless pure bred of a recognized breed, the object of the law being, in the opinion of this department and the Department of Agriculture, to exclude from free entry animals not absolutely and strictly pure bred, it is hereby directed that on and after June 1, 1892, no animal which is brought into the United States from foreign countries for breeding purposes shall be admitted free of duty unless the importer furnishes a certificate of the record and pedigree in the form hereafter given, showing that the animal is pure bred and admitted to full registry in a book of record established for that breed; that both its sire and dam were likewise recorded in a book of record established for the same breed; and that there have been four successive top crosses by recorded sires of that breed on the side of the dam, together with the affidavit of the owner, agent, or importer that such animal is the identical animal described in said certificate of record and pedigree."

Everyone has heard of the trotting dog Doc and his owner and driver Willie Ketchum, but few in New York have had an opportunity to see this marvellously speedy dog on the trotting track. Doc is now attending the meeting at Fleetwood Park and should have trotted against a pony on Monday last, but the S. P. C. A. people put a stop to it. It was not stated wherein the cruelty lay, possibly it was on account of the pony as Doc was allowed to give an exhibition trot which showed him possessed of a marvellous turn of speed and a true trotting gait. He may be matched to-day against a 19 hand horse that has trotted in 2:25.

The following specials have been donated to the Industrial Exhibition Association's bench show of dogs to be held at the City of Toronto, Sept. 12 to 16, which promises to be superior in every particular to the former successful shows held in the Queen City. The National Beagle Club offers $5 for best dog and $5 for best bitch exhibited by a member of that club. The Collie Club of America offer a silver medal and also $20 for the best American bred collie under two years of age exhibited by a member of that club, also a bronze medal for the best collie in the novice class (if no novice class, then in puppy class,) exhibited by a member of the Collie Club. The American Spaniel Club offer the following handsome specials: Silver cup, value $100, for the best field spaniel; silver cup, value $100, for the best cocker spaniel; George H. Whitehead trophy, value $25, for best cocker stud dog and two of his get; $10 in cash for best kennel of field spaniels, not less than four, and $10 in cash for the best kennel of cockers, not less than four.

Mr. James H. Watson, who has so pluckily upheld the coursing honor of our Eastern greyhounds by running his dogs at the meetings at Great Bend, Kan., and Merced, Cal., does not intend to let defeat dampen his ardor. He intends running both Drytime and Royal Crest in the All Age stakes at Great Bend and possibly at Merced next fall. It will be remembered that Drytime was sent to England and bred to Burnaby, and contrary to Mr. Whiton's provoking experience the bitch had nine pups, all of which she raised, and they are now in the country. On our asking Mr. Watson if he intended sending any of them to Great Bend he answered in the affirmative, but added that he was unable to determine which to send, as they were the most even lot of youngsters he ever saw, and it was impossible to pick out one as being speedier than the others. This litter affords any one who would like to run a greyhound in the Great Bend Derby, but who has not good enough material in his kennel, the chance to nominate one of these pups and run it in his own name. Mr. Watson will pursue the plan that should have been tried before and send his dogs out West in July, so as to be properly seasoned by the time the meeting comes off. In view of this, Royal Crest, that did so well last year, should be able to bring a prize East this year, as it was only the want of condition that stopped him in the Derby last October. Mr. Watson will attend the meetings, and it is again proposed that a special car be secured to Great Bend, and surely there should be enough lovers of the leash in this part of the country willing to go, so as to secure the reduced rate of $50 for return trip.

The pointer bitch Ruby VII. sailed last Saturday for England, there to remain till she is bred to either Naso of Strasburgh or Naso of Upton. The litter she had by the former dog is said to be doing well and to be of unusual merit, so much so that though having numerous opportunities to sell the Anglo-American Kennel will keep them till grown. They will be sent to a farm near Moosehead Lake, Me., to run all summer. Few people who have been accustomed to seeing Thomas "messing" round the Yorkshires with a pearl-backed comb and brush know that he is well up as a trainer of pointers and setters, having done a good deal of it in Scotland before he came over here, so perhaps we shall yet see "George" with a string of "high classers" at the N. E. K. C. trials in the near future.

We are sorry to hear that Mr. John Moorehead, Jr., the owner of the crack bull terrier Streatham Monarch, has lost his noted bitch Queen Bendigo. Through an injury received three weeks ago she died last Wednesday week in parturition. A post mortem showed eight fine pups, five dogs and three bitches by Streatham Monarch.

The Philadelphia Kennel Club's large Derby entry shows conclusively that in throwing their stakes open to all they made no mistake, as their entries are drawn from the principal kennels in the country. At one bound they have taken a foremost position. The judges selected are men thoroughly familiar with this branch of field sport, and their decisions should command respect.

The wire-haired fox terriers Brittle and Vic Broom, owned by Mr. R. F. Mayhew, are now at the Rochelle kennels, where Brittle will be at stud. Brittle is well known to all fox terrier men, as his career on the other side was quite a noted one. Vic Broom is also a prize winner, and is sister to champion Miss Miggs, for whom Lord Lonsdale paid $1,075, and also to champion Mischief and champion Gladys Broom. She is now nursing three puppies by Brittle. Dr. Foote has the "wire hair" fever too, and is now negotiating for a bitch in England which he will get over in whelp and expects to have a team of these smart terriers to show through the fall circuit. By the way, Dr. Foote, on his farm, has a large pond where the dogs take a swim, and the other day Brittle narrowly escaped a "wet" death. Swimming round with Sultan, the black and tan, they picked up a quarrel instead of the stick that was thrown to them and sailed in. Sultan got a neck hold and held Brittle under the water for fully two minutes, when Dr. Foote, to save him, had to wade into the water to a depth of five feet and carry both dogs to

shore. This, instead of cooling "Doc's" love for the black and tan, has made him more attached to them than ever.

[The following "bars" were crowded out last week.]

IT was reported some time since that several fine Dandie Dinmont terriers were being sent over here, but no names were given. It seems that they arrived on the steamer Ebro, of the Wilson Line, and while at the pier in Brooklyn one of the quartet disappeared and has not been heard of since. A reward has been offered by Messrs. Sanderson & Sons for its recovery, and, as it is supposed to have been stolen, the services of Pinkerton's Agency have also been called in.

The members of the Massachusetts Kennel Club are very much in favor of holding a show in Boston this fall. If they can get permission from the A. K. C., their idea is to give such a show in the matter of prize money as will put in the shade all previous exhibitions of dogs. They propose giving first prizes of $30 in open and challenge classes.

Mr. Mortimer sailed for Europe on the Alaska, Saturday last, and will be away about six weeks. During his visit to the Pacific coast he took a trip to Red Lands to see Mr. Hemingway, who was so well known in spaniel circles as a breeder and judge. His many friends will be pleased to hear that he is both looking and doing well. Mr. Mortimer is loud in his praises of the treatment he received at the hands of Californians. Among others he was surprised to meet in Los Angeles was Mr. R. L. McCook, of New York, who is one of the Eastern Field Trials judges this year, and who has been traveling along the Pacific coast during the spring.

A supposed mad dog created havoc in Lynn, Mass., the other day, biting nine persons, among them Dr. Fannie Warren, who has now sued the owner of the dog for $20,000.

Dr. T. G. Sherwood, the veterinarian, has been ill with dyphtheria and scarlet fever, from which he has not yet quite recovered.

Englishmen are beginning to be interested in the World's Fair show, and now it is rumored that Devonshire, Eng., will be represented by a team of pointers, and our exhibitors will have to look well to their laurels.

Mr. C. H. Smith, of St. Stephens, Can., has imported the well-known Skye terrier bitch Prairie Flower from Mr. W. J. Nichols, of Merton Abbey.

The judges of the United States Field Trials next fall are Col. A. G. Sloo, of Vincennes, Ind.; P. H. Bryson, of Memphis, Tenn., and Major J. W. Renfroe, Atlanta, Ga. Surely a trio that should command confidence.

The Pacific Fox-terrier Club was formed in San Francisco May 11, with the following officers: Pres., James E. Watson; Vice-Pres., C. A. Sumner; Treas., George W. Debenham; Sec'y, J. B. Martin. Board of Directors: A. L. Cresswell, Robert Liddle, Dr. R. A. Ferguson, F. J. Walker and W. H. McFee. The rules of the American Fox-terrier Club were adopted, with a few changes, and also their standard. Specials will be given at the Californian shows, and the new club will no doubt prove of great benefit to the breed on the coast.

PHILADELPHIA K. C. FIELD TRIALS DERBY ENTRIES.

Editor Forest and Stream:

Inclosed please find the list of entries for the Derby Stake of the Philadelphia Kennel Club, to be held at High Point, N. C., commencing Nov. 28, 1892.

It is certainly with much satisfaction that I am able to furnish you with a list of this size for publication. Our entries closed with 70 nominations—52 English setters, 2 Irish setters and 16 pointers, all whelped in 1891. Being the first open field trials held by our club, it was but natural that we should be anxious to secure a large entry.

As the list will show, our club has received the encouragement of the largest and most influential breeders and owners in the land. With the list of entries I am able to furnish you officially with the names of the judges. It has been the earnest endeavor of the gentlemen composing the field trial committee to secure the services of men competent to fulfill the onerous duties of the position. The judges are Washington A. Coster, of Saratoga Springs, N. Y.; Wm. Tallman, New York city, and Dr. Wm. Jarvis, of Claremont, N. H.

GALE NOBLE (H. K. Devereaux, Cleveland, O.), black, white and tan bitch (Gladstone—Katie Noble), March 11.

FAN (H. Merriam, Weston, Mass.), black, white and tan bitch (Nat Goodwin—Royal Myrtle), May 2.

NAT GOODWIN II. H. Merriam, Weston, Mass.), black, white and tan dog (Nat Goodwin—Royal Myrtle), May 2.

FLYAWAY (H. Merriam, Weston, Mass.), black and white bitch (Rowdy Rod—Eve), May 3.

SPEEDAWAY (H. Merriam, Weston, Mass.), black and white bitch (Rowdy Rod—Eve), May 3.

MECCA (T. E. Shreve, Trenton, N. J.), black, white and tan dog (Paul Gladstone—Latonia), April 6.

SPECKS (E. Comfort, Philadelphia, Pa.), black and white bitch (Clipper W.—Perseverance), April 29.

GAIETY (Royal Robinson, Indianapolis, Ind.), black, white and tan bitch (Lone Jack—Gay Rhoebe), Feb. 13.

PROCTOR KNOTT (Blue Ridge Kennels), black, white and tan dog (Gath's Hope—Dashing Lady), January.

HOPE'S MERIT (Blue Ridge Kennels), orange and white dog (Gath's Hope—Dashing Lady), January.

LANCIER (Blue Ridge Kennels), chestnut, white and tan dog (Gath's Hope—Stockings), May.

DICK FOX (Blue Ridge Kennels), black, white and tan dog (Chance—Countess Rush), April 8.

LADY BROOKE (Blue Ridge Kennels), black, white and tan bitch (Chance—Countess Rush, April 8.

ORSINO (E. W. Clark, Jr., Philadelphia), black, white and tan dog (Rod Gem—Winnie Davis), April 21.

STANFORD (E. W. Clark, Jr., Philadelphia), orange and white dog (Rod Gem—Winnie Davis), April 21.

HOOSIER GIRL (John A. Hunter, Sandborn, Ind.), orange and white bitch (Dad Wilson—Daisy Hunter), Jan. 1.

HOOSIER LADY (F. R. Hitchcock, New York), liver and white bitch (Dad Wilson—Daisy Hunter), Jan. 1.

CRICKET (F. R. Hitchcock, New York), black and white bitch (Roderigo—Juno A.), Jan. 3.

CHINAMAN (F. R. Hitchcock, New York) black, white and tan dog (Chance—Bessie Avent), May 30.

BESS (F. R. Hitchcock, New York), black, white and tan bitch (Chance—Bessie Avent), May 30.

BELL (F. R. Hitchcock, New York), black, white and tan bitch (Roi D'Or—Nelly Bly), June 24.

BELLE OF KENTUCKY (Fairmount Kennels, Philadelphia, black, white and tan bitch (Dad Wilson—Bohemian Girl), June 23.

ROGER'S SPARK (L. Gardner, Mt. Vernon, N. Y.), black, white and tan bitch (Roger—Dora Deane), May 13.

REPORT (Francis G. Taylor, Philadelphia), lemon and white dog (Breeze Gladstone—List Noble), Feb. 14.

DOT ROGERS (P. Lorillard, Jr., Jersey City), black, white and tan bitch (Roderigo—Gladstone's Girl), March 3.

SUE GLADSTONE (P. Lorillard, Jr., Jersey City), black, white and tan bitch (Roderigo—Gladstone Girl), March 3.

ADDIE T. (P. Lorillard, Jr., Jersey City), liver, white and tan bitch (Roderigo—Maggie Gladstone), March 3.

GLADEOLO (P. Lorillard, Jr., Jersey City), black, white and tan bitch (Blade—Estelle), Jan. 15.

MAIDEN MINE (P. Lorillard, Jr., Jersey City), lemon and white bitch (Vanguard—Georgia Belle), Jan. 8.

RUSHMORE (C. H. Littleton, Philadelphia, Pa.), black, white and tan dog (Rowdy Rod—Celeste), Sept. 4.

DASHING ROD (C. H. Littleton, Philadelphia, Pa.), black and white dog (Rowdy Rod—Celeste), Sept. 4.

GROUSE (Joseph F. Fox, Philadelphia, Pa.), lemon and white dog (Pedro—Jeanne), Feb. 14.

BONIAR (Avent and Thayes's Kennels), black and white dog (Roderigo—Juno A.), Jan. 3.

KINGSTON (Avent and Thayer Kennels), black, white and tan dog (Chance—Bessie Avent), May 20.

HAMLET (Avent and Thayer Kennels), black, white and tan dog (Chance—Bessie Avent), May 30.

LOCHINVAR (Avent and Thayer Kennels) black, white and tan dog (Chance—Bessie Avent), May 30.

LORIS (Avent and Thayer Kennels), black, white and tan dog (Chance—Haydee), May 15.

CHEVALIER (Avent & Thayer Kennels), black, white and tan dog (Jean Val Jean—Lucy Avent), June 7.

SHADOW (Avent & Thayer Kennels), black, white and tan bitch (Jean Val Jean—Lucy Avent), June 7.

LADY BELTON (C. W. Barker, Ravenna, Neb.), black and white bitch (Tennessee Bob—Dixie Belton), January.

FULL TILT (S. C. Bradley, Greenfield Hill, Conn.), black, white and tan bitch (Rowdy Rod—Celeste C.), Sept. 4.

DUFF (W. T. Hunter, Wheatland, N. D.), black bitch (Toss—Pitti Sing), June 6.

BELLE OF DELAWARE (Murray Mitchell, Philadelphia), lemon and white bitch (Breeze Gladstone—Delaware), Feb. 9.

MOLLIE G. (John N. Lewis, Ramsey, N. J.), liver and white bitch (Tom Draw—Flirt), August.

SPOT CASH (H. K. Deveraux, Clevelaud, O.), black, white and tan dog (Vanguard—Georgie Belle), Jan. 8.

SNAP (F. S. Brown), black, white and tan dog (Nat Goodwin—Royal Myrtle), May 2.

LAD (F. T. Brown), black, white and tan dog (Edge Mark—Clip Glenrock), May 3.

CLEM GLADSTONE (J. L. Sneed, Columbus, O.), black, white and tan dog (Paul Gladstone—Latonia), April 6.

BRIGHTON CLIP (Thos. Hallam, London, Ont.), black, white and tan bitch (Canadian Jester—Lassie), April 5.

KENDAL (J. Leisinring, Upper Lehigh, Pa.), black, white and tan dog (Booth—Queen Vashti), Oct. —.

AGNES BOOTH (J. Leisinring, Upper Lehigh, Pa.), black, white and tan bitch (Booth—Queen Vashti), Oct. —.

ST. ANTHONY (J. H. Winslow, Philadelphia), black, white and tan dog (Rowdy Rod—Celeste C.), Sept. 4.

IRISH SETTERS.

ROCKWOOD DANDY (C. L. Thompson, Philadelphia, Pa.), dog (Desmond II.—Fly), March 6.

ROCKWOOD ESTELLE (C. T. Thompson, Philadelphia Pa.), bitch (Tim—Estelle), April.

POINTERS.

CHIN CHIN (Charlotteville F. T. Kennels), black and white bitch (Rip Rap—Lonnie Bijou), Jan. 13.

JINGO (Charlotteville F. T. Kennels), liver and white dog (Mainspring—Queenie II.), May 1.

SEARSPRING (Charlotteville F. T. Kennels), liver, white and tan dog), Mainspring—Queeenie II.), May 1.

CONSCRIPT (Charlotteville F. T. Kennels), black and white dog (King of Kent—Hops), June 26.

COSSET (Charlotteville F. T. Kennels), black, white and ticked bitch (King of Kent—Hops), July 26.

JOHN PAUL (Charlotteville F. T. Kennels), lemon and white dog (Rip Rap—Petticoats), July 3.

GRACEFUL II. (Luke W. White, Fredericksburg, Va.), liver and white bitch (Duke of Hessen—Concave), May 8.

BRADLEY (Geo. H. Payne, Detroit, Mich.), liver and white dog (King of Kent—Lass of Kent), July 4.

HEMPSTEAD GAME (Hempstead Farm Kennels), liver and white bitch (Duke of Hessen—Woolton Game), May 8.

HEMPSTEAD BLOSSOM (Hempstead Farm Kennels), liver and white bitch (Duke of Hessen—Woolton Game), May 8.

MERRY DUCHESS (Hempstead Farm Kennels), liver and white bitch (Duke of Hessen—Merry Legs), Aug. 3.

CLANCARTY (J. H. Winslow, Pa.), liver and white bitch (Beppo III.—White Fawn), April 27.

REDEMP (J. H. Winslow, Philadelphia), liver and white dog (Graphic—Vandalia), Sept. 17.

ASPERATION (J. H. Winslow, Philadelphia), liver and white bitch (Dick Swiveller—Bloomo III.), April 26.

FAN FAN II. (C. E. Connell, Philadelphia), liver and white bitch (Duke of Hessen—Fan Fan), May 7.

BRIGHTON LEDA (Thos. Hallam, London, Ont.), liver and white bitch (Devonshire Nero—Armstrong Mag), May.

WORMS.

To judge from the advertisements we read one would suppose that the worms which infest puppies' stomachs were more tenacious of life than a mud turtle, whereas their vitality is of the lowest order. Almost any substance of strong taste or smell—such as tobacco, red oak bark, rosin, salt and hickory ashes or sulphur, copperas and the like, will run all the intestinal worms out of colts, pigs or puppies to a dead certainty. Pumpkin seed tea will knock the tape worm cold, every time, in any sort of animal from a man to a mouse. And we will give bond and security to keep the largest kennel in the United States entirely free from worms by the use of soda, sulphur or charcoal. Nothing is better than powdered charcoal, but soda is cleaner, while sulphur is sometimes refused unless disguised in milk or soup. We charge nothing for our prescriptions, and therefore nobody will use them. What a man does not pay for he does not value.

N. B.—Don't let your compositor set up mad turtle for mud turtle. The mud turtle is the same as the shagtail turtle. In the South he lives in mill ponds and fresh water streams, and never lets go till it thunders, as every darky will tell you. TAR HEEL.

MUD CREEK, N. C.

ANSWERS TO CORRESPONDENTS.

Please inform me what ails my pointer bitch, three years old. She refuses to eat anything but grass for a while and has a staring look and moans as if in pain for a day or a night, then seems to get better and eats. Has these spells every two weeks or so. The bitch is splayed. Ans. Probably the intestines are attached to some of the abdomen, the result of splaying. First give an aperient of sulphate of magnesia, four drams; this might be repeated whenever the bitch has one of the attacks you mention. Afterwards give the following mixture:

Tinct. cinchon. ext	ʒ ii.
Sodii bicarb	ʒ i.
Tr. rhei	ʒ iv.
Tr. hyoseyanni	
Tr. belladona	ā ā ʒ i.

Mist. One teaspoonful three times a day.

T. R. C., New York City.—What is the matter with my English setter, four years old? His bowels are costive and he does not seem to relish his food whenever offered him. I gave him castor oil on two occasions and it produced a frothy substance in his mouth which he continued to vomit for about two minutes Ans. First give two grains of calomel and then the following mixture:

Pot. b'carb	ʒ i.
Tr. gent. co	ʒ ii.
Tr. nucis vom	ʒ i.
Syr. simple	ʒ i.
Aq. to	ʒ vi.

Mist. Give one teaspoonful three times a day. If necessary treat for worms with some of the advertised worm pills.

Yachting.

SPEED RECORDS OF SAILING YACHTS.

THE subject of the actual speed of sailing yachts is one that has received far less attention than from its importance it deserves, as it is the only true basis of comparison by which the improvements of recent years can be accurately estimated. It is generally assumed, and in all probability correctly, that the yachts of the last six years are materially faster than their predecessors immediate or remote, but at the same time there are very few reliable records of new or old yachts to substantiate this claim, or to show in what years the improvement was most marked.

With the amount of racing now done in America and Great Britain the collection of reliable records should be an easy matter. That it is not systematically done is largely due to the fact that in racing it is the relative, and not the actual speed which is of importance; so long as the yacht is the first in her class, it matters little whether she is sailing at six knots or ten.

The conditions of yacht racing were never more favorable than at the present time for the collection of data relating to speed; the courses of the various clubs have been much improved of late years, being permanently laid down and the length of each leg known; the turning is usually very accurate, the yachts in each class are more nearly of the same measurement, thus eliminating time allowance; and though the racing classes just now are comparatively few, in those that do any racing at all, such as the 46ft. and 21ft., there will be a great deal of keen competition.

The figures on which the accompanying tables are based were compiled by a yachtsman from the results of last season's racing and were placed at our disposal some time since. Although their compilation involved a great deal of labor, they are by no means as complete as is desirable, owing to the difficulty of verifying times, distances and conditions in certain races. At the same time the results as they stand are interesting and valuable. We publish them partly to call attention to the subject, in the hope that the regatta comittees and racing men may take such interest in it as to lead to a careful and systematic collection of similar data during the coming season.

The regular racing courses of the leading clubs are now, as a rule, marked by permanent buoys or other marks, so that it is only necessary at the beginning of the season to verify the distances and note a few changes. This is the case in the Eastern, New York, Atlantic, Corinthian of Marblehead and Seawanhaka clubs. In some cases where markboats are depended on in part, a greater degree of accuracy is desirable in anchoring them, so that the distances may be absolutely the same in each race. In nearly all races a good anemometer may be used on the club house or even on the judge's boat; from which, aided by the observations of the U. S. Signal Service at the leading ports, the force of the wind may be obtained.

The timing of the yachts is now done with great accuracy, and no change is needed in this detail. The most troublesome detail is that of the tides, but it is nearly always possible for the regatta committee to note the general effect of the tide on each leg of a course. There are many occasions on which it will be useless to take any observations, owing to fluky winds, calms or very strong tide, but in nearly every race there will be one or more legs sailed under such fair conditions as to give satisfactory results.

To make a complete and useful record, it is necessary to know the force of the wind and sailing course on each leg from which it will be possible to ascertain the true speed and relative merits of each yacht in light, moderate and heavy weather, as well as in running, reaching and beating. In the present tables the details are hardly complete enough to permit of any close analysis, and we have simply taken the rough averages of the speeds on off and along the wind. Incomplete as they are, the results are very interesting, and we hope that they will lead to a general attempt to collect such data during the coming season as may enable us to publish a far more complete and accurate table in the fall.

The inquiry was originally begun mainly with a view to ascertaining the maximum speeds attained in racing and consequently the results are well above the average. The highest speeds attained may in each case be in part attributed to favoring tides, which are very important factors in New York Bay and in Vineyard Sound. In Long Island Sound above Larchmont, off Newport and off Marblehead, the influence of the tides are less important.

In the tables the observed speed is given in nautical miles per hour. It has not been possible to note as closely as is desirable the direction of the wind, as the rough divisions of running, reaching and beating are hardly definite enough.

The following times, which are closely approximate, though not official, show the speeds of three well-known yachts under conditions favorable to accurate observation:

They were taken in the special race of the New York Y. C. in Vineyard Sound on August 10, 1891, the wind being fresh and the tide running from 1 to 2¾ knots with the wind.

	Nautical miles.		Marguerite, 80ft. l.w.l.	Iroquois, 80ft. l.w.l.	Quickstep, 65ft. l.w.l.
First leg	4¾	Close reach.	5 62	5 55	5 45
Second leg	8	Beat.	3 73	3 74	3 75
Third leg	8	Wing and wing.	8 79	9 28	8 92
Fourth leg	4¾	Quartering.	13 04	11 48	10 79

There are many localities where a number of yachts are frequently raced in still water, or under such known conditions as may be readily allowed for. In these cases a careful observation throughout the season will give important results, however small the yachts may be.

THE records of the speeds of racing yachts which we publish this week are the result of no small amount of labor on the part of the yachtsman to whom we are indebted for them. While interesting and useful as they stand, they are still more important as pointing out a wide and instructive field of investigation as yet but little explored.

At the close of the season of 1887, there appeared in *Engineering* an elaborate article on the same, subject by Lt. Col. J. T. Bucknill of Southampton, Eng., giving the speeds of the then existing Itchen boats or "lengthers." We have not attempted to carry out the present calculation as thoroughly as was done by Lt. Col. Bucknill, the courses and conditions in this case being much more diversified, but we hope to be able during the coming season to secure still more accurate records.

Two very interesting questions suggest themselves on an examination of the tables, the highest speeds shown were attained in cruising im, and the speeds with a quartering wind compare so favorably th those under spinakers as to suggest the desirability in many ses of tacking to leeward rather than running wing and wing. A ther continuation of the inquiry promises to throw much light on ese and similar questions.

After the race of Monday at Larchmont it looks as though there might be something after all in the theory advanced last week by Mr. Clapham, and that a great weight of lead possesses some mysterious power of increasing a yacht's speed, apart from her sails, just as oars or a naphtha engine might do. As the result of a three-mile drifting match, in which the start was quite even, the wide boats sailing on top of the water, were about half an hour astern of the moderate beam craft of considerable depth and displacement.

QUITE different conditions and results have characterized the first races of the fin-keels in New York and Boston. In light weather and smooth water the fin-keel El Chico made a very poor showing alongside of the cutter Pyxie, and in a moderate breeze she appears but little faster than Nameless, another cutter. Off Marblehead, however, the new fin-keel Handsel in a fresh breze and some sea, very easily d efeated the two larger cutters, Fancy and Hawk, one a keel and one a centerboard boat.

MEMORIAL DAY.—MAY 30.

THE weather, which is such an important factor in the observance of Memorial Day by yachtsmen as the formal opening of the yachting season, was fairly good on Monday for such a cold and backward season. About New York the wind was light and fickle, and there were occasional light showers, but the scheduled events were all carried out as per programme. About Boston there was more wind, and the racing was subsequently more satisfactory. The principal event in each place was the trial of the Herreshoff fin-keels; a 30-footer in Boston and a 25-footer in New York. The former trial was quite satisfactory to the fin-keel, a good race being made with two known boats, in which the fin won. The race of the Corinthian Mosquito Fleet was a little more than a drift, but it served to show that El Chico, the fin-keel, is poor at this work and needs wind to drive her.

The races throughont the country being sailed on Monday, we are obliged to defer the reports of many until next week.

The first club to recognize Decoration Day as the formal opening day of the season was the Atlantic Y. C., and in accordance with the custom, the fleet was out on Monday for a review and squadron sail around the Southwest Spit. Com. Banks reviewed the fleet from the flagship Waterwitch, after which the following yachts started for an informal sail: Waterwitch, Com, David Banks; Shamrock, J. Rogers Maxwell; Comet, W. C. Langley; Tempest, Owen A. Campbell; Yampa, Chester W. Chapin, and Gevalia, Howard W. Coates. Sloops, cutters: Athlon, E. C. Havens; Tigress, Edmund Fish; Espirito, F. C. Adams; Aglaia, E. J. Bergen; Smuggler, Charles W. Morgan; Monette, F. H. Smith; Arva, F. D. Cameron; Anaconda, John G. Prague; Nimpoy, H. H. Salmon, Jr.; Gulnare, J. E. Dwight; Nautilus, W. D. Dickey, and Rover, J. S. Manning. Shamrock was out for the first time under her schooner rig.

The Harlem Y. C. fleet turned out in full force for the annual spring regatta, the course being from the new club station at College Point, Classes A to H, inclusive, rounding Sand's Point Buoy, eighteen miles; Classes H to C rounding Gangway Buoy, sixteen miles, and Class L, for open catboats under 18ft., rounding Stepping Stones light. The wind was light and variable from N. E. to S. E. The times were:

CLASS A—CABIN SLOOPS, 33FT. AND OVER.

	Elapsed.	Corrected.
Gipsy, E. M. Griffiths	4 49 05	5 46 32
Meta, A. L. Kerker	withdrew.	

CLASS B—CABIN SLOOPS, 30 TO 33FT.

Chas. Weide, W. A. Borst	4 39 51	4 36 51
Edith, W. J. Cooper	4 49 55	4 46 33
Nereid, T. Charles Allen	4 49 16	4 47 25
Peerless, James F. Lalor	4 51 25	4 47 27

CLASS C—CABIN SLOOPS, 25 TO 30FT.

Teresa, A. W. Warner	5 11 32	5 04 00

Mattie, George A. Bergen	withdrew.	
Agnes, F. J. Morrisey	withdrew.	
Rosetta, K. McDonald	withdrew.	

CLASS D—CABIN SLOOPS, UNDER 25FT.

Oriole, M. P. Lee	4 56 45	4 56 18
Idler, George Rosenberg	5 05 10	5 01 25
Alert, O. Aubut	withdrew.	
Caristina, Charles F. Stevens	withdrew.	

CLASS E.—OPEN JIB AND MAINSAIL, OVER 25FT.

Maud M., W. McManus	4 23 00	4 20 43
Neptune, O. R. Hartwig	4 54 10	4 54 10

CLASS F—OPEN JIB AND AND MAINSAIL, 21 TO 25FT.

Sophia, T. H. McDonnell	4 57 01	4 52 13
Blizzard, H. Rewig	withdrew.	

CLASS G—CABIN CATBOATS, 25FT. AND OVER.

Pfaffinder, R. L. Fersenheim	4 43 25	.. .. ..
Village Maid, A. M. Stebbins	4 49 18	4 43 59
Clarence K., J. Greenebaum	4 52 33	4 45 12

CLASS H—OPEN CATBOATS, 22 TO 25FT.

Josie, John O'Brien	4 33 15	4 32 44
Truant, Otto H. Lange	4 39 28	4 37 54
Truant, Jr. Otto H. Lange	4 47 05	4 46 16
Tyrant, William Geophert	withdrew.	

CLASS I—OPEN CATBOATS, 18 TO 22FT.

Anglescy, B. Krumeich	4 38 32	4 35 12
Gypsie, H. Hollereith	withdrew.	

CLASS J—OPEN JIB AND MAINSAIL UNDER 21FT.

Regina, W. Scardefield	4 23 18	4 20 14
Bertie M., H. Hanlein	withdrew.	
Ida, C. G. Magnuson	withdrew.	
Frances W., Charles Watson	withdrew.	

CLASS K—CABIN CATBOATS, UNDER 25FT.

Nadjy, W. Towner	withdrew.	
Mohican, F. H. Davis	withdrew.	

CLASS L—OPEN CATBOATS, UNDER 18FT.

Tramp, William C. Mulker	3 38 27	3 37 42
Amaranth, A. Olmesdahl	3 41 04	.. ..
Robert T., Robert Tate	3 53 55	3 52 25

OPEN CLASS—CABIN SLOOPS.

Katie Louisa, Henry Roth	4 40 45	3 37 49

OPEN CLASS—JIB AND MAINSAIL BOATS

Thorn, W. E. Kirzey	4 38 30	4 30 10
Clara S, Joseph Stilger	4 40 00	4 33 00

OPEN CLASS—OPEN CAT—OUTSIDE CLUBS.

Surprise, N. Schmidt	5 10 35	4 53 38
Restless, G. W. Cornell	withdrew.	

Judges—George Parkill, Columbia Y. C.; George Wright, Yorkville Y. C., and P. Grace, Harlem Y. C.

A special prize to the yacht making the fastest time over the Sands Point Buoy course was awarded to Maud M. The Bailey prize was won by Regina, and a special prize in Class L was won by r amp.

The Knickerbocker Y. C. opened the season with a spring regatta from College Point, the new station of the club, over a 5-mile course in front of the club house, the starters being:

Class A.—Cabin sloops, 26ft. and over.—Carita, F. E. Barnes; Alice, A. M. Holder.

Class B.—Cabin sloops, under 26ft.—Nahwa, O. D. Dike; Nanita, H. Stevenson; Paula, D. Shattick; Alpha, A. Wagner; Liberty, L. Zocher; Nyad, W. C. Lieber; Evadne, R. Floyd Clarke.

Class C.—Cabin catboats —Melita, O. H. Chelibourgh; Atche, C. Fairchild; Leisure, F. B. Myrick; Clara, C. B. Roe; Isn't, E. Eberspacher.

Class D.—Open catboats.—Myra, G. K. Rosenquest; Edna, George Greaves; Mazulm, T. W. T. Maxwell; Anna Seaman, C. Coughtry.

The winners in each class were:

Class A.—Carita, 9:56:55. Class B.—Nahwa, 1:17:20. Class C.—Atche, 1:04:41. Class D.—Edna, 0:59:40.

The wind was light S.E. during the race, which started at 3 P. M.

The Memorial Day programme of the Brooklyn Y. C. included a review and squadron sail, the following yachts taking part: Mull, Com. Sutton; Fair Wind, Capt. Meehan; Truant, Capt. Townsend; Sappho, Capt. Lyons; Alice; Vice-Commodore Cottier; Emmie, Capt. Clunen; Ida, Capt. McCarthy; Mary A., Capt. Lyons; Mary, Capt. Tracy; Iroquois, Capt. E. H. Chandler; Kestrel; Capt. Pierce; Panchito, Capt. George Foote; Water Lily, Capt. Anderson; Irene, Capt. Lockhead: Cricket, Capt. George Gray; Faustina, Capt. Hopkins; Circe, Capt. S. R. Brown; Missie, Capt. Prentice; Chief, Capt. Barrett; Seneca, Capt. Trickens: Studio (houseboat), Capt. Tobin; Rosie, Dr. Latham; Hannah, Capt. Green; Sunshine, Capt. McCrea, Phenix, Capt. Stumpf; Ida, Capt. Williams; Homing, Capt. Drayton; Alps, Capt. Doggett; Annie, Capt. Austin, and Eddie D., Capt. Rummell.

Com. Sutton reviewed the fleet from the flagship. After the sail there was music and dancing at the club house.

There were handsome cups and a very good entry list for the regatta of the Corinthian Mosquito Fleet on May 30, in fact a more remarkable fleet of small yachts has never been brought together than was entered on this occasion. There was the Herreshoff fin-keel, El Chico, the Gardner cutter Pyxie, the centerboard cutter Helcia, another new Gardner boat, the two cruising cutters Nora and Brenda, the new Gielow catboat Oconee, with several older cats, the open boat Duster, a fast jib and mainsail racer of local celebrity, and last of all three of the flat shovel-nose type, the Clapham boats Chippewa and Toboggan, the latter a new boat, and Mr. Bourry's new Willis boat Badger, of much the same pumpkinseed shape as the Clapham boats. Unfortunately, after entering, a number did not start. Oconee was invisible, Badger had no ballast, Helcia had no light sails, and others had nothing aboard but excuses.

The courses were from off Larchmont, the Larchmont Y.C. having kindly offered the hospitality of the club to the Mosquito Fleet, all turning the buoy off Execution Light, the larger boats going thence around Matinicock and home, 15 miles, the cats and Nora and Brenda, out for a private match, going around Constable's Point Buoys from Execution and then home, 7 miles.

There was little wind in the morning and a few drops of rain fell. When the race was started at 12:16 P. M., there was a very light S.W. wind and the last of the flood tide. With a one-gun start the fleet got over the line slowly but all well together. Pyxie, sailed by her owner, Oswald Sanderson, with Com. Forward and Mr. Alley being just ahead of El Chico, sailed by her owner, Mr. Kersey, and Messrs. Willard and Mott. Pyxie moved very fast in the light air from the start, all on port tack standing toward Horseshoe Harbor. On board of Tobogan was her owner, Mr. George Work, and her designer and builder, Mr. Thomas Clapham, while Chippewa was sailed by young Mr. Clapham. Pyxie was soon well ahead and to windward of El Chico, while the fin-keel in turn gained as rapidly on the Clapham boats. It was not until 1:26 that Pyxie had covered the 3 miles and turned Execution Buoy, and El Chico was 18min. astern of her. Thus far neither had been blessed with any wind, though far astern were Chippewa and Toboggan with spinakers out before a light N.E. breeze, while close under the Long Island shore a number of yachts were heeling to a fine southerly wind, and far up toward City Island the 40 yachts of the Harlem Y. C. had a nice little breeze.

Pyxie and El Chico in time drifted down with the tide, trying to work into the narrow belt of wind off Hempstead Bay. Toboggan came to the buoy finally and lay there becalmed, her flat bow splashing to the roll of a steamer's swell. Both she and Chippewa seemed inert and sluggish in the light airs compared with the deeper boats. Nora and Brenda, wide cruising cutters built nearly ten years since, are by no means fast yachts, but they both reached Execution ahead of the flatiron models.

Pyxie was the first to get the wind, but from N.E. instead of south, standing up for Matinicock on port tack. Helcia, a very pretty yacht, in spite of a large cabinhouse, was with her, and both sailed very fast. El Chico meanwhile was becalmed off Hempstead Bay, but finally took a light breeze, while Chippewa and Tobogggan had got on her lee beam, but close in to the Hempstead shore. Nora and Brenda went across to Constable's Buoy, the former with a good lead. After a time the breeze fell again, and the two Clapham boats withdrew. Pyxie won very easily, as the following times show:

TWENTY-FIVE FEET CLASS.

	Start.	Finish.	Elapsed.
Pyxie, O. Sanderson	12 16 40	4 36 42	4 19 58
El Chico, H. M. Kersey	12 16 40	5 21 35	5 04 55
Toboggan, Geo. Work	12 16 40	withdrew.	
Duster, E. Crabbe	12 16 40	5 21 30	5 04 50
Chippewa, T. Clapham	12 16 40	withdrew.	

SPECIAL CLASS

Nora, G. M. Barrett	12 16 40	3 46 31	3 29 51
Brenda, F. M. Scott	12 16 40	3 47 31	3 30 52

CATBOATS—THIRD CLASS.

Caprice, Mr. White	12 16 40	3 53 20	3 36 40
Narrioch, F. C. Lawton	12 16 40	3 47 35	3 30 55
Spendthrift, B. C. Lockett	12 16 40	3 54 58	3 38 18

What with calms and uneven winds, the race was in no way a test of the true merits of any of the boats, but at the same time it brought out several very interesting points. In the first place, the new Gardner cutter Pyxie is a very lively boat in a drift or a light wind; El Chico on the contrary evidently requires a fair strength of wind to drive her, and is slow in a drift. The Clapham boats show the same peculiarity, but in a more marked degree, being very dull and inert in the light airs. The most astonishing point to many will be that all of the lead-loaded boats, Pyxie, El Chico, Nora and Brenda, proved faster as drifters than the very light displacement skimming dishes, such as Chippewa and Toboggan. As to rig in such weather, the high topsail and jib topsail appear to drive a boat faster than the simple large mainsail and jib, in spite of all theories as to the division of sail.

The Audubon Y. C., of 152d street, N. R., New York, held its second annual regatta on Monday. John A. Cameron's open sloop Tin Soldier, class C, won the club prize, a silver water pitcher, as well as the regular prize in class C, and Peerless, of the Hudson River Y. C., won in class D. C. T. Wills, open cat, was the winner in class E. In class F, Uncas, cabin cats, won. The canoe yawls, Sea Urchin and Sea Horse, started in class G. Sea Horse won.

Arrow, an open catboat, capsized just as she finished. The judges were B. Van Riper, Thomas Latham and R. B. Saul. The Regatta Committee included John A Cameron, E. J. Leslie, C. Leach, C. R. Terwilliger and H. C. Crampton.

The regatta of the Kill von Kull Y. C., of Port Richmond, Staten Island, sailed on Monday, resulted as follows: Open sloops, 22 to 25ft.—Libbie May, 2:28:10. Class F, cabin catboats, 30ft and under—Sea Bird, 2:21:50. Class G, open catboats, 22 to 25ft.—Our Own, 2:01:52. Class H, open catboats, 20 to 22ft.—Tormentor, 2:00:08. Class I, open catboats, 18 to 20ft.—Ges So, 2:02:20. Class J, open catboats, 18ft. and under—Chip, 2:12:25.

The special race of the Eastern Y. C. on Monday, open to yachts not over 30ft., had but three starters, but all good boats, the keel 30-footer Fancy, one of the most promising thirties designed by Mr. Burgess, the Burgess Hawk, with her new iron and lead centreboard, and the new Hooper fin-keel Handsel, sailed by her designer, Mr. N. G. Herreshoff. The course was from Marblehead Rock around the Groves Buoy, eight miles to windward and return, with a fresh wind and moderate sea. Handsel took the lead shortly after the start, easily leaving the other two and rounding the weatner mark 15m. 45s. ahead of Fancy, Hawk having parted her bobstay off Nahant and withdrew. On the run home Handsel lost 45s. The times were:

	Length.	Elapsed.	Corrected.
Handsel, J. R. Hooper	32 22	3 02 53	3 16 30
Fancy, C. F. Lyman	30.67	3 38 08	3 33 08
Hawk, Gordon Dexter	30.85	Disabled.	

The Pavonia Y. C. had a double celebration, Com. Rowe, with a party, visiting the house at Atlantic Highlands, while a race was sailed from the Jersey City club house, the course being around Buoy 9 and Fort Lafayette, the wind light S. C. The times were:

CLASS 1.

	Start.	Finish.	Time.	Corrected.
Christine	1 28 05	6 14 45	4 46 40	4 42 10
Alex. F.	1 29 30	6 13 30	4 43 50	4 43 50
Pavonia	1 28 40	6 03 45	4 35 05	4 31 35

Annie J.	1 25 00	6 29.30	5 04 30	5 04 30

The Staten Island Y. C. sailed its annual regatta on the bay in a light S. E. wind, the times being:

	Start.	Finish.	Elapsed.
Maude S, J. Sandford	10 44 30	2 59 00	4 14 30
Amy, Wm. Ludlum	10 45 00	3 18 10	4 33 10
Turtle Bay, J. Boelger	10 45 30	3 18 00	4 32 36
Try Again, W. E. Horn	10 45 30	2 55 00	4 09 30
Henrietta, Hoyer & Wiss	10 46 00	Did not finish.	
Sterling, M. Taylor	10 46 50	2 55 30	4 09 00

Try Again wins. Amy was in collision with a tow of barges, injuring her stern, while Turtle Bay fouled and capsized the Annie B., of the Ocean Y. C.

SEAWANHAKA CORINTHIAN Y. C.

DURING the greater part of its sojourn on Staten Island the Seawanhaka Corinthian Y. C. maintained a rigid observance of Decoration Day as the formal opening of the yachting season, and a large fleet was always afloat under its flag. From 1878 to 1885, in particular, the Decoration Day outing was one of the events of the year, the squadron sail down the Bay terminating with a dinner ashore at Staten Island. Of late years the absence of a waterside station has tended to separate the fleet, the yachts naturally going to the other fleets whose rendezvous was at some large club station, and the observance of the day has been largely confined to a gathering at the town clubhouse in the evening.

This year, however, the holiday was not merely celebrated on a more extensive scale than ever in the past, but the celebration itself was the inauguration of a new era in the club's history. It is barely a year since the club determined upon the establishment of a waterside station, and while the site selected was all that could be desired, the task of turning a bare uncultivated hillside into a comfortable home, and of arranging the thousand and one details of house, kitchens, wharves, launches, etc., has been a formidable one.

The work of the architect and builder was done punctually, and the completed house was turned over to the house committee some time since, but that energetic body has been at work night and day to accomplish the results which were visible on Saturday. The house, grounds and location were very fully described in the FOREST AND STREAM of Jan. 7, the house being a large building in colonial style, designed by R. W. Gibson, a member of the club, and located on the southern slope of Center Island, on Oyster Bay Harbor, opposite the town of Oyster Bay. The leading features of the house are its broad piazzas and deck roof, from which are visible Long Island Sound, Oyster Bay, West Harbor, and Cold Spring Harbor, with the surrounding hills. The handsome and homelike main hall, with dining room on one side and billiard room on the other, and its apartments for guests on the second and third stories, including a wing specially set apart for ladies. Directly in front of the house is the club anchorage, well protected, and with an expanse of deep water that would accommodate the combined fleets of three yacht clubs. Here are moored the club steam launch Seawanhaka, the naphtha launch Corinthian, and the four club cats, Alpha, Beta, Gamma and Delta, besides many private yachts and a whole fleet of naphtha launches.

On Saturday there were at anchor the flagship Miranda, schr., Com. G. H. Hill; Vandal, cutter, Vice Com. Henry Stanton; Mirth, sloop, Rear-Com. J. W. Beekman; the schooners Iroquois, Peerless, Agnes, Fleur de Lys, Montauk; the cutters and sloops Gracie, Wasp, Huron, Oriva, Clara, Liris, Nameless, Laxen, Lotawana, Helcia, Nymph, Hornet, and the new fin-keel El Chico, and numerous small cutters and catboats, with the steam yachts Oneida, Emu, Vivienne and Floss.

At 10:30 a special train from New York brought down a party of nearly 150 members and guests, and on its arrival the entire fleet of steam and naphtha craft was pressed into service to ferry the visitors, with many residents of Oyster Bay, across to the clubhouse. By 11:30 there were about 350 present, nearly half being ladies. Landers' orchestra struck up a march and the guests gathered about the lawn, the roofs, and the piazzas, in preparation for the principal event of the day, the formal putting in commission of the new club house. Just before noon the club signals were bent on to their halyards. Fleet Captain Tams took charge of the American ensign, Secretary d'Oremieulx left his labors on the new club book for a few moments to stand by the big club burgee, and Messrs. Zerega, Post, Whitlock and other old members manned the other halyards. As the gun fired at noon from the flagship the orchestra struck up the "Star Spangled Banner," and the hundreds of flags ashore and throughout the fleet rose slowly to the mast heads, all the yachts dressing ship. The blue and orange burgee of the Oyster Bay Y.C., now merged with the S. C. Y. C., was hoisted for the last time on the western yardarm of the large flagpole.

There was a fresh breeze blowing, and the first race was called early in the morning, the four catboats being manned by two men each. The winning boat, Alpha, was sailed by Messrs. Bullock and Foster. After the flags were set a luncheon was served in the club house, and then a race for naphtha launches was called, the handicap being arranged by Mr. Gibson, of regatta committee. The times were:

	Elapsed.	Corrected.
Eleanor	13 10	12 32½
Titania	12 38	12 38
Liris	13 44	13 14
Miranda	15 44	13 18½
Ripple	13 48	13 45
Cherub	14 28	13 50½

Cherub was handicapped at the start.

Later a race was started between the new Herreshoff fin-keel El Chico, sailed by her owner, Mr. H. Maitland Kersey and Messrs. Willard and Alley, and the Gardner 25 footer Nameless, sailed by her owner, Mr. C. W. Wetmore. Nameless crossed the line 15 seconds before the signal, and lost so much time in returning and recrossing that the race became a procession and devoid of interest, Nameless not crossing the line at the finish. There was much disappointment over the absence of a conclusive result, but the two boats were seen together a number of times during the day, and in a moderate breeze they seemed very evenly matched. After the races the main hall was cleared for dancing. Many of the visitors left for New York on a special train at 4:30, and in the evening the members of the club settled down for the quiet enjoyment of their new home, dinner being served for the first time. During the afternoon Com. Colt, of the Larchmont Y. C., came into the harbor in the Larchmont flagship Dauntless, with Messrs. Scott, Monroe and others of the Larchmont Y. C., and inspected the house and grounds.

The club has now a home and station unsurpassed by any club on the coast, and another year will show still further improvement. Messrs. Hoyt and Wetmore, who own land adjoining the club, have built a joint boathouse on West Harbor, near the residence of the latter. Mr. Hoyt's new house, about half a mile from the clubhouse, is now completed, and a new house for Mr. Sidney Chubb is now nearly completed near the clubhouse, while another has been begun for Mr. George Bullock.

Races will be open to yachts of the Atlantic, Beverly, Corinthian of Marblehead, Corinthian of New York, Eastern, Knickerbocker, Larchmont, Massachusetts, Marine and Field, New Haven, New York Yacht Clubs and Royal Nova Scotia Yacht Squadron, and will be governed by the racing rules and time allowances and under the direction of the race committee of the Seawanhaka Corinthian Y. C.

Saturday, July 2, 1892.—The annual Corinthian race, to be sailed over the regular club courses.

Prizes will be offered in this race in the following classes: Schooners, 90ft. class; sloops, cutters and yawls, 46ft. class, 40ft. class, 35ft. class, 30ft. class. Also the class of 25ft. racing length, and such other small classes as may fill with three entries.

In addition to the regular prizes offered by the club, the Leland Challenge Cup, open to competition for members of the club only, is put up for contest in the 46ft. class, and the club, in accordance with the terms attaching to the cup, will give a special prize to the winner.

Individual prizes will be given to the Corinthian members of crews on winning yachts carrying Corinthian crews, as defined by club rules.

Leland Challenge Cup.—Contests for the possession of the cup are open only to members of the Seawanhaka Corinthian Y. C. Under the rules attached to the cup, it is to be held subject to challenge during the yachting season in the class in which it is first won in

each year, and the winner in each contest will be given a prize by the club. The winner of three successive races in the same season will be entitled to hold it for the remainder of the season, not subject to challenge.

Two series of races for the club catboats have been arranged as follows: The Saturday series will be sailed on Saturday afternoons; the Oyster Bay series to be sailed on any week days from June 1 to September 30. For these special prizes will be awarded. The full programme has already been published.

Mr. Henry C. Rouse and Mr. Charles W. Wetmore have presented to the club four prizes of the value of $75 each, to be raced for by the small yachts of the club on the second Saturday of each month during the season, under special conditions to be hereafter announced.

Special races will be arranged by the committee in any classes for which a satisfactory number of entries may be made.

NEW YORK, May 14

ALCÆA.

THE steel schooner Alcæa, launched at Lawley's yard, South Boston, on May 25, is in several ways a notable yacht. She is the only modern keel yacht of her size or rig, the first large yacht built from Mr. Gardner's designs, the first steel yacht built at Lawley's yard, and the largest steel sailing yacht yet built in the East. Whether she will make a name as a racer remains to be seen, as it is not clear as yet whether she will be used mainly for cruising or will be raced as hard as her large sailplan would promise. The dimensions of the yacht are: length over all 131ft., lwl. 90ft., beam 22ft. 6in., draft 13ft. 6in.

The approximate lengths of the spars are: mainmast 95ft., foremast 76ft., bowspirit 33ft., foreboom 35ft., mainboom 76ft. The yacht has a handsomely turned midship section, an easy reverse curve but with a strong bilge. The sheer plan shows the long ends, with a Gloriana bow, while below the foremast is a deep jog in the keel line. The sternpost has a moderate rake. The yacht is well sheered, with a bulwark about 16in. high. The bottom of the keel is a plate of ½in. thickness and 28in. width, perfectly flat. This is joined to the garboards by heavy steel angles, forming the ballast trough. The plating is flush, ⅜in. thick. The steel angle frames are 3½×2½in., spaced 21in., main deck beams 3×3in. The steel work, which was done under the direction of Mr. James Guiler, formerly of the Union Iron Works, San Francisco, is equal if not superior to any work yet seen here. The yacht was built under the superintendence of Mr. Arthur H. Clark, of Boston. The interior is arranged to give very fine accommodations, including a main saloon 18ft. long, a large owner's room abaft it, a very large and airy forecastle, a good galley and a captain's room. The winding stairway leads to a steerage with a large chart cabin, wardrobe, etc., abaft, which is the ladies' cabin. Below the cabin floors is a clear headroom of 6ft. in which are iceboxes, watertanks, sail lockers, coal and vegetable bins, etc. The joiner work is mostly of white pine, with just enough mahogany in the styles and rails of paneling to make a pleasing contrast. The interior fittings include all the usual lockers, closets, pantries and cabin furniture; the joiner work throughout is quite light. The rig is still more extreme than in Volunteer, the fore and main masts being further forward. The yacht was designed and built for Messrs. Charles Clark and his son Louis V. Clark, of St. Louis, Mo., members of the New York, Seawanhaka and other clubs. The finishing will be hurried through in order to get her to New York in time for the New York Y. C. regatta if possible.

CORINTHIAN FLEET OF ATLANTIC CITY.

ON May 21, at 3 P. M., the first race of this new organization was started over a 6-mile course, dead to leeward and return under heavy skies and a most variable breeze.

Notwithstanding the general threatening appearance of the weather, abounding in heavy squalls, rain, calms, and a marked tendency for the breeze to shift all around the compass; eight boats out of nine entries started at the signal.

The fleet presented a spleudid sight as they rushed on the starboard tack across the line.

Unfortunately the character of the weather was such as to make the race no test regarding either the speed of the boats or the ability of their skippers, as all depended upon luck in the shifting of the wind.

The following table gives the time over the entire course for each boat:

Alert	1 40 31	Westcott	1 46 13
Lillias	1 43 37	George S.	1 47 54
Katie	1 44 57	Viking	1 52 12
Flora	1 45 50	Ruth	did not finish.

The next race of the fleet will be sailed on June 6, at 2:30 P. M., when three new boats may be expected to make things interesting.

YACHT NEWS NOTES.

The steam launch Chinook, launched on May 27 from the works of Charles L. Seabury & Co. at Nyack, is 37ft. over all, 7ft. 6in. beam, and 2ft. 6in. draft. She was designed and built for Mr. R. Lincoln Lippitt, of Providence, R. I., of N. Y. Y. C. The hull is built of selected white oak frames, straight grained, steam bent, and white oak keel. The sternpost is hackmatack and stem oak. The planking is white cedar, copper fastened and rivetted to timbers throughout. The decks are of white pine, laid in narrow strips, and the interior is finished in quartered oak. The machinery consists of a fore and aft compound engine of Seabury design and a Seabury patent safety water tube boiler. The working steam pressure allowed is 250 pounds, but the average pressure carried is 200 pounds, which will drive the launch at a speed of 10½ to 11 miles per hour. The Chinook was designed as a small cruiser, and the entire forward cockpit is inclosed with glass cabin, which is fitted with sleeping berths and is completely arranged, having an ice box, buffet, etc., fitted; also w.c. and wash basin. She will be used by her owner about Providence, Narragansett Bay, Newport and vicinity.

The Cedar Point Y. C., of Saugatuck, Conn., will hold its annual regatta, open to all clubs, on Long Island Sound on June 15.

Vindex, iron cutter, has been sold by Manning's Agency for Arthur Blake, of Boston, to George Bullock, of Cincinnati. She will hail from New York and will take up her moorings off the Seawanhaka club house at Oyster Bay, where Mr. Bullock is building a handsome residence.

Alva, steam yacht, W. K. Vanderbilt, arrived at Newport on May 30 from Havre via Fayal, having left the former port on May 17.

LYNN Y. C. EXPERT CUP.

The final race for the expert cup of the Lynn Y. C., undecided last year, was sailed on May 28, Black Cloud winning, as follows:

	Length.	Elapsed.	Corrected.
Black Cloud, Taylor & Co.	22.8	1 23 56	1 12 14
Astrea, R. M. Benner	20.0	1 41 54	1 18 51
Irene, Armstead & Co.	22.8	1 41 36	1 20 44

Nellie, Emma, Irene, Astrea and Black Cloud had each run one leg already.

QUINCY Y. C.

The opening race of the Quincy Y. C. on May 28 was notable as the first one under the length and sail area rule and fixed ballast rule lately adopted. The race was started at 1:32 in a light N. W. wind, increasing later. Alpha, the new Herreshoff catboat, went up and sailed against the 25ft. Cape Cat Moondyne, winning very easily. The elapsed times were:

FIRST CLASS.

All yachts 21ft. and not over 28ft. water line.

Alpha, Dunne, Brown & Hunt	1 39 30
Moondyne, Shaw Bros.	1 45 50

SECOND CLASS.

All cat rig yachts 18ft. and less than 21ft. water line.

Magpie H. E. Otis	1 37 43
Vision, G. Crane	1 42 27

Helen and Smoke withdrew.

THIRD CLASS.

All catrig yachts under 18 ft. water line.

Marvel, H. M. Faxon	1 40 30	Elsie, G. Keating	1 53 51
Mab, John Shaw	1 46 57	Scamp, H. U. Nute	1 47 54
Dandelion, A. Adams	1 50 22	Don, W. H. Shaw	1 53 33

This race gives a leg in the championship, in their respective classes, to the Alpha, Magpie, and Marvel. Cash prizes were won by the Vision and Mab.

8. Rochester, Fall Regatta, Irondequoit Bay.
10. Brooklyn, Single Paddling, Bay Ridge.

OCTOBER.

1. Springfield, Cup, Springfield.

THE CRUISING RACE.

Editor Forest and Stream:

In regard to the cruising race suggested in last week's FOREST AND STREAM by the regatta committee, I for one will be glad to join it if I can arrange to be at the meet before it is held.

As for suggestions: Would it not be well to limit the sail area to a suitable cruising rig, of say 75 square feet or less?

And another: Limit the racing feature to a part of the cruise only; for instance, race from main camp to a certain distance, or number of days, and then make the distance back to main camp in a more leisurely manner as befitting a cruise, or cruise at a comfortable rate of speed from camp and race back. By following this plan both the excitement of a race and the good time of a genuine cruise could be enjoyed, besides lessening the work of the judges.

And one more: Why not open this race to all canoes, regardless of size, as there are many cruisers outside of the A. C. A. racing limits? A. C. A. 2275.

GOUVERNEUR, N. Y.

CANOE NEWS NOTES.

WHILE canoeists as a rule have paid far less attention to strict training than is common among oarsmen and other athletes, the whole tendency of canoeing work, sailing, paddling and camping, is toward a careful and regular mode of living. To those who, even though not undergoing a regular course of training, are desirous of knowing more of the systematic care and development of the body, we can recommend "The Science and Art of Training," by Henry Hoole, M.D., published by Horace Cox, London.

New Jersey Rifle Shooting.

[Specially Reported for Forest and Stream.]

MILLER RIFLE CLUB Hoboken, Captain Richard W. Dewey, Wednesday, May 25. The scores made to-night in the several classes are appended below, the conditions being ten shots, off-hand, 25-ring target, possible 250:

First Class.

L Vogel	25 25 25 25 24 24 23 23 23 23—240
G Plaisted	25 25 25 24 24 24 24 23 23 22—239
E Fischer	25 25 25 24 24 23 23 23 21 21—233
F Brandt	25 25 25 25 24 23 23 22 21 20—233
J H Kruse	25 25 25 24 24 23 22 22 22 20—232
L Sohl	25 25 24 24 24 24 23 23 20 20—232
D Miller	25 25 25 24 24 23 23 21 21 20—231
G Schlicht	25 25 24 24 24 23 23 22 21 20—231
Capt Dewey	25 25 24 23 23 22 20 20 20 19—221

Second Class.

D Peters	25 25 25 25 24 24 23 23 23 20—237
F Drews	25 25 24 24 24 23 23 21 21 20—230
F Kloepping	25 25 25 24 24 23 22 21 21 20—229
C Prien	25 25 24 24 24 24 23 20 20 18—227
F Landolt	25 25 24 24 24 22 21 20 18 18—221
R Zoch	25 24 24 24 23 22 22 21 18 17—220
W T Taylor	25 24 23 20 20 20 20 20 17 16—205

Third Class.

H F Meyer	25 25 24 24 23 23 23 20 19 19—225
H Vanderlinden	25 25 24 24 24 23 20 19 19 18—220
F J Devitt	25 24 23 23 23 20 20 19 19 19—215

Excelsior Rifle Club, Jersey City, Tuesday, May 24.—The scores made to-night in the weekly competitions for the class medals are below. The conditions were 10 shots off-hand, American 25-ring target, possible 250:

L P Hansen	25 25 25 24 24 24 24 23 23 22—239
W J Channing	25 25 25 25 24 24 24 23 22 21—238
J Hughes	25 25 25 24 24 24 23 23 22 20—235
C L Pinney	25 25 24 24 24 23 23 23 21 21—233
C Bauchle	25 25 25 24 23 23 22 20 20 18—225
T Hughes	25 25 24 24 23 23 22 18 18 18—221
R Duff	25 24 23 23 23 23 19 18 17 17—212

The medal winners in their respective classes were: L. P. Hansen, first class, with score of 239; James Hughes, second class, with score of 235. That the Excelsiors have not abandoned indoor shooting for the summer will readily be perceived, as they believe in keeping in trim during the summer months. Another inducement for them to attend the regular weekly shoots is the fact that they have handsome class medals to compete for.

The lately organized Hoboken Rifle Club gives promise of being a most successful organization. In Capt. "Johnny" Teck and lieutenants Wm. Dilger and Joseph Schaner they have a trio of tried hustlers. The club also has over fifteen members though less than a month in existence. The weekly shoot takes place at headquarters, Third and Adams street, Hoboken, every Friday evening. The range, which is being finely fitted up, possesses two channels. As every member is deeply interested in rifle shooting a good club will no doubt result.

The Hansa Rifle Club, of Hoboken, has changed its headquarters from the Hansa Hotel to Henkel's ranges, 34 Grand street. In consequence the membership list is becoming larger.

The Palisade Rifle Club has completed all minor and important details, incidental to its two days' shoot at headquarters, 354 Palisade avenue, Jersey City Heights, June 18 and 19.

The Greenville Rifle Club, Capt. William H. Robidoux, is at present arranging a 3in. bullseye shoot.

The Herman Rifle Club, Captain Herman Neuman, held its weekly shoot at headquarters on Jersey City Heights last Saturday evening. Large scores were the rule. An interesting social session followed, during which speeches were made by Captain Neuman and several others. Vocal selections were rendered by the Palisade Quartette, Messrs. John C. Reinhardt, first bass; H. Rosenthal, second bass; Geo. W. Graf, first tenor and Adolph Rossy second tenor. A most pleasant time was had by all. The company was further enlivened by the appearance of Herman Rosenthal, the German dialect comedian.

Rensselaerwyck.

TROY, N. Y., May 29.—The following scores were made at Rensselaerwyck range to-day:

Off-hand.

Major Chas H Gaus	9	6	8	10	8	8	5	6	7	9—76
Wm T Mayer	10	4	6	9	10	10	6	6	6	7—74

	9	8	10	9	10	8	6	9	8	6—83
Chos P Frey	5	7	10	5	10	7	7	6	9	9—75
	5	9	4	6	8	10	6	5	9	8—70
	7	7	5	6	8	8	7	5	10	9—72

Rest.

Major Chas. H. Gaus	12	12	11	11	10	11	12	9	11	12—111
Wm T Mayer	11	11	11	9	11	10	9	9	9	10—100

Lischke Scores.

JERSEY CITY, May 20.—The following scores were made by six members of the A. Lischke Rifle Club, at their weekly shoot, 110ft., 25-ring target:

Capt Lischke	25 25 24 24 23 23 23 22 21 21—231
Scharly	25 25 24 23 23 22 21 21 20 19—223
Steidel	24 24 23 22 21 20 20 19 18 18—210
Schulte	25 24 23 22 21 20 20 19 18 17—209
Reicherz	24 24 23 23 22 22 21 21 21 18—219
Strater	25 23 23 23 21 21 19 18 16 15—204

Medals were won: First class, A. Lischke; second class, Strater; third class, Steidel.—OTTO SCHULTE, Shooting Master.

Garden City Rifle Team.

THE Garden City Rifle Team met for their weekly contest Tuesday evening May 24, at George McCune's Shooting Gallery, 146 South Halsted street, Chicago. Conditions were; 25yds., 25 shots each, open sights, free off-hand position, Massachusetts paper target, possible 300 points:

Geo McCune	276	W G Gibbs	267
H S Burley	273	Jas Ford	260
John Politico	257		
F Erickson	255		

Empire Rifle Club.

The following scores were made by members of the Empire Rifle Club May 17 at their headquarters, No. 12 St. Marks place, distance 100ft., 25-ring target:

A Rosenstraus	236	B Zahn	227
W Rosenbaum	229	W Walker	225
C Zettler, Jr.	227	J Grimm	223
H Zettler	216		
J Diehl	196		

New Bullet Mould.

RIFLE shooters who desire to have their bullets exactly true are well aware of the difficulty of attaining this result with many of the moulds in common use. The Ideal Manufacturing Company, of New Haven Conn., have invented a new bullet mould which is believed to obviate the difficulty of getting absolutely true bullets. This new mould is a perfect cylinder. There is no ridge on the ball, which can be cast of any length and so of any weight. This mould, which is called the Ideal Cylindrical Adjustable, is described in a circular issued by the company. A cut of the mould is seen in the company's advertisement in this issue.—*Adv.*

Trap Shooting.

All ties divided unless otherwise reported.

FIXTURES.

If you want your shoot to be announced here send in notice like the following:

June 1-3.—Schuylkill County Shooting Association, three days' shoot, at Tamaqua, Pa. R. T. Clayton, Sec'y.

June 1-3.—Minneapolis Gun Club tournament, Minneapolis.

June 6-11.—Eighteenth annual tournament of Illinois State Sportsmen's Association, at Chicago. W. L. Shepherd, Sec'y.

June 7-9.—Interstate Manufacturers' and Dealers' Association tournament, at Brooklyn, N. Y.

June 13-18.—New York State Association's Thirty-fourth Annual Convention, at Syracuse, N. Y. Chas. H. Mowry, Sec'y.

June 14-16.—North Star Gun Club tournament, Minneapolis.

June 15-17.—Waverly Gun Club tournament, at Waverly, Ia.

June 16-17.—Third annual tournament of Island Gun Club, Wheeling, W. Va. R. B. Burt, Sec'y.

June 16-18.—Sportsman's Association of the Northwest tournament, Seattle, Wash.

June 20.—Fifty bluerock match. $3 entry, at Dexter Park, L. I.

June 21-23.—South Dakota State Sportsmen's Association tournament, Bresford, S. D. Professionals barred.

June 21-23.—Second annual tournament of Winchester Gun Association, Winchester, Va. Chas. F. Neeson, Pres.

June 22.—Brightwood Gun Club tournament, Brightwood, Ind.

July 4-7.—Atlantic City Gun Club's tournament, at Atlantic City, N. J.

July 6-8.—Lafayette Gun Club tournament, at Lafayette, Ind.

July (second week).—Interstate Manufacturers' and Dealers' Association tournament, at Watertown, N. Y.

July 12-13.—White House Gun Club tournament, at White House, N. J.

July 12-15.—Saratoga Gun Club's third annual tournament, at Saratoga Springs, N. Y.; $2,000 guaranteed in purses. Wm. Henry Gibbs, Sec'y.

July 21-22.—Independent Gun Club tournament, Plainfield, N. J.

Aug. 9-12.—Pennsylvania State Sportsmen's Association's annual tournament, Reading, Pa. Walter D. Eller, Sec'y.

Aug. 10-12.—Missouri State Amateur Association tournament, at Lexington, Mo. Added purses. Address G. A. Sturges, Sec'y.

Aug. 23-26.—International tournament, Des-chre-shos-ka Island, Detroit, Mich. Live birds and targets.

Aug. 30 to Sept. 1.—Hackettstown Gun Club tournament, at Hackettstown, N. J; two days at targets, third day at live pigeons. Address James L. Smith, Hackettstown, N. J.

September (second week). — Interstate Manufacturers' and Dealers' Association tournament, at Auburn, N. Y.

Oct. 5-7.—First annual tournament of the Riverside Gun Club, at Red Bank, N. J. First two days targets, last day live birds John P. Cooper, Sec'y.

The Auburn Gun Club.

AUBURN, N. Y., May 28.—Inclosed I hand you the scores made by our club at its last shoot, which was held at Owasco Lake Park, on account of sickness near our own grounds. The attendance was not so large as usual, but those who did go had no difficulty in finding enjoyment throughout the afternoon. The race was 20 singles, rapid firing, and 5 pairs. The following are the scores, both for inanimate targets and live birds:

Class A.

Stewart	28	Tuttle	24	Whyte	24
Carr	27	Corning	24	Brigden	21

Class B.

Brister	22	Smith	21
Doan	21	Garrett	19

Class C.

Goodrich	23	Barnes	19
Peters	23	White	19

Peters won tie with 12 to 9.

Live Birds.

Tuttle	6
Brigden	5
Stewart	6

Tie, Tuttle 3, Stewart 3. Further tie postponed.—C. W. B.

The Knoxville Inter-State.

THE trip from New York to Knoxville, Tenn., is one that presents a magnificent diversity of views. Leaving New York at 5 P. M. on Sunday, A. E. Mead, of Knoxville, E. D. Miller, of Springfield, N. J., and the trap editor of FOREST AND STREAM speeded along through familiar scenes, until Harrisburg was left behind, the trip from that place to Hagerstown being over the Cumberland Valley route. Hagerstown was reached at 12:30 on Sunday night, and here, after securing reduction tickets, the party turned in to try and steal a little rest. At 7:34 on Monday morning the writer found it impossible to sleep or rest in his berth and decided to take a look at the route. At this time we were on the train and tracks of the Norfolk and Western, which runs from Hagerstown to Bristol. The scenery below this point was grand in the extreme, presenting a panoramic view of lofty mountain peaks and fertile valleys through which picturesque water courses wound their way. Old-time plantations, several thousand acres in extent, were seen here and there. Now the train would speed through a deep gorge and then after rounding

SEC'Y R. VAN GILDER.

a sharp curve would bring to view a valley of beauty, a cluster of negro cabins, or perhaps the remnants of some of the "boom towns" which from time to time have burned the fingers of Virginians and Tennesseeans. At Roanoke the trio of travelers were joined by Wm. Wagner and Jos. H. Hunter, of the Capital City Gun Club, of Washington, D. C., who were accorded a hearty welcome. At Bristol, where we abandoned the N. & W. for the E. T., V. & G. R. R., we were joined by C. C. English, A. S. McDowall, of the Bristol Gun Club. Here we enjoyed a solid repast, and, strange as it may seem, I am unable to say whether we ate our dinner in Tennessee or Virginia. Bristol is rather a compound town, being one-half in Virginia and one-half in Tennessee, the dividing line running through the center of the main street directly east and west. I am rather inclined to the belief that our meal was eaten in Tennessee, but have no way of proving it, unless I refer the question to Dr. S. W. Rhea, who is the Tennessee mayor of Tennessee-Bristol. Each half of the town has its own government, and is regulated by the laws of its own State.

From Bristol to Knoxville, 131 miles, the road leads over mountains, through deep gulches and along pleasant streams, confluent to the Tennessee River. This East Tennessee Valley, lying under the shadow of the Alleghany Mountains, is prolific of attractive scenery, and is visited by thousands of tourists. In its streams are found an abundance of gamy fish, while feathered game of all kinds are plentiful enough to give the gunner a good reward for a day's tramp.

It was 7 P. M. on Monday when our tired party stepped from the train at the Knoxville depot, and the first one to greet us was Charley Ross, Charley of the chubby face, the stocky form and the complexion of a strawberry blonde. Nearly all of our party had met Charley in Staunton a few weeks before, and were well pleased to renew the acquaintance. Along with Ross, and fully as enthusiastic in their welcome to the party, were Roger and Sommer VanGilder, J. C. White, T. C. Eldridge, S. B. Dow and F.

TREAS. J. C. WHITE.

S. Mead, all of the Knoxville Gun Club, the latter being a younger brother of our traveling companion, A. E. Mead. After the voyageurs had become acquainted all around, the party went by stage to the new Schubert Hotel, where they were made comfortable and well fed by mine host James O'Connor. Several other shooting men were registered when our party arrived, among them being Dr. S. W. Rhea, mayor of Bristol, Tenn., and president of the Bristol Gun Club; E. S. Wolfe, of Johnston City, Tenn.; J. T. Anthony, of Charlotteville, Va., and Lemuel T. Alston, representative of the Lefever Arms Company, of Syracuse, N. Y. Mr. Alston was formerly connected with an arms company in Atlanta, Georgia, and is thoroughly posted on the mechanism of the various smooth-bores. He is an accomplished talker, and during his connection with the Lefever Company has made many converts to the company's new hammerless ejector.

After supper the party was visited by several other members of the local club, along with whom came Paul North, the ruddy-faced boy from Cleveland, O., who came down to Tennessee to look after the interests of the Cleveland Target Company and the Chamberlain Cartridge Company. The evening was passed in a very pleasant manner, and so rapidly did the time pass that it was long after midnight before any one thought of retiring.

Tuesday morning opened bright and clear and with a look in the air which presaged a warm day, this anticipation being realized very fully. Before going to the shooting grounds, a look about the city convinced the writer that Knoxville was "quite a town," despite the general opinion to the contrary. The population is placed at 45,000, about one-fourth being colored people. The town is the county seat of Knox county and is beautifully situated on the right bank of the Holston River, twenty-two miles above its junction with the Tennessee River. Situated on a commanding bluff in the western section of the city are the handsome cluster of buildings comprising the University of Tennessee, one of the most popular institutions in the South. Between the city proper and the above bluff is a deep gorge through which a railroad is now running. Directly opposite the University on the eastern side of this gorge is the handsome estate of Mr. Mead, father of the Mead brothers previously mentioned. From the mansion to the banks of the Holston River the ground slopes gradually, and from the house a magnificent view of the river and on the opposite side the mountain peaks stretching away far as the eye can reach. To the east is seen the bridge of the E. T., V. & G. R. R., below which the river makes an abrupt turn to the southwest and then west again, its waters washing the banks of the Mead estate. Flat-bottomed boats and several old-fashioned log canoes were being propelled up and down the river when the writer took his hurried view.

Southwest of the University is old Fort Saunders, where nearly thirty years ago was fought a decisive battle. On the outskirts of the city are numerous marble quarries which yield a generous return to their owners. For business the town has a fine reputation, one dry goods firm being said to do a business of over one and a half millions of dollars a year. Nearly all the members of the Knoxville Gun Club are business men who are doing a profitable business. Handsome residences are found everywhere. The hotel accommodations are good, much better, in fact, than I was led to expect from reports of those who had stopped at them.

North of the city proper and about four miles distant is beautiful Lake Ottossee, one of the prettiest sheets of water in the State. Overlooking this lake is a high bluff, on the summit of which, on Tuesday morning, was opened a trap-shooting tournament which the participants pronounce "the best tournament of the year." This was the "eleventh annual" of the Knoxville Gun Club, the organization which made such a great reputation in 1891 when it engineered a tournament of the Inter-State Manufacturers' and Dealers' Association.

The grounds were magnificently situated, affording a clear view for miles in all directions. The club has a small, neatly arranged club house to which was added an extension for the use of the secretary and cashier. To the left of this was the black board and the official scorer's table. Then came two wall tents used as resting places by the shooters. In rear of these tents was a huge marquee, under which caterer Miller provided the boys with an elaborate dinner each day. To the right of the club house were chairs and benches for the use of visitors. When the writer reached the grounds one event had been shot and the second was in progress, the first showing thirty entries and the second twenty-nine, a fine showing for an opening day. The shooting was at bluerock targets, from five expert traps, the North electric pull being used. Traps, targets and pulls all worked in elegant form and very few targets were broken in the traps.

The office work was performed in an able manner by Roger Van Gilder, Frank S. Mead and Mr. Chandler of the Knoxville *Tribune*, which paper by the way was the only one in the city to send a representative to the grounds. Mr. S. B. Dow, a veteran member of the club officiated as referee. The office work ran along as smoothly as could be desired, not a grumble being heard during the week.

There is one point in which the shooting differed, so far as conditions were concerned, from the printed programme, and for making the innovation the members of the Knoxville Gun Club have shown themselves to be straightforward, thoroughgoing sportsmen who are willing to give every man a chance to win if he can. It will be remembered that the conditions provided that

PRES. S. B. DOW.

while "known experts" would be obliged to shoot "all the time" under strict expert rules (unknown traps determined by indicator), the others were all to have the benefit of the now well-known and equitable "North system." The only "known expert" the opening day was E. D. Miller, and at least a dozen of the shooters, including the Washington men, Paul North and a number of the local men protested against what they justly claimed was "a losing handicap" to impose upon any man. Miller himself said he came to Knoxville to shoot and while he would shoot as an expert if compelled to do so he would consider that the money he paid in was "contributed" to the cause, as no man in the ranks could shoot under those rules against the men who would shoot during the three days against him, these latter to have the benefit of the "North system."

The management was not willing to come out flat-footed and alter its printed rules, but it at once referred the question in all its phases to the shooters present, the result being that class one was abolished, Miller, North, Hunter, Wagner and R. Van Gilder were obliged to shoot all events from known traps and unknown angles and the others were given the benefit of the "up and down" system of Paul North. This was one of the most sensible decisions ever given by a body of shooters in this country and they should be given great credit for their willingness to give a brother sportsman an opportunity to at least have a fighting chance along with them. The Knoxville Gun Club, by advocating this course, has made itself solid with the shooting men of the country, and will reap its reward at future tournaments. The expert rule is something to which I have always been teetotally opposed, as it has driven many a good man from the arena, and unless it is abolished many more will follow. Some of the managers of Eastern tournaments insist that without the expert handicap tournaments will be failures, and yet they fail to show by the number of entries that the handicap is a benefit. In the West at artificial target shoots "all men are equal," the result being that instead of from fifteen to thirty or forty entries as in the East, the wild, weird, wooly and whistling West puts the East to shame by showing all the way from forty to a hundred or more entries. I claim that if all events in the East were made at fifteen or twenty targets and the North system adopted the entry lists would in a short time be equal to those in the Western affairs. At any rate the experiment is well worth trying.

The programme of the Knoxville tournament was without exception the best arranged of any issued since the beginning of the present tournament season. The club added $500 in cold cash to the various events, this of itself being a decided and strong attraction. Besides this, its members went out through the lanes and along the byways and collected merchandise valued at several hundreds of dollars, these being given as special premiums. Each day there were five premiums for averages, and there were also eight premiums in No. 4 event each day, besides the money divisions. As a still stronger incentive there were ten premiums for the highest aggregates made by those shooting in all three of the No. 4 events, and four premiums under the same conditions in No. 6 event. The result was that a big lot of "stayers" were developed, and from start to finish the events were well filled.

When the last event had been shot and the averages were footed up, the sensible part of the abolishment of Class 1 was shown when first average was won by J. H. Hunter on 94 7-10 per cent., Wm. Wagner being second with 91 1-10 per cent., while E. D. Miller, the man who was so greatly feared, came in third on 90 1-10 per cent., along with L. J. Alston on the same figures. Fourth man was James Jordan, 89 4-10 per cent., and Paul North was fifth on 88 8-10. The premiums were as follows: First, ½ dozen Monarch shirts; second, 6¼lb. keg of wood powder; third, silver shaving set; fourth, 6¼lb. can black powder; fifth, bag of shot.

In No. 4 event the following premiums were offered: First, a year's subscription *American Field*; second, 6¼lb. keg wood powder; third, rocking chair; fourth, 100 loaded wood powder shells; fifth, bag shot; sixth, 100 fine cigars; seventh, 100 loaded quick shot shells; eighth, 100 loaded wood powder shells.

There were ties for all except Nos. 1 and 3. According to the conditions, all ties for merchandise were to be shot down to one man in the subsequent events. This was done, and the prizes were finally won as follows: First, S. W. Rhea; second, E. D. Miller; third, R. Van Gilder; fourth, L. J. Alston; fifth, C. C. English; sixth, H. Smith; seventh, H. L. Lee; eighth, Chas. B. Ross.

After the regular programme was run out a couple of extras were shot, after which the sport was closed for the day. The number of targets thrown was a trifle over 6,000.

Below are the detailed scores of the day's work:

No. 1, 15 singles, entry $2. No. 2, 15 singles, entry $2, $20 purse. No. 3, 15 singles, entry $2, $20 added:
